NOTE

Section 119 of The Loan and Trust Corporations Act (R.S.O. 1927, Chapter 223) provides as follows:—

119.—(1) No corporation shall, under the penalty of becoming disentitled to registry or of having its registry suspended or cancelled, make, print, publish, circulate, authorize, or be a party or privy to the making, printing, publishing, or circulating of any statement or representation that its solvency or financial standing is vouched for by the Registrar or that the publication of its statement in his report is a warranty or representation of the solvency of the corporation, or of the truth or accuracy of such statement in any particular.

DEPARTMENT OF INSURANCE

TO THE HONOURABLE ARTHUR W. ROEBUCK, K.C., M.P.P.,

Minister in Charge of the Department of Insurance.

Sir:—

I have the honour to submit herewith, as required by The Loan and Trust Corporations Act, the Thirty-eighth Annual Report of the Registrar of Loan Corporations. It shows the particulars of the business of each registered loan corporation, loaning land corporation, and trust company doing business in Ontario during 1934, as ascertained from its annual and other returns and from the inspection and enquiries made by the Chief Inspector and his staff. Detailed statements of the individual corporations are grouped herein in accordance with these three classifications recognized by the Act and are further arranged in alphabetical order. In addition, statistical tables, tabulated summaries and comparative statements are included as shown in the Table of Contents.

The annual returns of the corporations covering their 1934 business were filed with the Department at the end of February, 1935. Upon filing, each return was carefully checked and a preliminary Abstract of this Report showing assets, liabilities, revenue accounts, profit and loss accounts and mortgage summaries was prepared and issued under date of April 15th, 1935. The remaining months of the year were required to complete the annual inspection of the corporations, more particularly described later in this Report, and to determine exactly what changes and what miscellaneous notes, if any, should be made in the individual statements of the corporations as a result of such inspections. The publication of the Report at an earlier date is not feasible without a substantially augmented inspection staff.

Discrepancies may be observed between the figures shown in the statistical tables, etc., included on pages 250 to 293 and the figures shown in the statements of the individual corporations on pages 3 to 245. The latter figures includes the changes the Registrar deems necessary to be made upon a review of the Inspector's inspection reports — changes which have not been carried, by reason of the time and expense involved, into the former figures which are reprinted without change as they appeared in the preliminary Abstract of this Report published last April.

In the Report of the Registrar for last year, your attention was drawn to a Summary of unclaimed deposit account balances of \$10.00 or more included therein at page 326. The Summary does not appear in this Report for the reason that little or no change has occurred. In the course of a few years the Summary will be revised and reprinted.

REGISTRY CHANGES

I have the following registry changes to report:

By Order-in-Council dated May 1st, 1935, the Lieutenant-Governor-in-Council formally approved an increase in the amount which may be borrowed by the Canada Permanent Mortgage Corporation on debentures and other securities and by way of deposits to a sum not exceeding five times the aggregate amount from time to time of the permanent capital, reserve fund and cash of the said corporation. The increased borrowing powers were approved and effective since the 31st day of December, 1934.

REVIEW OF 1934 BUSINESS

Introduction:

The Statistical Tables included at pages 250 to 293 have been used for comparative purposes in preparing the following review of 1934 operations.

Loan Corporations:

Total assets of loan corporations amount to \$219,800,000. They show a decrease during the year 1934 of \$3,000,000 as compared with a decrease of \$5,400,000 in the previous year. The greater part of this decrease is reflected in the liabilities as transfers from Reserve Funds of \$2,840,000 to Investment Reserves, due largely to the conservative policy followed by many of the corporations of transferring large amounts to internal investment reserves to be held as provision for possible losses in realization of depreciated assets.

Total Debentures outstanding amount to \$113,600,000 of which \$83,500,000 is payable in Canada and \$30,100,000 elsewhere. They show an increase of \$1,700,000 while Trust Deposits amounting to \$31,400,000 show an increase of \$800,000 over the year 1933, which reflects public confidence.

During the year 1934 there was no change in the number of loan corporations registered and operating in the province of Ontario as compared with the previous year.

Trust Companies:

Contrary to the downward trend shown in trust companies' total Assets (exclusive of those held for Estates, Trusts and Agencies) in previous years the trend in 1934 was upward. Total Assets held for Company Funds amounting to \$55,700,000 showed a decrease of \$500,000 while total Guaranteed Fund Assets amounting to \$132,500,000 increased by \$2,100,000 as compared with 1933, or a net increase of \$1,600,000.

The total of paid-in capital of trust companies amounts to \$26,200,000. This shows a decrease of \$700,000 which is accounted for through the amalgamation of trust companies and the reduction of \$175,000 by one company.

Trust Deposits amount to \$45,000,000. They show an increase of \$300,000 over 1933 while specified and general guaranteed investment receipts amounting to \$87,000,000 increased by \$1,800,000, all of which would indicate an improvement in conditions and continued public confidence in these corporations.

Estates, Trusts and Agencies:

The total assets under administration in this section have continued their upward trend, having increased \$95,000,000 over 1933 to \$2,195,000,000. The increases from year to year indicate public recognition of the advantages obtained through administration of estates, etc., by trust companies as compared with private executors and administrators. During the past fifteen years, assets in this section have risen from \$575,000,000 in 1920 to \$2,195,000,000 in 1934.

Mortgage Loans:

Mortgages held by loan corporations in Ontario and elsewhere amount to \$159,000,000 while those held by trust companies amount to \$85,555,000. In 1934, mortgage loans held by loan corporations dropped \$5,000,000 as to principal and increased \$217,800 as to interest due and accrued. The holdings of trust companies decreased \$2,000,000 in Company Funds and \$830,000 in Guaranteed Funds as to principal, and interest due and accrued decreased \$315,000 in Company Funds and increased \$548,000 in Guaranteed Funds.

Fluctuation shown in mortgage investments during recent years is attributable mostly to moratorium legislation and unfavourable economic conditions. In normal times, repayments of principal operated to reduce totals reported which, however, were more than offset by new loans. These circumstances together with the uncertainty of real estate values and high taxes have had the effect of hampering the carrying out of contracts between mortgagor and mortgagee. All factors have combined to create a rather general feeling of uncertainty. Accumulation of charges such as taxes, insurance, etc., paid by companies in protection of their investments and increasing amounts of interest arrears have had a substantial effect towards increase, while voluntary writing down of book values and transfers of foreclosed properties have contributed much to the decrease.

On account of these adverse conditions, funds for investment have been diverted to more liquid channels to enable companies to hold a larger proportion of their investments in a readily realizable form. The diversion of funds to this class of investment enables the companies to take care of increased withdrawals from savings deposits and the liquidation of debentures and guaranteed investment receipts.

Examining the total of mortgage investments of both loan and trust corporations, loans secured by eastern properties decreased from \$165,200,000 to \$160,300,000, a drop of \$4,900,000, or 2.36 per cent., while western loans showed a decrease of \$3,100,000, or 3.69 per cent. in falling from \$87,500,000 to \$84,400,000. The greater rate of decrease to be observed in eastern loans is in direct contrast to the experience of the years 1930 and 1931 when, while western loans showed a substantial decrease, eastern loans increased at approximately the same rate as shown in previous years.

The condition of mortgages generally is indicated in the accumulation of interest arrears. Interest reported as due and unpaid on eastern loans increased from \$2,839,000 to \$3,030,500, while the amount outstanding against western loans increased from \$8,550,000 to \$8,800,000. Outstanding interest on eastern loans stands at 1.89 per cent. and western loans at 10.13 per cent. of principal. At the end of 1932 interest arrears stood at 1.18 per cent. of eastern mortgages and 8.06 per cent. of western mortgages respectively. Arrears of eastern mortgage interest have increased two and one-half times since 1929, while western arrears have more than quadrupled. It may be noted, however, that western arrears have for a good many years been proportionately greater than eastern. This has been due largely to the fact that legislation respective of mortgages rights commenced a good many years ago in Western Canada and in addition, low prices and drought have more recently affected interest collections.

You will be interested in the following figures compiled by the Department from answers to questionnaires sent in January, 1934, and again in February, 1935, to all loan and trust corporations and all life insurance companies transacting business in the Province. They show, as to principal and interest respectively, and in respect of Ontario mortgages only, the amounts which fell due on these mortgages in the calendar years 1933 and 1934 respectively, in contrast with the amounts which were actually paid in

cash thereon during the same years. Payments received in 1933 and 1934 on account of arrears of principal or interest outstanding as of December 31st, 1932 and 1933 respectively, were directed to be excluded.

	Life Companies	Loan Corporations	Trust Companies	Total
Principal:				
Total amount of principal outstanding December 31, 1934.....	\$141,746 780 08	\$73,157,066 31	\$97,541,113 61	\$312,444,960 00
Total amount of principal due as of December 31, 1933.....	18,337,268 76	6,199,386 30	13,117,116 66	37,653,771 72

Interest paid in 1934.....	7,819,063 96	3,894,290 87	6,259,876 82	17,973,231 65
Percentage of interest:				
Paid in 1933.....	86.10	75.19	83.77	86.78
Paid in 1934.....	83.39	78.67	84.41	82.66

These figures show better than can any words just what our mortgage lending institutions have experienced during the past few years and assist to explain the veritable stagnation that exists in the mortgage market in many districts today. The decision of the Government to renew the Mortgagees' and Purchasers' Relief Act for another year without change in the face of some demand for a more radical measure, indicates that the situation is fully appreciated by the Administration and affords ground for hope that a step forward towards normal conditions may be taken in the not too distant future.

The above figures include in some cases, amounts and experience of trust companies on mortgages of estates, trusts and agencies in addition to those owned by such companies.

Office Premises:

Due to customary write-downs, Office Premises of loan corporations amounting to \$7,500,000 declined \$200,000. Those of trust companies amounting to \$5,760,000 increased \$8,000. Total investment in permanent housings for the operation of loan corporations and trust companies amounts to \$13,300,000, which represents a substantial investment.

Real Estate Held for Sale:

Real estate holdings of loan corporations amounting to \$6,700,000 increased by \$1,100,000 in 1934 while trust companies holdings amounting to \$6,700,000 showed an increase of \$1,000,000 a total of \$2,100,000. This amount is \$1,700,000 less than the

increase shown in the previous year. Excepting loaning land corporations, real estate is not permitted as a direct investment of loan corporations or trust companies, and the amounts held under that heading represent largely foreclosed properties and sale agreements, including accumulated charges and interest. Companies have endeavoured to avoid foreclosure proceedings wherever possible and it is apparent that properties have been seized only after interest has fallen considerably in arrears and other methods of saving investments have failed. Loan corporations (including loaning land corporations) holdings now represent 3.04 per cent. of total assets as against 2.52 per cent. a year ago while trust companies holdings represent 12.01 per cent. of total Company Funds assets compared with 10.1 per cent. at the end of 1933.

Collateral Loans:

Collateral Loans have dropped from \$440,000 to \$428,000 in the case of loan corporations, while trust companies show increases from \$2,100,000 to \$3,400,000 in Company Funds and from \$19,700,000 to \$19,800,000 in Guaranteed Funds. Total collateral loans held by both classes of corporations amount to \$23,600,000 and attained a peak of \$47,700,000 in 1928, but declined rapidly in the following years to the low point of \$22,300,000 reached in 1933. These figures reflect an upward trend in 1934.

The fluctuations in the aggregate amount of Collateral Loans as reported from year to year has been chiefly affected by the increases and decreases reported by The Montreal Trust Company. Reference to the statistical tables in this Report will show that this company carries substantially more than half of all collateral loans reported to the Department.

Bonds and Debentures:

The movement of the funds of financial institutions generally in recent years from mortgages to bonds and debentures reflected in the returns of our loan and trust corporations, is seen in a large increase for the year. Considering only "trustee" securities, that is, issues of Canadian governments and municipalities, including school districts and rural telephone companies, the holdings of loan corporations moved up \$5,000,000 to \$20,000,000 trust companies Company Funds moved down \$600,000 to \$8,800,000 and Guaranteed Funds moved up \$600,000 to \$26,600,000. The desire for a fair return with a maximum of security, has no doubt, led companies to invest heavily in this class of security and liquidity in recent years. While numerous defaults in municipal debentures have reduced their value and curtailed the income of holders of defaulted issues, the utmost care has been exercised by most companies in choosing investments of this class. The continuing demand for high-class bonds and debentures, however, has increased their market values and reduced their yield on new purchases to such an extent that it became necessary for all companies to reduce the rate of interest allowed to depositors and investors.

"Other bonds" held by loan corporations decreased \$2,900,000 to \$3,600,000 but an increase of the amount is shown in these securities held in Company Funds of trust companies, which now total \$6,300,000. Such holdings in Guaranteed Funds of trust companies showed an increase of \$200,000. The very marked appreciation in values of industrial securities in 1934 was a benefit to many of the corporations. The large decrease in loan corporations' holdings is due to liquidation of other bonds by The Credit Foncier Franco-Canadien Corporation.

Stocks:

Stocks held by loan corporations amount to \$10,142,000, an increase of \$42,000 over 1933, and those held by trust companies dropped \$100,000 to \$4,200,000.

Cash:

Cash on hand and on deposit in the case of loan corporations increased \$850,000 to \$7,400,000. In trust companies, Company Funds cash increased \$100,000 to \$1,400,000 and Guaranteed Funds cash increased \$1,500,000 to \$7,700,000. These increases would indicate lack of investment facilities with suitable remunerative returns and a determination to maintain large cash reserves against demand obligations.

Other Assets:

Other Assets of loan corporations amounting to \$1,100,000 decreased \$100,000 and company funds of trust companies amounting to \$4,400,000 decreased \$600,000 during the year, while those held in Guaranteed Funds of trust companies rose from \$2,200,000 to \$3,000,000.

Earnings:

Net profits before providing for transfers to investment reserves improved considerably during the year 1934. Loan corporations' earnings fell \$100,000 while those of trust companies increased \$1,300,000 as compared with declines of \$600,000 and \$400,000 respectively, in 1933. The net showing for the year is creditable in view of prevailing conditions. Loan corporations showed a net return of \$3,750,000 and trust companies \$3,450,000. The factor chiefly responsible for the improvement in the net earning position of trust companies has been the increase in their business of handling estates and trusts which has enabled them to counteract the losses on their guaranteed investment accounts.

Investment reserves (chargeable against expenditure but eliminated in the above figures for purposes of comparison) were increased to a greater extent in 1934 than in any previous year. Loan corporations transferred a total of \$3,900,000 to investment reserves against \$3,500,000 in the previous year, while trust companies set up an additional \$2,190,000 as compared with \$1,500,000 in 1933. The policy of writing down assets as market values decline was commenced in the earliest days of the depression and has been followed since in increasing volume. No doubt, transfers of this nature will continue so long as the necessity for additional investment reserves is apparent.

Largely through a desire to build up internal investment reserves out of which to absorb losses, most companies have drawn down large sums from their reserve funds. Reserve funds of loan corporations dropped \$2,800,000 to \$19,800,000 and trust companies fell \$1,100,000 to \$15,200,000. Notwithstanding these substantial withdrawals to strengthen internal investment reserve, Reserve Funds still amount to 57 per cent. of paid in capital in the case of loan corporations, and 58 per cent. of paid in capital in the case of trust companies. These Reserves stand as substantial shock-absorbers to preserve the companies' credit and safeguard the shareholders' equity.

Dividends:

Dividends declared by loan corporations in 1934 amounted to \$2,500,000 or 4.40 per cent. of the shareholders' equity as compared with \$3,000,000 or 5. per cent. in 1933, while net earnings on the same basis increased from 6.30 per cent. to 6.69 per cent. Trust companies declared dividends of \$1,600,000 or 3.69 per cent. as compared with \$1,700,000 or 3.85 per cent. in the previous year. Net earnings by the same token increased 3.26 per cent. to 7.91 per cent. For the purpose of these calculations it has been necessary to eliminate transfers to investment reserves aggregating \$6,090,000—a figure which indicates the misleading character of the "net earnings" percentage figures of 6.69 per cent. and 7.91 per cent. respectively.

New Legislation:

The text of Chapter 36, Statutes of 1935, amending The Loan and Trust Corporations Act and effective April 18th, 1935, is printed (omitted text of sections as revised and sidenotes) at the back of this Report, together with the explanatory notes printed in the first reading edition of the Bill.

Inspection:

Last year the Report of the Registrar dealt in considerable detail with the inspection of companies and the impossibility of discharging fully the statutory requirements as to inspection of Loan, Trust and Insurance corporations without a substantially augmented staff of inspectors. Rearrangement of inspection assignments has permitted a larger number of necessary inspections and closer supervision of certain classes of insurers to be made, but it was found impossible to make any substantial improvement in the Loan and Trust field. By detailed examination of all statements filed with the Department and by correspondence and interviews with company officers, however, every effort is made to ascertain the true and correct financial condition of such corporations and record the same in the Annual Report. Lack of staff, nevertheless, prevents the making of many necessary inspections and the conduct of complete and fully satisfactory supervision. Accordingly, I have to report as was reported last year, that owing to lack of inspection staff, it has been impossible to discharge the requirements of The Loan and Trust Corporations Act in regard to inspections.

Resignation of R. Leighton Foster, K.C.:

R. Leighton Foster, K.C., Superintendent of Insurance and Registrar of Loan Corporations for nearly twelve years, resigned his office on October 31st, 1935, to become General Counsel of the Canadian Life Officers Association and to engage in private practice, specializing in insurance, loan and trust company law.

During his term of office, great advances were made in methods of administration of The Loan and Trust Corporations Act and the supervision and inspection of corporations developed to a high degree of efficiency. His capable management of the Department during five years of most severe financial depression reflects unusual credit upon his ability and has enabled the Department to maintain a record during this period of not a single failure or default in obligation of any loan or trust company carrying on business in Ontario.

Conclusion:

The problems facing loan and trust corporations with mortgage investments of millions of dollars throughout Canada have been great and cannot quickly or easily be solved. It is worthy of particular note, however, that these institutions have already come through several very trying years and have met every demand made upon them. The confidence of the public in them is indeed well merited.

All of which is respectfully submitted.

HARTLEY D. McNAIRN,
Registrar of Loan Corporations.

Toronto, December 31st, 1935.

Principal.....	29,117	08
Interest.....	26,588	51

CANADA PERMANENT MORTGAGE CORPORATION—Continued

CONSTATING INSTRUMENTS

This corporation was incorporated under Special Act of the Dominion of Canada, 62-63 Victoria (1899), c. 101, under the name of "The Canada Permanent and Western Canada Mortgage Corporation," for the purpose of acquiring the assets and business of the Canada Permanent Loan and Savings Company, the Western Canada Loan and Savings Company, the Freehold Loan and Savings Company, and The London and Ontario Investment Company, Limited, which several purchases were confirmed by Special Act of Ontario, 63 Victoria, 1900, c. 129. The name was changed to the "Canada Permanent Mortgage Corporation" by 3 Edward VII (1903), c. 94 (D), which Act also amended its lending powers. By 3-4 George V (1913), c. 86 (D), further amendments were made to the Incorporating Act.

Of the constituent companies, the Canada Permanent Loan and Savings Company was incorporated by declaration filed under The Building Societies Act (Cons. Stat. U.C., c. 53) in 1855, under the name of the Canada Permanent Building and Savings Society, which name was changed to the Canada Permanent Loan and Savings Company by 37 Victoria (Ontario), 1874, c. 100.

The Western Canada Loan and Savings Company was also incorporated by declaration filed under The Building Societies Act in 1863, under the name of the Western Canada Permanent Building and Savings Society, and its name was changed to the Western Canada Loan and Savings Company by 37 Victoria (Ontario), 1874, c. 79.

The Freehold Loan and Savings Company was also incorporated by declaration filed under The Building Societies Act in 1859 under the name of The Freehold Permanent Building and Savings Society; the name being changed to The Freehold Loan and Savings Company by 36 Victoria (Ontario), (1873), c. 104.

The London and Ontario Investment Company was incorporated by the Act of Ontario, 39 Victoria, 1876, c. 62.

In 1918 the corporation purchased the assets and business of The Oxford Permanent Loan and Savings Society, which purchase was ratified by Order-in-Council of Ontario, dated July 31st, 1918, pursuant to The Loan and Trust Corporations Act.

In 1921, the corporation also purchased the assets and business of The London and Canadian Loan and Agency Company, Limited, which purchase was ratified by Order-in-Council of Ontario, dated September 23rd, 1921, pursuant to The Loan and Trust Corporations Act.

In 1927, the corporation purchased the assets and business of The Royal Loan and Savings Company, which purchase was ratified by Order-in-Council of Ontario, dated March 4th, 1927, pursuant to The Loan and Trust Corporations Act.

In 1927 the corporation purchased the assets and business of The British Columbia Permanent Loan Company, Vancouver, B.C.

In 1927 the corporation also purchased the assets and business of The Canada Landed and National Investment Company, Limited, which purchase was ratified by Order-in-Council of Ontario, dated December 30th, 1927, pursuant to The Loan and Trust Corporations Act.

Borrowers' Interest on Mortgage foreclosed transferred to Real Estate held for Sale—303 Oriole Parkway—\$381.61.

CONSTATING INSTRUMENTS

1884—Letters Patent (under the Ontario Government Joint Stock Companies' Letters Patent Act) incorporating The Central Canada Loan and Savings Company of Ontario, with a capital of \$2,000,000, in 20,000 shares of \$100 each, dated 7th March, 1884.

1890—Act (of the Legislature of the Province of Ontario), 53 Vic., c. 129; declares capital to be \$5,000,000, in 50,000 shares of \$100 each; confirms the purchase of the assets of the Peterborough Real Estate Investment Company, Limited; authorizes the issue of debenture stock; authorizes agencies in the United Kingdom; defines the limit of borrowing powers.

1893—Supplementary Letters Patent (of the Province of Ontario), dated 8th June, 1893, extending the Company's purchasing and lending powers with regard to bonds, stocks and debentures to the Province of Manitoba.

1896—Act (of the Legislature of the Province of Manitoba), 59 Vic., c. 33, authorizes Company to exercise in the Province of Manitoba, with respect to real and personal property, all the rights, powers and privileges that it possesses in Ontario.

1897—Supplementary Letters Patent (of Ontario), dated 6th May, 1897, amending the original Letters Patent by expunging therefrom powers of Company to buy and sell land.

1898—Act (of the Parliament of the Dominion of Canada), 61 Vic., c. 97.

1899—Act (of the Legislature of the Province of Manitoba) authorizing Dominion Company to exercise in Manitoba all its rights, powers and privileges; defining the powers of the Company and vesting all the assets of the old company in the new company.

1900—Act (of the Legislature of the Province of Ontario), confirming and validating the conveyance and assignment of 1st December, 1898 (see form of the conveyance and assignment in schedule to 61 Vic., c. 97), and transferring and vesting the assets of the Provincial Company in the Dominion Company.

---	-------------

CONSTATING INSTRUMENTS

Incorporated under The Building Societies Act, 9 Vict., c. 90 (Province of Canada), by declaration filed on 27th March, 1847, with the Clerk of the Peace for the Western District. The original corporate name was "The Port Sarnia Building Society." The society was reorganized as "The Lambton Permanent Building and Investment Society" under the said Act and other Acts, all of which became consolidated as Chapter 53 of the Consolidated Statutes of Upper Canada, by declaration filed 19th June, 1855, with the Clerk of the Peace for the County of Lambton. This latter corporate name was changed by Order-in-Council, 4th June, 1880, to The Lambton Loan and Investment Company.

The lending and the borrowing powers are governed by The Loan and Trust Corporations Act, R.S.O. 1927, c. 223.

CONSTATING INSTRUMENTS

Incorporated under The Building Societies Act, Consol. Stat. U.C., Chap 53, by declaration filed with the Clerk of the Peace for the United Counties of Northumberland and Durham, 5th July, 1872. (Decl. Book II, 127).

The corporate name was, by Order-in-Council of Ontario, 21st June, 1876 (Ibid.), changed to the Midland Loan and Savings Company.

A by-law altering the amount of the capital stock and par value of the share was, pursuant to The Loan Corporations Act, approved by Order-in-Council of Ontario, 3rd October, 1900.

The borrowing and lending powers are governed by The Loan and Trust Corporations Act, R.S.O. 1927, Chap. 223.

CONSTATING INSTRUMENTS

Incorporated under The Building Societies Act, Consolidated Statutes of Upper Canada, c. 53, by declaration filed in the office of the Clerk of the Peace for the County of Middlesex, 26th September, 1870. The original corporate name was The Ontario Savings and Investment Society.

By Order-in-Council of Ontario, dated 4th October, 1879, and also by Order-in-Council of Canada, dated 29th October, 1879, the corporate name was changed to The Ontario Loan and Debenture Company.

The Company as now constituted was formed under the provisions of The Loan Corporations Act of Ontario by The Ontario Loan and Debenture Company, taking in by amalgamation

THE ONTARIO LOAN AND DEBENTURE COMPANY—Continued

the Agricultural Savings and Loan Company under Order-in-Council dated 10th November, 1911, and operates under The Loan and Trust Corporations Act, R.S.O. 1927, chapter 223.

By Order-in-Council of Ontario, dated 12th March, 1930, 20,000 shares twenty per cent. called and paid were converted into 4,000 shares fully paid, the authorized capital thereby being reduced from 100,000 to 84,000 shares.

CONSTATING INSTRUMENTS

Incorporated under The Building Societies Act (R.S.O. 1877, c. 164), by declaration filed with the Clerk of the Peace for the County of York, 17th September, 1879, with the corporate name of the Real Estate Loan and Debenture Company. Decl. Book II, p. 57.

Letters patent of Canada (6th April, 1883) incorporating the Company under The Canada Joint Stock Companies Act, 1877, with the corporate name of The Real Estate Loan Company of Canada, Limited,—Lib. 85, folio 282. Office of the Registrar-General of Canada. The capital authorized by this instrument was \$2,000,000, being the capital of the said The Real Estate Loan and Debenture Company, with the same powers throughout Canada as now possessed by the said The Real Estate Loan and Debenture Company, and for the same purposes and objects, subject always to the provisions of the said last mentioned Act (Canada J. S. Co's. Act, 1877), and with all such further powers, purposes and objects as are conferred upon Loan Companies incorporated under the provisions of the said last mentioned Act.

1884. Act of the Dominion of Canada, 47 V. c. 101 (D), respecting sales of assets.

Supplementary Letters Patent of Canada, 20th June, 1892, reciting By-law No. 62 of the Company, and (as therein provided), reducing the capital stock from \$2,000,000 to \$1,600,000.

1913. Act of the Dominion of Canada, 3-4 George V, c. 184, increasing capital stock to \$2,000,000 in shares of \$100 each par value.

CONSTATING INSTRUMENTS

Incorporated under The Building Societies Act (Consol. Stat. U.C., c. 53), by declaration, dated 12th March, 1870, and filed with the Clerk of the Peace for the County of Lincoln on the 21st March, 1870. The original corporate name was The Security Permanent Building and Savings Society of St. Catharines.

The corporate name was changed to The Security Loan and Savings Company, St. Catharines, in 1876 by 39 Vic., c. 64 (D); and also by Order-in-Council of Ontario, dated 18th August, 1876.

The authorized Capital Stock was increased from \$300,000 to \$500,000 on the 29th June, 1911. This increase was approved of by Order-in-Council of Ontario, dated 12th July, 1911.

The authorized Capital Stock was further increased from \$500,000 to \$1,000,000 on the 9th March, 1916. This increase was approved of by Order-in-Council of Ontario, dated 14th March, 1916.

The lending and the borrowing powers of the Company are governed by The Loan and Trust Corporations Act, R.S.O. 1927, Chap. 233.

(e) Net revenue from real estate (less disbursements).....		40,969	31
	\$	280,536	08

CONSTATING INSTRUMENTS

Incorporated as "The Toronto Real Estate Investment Company" by Letters Patent of Ontario (June 15th, 1885), issued under The Ontario Joint Stock Companies' Letters Patent Act, R.S.O. 1877, c. 150. Supplementary Letters Patent of Ontario (December 29th, 1887), were issued under R.S.O. 1887, c. 157, defining the borrowing powers, etc. Further Supplementary Letters Patent of Ontario (September 25th, 1889) were issued under the last mentioned Act, increasing the capital stock from \$400,000 to \$2,000,000. Further Supplementary Letters Patent of Ontario (March 30th, 1891) were issued under the same Act, conferring agency powers on the Company. The corporate name was by Order-in-Council (April 2nd, 1891) changed to "The Toronto Savings and Loan Company."

For the lending and borrowing powers, see the Letters Patent and the Acts, R.S.O. 1877, chap. 150; R.S.O. 1887, c. 157; R.S.O. 1914, chap. 184; R.S.O. 1927, chap. 223.

CONSTATING INSTRUMENTS

The British Mortgage Loan Company of Ontario was incorporated by Letters Patent of Ontario, dated October 5th, 1877 (Lib. 5, No. 52), issued under R.S.O. 1877, c. 150, which Act was continued by R.S.O. 1887, c. 157, and was as to Loan Corporations superseded by 60 Vic., c. 38 (O), now R.S.O. 1927, c. 223.

By 16 George V, c. 121, the Company was given trust company powers and its name changed to The British Mortgage and Trust Corporation of Ontario.

The lending and the borrowing powers of the Company are derived from its Letters Patent and the above public general statute.

CONSTATING INSTRUMENTS

Incorporated by declaration filed May 11th, 1885, with the Clerk of the Peace for the United Counties of Leeds and Grenville. The declaration was made by virtue of "The Building Societies Act," R.S.O. 1877, c. 164, continued by R.S.O. 1887, c. 169, and superseded by 60 Vic., c. 38 (O), now R.S.O. 1897, c. 205. See R.S.O. 1927, c. 223.

The lending and borrowing powers are derived from the above public General Acts.

By a Special Act of the Legislature of Ontario, 18 Geo. V, c. 130, the Company was granted the powers of a trust company and its authorized capital stock was increased from \$500,000 to \$1,000,000. Its name was changed to The Brockville Trust and Savings Company.

CONSTATING INSTRUMENTS

The Canada Permanent Trust Company was incorporated in 1913 by a Special Act of the Parliament of the Dominion of Canada, 3-4 Geo. V, c. 87.

Authorized by Order-in-Council (May 7th, 1913), to carry on business in the Province of Ontario as a Trust Company, pursuant to the provisions of The Loan and Trust Corporations Act, R.S.O. 1927, c. 223.

In 1927 the Company purchased the assets and business of The Brantford Trust Company, which purchase was ratified by Order-in-Council of Ontario, dated 31st day of August, 1927, pursuant to The Loan and Trust Corporations Act.

MISCELLANEOUS

1. Officers of the Corporation who are under bond for the following amounts respectively:
Estate Officer \$10,000; General Manager, \$10,000; Secretary, \$10,000.
2. Date appointed for the Annual Meeting—February 21, 1935.
Date of last Annual Meeting—February 22, 1934.
3. In the case of any Company whose Stocks, Bonds or Debentures are held by the Corporation either directly or indirectly, if such Company is otherwise indebted to the Corporation upon loans either secured by mortgages or other security, or unsecured, the aggregate amount of such loans is.....\$ 11,940 00
The aggregate amount of instalments of principal in arrears..... 2,675 00
The amount of interest due and unpaid, whether capitalized or not..... 51 40
The amount of interest on such loans taken credit for in the Revenue Account for the year..... 791 04
4. Amount of contingent liability not shown as direct debts in the foregoing statement.—The Company has a contingent Liability under its Guarantee of Titles to Land given when the Company was issuing Guarantee of Titles. This business was discontinued 19 years ago and no claim has been made during that time, and the outstanding Guarantees of Titles are constantly diminishing in number through expiration. The Liability at the worst is only nominal.
5. Amount of actual cash receipts during the year (excluding Trust Account receipts) for:

	<i>Company</i>	<i>Guaranteed</i>
(a) Interest on mortgages and agreements for sale.....	\$ 7,508 37	\$53,895 07

	\$ 363,711 48	\$156,140 96
6. Amount of interest permanently capitalized during the year..... 536 03
7. Amount belonging to Estates, Trusts and Agency Funds held on deposit in Guaranteed Funds Department, \$463,135.77.

CHARTERED TRUST AND EXECUTOR COMPANY—Continued

CONSTATING INSTRUMENTS

The Title and Trust Company was incorporated in 1905 by Special Act of the Parliament of Canada, 4-5 Edward VII, chap. 162 (Royal Assent, July 20th, 1905). By Section 19 of this Act the Company was required to make an initial deposit with the Receiver-General of Canada to carry on the business of Title Insurance, the said deposit to be increased to \$75,000.00 within two years from the date of the issue of such license, and to be further increased as the Treasury Board may from time to time require.

In 1907, by Special Act of the Province of Ontario, 7 Edward VII, chap. 118, the Company was, upon the conditions therein specified, made admissible to registry under The Loan Corporations Act, and initial registry was granted on the 30th August, 1907.

April 18th, 1914—Amendment to charter changing name to Chartered Trust and Executor Company.

May 16th, 1919—Absorbed Guardian Trust Company.

May 1st, 1929—Special Act increasing capital from \$1,000,000 to \$2,500,000.

November 12th, 1930—Absorbed Quebec Savings and Trust Company.

CONSTATING INSTRUMENTS

The Grey and Bruce Trust and Savings Company, cited 16 Geo. V (1926), c. 123. This Act confirms the amalgamation of The Grey and Bruce Loan Company and The Owen Sound Loan and Savings Company, and constitutes the amalgamated corporation a new corporation under the name of The Grey and Bruce Trust and Savings Company, with Head Office in the City of Owen Sound, and empowers the new corporation to carry on the business of a trust company under The Loan and Trust Corporations Act.

The Grey and Bruce Loan Company was incorporated under The Buildings Societies Act, R.S.O. 1887, c. 169, as a permanent building society under the name of The Owen Sound, Grey, and Bruce Loan and Savings Company, by declaration filed with the Clerk of the Peace for the County of Grey, May 10th, 1889. The corporate name was by Order-in-Council of Ontario September 15th, 1897, changed to The Grey and Bruce Loan Company.

The Owen Sound Loan and Savings Company was incorporated under The Building Societies Act, R.S.O. 1887, c. 169, by declaration filed with the Clerk of the Peace for the County of Grey on the 1st April, 1889.

CONSTATING INSTRUMENTS

Incorporated under The Building Societies Act, R.S.O. 1887, c. 169, by declaration filed with the Clerk of the Peace for the County of Lambton, 20th August, 1889.

By Order-in-Council approved March 6th, 1907, pursuant to the provisions of Section 4 (6), cap. 27, 63 Victoria, the authorized capital stock of the Company was increased from \$500,000.00 to \$1,000,000.00.

By 18 George V, Chapter 112, the Company was given Trust Company powers and its name changed to The Industrial Mortgage and Trust Company.

By 24 George V, Chapter 79, the Company assumed the liabilities and purchased under agreement the business, assets, etc., of The East Lambton Farmers' Loan and Savings Company.

The lending and borrowing powers are governed by The Loan and Trust Corporations Act, R.S.O. 1927, c. 223.

CONSTATING INSTRUMENTS

Incorporated on the 17th September, 1896, by Letters Patent of Ontario, issued under The Ontario Joint Stock Companies' Letters Patent Act, R.S.O. 1887, Chap. 157. See also The Loan and Trust Corporations Act, R.S.O. 1927, Chap. 223.

February 18th, 1929—Order-in-Council confirming By-law No. 14 of the Corporation to increase the capital stock from \$500,000.00 to \$1,000,000.00.

August 21st, 1929—Order-in-Council confirming By-law No. 18 of the Corporation to increase the capital stock from \$1,000,000.00 to \$5,000,000.00.

On the 10th day of September, 1929, His Honour the Lieutenant-Governor approved by Order-in-Council the removal of the Head Office of The London and Western Trusts Company, Limited, from the City of London to the City of Toronto.

By an agreement, dated the 15th day of October, 1929, The London and Western Trusts Company, Limited, of London, Ontario, purchased the assets and liabilities, business, rights, property and goodwill, etc., of The Standard Trusts Company with Head Office in Toronto, Ontario. The agreement was ratified and confirmed by the shareholders of both companies and was subsequently approved by the Lieutenant-Governor in Council. The transfer became effective on the 18th day of December, 1929. The Standard Trusts Company had, by authority of By-law No. 35, moved its Head Office from Winnipeg to Toronto, and was granted registry in Ontario under date of October 26th, 1929.

CONSTATING INSTRUMENTS

The Prudential Trust Company, Limited, was incorporated in 1909 by a Special Act of the Parliament of the Dominion of Canada, 8-9 Edward VII, Chapter 124.

Authorized in 1911 by Special Act of the Legislature, 1 Geo. V, Chapter 139, to transact business in the Province of Ontario as specified in Section 1 (5) of the said Act, which enacts as follows:

"(5) The Company shall be limited in respect of all business relating to property, rights or interests in the Province of Ontario, to the powers mentioned in this Act or granted from time to time to trust companies by any Public Act or Order of the Lieutenant-Governor in Council of the said Province and shall be subject to the general public law of the said Province relating to trust companies and trusts."

The Company has a deposit in the Province of Ontario amounting to *\$50,000.00.

In 1922, by Chap. 71, George V, 12-13, the authorized capital was increased from \$1,500,000 to \$2,000,000 representing 20,000 shares of par value \$100.

In 1930, by Chap. 70, George V, 20-21, the capital structure was altered to represent 100,000 shares of stock with a par value of \$20 a share.

In 1934 by Bill No. 11, 5th Session, 17th Parliament 24, George V, the par value of the shares was reduced from \$20 to \$10.

*Under the provisions of 1 Geo. V, c. 139, as amended by 10 Geo. V, c. 158, the deposit as security to do business in Ontario may be fixed from time to time by the Lieutenant-Governor in Council. By Order-in-Council, dated June 15th, 1920, the Company's deposit of \$200,000 was exchanged for one of \$50,000.00, the public liability in Ontario being at that time \$1,123.43 on Trust Account and \$26,167.14 of assets under administration.

*By Order-in-Council dated 4th July, 1933, The Honourable the Lieutenant-Governor of the Province of Ontario formally approved the reduction of the amount required to be held on deposit by the Department of Insurance in respect of The Prudential Trust Company, Limited, from Fifty Thousand Dollars (\$50,000.00) to Thirty Thousand Dollars (\$30,000.00).

THE ROYAL TRUST COMPANY—Continued

CONSTATING INSTRUMENTS

The Royal Trust Company was incorporated in 1892, by Special Act of the Province of Quebec, 55-56 Vict., chap. 79, which was amended by 55-56 Vict. (1892), chap. 80 (Q), and by 59 Vict. (1895), chap. 67 (Q), and by 63 Vict. (1900), chap. 76 (Q), 6 Edw. VII, chap. 73, 17 Geo. V, chap. 147 (Q), 19 Geo. V, chap. 116 (Q).

Authorized by Special Act of the Legislature of Ontario, 2 Edw. VII, chap. 103, to transact business therein as specified in Section 1 (5) of the said Act, which enacts as follows:

"(5) The Company shall be limited in respect to all business relating to property, rights or interests in the Province of Ontario, to the powers mentioned in the schedule to The Ontario Trust Companies' Act, and shall be subject to the general provisions of the said Act and of the general law of the said Province relating to trust companies and trusts."

The Company has a deposit in the Province of Ontario amounting to \$200,000.00.

 | 96,041 | 72 |

CONSTATING INSTRUMENTS

Incorporated under The Building Societies Act, 1887, c. 169, as amended by 56 Vic., c. 31 (O), by declaration filed with the Clerk of the Peace for the County of Victoria, on the 4th September, 1897.

The operations of the Company were for a time by law restricted to the County of Victoria (56 Vic., c. 31), continued by R.S.O. 1897, c. 205, s. 8 (4); but the Company, having fulfilled the statutory requirements, was by Letters Patent of Ontario, bearing date 11th November, 1898, relieved from the above restriction of its operations.

By a special Act of the Legislature of Ontario, 13 Geo. V, c. 107, the Company was granted the powers of a trust company and the name was changed to The Victoria Trust and Savings Company. (See also The Loan and Trust Corporations Act, R.S.O., 1927, chap. 223).

 39,417 28 |

CONSTATING INSTRUMENTS

Originally incorporated as a Loan Corporation by Letters Patent, 7th April, 1913, under The Loan and Trust Corporations Act, 2 Geo. V, 1912, chap. 34, now R.S.O. 1927, chap. 223. The original corporate name was The Waterloo County Loan and Savings Company.

By a special Act of the Legislature of Ontario, 12-13 Geo. V, c. 148, the Company was granted the powers of a trust company and the name was changed to the Waterloo Trust and Savings Company.

OF

DEPOSITS

AND

Securities on Hand and Available for Depositors

FILED BY

Loan and Trust Corporations

DECEMBER 31st, 1934, TO SEPTEMBER 30th, 1935, INCLUSIVE

Pursuant to Sections 45 or 18a (3) of the Loan and Trusts
Corporations Act.

Sec. 45. Every loan company receiving deposits shall make a sworn return to the Registrar quarterly on the 15th days of January, April, July and October in each year, drawn in accordance with the form prescribed from time to time by the Registrar, showing the amount of such deposits and showing the amount of cash on hand and on deposit and the amount of debentures, bonds, stock or other securities of or guaranteed by the Dominion of Canada, and of or guaranteed by any province of Canada less any incumbrances thereon and the amount of bonds, debentures and other securities of any municipal corporation in Ontario or of any city in Canada, less any incumbrances thereon and the principal amount of any moneys payable to the company on demand the payment of which is secured by the mortgage or pledge of any of the securities hereinbefore in this section mentioned as the said amounts stood at the end of the last preceding month, and stating that the same were at the date mentioned in such return on hand and available for depositors.

Sec. 18a.—(3) Every trust company receiving deposits in the manner authorized by subsection 3 of section 18 shall make a sworn return to the Registrar quarterly on the 15th days of January, April, July and October in each year, drawn in accordance with the form prescribed from time to time by the Registrar, showing the amount of such deposits and showing the amount of cash on hand and on deposit, and the amount of debentures, bonds, stock or other securities of or guaranteed by the Dominion of Canada, and of or guaranteed by any province of Canada, less any incumbrances thereon, and the amount of bonds, debentures and other securities of any municipal corporation in Ontario or of any city in Canada, less any incumbrances thereon, and the principal amount of moneys payable to the company on demand, the payment of which is secured by the mortgage or pledge of any of the securities hereinbefore in this subsection mentioned, as the said amounts stood at the end of the last preceding month, and including in such statement all such cash and securities and loans as defined in this subsection, whether owned by the company or held by it as guaranteed investments under the provision of subsection 2 of section 17, or subsection 4 of section 18, and stating that the same were at the date mentioned in such return on hand and available for depositors.

Securities Allocated
FILED BY
TRUST COMPANIES

DECEMBER 31st, 1934, TO SEPTEMBER 30th, 1935, INCLUSIVE

Pursuant to Section 18a (2) of the Loan and Trust Corporation Act.

Sec. 18a. (2) Every trust company receiving funds for guaranteed investment as mentioned in subsection 1 of section 16 shall make a sworn return to the Registrar quarterly on the 15th day of January, April, July and October in each year, drawn in accordance with the form prescribed from time to time by the Registrar, showing the amount of such funds, and showing all securities, including loans on securities, and cash, including money on deposit, ear-marked and definitely set aside as provided in subsection 2 of section 17, as the said amounts stood at the end of the last preceding month, and stating that the same were at the date mentioned in such return, so ear-marked and definitely set aside.

An Act to amend The Loan and Trust Corporations Act.

Assented to April 18th, 1935.

HIS MAJESTY, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:

STATUTES OF ONTARIO, 1935.

CHAPTER 36.

1. This Act may be cited as *The Loan and Trust Corporations Amendment Act, 1935.*

2. Subsection 3 of section 18*a* of *The Loan and Trust Corporations Act*, as enacted by section 5 of *The Loan and Trust Corporations Act, 1930*, is amended by inserting after the word "thereon" in the fifteenth line, the following words "and the bonds or debentures issued by an incorporated company in respect of which bonds or debentures annual or semi-annual subsidy payments sufficient to pay both principal and interest thereof are, by virtue of any general Act of the Dominion of Canada, payable by the Government of the Dominion of Canada to a trust company as trustee for the holders of such bonds or debentures."

EXPLANATORY NOTES

SECTION 2. Bonds subsidized by the Dominion Government as described in section 2 are permissible investments for trustees under *The Trustee Act*. See 1934, c. 60, s. 3. The purpose of the amendment is to qualify them as "liquid securities," i.e., government bonds, etc., and cash for the purpose of the quarterly returns filed by trust companies showing deposits and liquid securities available against them.

3. Section 45 of *The Loan and Trust Corporations Act* as amended by section 8 of *The Loan and Trust Corporations Act, 1929*, is further amended by inserting after the word "thereon" in the twelfth line the words "and the bonds or debentures issued by any incorporated company in respect of which bonds or debentures annual or semi-annual subsidy payments sufficient to pay both principal and interest thereof are, by virtue of any general Act of the Dominion of Canada, payable by the Government of the Dominion of Canada to a trust company as trustee for the holders of such bonds or debentures."

EXPLANATORY NOTES

SECTION 3. This section proposes the same amendment with reference to loan companies that is proposed by section 2 of the Bill with reference to trust companies. See note to section 2.

4. Subsection 2 of section 65 of *The Loan and Trust Corporations Act* is amended by inserting after the word "companies" in the third line the words "and to the sale of the assets of a loan corporation to a trust company" and by adding at the end thereof the words "provided that in the case of the sale of the assets of a loan corporation to a trust company, the purchasing trust company shall definitely set aside, in respect of any debentures and deposits of the vendor loan company of which the purchaser assumes payment, securities, including loans upon securities or cash, equal to the aggregate amount of such debentures and deposits in accordance with the provisions of subsection 2 of section 17 and subsection 4 of section 18 of this Act."

EXPLANATORY NOTES

SECTION 4. Sections 55 to 64 of the Act provide for the amalgamation of loan corporations and the purchase and sale of the assets of loan corporations. Section 65 (2) provides that the said sections shall also apply to the amalgamation of trust companies and to the purchase and sale of the assets of trust companies. The purpose of the amendment is to provide that, in addition, the said section shall apply to the sale of the assets of a loan company to a trust company subject to the proviso included in the amendment.

5. Section 136 of *The Loan and Trust Corporations Act* is amended by inserting the words "or 'Limited' or 'Incorporated' or any abbreviations thereof" after the word "Society" in the eighth line.

EXPLANATORY NOTES

SECTION 5. The purpose of section 136 is to prohibit any company in Ontario other than a loan or trust corporation duly registered under the Act, using any name likely to deceive or mislead the public into assuming it is so registered. Within the past year a company was incorporated under *The Companies Act* under the name of Trusts, Limited, and petitions for similar names are filed from time to time. The purpose of the amendment is to widen the application of section 136 to fill up the alleged "loop-hole."

6. This Act shall come into force on the day upon which it receives the Royal Assent.

R E P O R T

OF THE

Minister of Public Works

FOR THE

PROVINCE OF ONTARIO

FOR THE

TWELVE MONTHS ENDING 31st OCTOBER

1 9 3 4

PRINTED BY ORDER OF

THE LEGISLATIVE ASSEMBLY OF ONTARIO

SESSIONAL PAPER No. 8

TORONTO

Printed and Published by T. E. BOWMAN, Printer to the King's Most Excellent Majesty

1 9 3 5

To THE

HONOURABLE HERBERT ALEXANDER BRUCE, R.A.M.C., F.R.C.S. (Eng.),
Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

As required by law, I submit for the information of Your Honour and the Legislative Assembly, the Annual Report of the works under the control of the Public Works Department, comprising the reports of the Deputy Minister, the Architect, Engineers, Secretary and Accountant, for the twelve months ending the 31st of October, 1934.

Respectfully submitted,

T. B. McQUESTEN,
Minister of Public Works

Department of Public Works, Ontario,
Toronto, February 15th, 1935.

REPORT

OF THE

Deputy Minister of Public Works

HONOURABLE T. B. McQUESTEN, K.C., B.A., LL.B.,
Minister of Public Works and Highways,
Ontario.

Sir,—

I have the honour to transmit to you the accompanying annual reports for the fiscal year ending October 31st, 1934.

ARCHITECT'S BRANCH

An important change affecting the Departments of Health and Public Works was made as at the close of the fiscal year, when the structural maintenance and repair work of the Ontario Hospitals was transferred from the Department of Health, Hospitals' Branch, to this Department. The necessary staff transfers were also made.

The work of the branch for the year is summarized as follows:

Capital Construction:

Brockville, Ontario Hospital, extension work.
Burwash, Industrial Farm, extension work.
Guelph, Ontario Agricultural College, extension work.
Hamilton, Ontario Hospital, extension work, begun and closed down.
London, Ontario Hospital, extension work, begun and closed down.
Mimico, Ontario Hospital, Nurses' Residence, extension started and closed down.
Port Arthur, Ontario Hospital, Mental Hospital started and closed down.
Toronto, Employment Service Building, 70 Lombard Street, new.
Woodstock, Ontario Hospital, Nurses' Residence started and closed down.

Purchases:

Port Arthur, site for Mental Hospital.
Smith's Falls, site for Eastern Ontario Hospital.
Toronto, 70 Lombard Street, for Employment Service Building.
Toronto, 3 Queen's Park Crescent, for improvement purposes.

Other Property Acquired:

Mimico, Victoria Industrial School, now closed.

Repairs, Alterations and Equipment:

Belleville, Ontario School for the Deaf.
Bowmanville, Ontario Training School for Boys.
Brantford, Ontario School for the Blind.
Brockville, Ontario Hospital.
Embrun, Model School.
Fort William, Industrial Farm.
Galt, Ontario Training School for Girls.
Guelph, Ontario Agricultural College.
Hamilton, Normal School.
Kemptville, Agricultural School.
Kenora, Court House.
London, Normal School.
Monteith, Northern Academy.
Nipissing, District Building.
North Bay, Normal School.
Ottawa, Sparks Street, Province of Ontario Savings Office.
Orillia, Ontario Hospital.
Parry Sound, District Building.

Rainy River, District Building.
 Sandwich, Model School.
 Sioux Lookout, Mining Recorder's Office.
 Stratford, Normal School.
 Sturgeon Falls, Model School.
 Thunder Bay, District Building.
 Toronto, Parliament Buildings.
 Toronto, East Block.
 Toronto, Government House.
 Toronto, Osgoode Hall.
 Toronto, Normal School.
 Toronto, Liquor Control Board, 454 University Avenue.
 Toronto, Bay and Adelaide Streets, Province of Ontario Savings Office.
 Toronto, Department of Highways and Provincial Police Garage.
 Toronto, Nos. 1, 5, 9, 11, 15 and 39 Queen's Park Crescent.
 Various Districts, minor repairs.

ENGINEER'S BRANCH

Work in this branch was well spread over the province and afforded a means of giving considerable relief work.

In addition to the necessary maintenance and repair work, on which the sum of \$25,168.19 was spent and charged to Ordinary Expenditure, a further amount of \$101,510.42 was spent and charged to Capital Expenditure as follows:

Timber for construction work.....	\$234 02
Storage Dams.....	6,966 23
Municipal Bridges.....	78,340 46
Municipal Drainage.....	15,969 71
	\$101,510 42

OFFICE OF THE SECRETARY

During the fiscal year, thirty-eight contracts were entered into as follows:

Fuel (21).....	\$86,425 20
General (17).....	129,752 90
	\$216,178 10

The question of the Government carrying its own risks on fire insurance became an issue of importance before the end of the fiscal year, and policies expiring during the latter part of the year were not renewed. Subsequently all policies paid by the Government were cancelled except those covering the main Parliament Buildings.

OFFICE OF THE ACCOUNTANT

By the very nature of its functions, the Department of Public Works is not a revenue producing department.

	Ordinary	Capital	Total
Total Expenditure.....	\$772,288 36	\$811,668 17	\$1,583,956 53
Total Revenue.....	8,901 02	13 87	8,914 89
Net Expenditure.....	\$763,387 34	\$811,654 30	\$1,575,041 64

I have the honour to be, Sir,

Your obedient servant,

C. S. WALTERS,
 Deputy Minister of Public Works.

Toronto, February 15th, 1935.

THE HONOURABLE T. B. McQUESTEN,

Minister of Public Works and Highways.

Sir,—

I have the honour to report on the work done by the Architect's Branch of the Department of Public Works for the year ending October 31st, 1934.

Government House.—The buildings have been kept in repair. Some painting has been done in the servants' wing, and alterations have been begun to provide a covered concrete coal chute to overcome the nuisance arising from coal dust during coal deliveries. Drains have been extended and repaired in the ravine in the grounds to stop erosion.

Parliament Buildings.—The buildings, including Parliament Building, East Block, Nos. 1, 5, 9, 11, 15 and 39 Queen's Park Crescent, Highways and Provincial Police Garages and 454 University Avenue, have been kept in repair. No. 3 Queen's Park Crescent has been purchased to be included in the proposed programme of demolition of Nos. 1, 5 and 9 Queen's Park Crescent.

The reconstruction of the old boiler room in the Parliament Buildings for storage purposes has been completed and fitted with steel shelving manufactured by the Office Specialty Company as contractors, and is now used by the Treasury Department as a stack room. The alterations to provide additional laboratory accommodation for the Department of Health in the East Block have been completed. Changes in accommodation in Parliament Buildings and East Block have been made. The Departments of Municipal Affairs and Unemployment Relief have been housed in the East Block. The Inspector of Legal Offices has been moved from Osgoode Hall to the third floor of the Parliament Buildings. Painting has been done where changes have been made. The reception room has been completely redecorated. The suite of rooms formerly occupied by the Sergeant-at-Arms as an apartment has been converted to provide additional office space. The housekeeper's apartment has been redecorated and partially furnished. The work of cutting the names of the 18th Legislature has been done on the marble walls in the north wing corridor. Work on the experimental laboratory for the Department of Game and Fisheries has been begun. Repairs have been carried out on elevators, and new cables have been installed in those in the East Block and in the east elevator, centre group, Parliament Buildings. Drinking fountains have been installed at centre elevator hall on three floors, and piping has been renewed in east end lavatories. Tests have been carried out on the fire alarm system and regular fire drill is carried out. A new heater for hot water at the east end of the building has been installed to replace one which was rusted. The dictograph system has been extended to include connections between ministers' rooms and between these rooms and the secretaries' and deputy ministers' rooms. Improvements have been made to the electric lighting in the Health Laboratory.

No. 454 University Avenue.—Illuminated electric signs have been erected on the buildings for the University Avenue and Dundas Street Branch of the Ontario Savings Office, for which Flexlume Limited were the contractors. New signs have been painted on all windows. Repairs have been made to elevator doors in Liquor Control Offices.

Osgoode Hall.—Painting has been done in several of the rooms occupied by the Judges, and several of the rooms assigned to recently appointed Judges have been redecorated and partially furnished, and new carpets have been laid in one room and new curtains hung in two of these rooms. Additional steel files have been added to the central vault.

Employment Service Building, 70 Lombard Street.—The property known as No. 70 Lombard Street, Toronto, was purchased on April 5th, 1934, from Arthur W. Hughes for the sum of sixty-four thousand dollars (\$64,000.00) for the site of an Employment Service of Canada, Ontario Branch Building. The property has a frontage on Lombard Street, on the south of 105 feet 3 inches, a frontage on Richmond Street on the north of 79 feet 5 inches, with an average depth of 180 feet from north to south. The work of demolition of old buildings and excavations on the site were begun April 6th, 1934, and carried on by day labour in two day shifts, each day, over a period being also divided into two shifts. All concrete work, forms for concrete work, brick and mason work was carried on by day labour. The following trades were carried out by contract:

Cut stone.....	Ritchie Cut Stone Company.
Plastering	E. A. Murby,
Terrazzo floors.....	Italian Mosaic & Tile Company.
Steel sash.....	Architectural Bronze & Iron Works.
Mill work and painting.....	D. V. Klein & Company.
Roofing and sheet metal work.....	Can. Rogers Sheet Metal & Roofing.
Plumbing and heating.....	Purdy Mansell, Limited.
Electric wiring.....	Ontario Electric Company.

The building is a one-storey building designed to carry two additional stories and is divided into two separate sections, one for men, entering from Lombard Street, and the other for women, entering from Richmond Street. The men's section has basement under, with large waiting room and lavatory off, boiler room, coal vault and storage. The women's section has no basement under. The sections are sub-divided by glazed screen partitions into the various offices required for interviews, with ample counter space for registration purposes.

The building is a reinforced concrete frame structure of fireproof construction throughout. The outside walls are of brick, with pressed brick face and Queenston stone trimmings and base. All floors are concrete finished with terrazzo in the public spaces and with linoleum in the offices. All trim and screens are Ontario birch. All walls and ceilings are plaster. Roof is felt, tar and gravel with copper flashings.

This building takes the place of St. James Chambers, the premises occupied under lease at the corner of Adelaide and Church Streets for Men's Employment Service and the premises at 147 Church Street under lease for the Women's Employment Service. The leases for both of which have expired.

EDUCATIONAL BUILDINGS

At the Normal School, Toronto, some minor repairs and painting have been done, and a mechanical stoker has been installed under No. 2 boiler.

At the Normal School, London, repairs have been made to roofs, plumbing, boilers and electric clock system.

At the Normal School, North Bay, repairs have been made to down pipes.

At the Normal School, Ottawa, interior painting of class rooms in the Normal School has been done, and repairs have been made to copings and mechanical stoker.

At the Normal School, Hamilton, several artificial stone window sills have been replaced by natural stone sills. New outside door locks have been provided. Minor repairs have been made to plumbing and heating.

At the Normal School, Stratford, the entire main roof has been reconstructed and a new felt, tar and gravel roof has been laid. Copper has been substituted

for galvanized iron throughout, including the recovering of dome, flashings throughout and the main cornice. The brick parapets have been lowered and all brick work has been repointed. New cast iron rain water leaders were put in throughout the buildings, taken down inside, doing away with outside leaders which leaked badly and were costly in upkeep. The work was carried on by day labour, under the supervision of Mr. James Russell, who acted as resident architect. All materials were purchased direct by this Department. A car parking area to the rear of the school has been provided and floored with ashes from the boiler room.

At the Northern Academy, Monteith, a considerable repair was made to the Hydro-Electric Light Plant—many of the timbers had to be replaced and the foundations of the turbine strengthened. A new fly wheel was purchased and installed in turbine.

At the English-French Training School, Embrun, one of the used boilers sent from Kenora Court House has been installed to replace damaged boiler, and the whole heating apparatus has been thoroughly overhauled.

At the English-French Training Schools, Sandwich and Sturgeon Falls, only minor repairs have been made.

At the School for the Blind, Brantford, only minor repairs have been made, including repairs to power plant and to electric clock system.

At the School for the Deaf, Belleville, the new Dormitory Building, described in last year's report, has been completed and furnished and is now occupied.

Improvements have been made by day labour during the summer throughout the grounds; stretches of broken side walls have been removed and replaced with fill and loam and seeded. New walks have been put in where required. The driveways have been resurfaced in places and lawns have been filled, regraded and drained. The outside of the barns and other farm buildings, outside of Bursar's and Principal's residences, have been painted. The exterior and interior of the Main Building and Boys' Dormitory Building have been painted. Repairs have been made to plaster work in the Main Building and to roofs. Changes have been made to drains and new manholes have been built and grease traps have been installed.

One of the boilers has been relined. The inter-communicating telephone system has been overhauled. New transformers have been added to the electric system to take care of the new additional dormitory building. A new heating main has been carried in from the north to the Girls' Dormitory Building, and repairs have been made to the hot water tank and mains in the basement of this building.

AGRICULTURAL BUILDINGS

Ontario Agricultural College, Guelph.—The work of extending the steam mains and returns in the underground tunnel system to Macdonald Hall and to the Dairy Building has been done under contract by Messrs. B. J. Miller & Company. The branch connection from the new steam main into the Gymnasium, Animal Husbandry Building, Old Horticultural Building, Massey Library, Biological Building and Physics Building have been put in by day labour. As part of the work in connection with the heating, the concrete trench and sidewalk were continued south of the Chemistry Building to the Animal Husbandry Building. The low lying area around the south of the Dairy Building and the ditch along the side road to the Dairy Barn have been filled and levelled.

A concrete foundation has been built to receive the superstructure of the

greenhouse sent last year from Government House. New porches have been built at Farm Cottages. Repairs have been made to stone work at Memorial Hall, Mills Hall and Administration Building and repairs have been made to roofs and flashings at Macdonald Institute and Mills Hall. Repairs are now being made to roofs of Maids' Dormitory, Poultry Building, Memorial Hall, Bacteriological and Stock Judging Buildings.

The underground electric cable system has been further extended and new sub stations, complete with transformers, have been installed in the Massey Library basement at the rear of the Dairy Building and in vault built behind Macdonald Hall. The work of the general trades in connection with the substations was done under contract by Messrs. Battaglia and Crenna; the electric work by day labour.

Veterinary College.—The building is now heated from the central plant. The three boilers in the Veterinary College which also supplied steam to the Dairy Building and Poultry Building have been dismantled and the boilers and other equipment in connection therewith removed. The boiler room has been remodelled and fitted up as a demonstration classroom. The old coal vault has been altered to give office accommodation, incinerator room and storage. New copper gutters have been installed under contract. The whole of the outside woodwork and ironwork has been painted; brickwork has been extensively repointed and repairs have been made to slating, all by day labour. Internal repairs have been made to plaster work.

Horticultural Experimental Station, Vineland Station.—Repairs have been made to the electric service and to plumbing. Painting supplies have been purchased, the labour being done by the Farm staff.

Western Experimental Farm and Agricultural School, Ridgetown.—Only repairs of a minor nature have been done and some paint has been purchased.

Agricultural School, Kemptville.—The heating system in the Superintendent's house has been changed from combined hot water and hot air heating to a complete new system of hot water heating. The work was carried out by day labour. One of the boilers taken from the Court House at Kenora was used to replace the old furnace. Repairs have been made to the boiler in the Stock Judging Pavilion. New electric transformers have been installed to take care of the lighting of three farm cottages; the electric service has been extended to these and the cottages have been wired and electric fixtures installed complete. Repairs to plastering and woodwork have been done in the Students' Residence and all previously unpainted walls and ceilings have been painted. Classrooms and offices in the Main Building have been painted. Roofs of barns have been reshingled. Grading and pointing has been done around buildings.

ONTARIO HOSPITALS

Ontario Hospital, Brockville.—The existing heating plant, consisting of a battery of five H. R. T. boilers operated at their maximum in a cramped situation where no extension to the plant could be made, was found to be inadequate and a new plant on another site was considered necessary. The sites under consideration were (a) the river front and (b) the level area in the low ground to the north of the institution. The river front presents difficulties and involves costs in preparing a building site with dock and coal handling arrangements, with long mains and trenches to the buildings. The second site is closer to the buildings, has the

advantage of a naturally level area and the possibility of being served by a railway siding in the future and this site was selected.

Plans were prepared and the work was begun on June 4th by day labour, under Mr. B. Dillon of Brockville acting as supervising Architect. The builder's office and tool and cement sheds were erected and the site cleared of brush, excavated and a quantity of the excavated rock crushed and piled. The work was closed down on July 12th. On August 16th tenders for the general trades and the radial brick chimney stack were called for. The general trades contract was awarded to the Doran Construction Company of Ottawa. The contract for the chimney was awarded to the Frances Hankin and Company Limited of Toronto. The whole of the brick and form lumber for the building was supplied by the Department.

The boiler room is planned to take three 380 h.p. cross drum water tube boilers, two of which will now be installed. The coal will be handled mechanically and elevated to overhead bunkers to feed the stokers. The contract for the boilers has been awarded to E. Leonard and Sons of London. The contract for coal handling apparatus has been awarded to the Stephens-Adamson Manufacturing Company of Belleville. The concrete trench for the steam mains to the buildings is being done by contract by the Doran Construction Company.

Ontario Eastern Hospital, Smith Falls.—Several possible sites were looked over in the neighborhood of Smith Falls for the purpose of erecting a Mental Hospital there. A site about a mile from the town was finally selected as suitable, where advantage could be taken, by arrangement with the local authorities, for the supply of water and sewage disposal with the town and where railway facilities and hydro power were available. Work was begun on May 14th by day labour. Office, tool and cement sheds were built and excavations were begun and rock taken out to the required depth for the main section of the building and forms were set up. The work was closed down on July 14th. Lumber for forms, brick and cement were delivered on the ground, all of which was afterwards trucked to Brockville, when it was decided to proceed with the boiler plant there.

Ontario Hospital, Hamilton.—Plans have been prepared for Nurses' Residence. Work was begun on May 14th by day labour. Builder's office, tool and cement sheds were erected. Materials and tools required were purchased direct by the Department by tender and the hire of equipment was arranged by the tender. The outside and inside stone foundation walls were carried up and forms set with structural tile in place to receive reinforcing of first floor slab when the job was closed down on July 14th. A contract was awarded to the Frid Construction Company of Hamilton on October 22nd to complete the slab and carry up the outside walls to finished grade level and roof the whole in with a water tight roof, piled with straw and complete the drainage and so protect the structure against the winter.

Ontario Hospital, London.—Foundation plans were prepared for a patients' new building to accommodate 260 patients. The site selected is west of Woodbury Avenue and centres on the north access to the hospital grounds. The work was begun by day labour on May 14th. Builder's office, tool and cement sheds were erected. Materials and tools required were purchased by tender direct by this Department.

The outside concrete foundation walls were poured up to finished grade level and footings were poured for inside walls, piers and columns. The work was closed down on July 14th. Mr. H. H. Angus, the heating engineer, was engaged to advise on the question of heating, examining into the capacity of the present heating plant to carry the extra load due to this building. Tenders have been called for the carrying up of the walls of the new building to first floor level and pouring the slab at that level, filling in against walls and protecting the inner foundations with manure.

Ontario Hospital, Orillia.—The work of painting the plaster walls and ceilings of the Boys' New Dormitory Building has been done.

Ontario Hospital, Port Arthur.—The property known as the Wiley property, consisting of a house and grounds attached extending to eight and one-half acres approximately, was purchased for the purpose of installing a mental hospital. Plans for adapting the house to accommodate 32 patients were prepared by the Architect of the Department of Health and the work was begun by that Department by day labour with Mr. George Blanchard of Port Arthur as supervising Architect. The work was transferred to this Department and continued by it until July 14th when it was closed down. Since that date no further work has been done.

Ontario Hospital, Woodstock.—Plans have been prepared for a Nurses' Residence. The work was begun on May 14th by day labour. Builder's office, tool and cement sheds were erected. Materials and tools required were purchased direct by this Department and the hire of equipment was arranged by tender. The outside concrete walls were poured to finished grade level and inside brick foundation walls were partially up when the work was closed down on July 14th.

Consideration is now being given to doing the necessary filling in, raising walls to the grade level and pouring the slab so that the work can be properly protected against the winter.

Ontario Hospital, Mimico.—Plans have been prepared for the extension to the Nurses' Residence. Work was begun on May 14th by day labour. Builder's office and tool and cement sheds were erected. Excavations were completed and outside cement walls poured to grade and inside brick walls were partially built. The work was closed down on July 12th. A contract was awarded to the Frid Construction Company of Hamilton to continue up the walls and pour the slab at first floor level and protect the structure against the winter. The hospital engineer installed a steam main in this basement to maintain the temperature above freezing.

Foundation plans were also prepared for a new Power House and a patients' new building. The work of excavating only was done in these two buildings by day labour and was shut down on July 14th.

At the end of October the work of remodelling and reconstruction in the various institutions being carried on by the Maintenance Architect's staff of the Department of Health was transferred to this Department, as follows:

- Ontario Hospital, Toronto—Repairs to be done.
- Ontario Hospital, Hamilton—Reconstruction of East House.
- Ontario Hospital, Hamilton—Alterations to Hickory Farm.
- Ontario Hospital, Brockville—Remodelling cottages D, E and F.
- Ontario Hospital, Mimico—Remodelling cottages A and B.
- Ontario Hospital, Kingston—Remodelling Beechgrove.
- Ontario Hospital, Kingston—Remodelling elevator, Mowat Wing.
- Ontario Hospital, Orillia—Plastering stair and landings.
- Ontario Hospital, Orillia—Changes to water supply.
- Ontario Hospital, Penetang—Terrazzo and plastering of stair.
- Ontario Hospital, Cobourg—Electric cable.

REFORMATORIES

Industrial Farm, Burwash.—The Custodial Administration section of the new group of buildings, under construction, has been built and roofed in. The building is two stories and basement in height and is connected to the recently erected cell

block on the east by a corridor. The building will provide accommodation for Sergeant's office, waiting rooms, armory, wash rooms for the inmates and day clothing rooms, all on the first floor; school room, library and reading room on the second floor and receiving room, search room with shower room adjoining, finger printing room and photographing room with dark room adjoining and a large general clothing storage room in the basement. There are two outside entrances leading to stairs, which go from basement to second floor. The building is of concrete frame with fireproof floors and roof. Outer walls are of brick faced with tapestry brick and inner walls of structural tile from the Ontario Government Clay Plant at Mimico. The outer walls have stone base, plinth and stone window sills of Queenston stone. All work has been carried out by day labour and window frames and sashes have been made at the mill on the Farm.

Excavations have been made for the next section under consideration which will be a Dormitory Building with hospital on one floor and Assembly Hall on the top floor. The proposed new building will be on the west of the Custodial Building, forming a wide court yard open on the south with the Custodial Building in the centre between the two buildings.

The Hydro Power Commission have been asked and have examined and reported on the power line from McVittie where power is generated to Camp No. 2 and have advised that the power be transmitted at greater voltage. The matter is now under consideration.

The question of a more adequate water supply has been reported on by Mr. F. A. Dallyn, Civil Engineer. The well drilled by George Graham and Company to a depth of 80 feet, while showing the highest test for purity, only gave a supply of 35 gallons an hour but is subject to a fine sand infiltration periodically. The existing reservoir has been repaired and cleaned out and is taking care of the requirements meantime. The matter of increased water supply is under consideration.

The work of the sewage disposal scheme is being proceeded with. The drain has been laid from the group of buildings to the sewage plant, a distance of 4,000 feet. The filter beds have been excavated for and the concrete work carried up to grade level ready for the superstructure. At Camp No. 1 one of the boilers taken from the Veterinary College has been installed and a reconditioned boiler has been built in at the sawmill.

Industrial Farm, Fort William.—Work is being carried on repairing buildings, installing of new pump and building of pump house and extensions to sewage plant. The work is being carried on by inmate labour under the supervision of the Clerk of Works.

WELFARE BUILDINGS

Boys' Training School, Bowmanville.—Extensive repairs have been made to the dining room building. A condition of dry rot was discovered in the roof timbers which destroyed their structural value and the whole roof had to be rebuilt. Repairs have been made to the floor of the gymnasium.

Girls' Training School, Galt.—Additional equipment for Technical Training has been installed in the school building. Additional furniture and furnishings and kitchen equipment has been supplied in the dormitory buildings. In the Administration Building dental and surgery rooms have been equipped with dental chair and other appliances. Fly screens have been supplied for all windows. Improvements have been made to driveways and shrubs have been purchased. A double car garage and chicken house and chicken runs have been erected.

Victoria Industrial School, Mimico.—The Victoria Industrial School for boys at Mimico has been taken over. The buildings have been examined and reported on prior to being vacated and were found to be generally antiquated and unsuitable for the purpose for which they were being used, being non-fireproof and having little value as custodial buildings. The buildings have been placed under the care of this Department.

DISTRICTS

Throughout the districts, repairs have been made to the Court Houses, Registry Offices, Land Titles Offices, Gaols, Lock-ups and other district buildings, including Mining Recorders' offices. Generally the repairs to these buildings have been of a minor nature.

Kenora.—A new boiler was installed in the Court House of the heating system changed from a one pipe system to low pressure steam flow and return. The system was connected up to the Registry Office from where the hot water boiler was removed and a heater substituted. The new system will not only provide more adequate heating but will effect a saving in coal consumption. The boilers taken from the Court House were used at Embrun School and Kemptville and the heater used at the Registry Office was one taken from the dismantled Government House Greenhouse. Painting has been done in the Court House.

Storm sashes were supplied to the Government Building at Sioux Lookout.

Nipissing.—At the Court House, North Bay, decorating and painting have been done to the Judge's Chambers. Repairs have been made to plumbing and to roofs.

At Parry Sound interior painting has been done in the Gaoler's House.

At Rainy River work of painting was done in the office of the Court House and Land Titles Office. Repairs were made to plumbing in Gaol.

At Thunder Bay new floor was laid in Registry Office, Port Arthur.

Throughout the districts minor repairs were made to heating plants.

Savings Offices.—Plans have been prepared and the work has been carried out and completed of a branch office at 171 Sparks Street, Ottawa. A new stone front has been put in with metal windows and painted pine doors with metal grilles. The interior has been remodelled; new bank fixtures have been installed, the woodwork being manufactured by the Office Specialty Manufacturing Company. The floor of public space is of rubber tile.

A new rubber tile floor was designed and laid in the Adelaide and Bay Streets Branch Savings Office.

The building at 128 Pembroke Street, which was occupied by the British Welcome League was demolished by day labour, the old materials sold and the site cleared and levelled.

The City of Toronto have carried on such repairs to the Ontario Government Building at the Canadian National Exhibition as have been asked for by this Department, and prior to the opening of the building will continue to make repairs to the stone work. The building was not opened for the annual Ontario Government display

I have the honour to be

Sir,

Your obedient servant,

GEO. WHITE,
Assistant Architect.

HON. T. B. McQUESTEN.

Minister of Public Works and Highways.

Sir,—

I have the honour to report on the work of the Engineer's Branch of the Department of Public Works, for the year ending October 31st, 1934.

During the year, 101 municipal bridges were constructed. They consist of 7 steel bridges, 42 concrete bridges, 26 timber bridges and 26 metal pipes.

MAINTENANCE EXPENDITURE, 1934

General, tools, repairs to equipment, etc.....	\$1,711 67	
Storehouse at Bracebridge.....	47 00	
Clearing navigable channels.....	45 00	
Painting bridges.....	1,342 36	
		\$3,146 03
Repairs and Lighting Locks, Docks and Swing Bridges		
Port Carling lock, dock and swing bridge.....	\$3,271 26	
Magnetawan lock and swing bridge.....	113 94	
Huntsville lock and swing bridge.....	1,456 89	
Port Sandfield dock and swing bridge.....	981 40	
Ryerson swing bridge.....	100 83	
		\$5,924 32
Repairs to Dams

MUNICIPAL BRIDGES

NIPISSING

Trout Lake Bridge, Lot 16, Concession C, Widdifield.—This is a concrete slab bridge with an 8 foot clear span and 18 foot roadway. It has steel posts and steel cable guard railing on bridge and approaches.

Barbut Creek Bridge, Lot 16, Concession 6, Calvin.—This is a concrete culvert with a 6 foot opening and 18 foot roadway. It was built on a new site in order to straighten the road.

Dupre's Creek Bridge, Lot 14, Concession C, Widdifield.—This is a concrete slab bridge with a 10 foot clear span and 18 foot roadway. It has steel posts and steel cable guard railing on bridge and approaches.

Dolan's Creek Culvert, Lot 12, Concession C, Widdifield.—In 1918, a 6x6 foot opening concrete culvert was built at this site. During the last year, the road at this point was being widened and straightened, so it was necessary to lengthen the culvert. To each end of the old culvert, 12 feet were added so that the roadway is now quite wide and much safer for traffic. It was provided with steel cable guard railing on culvert and approaches.

Graham Creek Bridge, Lot 11, Concession 6, Chisholm.—This is a concrete slab bridge of 10 foot clear span and 18 foot roadway. It has steel posts and steel cable guard railing on bridge and approaches.

Papineau Township Bridge, Lot 13, Concession 10.—This is a timber bridge of 12 foot span, resting on stone abutments.

Calvin Township Culverts.—Two metal pipes were installed here, one 24 feet long and one 28 feet long, each 36 inches in diameter.

East Ferris Township Culverts.—Three metal pipes were installed here, two being 18 inches in diameter by 22 feet long each, and one 24 inches in diameter by 26 feet long.

PARRY SOUND

Black Creek Bridge, Lot 8, Concessions 4 and 5, Machar.—This is a timber bridge of 20 foot clear span, resting on rock-filled timber cribs.

Foley Township Bridge, Lot 6, Concession 3.—The old bridge at this site had two spans of 16 feet each. As both spans were not required to take the flow of water, the east one was filled with earth and the west one was rebuilt in timber, a timber guard railing was provided.

Blair's Creek Bridge, McDougall.—This is a concrete beam bridge, with a 35 foot clear span and 24 foot roadway. The bridge was built on a skew in order to straighten the road and fit the stream. Steel posts and steel cable guard railing were provided for bridge and approaches.

Ahmic Lake Bridge, Lots 20 and 21, Concession 3, Croft.—This is a concrete beam bridge with a 25 foot clear span and 16 foot roadway. It has steel posts and cable guard railing which extend out over the approaches.

Joe Canuck Bridge, Lot 23, Concession 13, Spence.—This is a timber bridge, 33 feet long, on rock-filled timber cribs. A timber guard railing was provided.

Strong Township Culvert, Lot 6, Concession 5.—A 30 inch metal pipe 20 feet long was installed at this site.

MUSKOKA

McCaulay-Draper Townline Culverts (3).—Three concrete slab culverts were built on this road. One on Lot 29, with a 10 foot clear span, one on Lot 23 of 8 foot span and one on Lot 21 of 8 foot span. The roadway on each culvert was 18 feet wide.

Outlet Creek Bridge, Lot 27, Concessions 6 and 7, McLean.—A concrete beam bridge of 40 foot clear span was built at this site in 1917. The roadway on this bridge was only 14 feet wide, which is altogether too narrow for present-day traffic. The bridge was widened 10 feet, making a 24 foot clear roadway. Two new concrete beams were provided and concrete slab railing put on.

Wattie Creek Bridge, Lot 24, Concessions 8 and 9, Brunel.—This is a concrete slab bridge of 12 foot clear span and 18 foot roadway. Steel posts and cable guard railing were provided for bridge and approaches.

Brunel Culverts (2), Lot 14, Concessions 10 and 11.—Two concrete slab culverts were constructed here about 300 feet apart. One has a clear span of 10 feet and the other 8 feet. Both have an 18 foot roadway.

Acton Island Bridge, Medora Township.—This bridge is now under construction and is expected to be finished for next summer's traffic. The channel at this point is over 300 feet wide and 20 feet deep. The Department was fortunate in securing three old steel spans which were being replaced by more modern bridges from the Highways Department, at a very reasonable cost. Two of these spans are 107 feet long each, and the other is 96 feet long. The roadway on these bridges is 18 feet wide. These steel spans are to rest on rock-filled timber cribs with concrete bridge seats. A 3 inch plank floor will be provided.

Baxter Culvert.—A metal pipe, 24 inches in diameter by 20 feet long, was installed at this site.

Stephenson Culverts (2).—Two metal pipes, each 18 inches in diameter by 30 feet long, were installed at this site.

Stisted Culverts (5).—Five metal pipes were installed as follows: Lot 30, Concession 12, a 30 inch diameter pipe, 30 feet long; Lots 15 and 16, Concessions 8 and 9, a 36 inch diameter pipe, 24 feet long; Lot 29, Concession 4, a 24 inch diameter pipe, 30 feet long; Lot 29, Concession 4, a 24 inch diameter pipe, 24 feet long; Lot 29, Concession 13, an 18 inch diameter pipe, 24 feet long.

Draper-Ryde Townline Culverts (2).—Two metal pipes were installed as follows: Lot 21, a 36 inch pipe, 30 feet long; Lot 17, a 24 inch pipe, 24 feet long.

Draper Culverts (6).—Six metal pipes were installed in this township: Lot 10, Concessions 2 and 3, a 24 inch pipe, 20 feet long; Lots 5 and 6, Concession 2, a 24 inch pipe, 20 feet long; Lot 6, Concession 3, two 24-inch pipes, 18 feet long; Lot 5, Concession 3, an 18 inch pipe, 18 feet long; Lot 4, Concession 8, a 24 inch pipe, 30 feet long.

Oakley Township, Lot 22, Concession 4.—A 36 inch metal pipe, 24 feet long, was installed here.

SIMCOE EAST

Wilson Creek Culvert, Lot 14, Concession 11.—A concrete culvert was constructed at this site. It has an opening 8 feet wide by 10 feet high. It has a roadway 18 feet wide and is provided with cable guard railing which extends out over the approaches.

Brough Creek Bridge, Lot 15, Concessions 2 and 3, Orillia.—This is a concrete beam bridge with a clear span of 24 feet and 16 foot roadway. It has a concrete slab railing and rests on concrete piles, which were pre-cast and driven into place.

Orillia Township Bridge, Lot 15, Concessions 2 and 3.—This is a concrete slab bridge with a clear span of 12 feet and 16 foot roadway. It has steel posts and cable guard railings.

CENTRE SIMCOE

Willow Creek Bridge, Lot 10, Concession 9, Vespra.—This is a steel girder bridge, 38 feet long, with a 16 foot roadway. It rests on rock-filled timber abutments and has a 3 inch plank floor on it. The railing is steel posts and steel cable.

HALIBURTON

Ox Narrows Bridge, Lot 1, Concession 13, Stanhope.—This is a steel truss bridge, 96 feet centre to centre of bearings, and roadway 24 feet wide. The floor is of reinforced concrete with wheel guards on each side. The bridge rests on concrete abutments which are supported by rock-filled timber cribs, built to low water mark. The floor of the bridge is 12 feet above low water line. Heavy fills of rock were required at each end of the bridge to make the approaches. A cable guard railing is provided on bridge and approaches. This bridge is on the Minden-Dorset Highway.

Hall's Lake Dam Bridge, Lot 11, Concessions 6 and 7, Stanhope.—This is a concrete beam bridge with a clear span of 21 feet and roadway 24 feet wide. In order to straighten the road at this point, the bridge was built on a skew, as the centre line of the road crosses the stream at an angle of 45 degrees. Thus, although the clear span was only 21 feet, the beams were 30 feet long. The floor of the bridge is 13 feet above water level of the stream. Steel posts and cable were provided for railings. This bridge is on the Minden-Dorset Highway.

Eldon Township Culvert, Lots 5 and 6, Concession 7.—This is a concrete culvert with a 6 foot opening and 18 foot roadway. Steel posts and cable guard railing were provided for culvert and approaches.

Bexley Bridge.—A timber bridge with a clear span of 18 feet was constructed at this site. The roadway is 18 feet wide, and it rests on stone abutments. A timber guard railing was provided for bridge and approaches.

Kinmount Culvert.—This work consists of adding 16 feet of 5 foot diameter metal pipe to the old culvert, in order to widen out the road to its proper width.

Minden-Dorset Road Culvert.—The old wooden culvert at this site was lengthened 15 feet in order to widen the roadway.

Queen's Line Bridge, Anson.—This is a timber bridge 18 feet long with 14 foot roadway. It rests on rock-filled timber cribs and is provided with timber guard railings.

Guilford Bridge, Lot 7, Concession 4, Guilford.—This is a steel girder bridge 49 feet long, with an 18 foot roadway. It rests on concrete abutments under which timber piles were driven to secure a good foundation. The floor of the bridge is 10 feet above water level and is of reinforced concrete. A cable guard railing is provided on bridge and approaches.

Maple Lake Bridge, Lot 21, Concession 4, Stanhope.—This bridge consists of two steel spans, 49 feet long each. It has an 18 foot roadway and rests on a concrete pier and concrete abutments. The floor is 12 feet above water level. It has steel posts and cable guard railing which extends out over the approaches.

Sawyer's Lake Road Bridge, Minden.—A timber bridge 22 feet long with 14 foot roadway was constructed at this site. It has a timber guard railing which extends over the approaches. The approaches were raised and gravelled.

Powell's Road Bridge, Dalton.—This is a timber bridge with 28 foot clear span and 16 foot roadway. The floor is 12 feet above water level. A timber guard railing is provided.

Black River Road Bridge, Dalton.—This is a timber bridge with 16 foot clear span and 16 foot roadway. The abutments are built of stone and are 10 feet high. It has a timber guard railing and the approaches were raised and gravelled.

Minden-Anson Townline Culvert, Lot 7.—There was an old stone culvert at this site. The culvert was too short, and the road at this point was very dangerous. The culvert was lengthened 16 feet and the road widened, so that the road is now quite safe. There was a fill of 12 feet above the culvert.

Dalton-Rama Townline Bridge.—This is a timber bridge with 9 foot clear span and 16 foot roadway. The abutments are built of stone and are 5 feet high.

Union Creek Bridge, Lot 1, Concession 7, Somerville.—A concrete beam bridge of 35 foot clear span and 24 foot roadway was constructed at this site. The floor is 9 feet above water level. The bridge was built on the skew, as the stream did not cross the road at right angles. Steel posts and cable were provided for guard railings which extend out over the approaches. There was a heavy fill at each end of the bridge.

PETERBOROUGH

Eels Creek Bridge, Lot 9, Concession 6, Burleigh.—This bridge is on the Burleigh-Apsley Road and was built on a new location in order to avoid a dangerous curve and hill which existed at the south approach to the old bridge. The new bridge is a steel truss span 75 feet centre to centre of bearings, with a 24 foot roadway. The

floor and abutments are of reinforced concrete. The floor is 12 feet above low water level. Timber piles were driven under the abutments to secure solid foundations, 44 piles being driven under each abutment. Steel cable guard railings were provided which extend over the approaches. There was a heavy fill at each end of the bridge.

Burleigh Falls Culvert.—At this site a half round metal culvert was installed. It is 3 feet wide and 40 feet long. It is on the Burleigh-Apsley road. This is a new type of culvert and is suitable for locations where there is not sufficient head room to install a round pipe.

WEST HASTINGS

Bow Lake Bridge, Lot 21, Concession 10, Faraday.—This is a concrete slab bridge of 10 foot clear span and 24 foot roadway. It is provided with steel posts and cable guard railings.

Faraday Culverts (4).—Four concrete slab culverts, each with 18 foot roadway, were constructed in this township, as follows: Lot 22, Concessions 8 and 9, a 12 foot clear span, 4 feet high; Lot 26, Concessions 12 and 13, a 6 foot clear span, 4 feet high; Lot 25, Concession 13, a 12 foot clear span, 4 feet high; Lot 23, Concession 13, an 8 foot clear span, 4 feet high.

Gulf Creek Bridge, Lot 23, Concessions 4 and 5, Marmora.—At this site there is a ravine 110 feet wide and 18 feet deep, over which a wooden trestle had been built. This trestle had become rotten and dangerous. As the traffic did not warrant an expensive bridge here, the old steel bridge at Marmora, which was discarded by the Highways Department, was taken to this site and re-erected. It is 114 feet long with a 16 foot roadway. A plank floor was put on.

Papineau Creek Bridge, Lot 3, Concession 6, McClure.—This is a concrete beam bridge with a 25 foot clear span and 22 foot roadway. The floor is 6 feet above low water level. It has steel posts and cable guard railings.

EAST HASTINGS

Neville's Bridge, Lots 1 and 2, Concession 12, Huntingdon.—This is a concrete slab bridge with a 12 foot clear span and 16 foot roadway. It has steel posts and cable guard railings.

Dungannon Culverts (2).—Two concrete slab culverts were constructed in this township, as follows: Lot 25, Concession 14, a 10 foot span, 6 feet high; Lot 23, Concession 14, a 10 foot span, 9 feet high. Both have 22 foot roadways and cable guard railings.

Elziver Culvert, Lots 10 and 11, Concession 3.—This is a concrete slab culvert with a 10 foot span and 18 foot roadway.

Otter Creek Bridge, Lot 7, Concession 13, Hungerford.—This is a concrete beam bridge with a clear span of 20 feet and 16 foot roadway. It has a cable guard railing.

Bangor Bridge, Lots 20 and 21, Concession 8.—A timber bridge 20 feet long was built at this site. It rests on rock-filled timber abutments.

ADDINGTON

Kirk's Bridge, Lot 11, Concession 8, Sheffield.—This is a concrete beam bridge with a clear span of 30 feet and 16 foot roadway. The floor is 9 feet above low water level. It has steel posts and cable guard railings.

Dead Creek Bridge, Lot 27, Concession 8, Kennebec.—A concrete slab bridge with 12 foot clear span and 18 foot roadway was built at this site. The floor is 9½ feet above low water level. Steel posts and cable guard railings were provided for bridge and approaches.

Bedford Culverts (4).—Four concrete slab culverts of 8 foot clear span and 18 foot roadways were constructed in this township.

Fall River Bridge, Lot 12, Concessions 4 and 5, Oso.—This is a timber bridge with a clear span of 15 feet and 14 foot roadway. It rests on concrete abutments. It has a timber guard railing on bridge and approaches.

SOUTH RENFREW

Killaloe Culvert, Lot 11, Concession 4, Hagarty.—A timber box culvert with 4x12 foot opening and 24 foot roadway was constructed at this site. The flooring is 6 inch flatted tamarac.

Wilno Culvert, Lot 1, Concession 4, Sherwood.—This is a concrete slab culvert with a clear span of 12 feet and a 24 foot roadway. It has steel posts and cable guard railings.

Hurd Lake Bridge, Lot 25, Concessions 1 and 2, Bagot.—An old timber bridge 145 feet long at this site had become badly decayed and unsafe for traffic. As this bridge is over a small creek, there was no need for such a long bridge, and it was decided to fill in most of it, leaving an opening 18 feet wide, over which a timber bridge was built. The fill was made mostly of rock, with a covering of earth and gravel to form a roadbed. About 1,350 cubic yards of rock and earth were put in this fill. The roadway is 16 feet wide and is protected by steel cable guard railings attached to cedar posts.

Lyndock Bridge, Lot 25, Concession 1, Brudenell.—This is a timber bridge with a clear span of 14 feet and 15 foot roadway. It rests on rock-filled timber cribs. It has timber guard railings.

Snake Creek Bridge, Lot 31, Concession 5, Lyndock.—This is a timber bridge 53 feet long, with two clear spans of 15 feet each and roadway 15 feet wide. It rests on rock-filled timber cribs. The floor is 6 inch flatted cedar and is 3 feet above low water level. It has a timber guard railing.

South Algona Bridge, Lot 11, Concession 5.—This is a timber bridge 20 feet long and roadway 16 feet wide. It rests on rock-filled timber cribs. The flooring is 6-inch flatted cedar, and a timber guard railing is provided.

Rockingham Bridge, Lot 25, Concession 9, Brudenell.—This is a timber bridge 22 feet long and 16 foot roadway. It has a 6 inch flatted cedar floor and timber guard railing.

Carson Creek Culvert, Lot 35, Concession 9, Sherwood.—This is a concrete slab culvert of 8 foot clear span and 24 foot roadway. It has steel posts and cable guard railing.

McCormick Bridge, Lot 19, Concession 14, Grattan.—A concrete slab bridge of 10 foot clear span and 24 foot roadway was constructed at this site. The bridge was built on the skew to fit the stream. It has steel posts and cable guard railings which extend over the approaches.

Sherwood Culverts (2).—Two timber culverts, with 10 foot span and 16 foot roadway, were built here.

Round Lake Bridge, Richards.—A new timber floor was put on this bridge.

NORTH RENFREW

Cliche's Bridge, Lot 18, Concession 8, Alice.—There was an old timber bridge 55 feet long and 12 feet high, at this point. As the creek was quite small, a concrete culvert with a 6x4 foot opening and 40 feet long was installed and the balance filled with earth. A heavy fill was required, and it was placed so that the road was straightened and grades on each side greatly improved. A cable guard railing on cedar posts was placed on each side for the full length of the fill. The roadway is 16 feet wide.

Alice Township Bridge, Lot 25, Concessions 2 and 3.—A concrete culvert with an opening 5 feet wide and 6 feet high by 42 feet long was installed at this site. There was 6 feet of fill above the culvert. This fill is provided with cable guard railings on cedar posts, and the roadway is 16 feet wide.

Bromley Township Culvert, Lot 16, Concession 2.—A 36 inch diameter metal pipe 20 feet long was put in at this site to replace an old timber bridge.

Stafford Township Bridge, Lot 10, Concession 2.—This is a timber bridge 16 feet long with 16 foot roadway. It rests on rock-filled timber cribs and has timber guard railings.

LOCKMASTERS

The lockmasters' reports on the traffic through the different locks were as follows:

	Steamboats	Small Boats	Scows	Rafts of Timber
Huntsville Lock. . . .	54	37	5	71
Magnetawan Lock. . .	19	47	32	1
Port Carling Lock. . .	1,108	334	262	50

STORAGE DAMS

Kinmount Dam.—During the recent spring floods, the old timber dam on the Burnt River at Kinmount was partly washed away, so that a head of water could not be maintained. The saw mill and electric light plant were run by water power, and therefore could not operate when the dam was out. The dam is about 200 feet long and has four sluiceways, besides the flume leading to the mill. It is 12 feet high and holds a head of about 10 feet.

The dam was rebuilt in timber by this Department, the mill owners and local people supplying all timber and other material required. The dam is now in good condition and should serve for many more years.

St. Ola Dam, Limerick Township.—The old timber dam at this site was built many years ago by the Gilmour Lumber Company for lumbering purposes. This dam backs water up on Gull Lake, Salmon Lake, Bass Lake, Dark Lake, Dixon Lake and Devil Lake. It is therefore an excellent dam for storage purpose and very valuable for the Hydro-Electric Power Commission. All these lakes are visited by many tourists during the summer, and the dam provides navigation between all these lakes.

The old dam had become so badly decayed and worn that the lake levels could not be maintained, and boats could not navigate the channels between the lakes during dry seasons.

The new dam is built of concrete. The dam on the main channel is 140 feet long and 10 to 12 feet high. It is provided with a sluiceway 18 feet wide, into which stop logs are placed for the regulating of the water. A steel winch is provided for placing and lifting the stop logs. A concrete platform is placed over the sluiceway on which the stop logs can be stored.

To the east of the main dam, there is a back channel which also had to be dammed. This dam is 80 feet long and 10 feet high. It is provided with a small sluiceway 6 feet wide in which stop logs are placed. There are 450 cubic yards of concrete in these two dams.

MUNICIPAL DRAINAGE

Drains were constructed in the various districts as follows:

Nipissing	25	drains	were	constructed
Parry Sound	8	"	"	"
Muskoka	16	"	"	"
East Simcoe	60	"	"	"
North Ontario	12	"	"	"
Haliburton	16	"	"	"
Peterborough	3	"	"	"
Hastings	9	"	"	"
Addington	7	"	"	"
South Renfrew	7	"	"	"
North Renfrew	8	"	"	"

DRAINAGE AID

Black Creek Drain and Extensions, in the Townships of Culross and Kinloss, County of South Bruce.—This drain was constructed by the Townships of Culross and Kinloss, under the provisions of the Municipal Drainage Act, in accordance with the report and plans prepared by J. C. Monteith, O.L.S. The engineer's report was adopted on November 25th, 1931, and the petition for aid was filed in this Department on August 2nd, 1932.

Black Creek commences at Waddell's Lake, on the boundary between Kinloss and Greenock Townships, and runs in an easterly direction through three lots in Greenock Township, then crosses into Culross Township and continues in an easterly direction across Lots 32 to 21 in Concession 15, Culross Township. On Lot 21, it crosses into Greenock Township again and crosses Lot 30, Concession 1, and empties into the Teeswater River on Lot 31; it has a total length of 4 1-5 miles.

The upper end of the drain has a bottom width of 10 feet and the lower end 12 feet, with side slopes of 1 to 1. It has an average depth of about 4 feet. The estimated cost of this work was \$18,345.00, which was assessed by the engineer on lands and roads affected as follows:

Culross Township	\$9,238 00
Greenock Township	4,374 00
Kinloss Township	4,733 00

The extension to this drain includes nine sections which empty into Waddell's Lake. They are as follows:

1. South-west section. 1.015 rods in length, in Kinloss.
2. South-west section. 541 rods long, in Culross and Kinloss.
3. McLean section. 257 rods long, in Kinloss.
4. Boyle section. 89 rods long, in Kinloss.
5. McGarlane section. 1.175 rods long, in Kinloss.
6. Guest section. 270 rods long, in Kinloss.
7. Middle section. 270 rods long, in Kinloss.
8. North-west section. 481 rods long, in Kinloss.
9. Inter-lake section consists of removing bars in the channel between Silver Lake and Waddell's Lake.

The estimated cost of this extension was \$8,600.00, which was assessed by the engineer on lands and roads affected as follows:

Culross Township.....	\$667 00
Kinloss Township.....	7,933 00

The treasurer of Culross Township reports the total cost of Black Creek Drain at \$9,598.41. The treasurer of Kinloss Township reports the total cost of the extensions at \$8,146.66. Included in this latter cost is the cost of some tile drains which are not entitled to aid under the Act and must be excluded. The cost of these tile drains with their proportion of engineering fees and incidental expenses is \$911.26, leaving the cost of extensions on which the grant is based at \$7,235.40. The total cost of the Black Creek Drain and extensions on which the grant is based is \$16,833.81.

On report, a grant of \$3,367.00 was paid to the Township of Culross, the initiating municipality.

Spring Creek Drain, in the Township of Lochiel, in the County of Glengarry.—This drain was constructed by the Township of Lochiel, under the provisions of the Municipal Drainage Act and in accordance with report and plans prepared by W. H. Magwood, O.L.S. The engineer's report was adopted on June 29th, 1931, and the petition for aid was filed in this Department on May 14th, 1932.

This drain consists of three trunk channels and a small branch drain. They are known as the main drain, the Quigley Branch, the Chisholm Branch and the Fraser Branch. The Fraser Branch is excluded from the work as it cannot be considered a trunk channel.

The main branch starts at the boundary between Kenyon and Lochiel Townships. It takes a north-easterly course across Lots 38 and 37, Concession 4, 37 to 29, Concession 5, and Lots 29 to 25, Concession 6. It then runs south on Lot 25 into Concession 5 again and takes a south-easterly course across Lot 25 to Lot 16 in Concession 5; then runs north on Lot 16, Concession 5, into Lot 17, Concession 6. The total length of this branch is 51,276 feet, or nearly 10 miles. At the lower end, it is 8 feet wide at the bottom for a distance of 13,800 feet. Above this, it gradually decreases in width to 2 feet 6 inches at the upper end.

The original course of the creek was very crooked, and many of these sharp bends were cut across to give a much straighter course and a much better run for the water. Considerable rock was encountered in the work, especially at the lower end.

The Quigley Branch starts at the road between Lots 25 and 26, Concession 5, and runs easterly to Lot 17, where it joins the main branch. It is 11,642 feet long, or a little over 2 miles. It has a bottom width of from 2½ feet at the upper end to

3 feet at the lower. Several sharp bends were cut on this branch.

The Chisholm Branch starts at the road between Lots 19 and 20, Concession 4, and runs north-easterly, joining the main drain on Lot 17, Concession 5. It is 7,020 feet long, or about 1 3-8 miles. A few sharp bends were cut on this branch. It has a bottom width of 2 to 2½ feet.

The estimated cost of the work was \$41,600.00, which amount was assessed by the engineer on lands and roads affected as follows:

Kenyon Township.....	\$2,142 27
Lochiel Township.....	39,457 73

The treasurer of Lochiel Township reports the total cost of this drainage work at \$31,539.27. This amount includes the cost of Fraser Branch, which must be deducted. The cost of this branch with its proportion of engineering fees and incidental expenses is \$883.00. It also includes \$4,052.00 for highway bridges, to which the Highways Department pays 40 per cent. This also must be excluded. This makes a total of \$4,935.00 to be deducted from the total cost, leaving a balance of \$26,604.27 on which the 20 per cent grant is based.

On report, a grant of \$5,321.00 was paid to the Township of Lochiel, the initiating municipality.

Respectfully submitted,

J. W. HACKNER,
Assistant Engineer.

Toronto, January 1, 1935.

Toronto, February 13th, 1935

HONOURABLE T. B. McQUESTEN.

Minister of Public Works and Highways, Ontario.

Sir.—

Twenty-Eighth Annual Report

OF THE

Game and Fisheries Department

1934

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO
SESSIONAL PAPER No. 9, 1935

ONTARIO

TORONTO

Printed and Published by T. E. Bowman, Printer to the King's Most Excellent Majesty

1935

TO THE HONOURABLE HERBERT ALEXANDER BRUCE,
a Colonel in the Royal Army Medical Corps, F.R.C.S. (Eng.),
Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

I have the honour to submit herewith for the information of Your Honour and the Legislative Assembly, the Twenty-Eighth Annual Report of the Game and Fisheries Department of this Province.

I have the honour to be,

Your Honour's most obedient servant,

H. C. NIXON,
*Minister in Charge,
Department of Game and Fisheries*

Toronto, 1935.

TWENTY-EIGHTH ANNUAL REPORT

OF THE

Game and Fisheries Department of Ontario

TO: THE HONOURABLE H. C. NIXON,
Minister in charge,
Department of Game and Fisheries.

SIR:—I have the honour to place before you this Twenty-eighth Annual Report of the Department of Game and Fisheries of Ontario, covering the year, 1934.

FINANCIAL

The following table contains details of the various sources from which this Department derived its revenue during the period under review, and covers the fiscal year ended October 31st, 1934.

REVENUE FOR FISCAL YEAR 1934

GAME—

Royalty	\$ 90,990.90	
Licenses—		
Trapping	\$ 30,695.00	
Non-resident Hunting	25,799.55	
Deer	47,263.70	
Moose	3,162.50	
Gun	59,214.25	
Fur Dealers	30,267.00	
Fur Farmers	6,257.50	
Tanners	155.00	
Cold Storage	106.00	
	<hr/>	\$202,920.50
		\$293,911.40

FISHERIES—

Royalty	\$ 10,058.68	
Licenses—		
Fishing	\$ 90,930.00	
Angling	128,472.22	
	<hr/>	\$219,402.22
Sales—Spawn taking	551.53	
	<hr/>	230,012.43

GENERAL—

Guides' Licenses	\$ 4,750.39	
Fines	5,276.02	
Sales—Confiscated articles, etc.	3,094.96	
Rent	4,405.00	
Commission	2,901.34	
Miscellaneous	386.93	
	<hr/>	\$ 20,814.64
		\$544,738.47

The total revenue of \$544,738.47 represents a decline of approximately \$27,000.00 as compared with the revenue of the previous year, and which last-mentioned figure is practically the unfavourable difference in the amount of fees received from the sale of hunting licenses, both resident and non-resident, of all varieties, during 1934 as compared with 1933. It is more than probable that this reduced sale of hunting licenses could be attributed to the existing economic conditions which naturally have resulted in limiting the spending ability of the average sportsman, thus necessitating curtailment of individual expenditures wherever necessary. Declining revenues, however, demand that the matter of expenditures shall be very carefully scrutinized, so that the amount which is available shall be spent to the best possible advantage, and in order that no particular division of the work shall suffer from lack of funds. During the period reported upon the total sum expended by this Department amounted to \$556,267.54, which was \$11,529.07 in excess of the total revenue which was derived, and some \$25,000.00 more than the total expenditures of the previous year. This increase was due to the extension in the work of the Fish Culture Branch in connection with the establishment of the bass ponds in the County of Frontenac, and which work was commenced late in the Spring of 1934.

STATISTICS

Attention is drawn to the various statistical tables provided as appendices to this report, and which tables supply in detail, information regarding the output of the fish hatcheries and rearing stations maintained and operated by the Fish Culture Branch, as well as information as to the designation and location of the various waters which have been re-stocked during the year.

There will also be found statistics in respect of the commercial branch of our fisheries, and throughout the report itself are tables having reference to other aspects of Departmental activity, all of which have been carefully assembled and prepared, and those who are interested therein will find them of considerable value.

GAME

The numbers of licenses to authorize the hunting of large game animals,—deer, moose and bear—as issued during the year, and as compared with similar figures for the previous year, are as follows:—

	1933	1934
Resident Moose	949	575
Resident Deer	19,065	17,252
Non-resident (general) Hunting	997	889

These figures substantiate the previous observations in the references as to Departmental revenues and indicate to some extent the reduction in the numbers of hunting licenses issued during the period under review.

Reports from Officers in the Field Service of the Department have been assembled and tabulated, and the following is provided as a summary of conditions as they have existed throughout the year and as they apply to our game life,—animals and birds:—

Deer—In the extreme northwestern portion of the Province, including Rainy River and Kenora Districts, conditions are generally favourable, though in the balance of the northern portion, that is, north and west of the French and Mattawa Rivers there was a very noticeable decline in the numbers of these animals. So far as Southern Ontario is concerned there are evidences of some increase in numbers in the western and eastern counties in which these animals are protected by an entire closed season, and while there is no immediate cause for concern as to the present conditions, in the northern counties and districts of this southern Division reports indicate that these animals are not any more than holding their own, and possibly suffered a decline during the period under review.

Moose—Few of these animals are to be noticed in the southern portion of the Province, and in which section they are protected by an entire closed season, while in Northern Ontario some slight improvement in their condition is indicated by the reports.

Caribou—There are but very few and scattered herds of these animals, and only in the north. No evidence of any improvement in their condition, and the present protection which the regulations provide is apparently necessary.

Elk (wapiti)—Introduced into the Province in 1932 and 1933 from western Canada, with the co-operation of the National Parks Branch of the Federal Department of the Interior. Herds at present located on the following Game Preserves,—Pembroke, Burwash, Goulais River-Ranger Lake, Chapleau and Nipigon-Onaman.

Ruffed Grouse (Partridge)—These birds were reported to be not plentiful in practically every section of the Province.

Sharp-tailed Grouse (Prairie Chicken)—Found only in Northern and Northwestern Ontario, where their numbers have been largely reduced.

Ptarmigan—Exist only in the extreme northern portion of the Province. Conditions fairly good in areas in which they are adaptable.

Quail—While these birds are to be noticed in various portions of southern Ontario, they are not very prevalent except in the extreme southwestern counties, where they are found in increasing numbers.

Ducks—The various species of ducks were not so numerous, particularly in Southern Ontario, though from Northern Ontario the reports would indicate little change during flight from conditions as they existed in previous years.

Plover and Snipe—No general improvement is reported concerning these birds, though there is some scattered local improvement as regards snipe. Very scarce throughout the Province.

Pheasants (Ring-necked)—These birds have very definitely established themselves in the western, southern and eastern counties of the Province, particularly those adjacent to Lake Erie, Lake Ontario and the River St. Lawrence, and where conditions are favourable to their existence. Reports, however, indicate that prevailing weather conditions in the more northerly counties and districts of Southern Ontario are not suitable for this species. Favourable conditions were responsible for the provision of an open season, limited as to period and area in which it was effective. The work of distributing live birds and eggs was continued from the Bird Farm at Codrington. Some 696 birds were liberated in various localities and

17,730 eggs forwarded to applicants for the same, whose co-operation in the matter of hatching the eggs and raising the chicks represent a degree of assistance the value of which it would be difficult to estimate, and without which co-operation, the successful establishment of the bird would undoubtedly have been retarded.

Hungarian Partridge—The work of establishing this bird has not progressed in a degree which is in any way comparable with the results obtained in our experiments with the pheasant. Up to the present time any propagation of these birds on the Department's Bird Farm devoted to this work, has been very limited and nothing which might be termed in any way successful. During the year reported on no general distribution of these birds was undertaken, only twenty birds being liberated. The remainder of the available stock was retained for liberation during a more favourable season.

Rabbits—There would appear to be general indications that these animals are decreasing in number, though they are reported still to be fairly numerous and afford good hunting in some localities, particularly the western counties.

At this point it might be well to observe that to the unusually dry seasons of 1933 and 1934 as well as to the extremely severe weather conditions which prevailed during the winter of 1933-34, might be assigned a large proportion of the responsibility for some of the unfavourable conditions which existed in respect of our game animals and birds, and more particularly deer and partridge.

FURS

Conditions as they affect fur-bearing animals throughout the Province, and as they have been reported to the Department, may be summarized as follows:—

Bear—Would appear to be increasing in number, particularly in Northern Ontario.

Beaver—Conditions would appear to show some improvement throughout the closed area, i.e. south of the main transcontinental line of the Canadian National Railway.

Fisher—This species is extremely scarce and its numbers possibly decreasing. Conditions are not at all favourable.

Fox—Conditions vary. Reported to be decreasing in Southern Ontario, while increasing numbers are indicated in reports from Northern Ontario. Annual catch shows considerable increase.

Lynx—While the annual catch as set forth in this report shows a considerable increase, the reports indicate that this species is extremely scarce and that conditions as they apply here do not show much, if any, improvement.

Marten—Very scarce, and still declining. The annual catch of this species is practically negligible.

Mink—Annual catch showed quite an increase over that of previous year. Some improvement, particularly in the north.

Muskrat—The catch of this stand-by of the fur-bearers showed a large decrease. Conditions in southern Ontario are not so favourable, though improvement is reported from Northern Ontario.

Otter—Not much, if any, general change for the better. Annual catch has remained about the same, even though a short open season on this species was declared in 1934 to take in the entire Province.

Raccoon—While the figures of the annual catch show an increase of fifty per cent over the previous year, reports indicate that this species is not so numerous.

Skuuk—These animals continue fairly plentiful throughout the Province.

Weasel—Decreasing in number somewhat, as is indicated by the figures of the annual catch.

The fur-bearers of our Province are subjected to very intensive trapping operations during the periods of the various open seasons, and practically all species, as a result, are encountering considerable difficulty in maintaining their numbers unimpaired, without even considering improvement, and if we are to preserve our wild life fur resources for the benefit of future generations of trappers and those engaged in the fur industry, it is quite apparent that the present restrictive regulations must be continued and every effort made to secure observation of and compliance with the same.

The following comparative table lists the pelts of fur-bearing animals, other than those which were raised upon licensed fur farms, on which royalty was paid in the years 1932, 1933 and 1934.

	1932	1933	1934
Bear	705	556	341
Beaver	13,230	10,799	10,336
Fisher	1,258	1,203	1,297
Fox (cross)	1,177	1,495	2,224
Fox (red)	9,564	9,198	13,534
Fox (silver or black)	121	132	280
Fox (white)	562	82	89
Fox (not specified)	113	111	85
Lynx	1,088	1,400	2,138
Marten	1,264	1,376	1,096
Mink	48,234	52,795	63,615
Muskrat	640,390	637,348	521,751
Otter	3,300	3,264	3,330
Raccoon	12,640	12,109	18,673
Skunk	82,917	67,797	73,721
Weasel	113,421	92,036	68,164
Wolverine	3	3	5
	930,017	891,704	780,679

Statistics based on average prices, as compiled by the Department from information supplied in this connection indicate that the trappers responsible for the taking of these pelts during 1934 received some \$1,595,668.65 from the sale thereof.

The foregoing figures do not include silver and black foxes raised on licensed fur farms, the pelts of which animals are exempt from royalty provisions, and 15,638 of such ranch-raised silver and black fox pelts were disposed of during the year. Of this number 14,052 were exported from Ontario, and the remainder, numbering 1,586 were dressed within the Province. It is estimated that these particular pelts were worth \$555,930.90 to the fur farmers responsible for the production of the same.

FUR FARMING

The fur farming industry continued its development during the year along the sound and established lines which have previously existed, and the efforts along these lines have been assisted and encouraged with the practical advice and co-operation which is available at the government Experimental Fur Farm at Kirkfield, the work of which institution during the year being outlined further on in this report. Silver and black fox continue to be the principal product of these licensed fur farms, though work in connection with the mink would appear to be developing, and the propagation of this species is attracting increasing attention.

In previous years statistics of the stock of animals on licensed fur farms as shown in the annual report represented animals on hand as at the end of each calendar year. To obtain these figures in time for inclusion in this report necessitated the employment of emergency methods out of all proportion to the results obtained, and for this reason it is deemed desirable with this report to institute the practice of reporting the number of animals on hand as at the beginning of the year under review,—thus the table appended herewith lists the numbers of the various species of fur-bearing animals reported to be stocked on licensed fur farms as at January 1st of the 1932, 1933 and 1934.

ANIMALS STOCKED ON LICENSED FUR FARMS AS AT JANUARY 1ST

	1932	1933	1934
Beaver	58	44	60
Fisher	74	50	18
Fox (cross)	582	559	443
Fox (red)	562	448	360
Fox (silver black)	17,414	15,938	16,826
Fox (blue)	42	13	10
Lynx	4	2	2
Mink	7,198	6,170	6,190
Muskrat	1,359	511	499
Raccoon	1,486	1,202	989
Skunk	12	10	2
Bear	25	16	14
Marten	40	37	22
Badger	6	4	0

The number of Fur Farmers' licenses issued during the year showed a small decrease, being 1217 as compared with licenses to the number of 1291 which were issued during the year 1933.

CROWN GAME PRESERVES

During the year approximately seventy thousand acres of additional territory was included in the system of Crown Game Preserves throughout the Province, which system had its inception in the year 1917, and there is evidence that these areas of complete sanctuary materially assist in the preservation and propagation of game, particularly within their own boundaries and on the areas adjacent thereto. Two game preserves were created, one which had been established previously was extended, and one was discontinued at the request of the owner of the land involved, particulars of all of which are as follows:—

Those established were:

(a) Burwash Crown Game Preserve, in the District of Sudbury, 87 square miles or 55,680 acres in extent; and

(b) North Easthope Crown Game Preserve in the County of Perth, 8,300 acres in extent.

The Barkley Crown Game Preserve, in the County of Dundas, which was originally established in 1932, was extended to take in an increased area of 5,000 acres, while the Nayaushé Crown Game Preserve, established in 1932, and covering a small area of 450 acres, was discontinued, as has been previously stated, at the request of the owner of the land involved. This last-mentioned Game Preserve was located in the District of Manitoulin.

WOLF BOUNTIES

During 1934, the Department received applications and paid bounties in respect of 1,859 wolves, and the following is a comparative table of statistics for the past three years:—

	Timber	Brush	Pups	Total	Bounties
For fiscal year ending October 31, 1932..	1,413	1,413	46	2,872	\$68,481.35
For fiscal year ending October 31, 1933..	1,112	1,229	43	2,384	53,433.88
For fiscal year ending October 31, 1934..	990	812	57	1,859	27,080.65

Reference to the foregoing shows a further decline in the number of these pelts upon which bounty was paid, the decrease being more than thirty-five percent in a period of two years. The difference in the total amount of bounty paid during the years 1933 and 1934 is principally accounted for by the reduction in bounty from \$25.00 to \$15.00 per pelt which became effective June 1st, 1933, and which reduced bounty would be payable on but few of the pelts presented for such payment during the fiscal year ended October 31st, 1933.

ENFORCEMENT OF THE ACT

This branch of departmental activity is delegated to the Field Service division, re-organization of which was commenced in 1934. In addition to the regular staff of officers maintained by the Department for this work, enforcement of the Game and Fisheries Act is also provided by members of the Provincial Police force, which system of additional assistance was inaugurated September 1st, 1934. The co-operation which thus exists between Game and Fisheries Overseers and Provincial Constables, has resulted in improved enforcement. It is also encouraging to the Department to note the increasing interest which is being taken in this branch of the work by sportsmen who are sufficiently concerned with the preservation of our fish and wild life resources, as to offer their voluntary services in the capacity of Deputy Game and Fisheries Wardens, and as such are authorized to assist in the matter of securing proper observance of the Regulations. During the year 1934 such appointments to the number of 717 were issued, many of whom are in close contact and co-operate with various members of the permanent Field Service or enforcement staff, particularly those stationed in that portion of the Province lying south of the French and Mattawa Rivers.

Records show that there were 491 cases in which offenders were apprehended and charged with violations of the provisions of our Act and Regulations, and in which convictions were secured. Fines and costs assessed and collected in these cases are as shown in the statement of revenue previously submitted in this Report.

In all, there was a total of 1036 cases in which seizure of goods and equipment was involved, and the following is a summary of the articles thus placed under seizure:—

Pelts	1,967	Boats—	
Deer and Moose Hides	9	Gasoline	4
Live Animals and Birds	68	Row	9
Fish (lbs.)	18,027	Steam Tug	1
Fish (nos.)	900	Canoes	7
Gill Nets (pcs.)	310	Punts	9
Gill Nets (yds.)	7,526	Motor Cars	4
Dip Nets	33	Jacklights and Lanterns	8
Hoop Nets	26	Deer and Moose	11
Seine Nets	23	Venison (lbs.)	640
Trap Nets	5	Moose-meat (lbs.)	325
Hooks	231	Partridges	316
Spears	61	Geese and Ducks	27
Rods and Lines	33	Pheasants	53
Lines	194	Decoys	51
Creels	3	Ammunition—Rounds	236
Tackle Boxes	10	Rabbits	19
Traps	1,001	Quail	10
Firearms	301	Miscellaneous	134

In accordance with the practice which was in effect in previous years, these confiscated articles, except those which were returned by sale to their original owners, were disposed of by tender at public sales, notice of which was advertised in the press. The amount derived from these sales is also shown in the statement of revenue incorporated in this Report.

REPORT OF THE EXPERIMENTAL FUR FARM

While pelt values have declined in common with other commodities during the past few years, 1934 saw a distinct increase in the demand for information regarding the ranching of fur-bearing animals in captivity. The silver black fox still retains its position as the most important species of fur bearer, both in numbers and in economic value, but mink are coming very rapidly to the fore in fur farming operations. It is encouraging to note that mink breeders are beginning more and more to realize the necessity for producing a pelt which will meet the highest requirements of the fur trade if breeding operations are to be carried out on a profitable basis. In some quarters there is an impression that ranch-bred mink are invariably inferior to those trapped in the wilds. This impression has been created by the number of inferior mink pelts which have come from ranches where the foundation stock is of poor quality. On the other hand, when the foundation stock has the right colour and texture of fur, the auction sales have clearly shown that ranch-bred mink can fetch the highest prices and equal in quality trapped mink coming from localities which produced the most desirable pelts.

The rapid advancement of mink breeding has called for considerable investigational work into some of the conditions arising among these animals when bred in captivity. Further studies of mink anaemia were made during the year which substantiated and augmented previous findings. This disease has a wide distribution throughout the Dominion and has been responsible for serious losses on many

ranches. It has been found that the disease can be entirely prevented by the feeding of beef liver. Liver is also curative in the early stages. Fish is a common article of diet for the mink but it should be noted that fish liver does not seem to possess, for mink at least, the anti-anaemia properties present in beef liver. Two diseases of major importance have made their appearance among mink during 1933-34. One of these diseases attacks the suckling females when the kittens are between five to six weeks of age. The affected females lose flesh rapidly and there is a complete cessation of the flow of milk. The appetite is completely lost and the animal becomes partially paralysed in the hind quarters and frequently dies in a coma. Convulsions often take place before the comatic condition is reached. The disease appears to be of metabolic origin but considerable work will have to be done in an attempt to discover the true cause of the condition so that preventive measures can be worked out to offset the disease.

The other disease encountered is caused by a sarcophagid fly *Wohlfahrtia vigil*. This fly was first reported by Walker in America in 1920 and in 1931 Dr. Norma Ford described the results of an attack made by these flies on an infant two weeks old. Since this date this fly has been found attacking young mink to the extent that it may become a serious menace. The fly deposits its larvae on the young suckling mink which burrow into the skin resulting in small abscessed lesions. If sufficient of these lesions are formed, the young mink will die from the effect. Within two to three weeks the adult fly hatches from the larvae and in a few days mate and in turn commence to deposit their larvae. The flies do not apparently attack adult animals; only the young are affected. It is not yet possible to state how serious a menace these flies may become but preventive measures can be taken by screening the mink houses during the season when the flies are active. A new type of mink house was built during the summer with the primary object in view of guarding against infestation with these flies. The layout appears to have been successful as no larvae were deposited on any of the Farm stock.

Observations were made on different rations and their general effect on the nutrition of mink. There is still, however, a great deal of work to be done in this respect. The question whether mink should receive just sufficient water for drinking purposes or whether they should be given sufficient water to allow them to bathe is one that is frequently asked. This year both methods were employed with the quite definite results that where the mink were allowed to bathe, the fur was off colour and distinctly singed. Those given only drinking water grew a pelt which was satisfactory in colour and texture. There also appears to be no question that shade is essential in securing a desirable colour. Mink which are marked for pelting in the Fall should be kept in shaded quarters and not exposed to the weather.

In addition to these observations, a number of parasites were collected from post mortem examinations and have been forwarded to parasitological institutes for identification. In this connection the feeding of fish, especially from sluggish waters appears to be fraught with danger to mink breeders as a number of the parasites of mink spend some part of their life cycle in the fish. The Experimental Fur Farm strongly advocates the removal of the entrails of all fish before feeding and under certain conditions it may be a wise precaution to place fish that are being fed to mink in boiling water for fifteen to twenty minutes.

During the year, a bulletin was prepared dealing exclusively with the fox and it is hoped that this bulletin will, to some extent, meet the requests for information from not only established fox breeders but from those contemplating engaging in the industry. All through the breeding season examinations were made of the sper-

matozoa of male foxes. It was found that there was a considerable variation in the morphology and virility of different foxes. In some cases pup males were found to be sexually active but the spermatozoa was immature and while the majority of young males are fit for reproductive purposes, fox breeders would be ill-advised to pelt desirable females that have failed to conceive when mated with pup males. Much valuable information can be gained by an extension of this work; particularly in regards to the period in each year during which the male can achieve conception. The rutting period in some adult males appears to only last for two or three weeks and if he has been used polygamously, it would be a serious error to place him at the end of the season with a young female which had not yet come in heat for it may be possible that he is quite indifferent once his rutting period is over.

A beginning has been made to make a thorough study of the assimilability and digestibility of various feeds fed to foxes. There is a great need at the present time for more accurate and definite information on this subject than is at present available.

The Staff took part in the summer school for Fox Breeders held at the Ontario Veterinary College, Guelph, and also spoke at the regional meetings held by the Ontario Fox Breeders Association, at Priceville, Barrie and Arnprior. These meetings were well attended and some very useful discussions took place which were felt to be helpful to all those engaged in the raising of foxes and mink.

In addition to the above investigations, the usual routine work was carried on, including correspondence, which has shown a remarkable increase over the previous year. A large number of visitors, including fox and mink ranchers, called at the Farm seeking information on many varied subjects. From time to time, visits were made to ranches on requests by owners who wished to discuss either questions of disease or ranch management.

REPORT OF THE FISH CULTURE BRANCH

During the year every effort was directed towards ways and means of producing more and better fish in our hatcheries and rearing stations, for distribution to suitable waters.

For a number of years hatchery officers have been responsible for planting hatchery products under careful supervision. Judging from the gratifying reports received by the Department, the work of these planting crews has been commendable and satisfactory.

The findings of the fish planting surveys and laboratory studies are carefully analyzed and applied to our varied problems, which have for their ultimate objective the maintenance of our important marketable and game-fish.

The following paragraphs are devoted to a brief discussion of the various species of fish cultured, the output for the year being compared that of the previous one.

SPECKLED TROUT:

Although the total speckled trout distribution was 12.7 per cent. less than the previous year, there was an increased distribution of 307,000 fingerlings and 6,525 yearlings. The number of adult speckled trout planted was slightly in excess of the number planted in 1933. There were no importations of speckled trout from outside sources.

BROWN TROUT:

Brown trout plantings to date have not brought the results anticipated. Anglers complain that they cannot catch them with the usual baits employed for the purpose.

Fourteen thousand five hundred yearlings were distributed or over twenty times as many as the previous year. When these become established it is to be hoped that good fishing will result in waters where they have been distributed.

RAINBOW TROUT:

Production of this important species was twelve times greater than in 1933; this was the result of more intensive field operations for the collection of spawn from natural waters in the vicinity of Owen Sound and Sault Ste. Marie, as well as from our own domesticated stock of breeders.

In addition, the Department succeeded in obtaining a small supply of eyed rainbow trout eggs through the courtesy of the Department of Conservation, State of Minnesota. The eggs in question were taken from fall spawners and will be valuable from the standpoint of fish cultural experimentation in our waters. It is reported that this particular strain has a tendency to remain in the waters in which it is planted, grows rapidly and can withstand fairly high temperatures.

Consignments of rainbow trout yearlings and fingerlings and brown trout yearlings were introduced into two spring-fed trout lakes in Algonquin Park. A preliminary fish planting survey was made, a very large percentage if not all the native trout and coarse fish was removed and the outlets screened before the pond-cultured fish were planted. If successful these plantings will establish a source of supply for the spawn of these species from time to time. These lakes are closed to all fishing and the greatest assistance has been given in the way of protection and in many other useful ways by the Superintendent of the Park and his associates.

KAMLOOPS TROUT:

The Department succeeded in obtaining a consignment of eyed Kamloops trout eggs through the courtesy of the Department of Fisheries, British Columbia. The Kamloops trout occurs in a number of lakes in the dry belt of British Columbia,—that is Kamloops, Okanogan, Kootenai and other tributaries to the Fraser and Columbia Rivers. This is a very interesting trout of large size, slender in form and graceful in appearance and movement. It resembles its close relative the steel-head, but it is reported that it does not show the same tendency to descend to the sea, preferring to remain permanently in freshwater. It is one of the most popular game-fishes of the interior waters of British Columbia and is taken by trolling with a spoon. Studies reveal that its requirements are in many respects similar to those of speckled trout and results following its introduction to certain trout waters in Ontario will be awaited with considerable interest.

OUANANICHE:

Through the courtesy of the Fisheries Department of the Province of Quebec, we succeeded in obtaining a small consignment of eyed ouananiche or land-locked salmon eggs. The ouananiche is a relative of the Atlantic salmon, one of the chief centres of its abundance being Lake St. John in the Province of Quebec. It seldom descends to the sea, spending its life-time in fresh water by choice rather than necessity. It spawns in the tributaries to Lake St. John and the report that it spawns on lake trout shoals as well, has not been definitely established.

LAKE TROUT:

There was a slight drop in the total number of eyed eggs, fry and fingerlings of this species distributed in 1934, but the proportionate number of fingerlings distributed was very satisfactory, namely 89 per cent. A drive to increase the quantities of fry and fingerlings planted in inland waters met with some success and will be pushed forward as far as economic conditions will permit.

WHITEFISH:

The quantity of whitefish fry distributed in 1934 was only slightly in excess of that distributed in 1933, but the total distribution in 1934 was only exceeded in 1924, 1927 and 1929.

HERRING:

There was a decrease in distribution of 5,293,000 herring fry as compared with the previous year. Lake herring spawn late in November and in early December and the gales on the lakes during this period prevented successful spawntaking operations to a considerable extent.

YELLOW PICKEREL, PIKE-PERCH OR DORÉ:

Yellow pickerel spawntaking operations, which for the most part were discontinued in 1933 on account of financial conditions, were resumed with greater zeal in the spring of 1934, so much so that the distribution exceeded that in 1932 by, approximately, 25,623,000. Satisfactory quantities were planted in game-fish waters.

The co-operation of our commercial fishermen on the Great Lakes in connection with the collection of spawn of commercial species was highly commendable and accounts to a very large extent for the successful harvest of various species.

BLACK BASS (SMALL-MOUTHED):

Although there was a decrease in the number of small-mouthed black bass fry distributed, there was an increase of ten thousand in the fingerling production as compared with the previous year.

The culture of this most important game-fish is being extended to the eastern section of the Province. A two-acre pond has been constructed at the outlet of White Lake, Olden Township, Frontenac County. If this venture proves a success, additional ponds may be constructed in that vicinity.

LARGE-MOUTHED BLACK BASS:

From one small pond devoted to the culture of large-mouthed black bass at Mount Pleasant 35,250 fry and 4,250 fingerlings were successfully distributed.

MASKINONGE:

For a number of years maskinonge eggs were collected during the spawning season in the Pigeon River, vicinity of Omemee. The eggs were cultured to the fry stage in a small temporary hatchery supplied with water direct from the river. This year a second collecting field was operated at Beaver Creek, Crow Lake, Hastings County and the eggs secured there were cultured in the Belleville Hatchery. Approximately nine hundred and nine thousand fry were distributed or more than seven times the quantity distributed in 1932.

Careful experiments were conducted with the object of determining the limiting factors in the culture of this species from the fry to the fingerling stage, and the results of these studies in detail will appear in the Transactions of the American Fisheries Society for 1934.

Briefly it may be stated that the controlling factors in maskinonge culture are two fold, namely:

1. A sufficient supply of suitable live food must be obtainable at all times.
2. The cannibalistic tendencies of the young maskinonge must be overcome.

FISH PLANTING SURVEYS:

The following fish planting surveys were carried out during the year:

WATERS	COUNTY	TOWNSHIP
Mill Pond (Chepstow)	Bruce	Greenock
Bowling Green	Dufferin	Amaranth
Butler Creek	"	Garafraxa East
Caldwell Creek	"	Mono
White's Creek	"	Amaranth
Salmon Lake	Hastings	Near St. Ola
Burnt Lake	Haliburton	McClintock & Sherbourne...
	Muskoka	Franklin and Ridout
Sheldon Lake	Haliburton	Lutterworth

Edgely Creek	"	York
Grenadier Pond	"	"
Massey Creek	"	"
Sider's Pond	"	Whitechurch

SANCTUARY SURVEYS

Partial or complete closure of bodies of water as bases of supply for replenishing other waters, for self-replenishment or for the purpose of building up a properly balanced relationship among all the organisms in a body of water closed in its

entirety, is being given more and more attention each year in connection with the Department's conversational activities, and studies are being carried out on waters with such objects in view.

CLOSED WATERS

The following waters were closed to all fishing during the year for the purpose and for the period specified:

Beaver Creek—From Fidler's Rapids to outlet at the Crow River, Lots 10 and 11, Concession 4 and Lots 11, 12, 13, 14 and 15, Concession 5, Township of Marmora, County of Hastings; closed until and including June 30, 1937.

Chub Lake—Located in the Township of Gould, District of Algoma, closed until January 16, 1936.

Deep Bay (Sparrow Lake)—Lots 3 and 4, Concession 13; Lots 2, 3, and 4, Concession 14; Lots 2 and 3, Concession 15; Township of Matchedash, County of Simcoe; closed until July 9th, 1939, for black bass propagation.

Jobamageshig Lake—Located in the Townships 188 and Gould, District of Algoma; closed until January 16, 1936.

Mannheim Creek—From its headwaters to Hallam's dam, flowing through the following lots, namely 4, 5 and 6, S.R.S.; 2, 3 and 4, B.R.N.; 2, 3 and 6, B.R.S. and 3, 5 and 6, Concession 1, Township of Wilmot, County of Waterloo; closed until April 30, 1936, for speckled trout propagation.

McGowan's Lake—Township of Sherbrooke south, Concession 7, Lots 18 and 19, Lanark County; closed until January 16, 1937, for forage fish propagation.

POLLUTION SURVEYS

As a result of complaints lodged with the Department, pollution investigations were conducted on Burlington Bay, near Hamilton and the Speed River at Hespeler and Preston.

Oxygen depletion during the winter in the waters of Lake Scugog was also investigated.

SURVEYS PERTAINING TO DAMS AND OTHER OBSTRUCTIONS

The dam at the outlet of Gull Lake on Beaver Creek, Hastings County, was inspected with reference to the practicability of introducing fishways.

Obstructions in streams connecting a chain of lakes in the vicinity of Kaladar, Lennox and Addington, were also investigated.

BASS HARVESTING SURVEYS

Investigations pertaining to the possibility of harvesting bass from the following waters were conducted, namely, Clear Lake, Haliburton County, and the Salmon River, vicinity of Napanee, Lennox and Addington.

FISH TAGGING EXPERIMENTS

The Branch undertook the tagging of fifty rainbow trout in the vicinity of Owen Sound after spawntaking operations with these had been completed. The fish were not tagged immediately after spawning, but were given some days to recuperate. After being tagged they were released above the dam on the Sydenham River at Owen Sound. A record was kept of the number of the tag appended to each fish, the date, the length of the fish in inches and the sex of each.

The object of tagging in this instance was to determine whether rainbow trout will migrate downstream over the dam at Owen Sound during the summer or whether they remain in the stream above the dam more permanently.

LABORATORY STUDIES

These may be classified for brevity and convenience into three groups:

1. Taxonomic:

This involved identification of fish and other organisms submitted from time to time.

2. Pathological Problems:

Confined to mortality among fish in a state of nature and also those under domestication. The interest, importance and value of fish pathology with the progressive development of fish cultural work cannot be overestimated.

3. Experiments

During the year studies were made of the effect of the use of a salt solution (physiological saline) in prolonging life of the sperm and the effect of this on the increased hatchability of trout eggs. Similar experiments were tried out by adding saline solution to the ova during the fertilization process. The results of these studies will appear in the Transactions of the American Fisheries Society for 1934 and the Branch hopes that work of this nature may be continued in order to obtain further knowledge of this very important subject.

ACKNOWLEDGMENTS

In conclusion, I desire to publicly express my appreciation of the assistance and support which has been rendered to the Department throughout the year, and more particularly during the period of my active connection therewith.

Our work has been made more pleasant by reason of the assistance and co-operation supplied by the transportation companies and the various Fish and Game Protective Associations, with the members and officers of many of which organizations enjoyable personal contact has been completed to the future advantage of both the Department and the organizations concerned, and which organizations work in conjunction with the Department and its officers in an earnest endeavour to secure proper observance of the provisions of the Game and Fisheries Act for the general improvement of conditions throughout the Province.

All of which is respectfully submitted.

I am, Sir,

Your obedient Servant,

D. J. TAYLOR,

Deputy Minister of Game and Fisheries.

Toronto, April 15, 1935.

APPENDIX No. 1

SPECIES AND QUANTITIES OF FISH PLANTED IN PROVINCIAL WATERS, 1934.

REPORT OF THE DEPUTY MINISTER OF LABOUR

TO THE HONOURABLE A. W. ROEBUCK,
Attorney-General and Minister of Labour.

SIR:

I have the honour to submit to you the following Report of the Department of Labour for the fiscal year ending October 31, 1934.

EMPLOYMENT CONDITIONS

A substantial improvement in employment conditions prevailed throughout the Province during the year, although there were minor set-backs in the upward trend which commenced the middle of the previous fiscal year, but these were of a temporary nature. Increased employment was apparent in almost all classes of activity and in all sections of Ontario.

The index number of employment, as reported by the Dominion Bureau of Statistics, was 99.5 for the year, as compared with 82.9 for 1933 and 91.1 for 1932. This advance of 16.6 points is the greatest change indicated for any year since 1921, and on October 1, 1934, the index number stood 15.2 points higher than at the same time last year. The index number of employment is based upon the average for the calendar year 1926 as 100.

Greatest increases in activity were reported in the construction industry, the index number of which was more than double that of last year, and in the logging industry, the index number of which almost tripled that of 1933. Mining, the manufacturing industry as a whole, services and trade ranked next in order of improvement. Slight decreases were recorded for communication and transportation groups.

A considerable portion of the increase in the construction industry was undoubtedly due to unemployment relief works on highways. However, the fact that the value of building permits issued in 30 municipalities in Ontario during the year showed an increase of approximately 35 per cent. over the previous year indicates a substantial improvement in building construction also. The total value reported for 1934 amounted to \$12,807,744 as compared with \$9,482,217 for 1933.

In addition to this evidence of progress in employment conditions a decrease in the volume of unemployment was shown among trade union members. The percentage of unemployment among trade unions reporting to the Federal Department of Labour averaged 19.2 as compared with 24.9 for last year and 22.5 for 1932, or 5.7 and 3.3 points respectively lower than those of the two preceding years.

Further indication that industry is on the upward grade in Ontario is evident in the report of the Examiner of Plans in the Factory Inspection Branch of the Department of Labour. The estimated value of plans for factory, shop and office buildings which were submitted to the Branch for approval amounted to \$6,426,550 for the year,

as compared with \$2,534,000 in 1933, which was the lowest figure for any year on record. The fact that this year's figure was more than two and one-half times that of last year and approximately 45 per cent. greater than that of 1932 shows a decided step towards recovery.

The number of plans submitted to the Branch totalled 202, as compared with 115 in 1933. To quote from the report of the Examiner of Plans:—

“A significant feature in the year's record is the large proportion of the building which is being done by firms who are already established in the Province and are adding to their plants. Over one-half of the buildings for which plans were approved come within this class and it must be considered a most encouraging sign that firms who have struggled through the depression, now consider that the time has come to provide for increased business.”

The reports of the Employment Service and of the Boiler Inspection Branch also indicated this general improvement in industrial conditions.

INDUSTRIAL UNREST

Greater efforts than ever before were put forth by the Department of Labour to re-establish and maintain harmonious relations in industry. The need for such action was pressing. During the fiscal year 1934, there were 94 industrial disputes recorded for Ontario in the Federal Department of Labour; 18,198 employees were involved in these disputes and 256,311 working days were lost by these employees.

Compared with the years during the period from 1921 to 1934, there were in 1934 more strikes than in any other year of the period and more employees involved. The amount of time-loss was greater than in any year since 1922.

Early in the year a request was made to the Department for intervention in a dispute in a boys' clothing factory in Toronto and upon complaint that wages lower than the minimum established by the Minimum Wage Board were being paid the workers, an investigation was undertaken. The result of this action taken by the Board was the payment of arrears of wages by the employer, as well as a fine for breach of the Minimum Wage Act. The dispute was finally settled after a period of four months.

The assistance of the Department was sought in connection with a threatened strike of 100 female employees in a women's clothing factory in Toronto. Negotiations brought about with the firm, the union and the employees concerned resulted in a satisfactory adjustment so that a strike was averted. The efforts of the Department in the case of an alleged lockout of girls in the same firm later in the year were less successful. In spite of representations made to the firm on behalf of the girls by women's organizations and others, the firm declined to reinstate all of the employees affected.

The disputes in several boot and shoe factories in the Province received the attention of the Department in an effort to bring about speedy settlements. In some cases, however, clashes between the strikers and the municipal authorities took place before the strikes were finally terminated.

This was also true in connection with certain other disputes, such as one in Stratford and a clothing workers' strike in Guelph. In the latter case it was only after long and persistent efforts on the part of this Department that an agreement was brought about between the parties concerned. In connection with this strike and others in the

clothing industry, the difficulty at the root of the matter seemed to be the unfair competition due to the operations of the small jobbers. Skilled operators have severed their connections with employing firms and set up machines in their homes where they work long hours turning out clothing which they can sell to jobbers at low prices because of the low production cost. The jobbers, in turn, sell to the trade at a price lower than that of the approved manufacturers.

Three of the clothing firms where strikes took place during the year came to an agreement whereby the then Deputy Minister of Labour is to act as arbiter in the event of an agreement not being kept.

Intervention was also made by the Department in connection with the strike of compositors in London upon request from that city, but the strike remained unterminated at the close of the fiscal year.

Particulars of other strikes in which there was no intervention on the part of this Department are given on pages 73-81 in the appendix of this Report. Sixteen strikes in the logging industry in Northern Ontario resulted in almost one-half the total time-loss in the Province due to strikes. In these strikes, 6,107 men were involved, with a time-loss of 123,365 days, or the equivalent of one whole year's work for 400 men.

LEGISLATION

Two Acts administered by the Department of Labour were amended during the 1934 session of the Legislature.

An amendment to the Factory, Shop and Office Building Act made new provisions regarding hours of labour in bakeshops. A maximum of 56 hours per week is set for this class of work and written permission of the inspector is required for overtime, except for overtime on the Friday of any week when a statutory or civic holiday occurs on the following Monday. Employment between 7 a.m. and 1 p.m. on Sunday, except on preliminary work, is prohibited but this prohibition does not apply to persons whose daily period of employment does not exceed eight hours between 7 a.m. and 6 p.m. and who are allowed a rest period of at least 24 consecutive hours each week. Employees working more than nine hours during any work period or during any 24 consecutive hours, except in cases covered by special permit, must be allowed at least 24 consecutive hours' rest before commencing the next daily work period.

The Minimum Wage Act was amended on several points. Where a minimum wage is established by the Board, the number of hours per week for which this wage is to be paid may not be more than 48 in municipalities of more than 50,000 population; not more than 50 hours in municipalities of from 10,000 to 50,000 and not more than 54 hours in other municipalities. If, however, the prevailing weekly hours of labour, as determined by the Board, in such industry or class of employment to which this wage applies, are less than these maximum hours, such prevailing hours are to be considered the maximum for which the minimum wage is to be paid.

A wage not less than the minimum must be paid to male employees replacing female employees at any work for which the minimum wage has been established. An employer may not discharge or in any way discriminate against any employee for lodging complaints or giving evidence regarding any breach of the Act.

An employer contravening any of the above provisions or the provisions regarding handicapped employees or apprentices, or any Order of the Board, incurs a penalty

of from \$25 to \$500 for each employee affected, instead of from \$20 to \$200 as formerly. In addition, he is liable to pay to the Board all arrears of wages of such employees for a period not exceeding one year prior to the laying of the complaint. The maximum penalty for failing to keep records or for obstructing any member of the Board is raised from \$20 to \$100 and the penalty for falsifying records is now from \$100 to \$1,000 instead of from \$50 to \$300 as formerly. Provision is made for imprisonment for from two to six months upon conviction for second or subsequent offences in certain cases.

ONTARIO GOVERNMENT OFFICES, EMPLOYMENT SERVICE OF CANADA

The figures presented by the General Superintendent of the Ontario Government Offices of the Employment Service of Canada in his report for the fiscal year 1934 indicate a decided increase in the activities of these offices, with more satisfactory results in the placement of applicants. The number of vacancies reported to the 28 offices was 221,580, or an increase of approximately 56 per cent. over the number for 1933 and the number of placements was 209,870, an increase also of almost 56 per cent. There were 409,138 applications during the year.

It must not be assumed, however, that the improvement in general employment conditions in the Province was proportionate to this increase in employment opportunities reported to the employment offices, for included in this number of placements are all the men who were sent through the offices of the Service to work on various relief projects, whether municipal, provincial or federal. Greatly extended use of the Service was made in connection with projects of this nature and in certain municipalities all such placements were made through the local office of the Employment Service.

Through the clearance system, 797 placements were made of persons transferred to other centres for jobs which could not be filled locally. The operation of this system over the whole Dominion has frequently made it possible to meet demands for the importation of special workers from the United States by supplying the necessary skill from among Canadian workmen.

A special effort has always been made by the various offices to assist handicapped ex-service men in getting employment and in Toronto and Ottawa the Federal Government has provided a special staff in the employment offices for this purpose. Of such applicants, 3,480 were placed during the year, which number represents approximately 56 per cent. of those registered. The Federal Department of Labour also bears a considerable portion of the cost of administration and operation of the provincial offices of the Service.

In Toronto a new building was erected during the year for employment office purposes exclusively, the only building of its kind on this continent. All the labour employed on the construction of the building was recruited through the employment office and over 5,000 men were given from two to six weeks' work. Publicity has been given the work of the Employment Service and at present the General Superintendent is supplying information to the public concerning employment opportunities through the medium of weekly broadcasts.

FACTORY INSPECTION BRANCH

The forty-eighth report of the Factory Inspection Branch shows an increase in the responsibility carried by the Branch for the year, although the inspectorate was

understaffed for several months due to the illness and death of two of the inspectors. The number of inspections and revisits totalled 23,429, as compared with 22,364 for the previous year, or an increase of 1,065. In making these inspections the factory inspectors rendered greater assistance than in former years in connection with the enforcement of the Minimum Wage Act.

The orders issued relating to the various requirements of the Factory, Shop and Office Building Act numbered 4,851, or an increase of 596. Two hundred and forty-seven complaints were received, but this number does not include those received over the telephone, the increasing number of which indicates the interest taken by the public in such matters, due largely to the publicity given in the press recently. The applications for permits totalled 2,246, or 574 more than in the previous year. The great majority of the permits dealt with hours of labour and among these, 27 more applications than last year were for double-shift permits, 795 more were for overtime permits in factories, while the permits for overtime in bakeshops were 81 fewer than last year.

The number of industrial accidents reported, 2,446, showed an increase of 556 and 32 of these, or nine more than last year, were fatal. Seven explosions resulting in two deaths were reported to the Branch during the year, but in no case were these explosions of steam boilers coming under section 58 of the Factory, Shop and Office Building Act, which requires that all uninsured steam boilers receive annual inspection.

The Factory Inspection Branch, in co-operation with the Industrial Hygiene Branch of the Department of Health, has been active in checking cases of industrial diseases, 16 of which were reported during the year. A great deal has been accomplished in safeguarding the health of workers by remedying conditions where hazards were present and by educating both employers and employees in the precautions necessary to avoid danger in connection with certain processes.

BOILER INSPECTION BRANCH

The designs of all steam boilers, air receivers and other pressure vessels to be constructed for use in Ontario must receive the approval of the Boiler Inspection Branch and be allotted a registration number. During the fiscal year 1934, 289 drawings and specifications were surveyed and registered, as compared with 251 the previous year, and 43 were returned to the manufacturers for revision.

The Boiler Inspection Branch has jurisdiction also over the inspection of boilers and other pressure vessels while under construction, and during the year 491 first inspections, 336 second and 486 final inspections were made of these new pressure vessels. This total of 1,313 inspections was 616 more than the number in the previous year.

Used boilers and other pressure vessels, when being sold, exchanged or extensively repaired, must be inspected by the Boiler Inspection Branch and annual inspections of boilers may be made by the Branch upon request of the owners or users. Of such pressure vessels, 1,630 inspections were made, or an increase of 90, as compared with last year, although the number of annual inspections decreased by 109.

The number of certificates issued by the Branch, 2,004, shows an increase of 399. Of these certificates, 1,184 were issued for new boilers and pressure vessels, which is an increase of approximately 44 per cent. as compared with last year. This increase indicates a decided upward trend in the boiler industry as well as in industry in general.

The monies transmitted to the Treasurer of Ontario for the fiscal year amounted to \$14,636.80, an increase of \$2,416.81 over 1933.

BOARD OF EXAMINERS OF OPERATING ENGINEERS

The Board of Examiners of Operating Engineers reported a total of 16,250 certificates issued during 1934, as compared with 16,516 in 1933. Every engineer of steam, refrigerating, hoisting and traction plants, to which this Act applies, is required to hold a certificate from the Board before operating in Ontario, and these certificates must be renewed annually. The certificates are classified as follows:—295 firemen's certificates, 5,092 fourth-class, 4,801 third-class, 2,596 second-class, 252 first-class, 1,701 hoisting, 1,109 traction, 296 duplex and 108 plant registration certificates. Although the total shows a decrease of 266, it is interesting to note an increase of 15 in the number of first-class certificates issued, there being also increases in the number of firemen's and duplex certificates. Of the certificates issued, 1,032 were granted upon examination, 13 were provisional, 17 duplicate, 108 plant registration certificates and 15,080 were renewals.

During the year, 1,486 candidates sat for examination, an increase of 45 as compared with last year. Of this number, 601 were examined at the head office in Toronto and 885 at outside centres where 59 examination sessions were arranged to suit the convenience of the candidates.

The net revenue of this Branch amounted to \$24,522.60, as compared with \$23,177.06 in 1933, or an increase of \$1,345.54. The members of the Board have issued to date six text books suitable for the use of engineers. The sale of these books brought a revenue of \$1,729.40 during the year.

APPRENTICESHIP BRANCH

It was not possible during the year to extend operations under the Apprenticeship Act owing to the continued lack of employment opportunities for apprentices in the building industry. There were, however, 15 new apprentices registered, as compared with 27 in 1933, and 185 completed their apprenticeship training, as compared with 193 in the previous year.

It was considered advisable to strike from the rolls those apprentices who were not actively engaged in learning their trades. A total of 134 such contracts were, therefore, cancelled during the year, but with improved conditions in the industry, it is anticipated that many of these boys will be able to take up work at their trades again and complete their training.

Through the transfer of the assessment officer, two of the inspectors and several clerks to the Minimum Wage Board, the staff of the Apprenticeship Branch was reduced to the minimum sufficient to carry on until an improvement in conditions arouses fresh interest in the apprenticeship system.

Since the Apprenticeship Act came into operation in 1928, 1,031 apprentices have completed their training and at the end of the fiscal year 343 were indentured and receiving training at their trades. These figures indicate that any sudden revival in the building industry would result in a dearth of both skilled mechanics and apprentices.

CAISSON INSPECTION

During the fiscal year 1934 there was little activity on caisson and tunnel work and, with the exception of three large jobs in Ottawa, only a few small contracts were carried out in the Province. The work in Ottawa consisted of three sewers ranging in diameter from four feet to four feet six inches, engaging about 130 men working in three eight-hour shifts. It is gratifying to report that not one serious accident happened throughout the whole of these operations, due no doubt to the splendid co-operation between contractors, workmen and caisson inspector and the adherence to the regulations for the protection of men engaged on work of this nature. When no caisson or tunnel work was in progress, the caisson inspector undertook inspection duties for the Boiler Inspection Branch and the Factory Inspection Branch.

CHANGES IN PERSONNEL

In the new Cabinet which was formed when the Liberal Party was elected to power in June, 1934, the Honourable A. W. Roebuck, Attorney-General, was also assigned the portfolio of Labour. As Minister of Labour, Mr. Roebuck succeeded the Honourable J. M. Robb, who had undertaken this portfolio formerly held by the Honourable J. D. Monteith, whose death in January, 1934, was noted in the Report of last year.

My appointment as Deputy Minister followed the transfer in August of Mr. A. W. Crawford, former Deputy Minister of Labour, to become Chairman of the Minimum Wage Board.

It is with regret that we report the deaths during the year of two members of the factory inspectorate:—Mr. H. A. Clark of Toronto, who died on June 15, 1934, and Mr. W. T. E. Brennagh of Hamilton, who died on October 23, 1934. They had both given long and valued service to the Department, Mr. Clark's covering a period of 27 years and Mr. Brennagh's 21 years. During this time they had won a host of friends through their efforts in all matters pertaining to safety and the improvement of general working conditions in the factories of Ontario. Their deaths have meant a decided loss to this Department.

Another change took place in the factory inspectorate when Miss Hamilton, an inspector in the Ottawa district for 12 years, resigned in January, 1934. Miss Hamilton was succeeded by Miss Kate Reesor, who was promoted from the clerical staff of the Toronto office, where she had become familiar with the duties of the factory inspectors.

Mr. E. J. Everett, Inspector for the Board of Examiners of Operating Engineers, was superannuated on March 20, 1934, after 23 years of efficient and faithful service with the Government, the last ten years of which were with the Department of Labour. Because of his ability, long experience and personal qualities, Mr. Everett was able to render great assistance to the Board in the administration of the Operating Engineers Act.

In the Employment Service there were three changes among the superintendents during the year. On March 15, 1934, Mr. George Hamilton, Superintendent of the Oshawa Office, was transferred to take charge of the Ottawa Office, and Mr. Rae Halliday, formerly of the Ottawa Office, took over the duties in Oshawa. Mr. George Ross, for 11 years Superintendent of the Pembroke Office, resigned in October, 1934, and Mr. P. J. Hennessy was appointed to the position.

At the end of the fiscal year several changes were made in the staff of the Apprenticeship Branch. Mr. George Chambers, the assessment officer, became auditor for the Minimum Wage Board and Mr. Fred Hawes and Mr. Charles Needham, inspectors, were also transferred to the Minimum Wage Board as investigators. In their new duties, however, they continue to obtain reports and make inspections for the Apprenticeship Branch when required.

CONCLUSION

A feature of the work of the Department of Labour which has been developed considerably during the past year is the assistance being given upon request by the officials of all the branches in work connected with branches other than their own. This closer co-operation has resulted in greater efficiency and economy in administration. It is of special value in connection with the outlying districts when an official located in an outside centre or an inspector on his rounds can undertake an investigation, inspect a payroll or collect information required for another branch.

In concluding this brief survey of the work of the Department of Labour, most of which was accomplished prior to my appointment as Deputy Minister, I should like to pay tribute to the loyal services rendered by the members of the staff. I wish also to acknowledge with appreciation the support which employers and employees have given the officials of this Department in their efforts on behalf of the workers of the Province. The present results could not have been achieved nor can the present standards be improved without this harmonious relationship and the ready compliance of those directly concerned with industry.

I have the honour to be, Sir,

Your obedient servant,

J. F. MARSH,

Deputy Minister of Labour.

Ontario Government Offices, Employment Service of Canada

GENERAL SUPERINTENDENT—H. C. HUDSON

INTRODUCTION

On the following pages will be found the eighteenth annual report of the Ontario Government Offices of the Employment Service of Canada, covering the fiscal year ending October 31, 1934.

During the past five years the story of the different superintendents has been the story of a scarcity of jobs in contrast with a surplus during previous years. It is a comparatively easy matter to conduct a public employment office when there are more jobs than men, but to distribute five jobs among probably one hundred qualified applicants, all anxious to secure work, without being accused of favouritism, requires tact and diplomacy of the highest order.

As General Superintendent, I feel that this task has been accomplished to a very high degree. The evidence of this statement is the fact that not once has there been a serious disturbance in any of the twenty-eight offices throughout the Province. It is true that there have been disgruntled men and women among the applicants. This is inevitable; but there has been no concerted attack on the administration of the Service during a very difficult period. The necessity for courteous treatment of applicants has been impressed on the staff at all times, and they have responded in a most satisfactory manner, in spite of the nervous strain under which they have been working. The citizens of the Province are entitled to a great deal of credit for their reasonable attitude and for the spirit of co-operation which they have shown during a period of great hardship.

TORONTO OFFICES—NEW BUILDING

Probably the outstanding event of the year was the construction of a new building to house the Toronto offices of the Employment Service. The local office commenced operations in 1917 in premises on Bay Street, with a floor space of less than one thousand square feet. The next move was to more adequate premises on King Street East, followed by a move to King Street West. Then, for ten years, a shed on Front Street housed the men's office, while the women's office was located in a basement on Richmond Street West. With the demolition of both these premises for building purposes, the women's office moved to two adjoining stores on Church Street, while the men's office occupied most unsuitable space in a building at the corner of Church and Adelaide Streets.

Early in April, 1934, work was commenced on the new premises, and all the labour employed was recruited from the applicants registered at the Employment Office, over 5,000 men securing from two days' to a week's work on the building. Modern in every respect, the office provides 15,000 feet of usable floor space, exclusive of corridors, boiler room and store-rooms. It is the only building on the North American

Continent constructed exclusively for employment office purposes, and provides tangible evidence of the recognition which this Service has earned.

UNEMPLOYMENT RELIEF PROJECTS

The topics covered in the various reports of the superintendents provide evidence of the effectiveness of a chain of public employment offices in bringing together work and workers with the minimum of delay. Placements on relief work were made on municipal relief projects, provincial construction projects, provincial highway projects and federal airport and relief camp projects. In the following centres, amongst others, the major portion of municipal unemployment relief work, if not all of it, was handled through the local office of the Employment Service:—Kingston, Oshawa, Toronto, Brantford, Niagara Falls, London, Sarnia, Timmins, Port Arthur and Fort William. The municipal authorities have, on different occasions, expressed their appreciation of the co-operation received in this connection.

The co-operation with Provincial Government Departments has involved the placement of tradesmen and labourers on building construction projects in Toronto, Stratford, London, Belleville and Kingston. During the spring of 1934 the Department of Highways requested the assistance of the local offices in the selection, placement and rotation of approximately 15,000 men on highway shoulder-widening, ditch filling and grading operations. Temporary offices were established during the year at Marmora, Kaladar, Shelburne and Flesherton, at the request of the Department of Highways. The representatives of the Employment Service at these points co-operated with the mayors, reeves and relief officers in the recruiting and rotation of men on the various highway construction projects.

During the fiscal year eleven out of twenty-eight offices were instrumental in placing a total of 4,978 men in highway camps operated by the Department of Northern Development, as follows:—

North-Western Ontario.....	Fort William	677
	Port Arthur	620
		—————1,297
Northern Ontario.....	North Bay	56
	Pembroke	250
	Sudbury	61
		————— 367
Eastern Ontario.....	Ottawa	1,484
Central Ontario.....	Hamilton	200
	Kitchener	180
	London	315
	Oshawa	210
	Toronto	925
		—————1,830
	Total	4,978

The value of co-operation between the different branches of the Department was seen in the assistance rendered to the Employment Service by three inspectors of the Apprenticeship Branch. Messrs. Needham of Windsor, Johnson of Ottawa and Hawes of Hamilton worked with the local superintendents of the three offices involved in the selection and placement of men on highway construction projects. Their assistance was much appreciated.

The Ontario Employment Offices maintained throughout the year close co-operation with the Department of National Defence in the transfer of men to the various

unemployment relief projects carried on by the Federal Government at Trenton, Kingston, Long Branch, Camp Borden, and in Northern Ontario. Placements in these camps were effected as follows:—

North-Western Ontario.....	Fort William	190	
	Port Arthur	196	
			386
Northern Ontario.....	North Bay	700	
	Pembroke	790	
	Sudbury	146	
			1,636
Eastern Ontario.....	Ottawa	1,484	
	Kingston	2,316	
			3,800
Central Ontario.....	Belleville	248	
	Oshawa	122	
	Toronto	1,256	
			1,626
	Total		7,448

PLACEMENT OF FARM WORKERS

The offices continued to serve agricultural employers. In most centres the demand was above that of 1933, and with one exception, all offices reported an increase in farm wages. An interesting feature of the reports on farm placements was the improvement in the demand in Northern Ontario, where farm work retains many of the features of pioneer days, inasmuch as the orders generally call for a man who can adapt himself to clearing land, as well as farming.

IMMIGRATION AND THE EMPLOYMENT SERVICE

Close co-operation was maintained, as usual, with the other provincial links in the Employment Service of Canada through the office of the Director at Ottawa. The 1934 Agreement under the Employment Offices Co-ordination Act was signed with no change in its provisions. The benefits of this association with the federal authorities were particularly evident in connection with importation requests, where the Employment Service had the opportunity to bring forward residents of Canada for positions which might otherwise have been filled by residents of other countries. Employers have frequently expressed their appreciation of this service, as their intention of bringing in help was based on the mistaken impression that the required assistance was not available in Canada.

THE EMPLOYMENT SERVICE OF CANADA

In connection with the co-operation under the terms of the Employment Offices Co-ordination Act, the following extracts from the Sixteenth Report of the Employment Service Branch of the Department of Labour, Canada, for the fiscal year ending March 31, 1934, will be of interest:—

“The annual agreements between the Minister of Labour and the several Provincial Governments, concluded under the terms of the Act, provide that the province, in the operation of its employment offices, shall register all applicants offering themselves for employment and undertake to locate suitable workers for all employers listing vacancies, without charging any fee or commission either to employer or employee. The province further agrees that the officials of the Employment Service shall accept no responsibility with respect to rates of wages or other working conditions offered or asked, but shall merely communicate the

information available on these subjects to the applicant or the employer, as the case may be.

It is also agreed that where employment is reported to be affected by an industrial dispute, employees being referred to such employment shall be notified of this fact. Another important provision of the agreement is that the province shall make a special endeavour to place in suitable employment handicapped men suffering from the effects of active service during the war. In the agreement the provinces undertake to furnish the Department of Labour (Federal) with information relative to the transactions of the offices, industrial information, and the like. The Department of Labour (Federal) is authorized to inspect the provincial employment offices from time to time, to determine whether the conditions of the agreement are being respected."

"SPECIALIZED EMPLOYMENT WORK ON BEHALF OF HANDICAPPED EX-SERVICE MEN: One of the more important phases of the administration of the Employment Service Branch is that of specialized employment work on behalf of handicapped veterans of the late war. Until the fiscal year 1923-4 the Department of Pensions and National Health (formerly the Department of Soldiers' Civil Re-establishment) endeavoured to place in suitable employment men having physical handicaps due to war service, but since that time the Department of Labour has been charged with the responsibility of this work in all provinces except Quebec, having incorporated it into the Employment Service of Canada. The annual agreements between the Minister of Labour (Federal) and the several provinces contain a special clause in which the provinces agree to undertake in all employment offices to register and to endeavour to place employable handicapped ex-service men, while the Department of Labour (Federal) undertakes to appoint and pay in full any additional employees necessary for the providing of adequate facilities to this end at the more important points. The centres at which federal employees are loaned to the provinces for this specialized employment office work have been selected because of their relative importance as the places of residence of handicapped ex-service men. At the present time such federal employees are maintained in the provincial employment offices as follows: Halifax, 1; Ottawa, 1; Toronto, 4; Winnipeg, 1; Vancouver 3; and Victoria, 1.

The assistance given by the provincial authorities in connection with the placement of handicapped ex-service men has been most satisfactory and illustrates the degree of success encountered in Dominion-provincial co-operation to operate the Employment Service. The work of seeking to place men satisfactorily who are suffering from war disabilities is difficult of accomplishment. Certain classes of disabilities drastically limit the employment opportunities of those unfortunate enough to be afflicted with them, with the result that many avenues of employment are not open to these applicants. Further, during the past few years, due to the competition for vacancies offered by workers who are fully physically fit, opportunities for placing handicapped men have diminished to quite an extent. Due to the physical handicaps and the psychological objections to engaging disabled persons, in many instances it is not possible to place these applicants in regular employment, and only casual work can be found for them. Employers generally have shown a commendable spirit in accepting handicapped ex-service men for employment, and in many instances they have been willing to concede that in selected occupations one hundred per cent. efficiency does not demand one hundred per cent. physical fitness. Judged by the number of applications made at the employment offices by handicapped ex-service men, though it is now fifteen and a half years since the Armistice, the obligation of endeavouring to assist these men in securing work shows no considerable diminution, but seems to remain at about the same level."

During the federal fiscal year ending March 31, 1934, the Province of Ontario received in the form of a subvention from the Federal Government \$63,471.68, representing 31.6 per cent. of the gross expenditures made by Ontario for Employment Service work.

ONTARIO EMPLOYMENT OFFICE STATISTICS

To the twenty-eight Ontario Employment Offices 221,580 vacancies were reported during the year; 85,864 men and women were referred to positions of assumed permanency; and 124,006 placements of a casual nature were made. As the total of casual placements clearly indicates, a very high percentage of the vacancies were in connection with municipal, provincial or federal relief projects.

ONTARIO GOVERNMENT EMPLOYMENT OFFICE STATISTICS

Fiscal Year November 1, 1933, to October 31, 1934

Offices	Vacancies	Applica- tions	Placements

UNEMPLOYABILITY AMONG APPLICANTS

In preparing their annual reports to the Department, superintendents were asked to furnish information as to the extent and nature of unemployable applicants. The study which resulted was by no means complete, but it is illuminating in its indication of the problems faced by the unemployable group, or those who are on the borderline, due to advancing years or physical disability.

The Brantford superintendent pointed out that the depression was responsible for the laying off of many men, who, under normal conditions would have retained their jobs, but who will never be re-engaged now that their continuity of service has been broken. An interesting analysis of the various age groups among the Brantford applicants revealed the fact that 731 men out of 2,800 registered were above the age limit of 45 adhered to by many industrial concerns. In the opinion of the superintendent, many of those who are now considered as unemployable, would be recalled by industry if employment conditions improved rapidly. That condition would result from the fact that so few young men have been learning skills and trades which would be required for a rapid increase in factory production and in the construction industry.

There were registered in the Kitchener office 78 men over 60 years of age who might be classified as unemployable, so far as their chances of securing factory employment are concerned. The fact that they have, in most instances, lost all ambition complicates the problem of assisting them to re-establish themselves.

In London 14 per cent. of the applicants in the men's department were between 50 and 60 years of age, and 7 per cent. between 60 and 70. Eleven per cent. of the women registered were virtually unemployable, due to age handicaps, physical disability or poor working records.

Other estimates of the degree of unemployability among applicants were as follows:—Chatham, 38 out of 250; New Toronto, 152 out of 5,947; Niagara Falls and district, 475 men and 105 women; North Bay, 60 men and 50 women; Sudbury, 174 men, of which 62 were single and failed to pass medical examination for camps or mines; St. Catharines, 6 per cent. of applicants.

The Timmins superintendent reported that there were no unemployables among the registrations at the office, and that men at 70 years of age were active and in good health and maintained themselves by town work and odd jobs.

EMPLOYMENT CLEARANCE

It is interesting to note that the clearance system, which is such an important feature of the Public Employment Service, continued to function effectively throughout the year. The table below furnishes details of 797 placements effected through the operations of the clearance system. The largest number of placements were in the logging group with 270 transfers-out from North Bay and 202 from Port Arthur. Toronto is regarded by many employers throughout the Province as the most fertile field in their search for household workers, and as a result, the Women's Employment Office in Toronto transferred 135 domestic workers to other centres:—

HANDICAPPED EX-SERVICE MEN

As indicated in the reports of the superintendents, a special effort is made by the various offices to assist handicapped ex-service men in their search for employment. In Toronto and Ottawa the Federal Government has provided a special staff for this purpose, and a table will be found below, indicating the applications and placements among this group.

During the summer months, at the request of the Canadian Legion of the British Empire Service League, all ex-service men were given the opportunity of filling out a questionnaire with the idea of collecting full information regarding the ex-service men's particular problems in securing employment. A letter was received from the Headquarters of the Ontario Command of the Legion, thanking the superintendents of the Employment Service for their co-operation in this regard.

MISCELLANEOUS

The General Superintendent attended the convention of the Association of Public Employment Services held in Quebec in September, when interesting and profitable papers and discussions were presented by delegates representing more than half the public employment services of the United States and Canada.

Shortly before the conclusion of the fiscal year the General Superintendent commenced a series of weekly broadcasts supplying information to the public regarding employment and particulars of unfilled vacancies. The Employment Service appreciates the co-operation of the Travel and Publicity Bureau of the Ontario Government in arranging this broadcast, and also appreciates the courtesy of Radio Station CRCT, Toronto, in giving us time on the air without charge to the Department of Labour.

BELLEVILLE

The Belleville Office reported fewer demands for farm help and lower wages than in the previous year. The prevailing rates ranged from \$10.00 to \$20.00 a month for single men and for married couples \$25.00 per month with free house, garden produce, milk and fuel. An encouraging feature of the agricultural situation, however, was the increase in the output of the various canning factories in the district.

Local firms connected directly or indirectly with the building industry operated with greatly reduced working forces during the year, while many other firms were able to operate rather steadily, maintaining normal production. The only large building construction in Belleville was a dormitory erected at the Ontario School for the Deaf.

Approximately 500 men were sent to the National Defence relief project No. 28 at Trenton, where an extensive building and grading programme was being carried on in connection with the airport. The Ontario Government highway construction programme in the Belleville district absorbed 1,950 men selected under the direction of the local superintendent of the Employment Office from Belleville and the neighbouring municipalities. This office co-operated with the City Welfare Department, the superintendent being a member of the unemployment relief committee, and also acted as information centre for many different types of problems relating to employment throughout the Province.

An interesting contact was made with the Ontario School for the Deaf, through which the Ontario Offices of the Employment Service of Canada will be able to assist those leaving that school in their search for employment. The first person assisted was a totally deaf shoemaker who was offered employment in North Bay.

BRANTFORD

Probably no city of its size in Canada has suffered more severely than Brantford in the matter of unemployment. It is estimated that 60 per cent. of the unemployment in this city may be attributed to the falling off in the demand for agricultural implements, affecting three large industries and several smaller allied plants. The removal of a foundry to London and the failure of another manufacturing firm reduced by 350 the jobs available in Brantford. The textile industry, however, had a very active year, employing at the peak 1,574 men and women. While many firms did not make use of the Employment Office to the same extent as in normal years, approximately 400 factory placements were made during the year and many of the firms called upon this office to assist in locating former employees.

Dealing with the relationship between the Employment Service and the municipal authorities, the superintendent briefly states:—"It has been our privilege again this year to co-operate with the municipal authorities and the Welfare Association in the placement of workers on relief jobs." This sums up activities requiring a very large portion of time of the office staff, a great deal of tact and a large measure of assistance to the municipal authorities in handling a difficult problem, namely, the allocation of relief work amongst those eligible for this form of employment.

The local supply of agricultural labour was sufficient throughout the year to take care of all orders received. Wage rates for single farm hands ranged from \$5.00 to \$25.00 with board, the average being \$10.00 to \$15.00 per month. Day workers received from 75 cents to \$1.25 per day with board, and workers in the tobacco fields were paid from \$1.00 to \$2.00 with board included in some instances. There was an influx of transient workers for this work in the tobacco fields from all parts of Ontario and Quebec, the supply being greatly in excess of the demand, in spite of the fact that 10,000 men were employed in harvesting the crop.

While unemployment among men was abnormally high, the factories employing women and girls operated at more nearly normal capacity, so that unemployment was not so acute, as far as women and girls were concerned. Cooks-general were in demand throughout the year. The local supply was equal to the demand until the closing weeks of the year, when the demand increased simultaneously with the improvement in general industrial conditions.

CHATHAM

The placement of farm labour in the Chatham district presents variations from that which prevails elsewhere in the Province, because of the fact that the majority of the help hired in Kent County is on a day-labour basis, the men living in the city and going to and from their work each day. The transportation problem was overcome through the co-operation of the city manager who had the city truck used for this purpose. The sugar beet crop did not provide as much employment as in former years in spite of the large acreage, due to the dry weather during seeding time.

Manufacturing in Chatham showed an improvement over 1933. A local automobile company found a good demand for light delivery trucks and a firm manufacturing food products maintained the same staff as in the previous year and reported excellent business conditions in their line. The sugar factories commenced operations on their beet run, re-employing most of their former workers and some additional help. Building was at a standstill during the year, except for repairs and alterations and the construction of one hotel.

Highway construction furnished employment to a large number of men, the majority of whom were selected from the relief lists in the district. The ditch-filling programme employed approximately 500 men on No. 2 and No. 3 highways. The number of men available for the work was so large that rotation was necessary and the selection and rotation of the men were under the direction of the superintendent of the Chatham Employment Office. City relief work absorbed from 50 to 60 men, the majority being engaged in the construction of a new sedimentation basin for the Water Works Department. Sixty men were sent to the Northern Development relief camp at Rondeau Park. The men were selected in co-operation with the Relief Department and where necessary were supplied with heavy clothing by the municipal authorities.

FORT WILLIAM

The outstanding feature of the report presented by the superintendent of the Fort William Office was the increase in activity in the mining industry. This was reflected in increased business for the numerous firms in Fort William and Port Arthur catering to the needs of the mining district, particularly those engaged in the distribution of food and clothing.

Two large building projects, the Post Office and the Sanitarium, provided a stimulus to construction and employed a large number of building tradesmen. Total building permits amounted to \$600,000 as compared with \$191,250 in the preceding year.

The number of placements in the lumbering industry exceeded that of the previous year and prospects for a further improvement were seen in the fact that upwards of one million ties will be cut during the fall and winter months. The Great Lakes Pulp and Paper Mill operated steadily throughout the year, except for the shut-down of one machine for several months.

City relief work resulted in 1,814 placements during the year, as compared with 970 in 1933. The majority of this work consisted of grading and ditching roads, and the extension of water mains to the new sanitarium. With the completion of many of the sections of the highway, the camps were closed down, resulting in a decrease in the highway placements. Approximately 200 unemployed, single, homeless men were placed in relief camps operated by the Federal Department of National Defence in the Fort William district.

GUELPH

Farm placements through the Guelph office showed a marked increase as compared with 1933 and the wages offered were higher, ranging from \$15.00 to \$20.00 per month, which is \$5.00 above the average for the previous year.

During five weeks in the spring of 1934 the Guelph Office co-operated in the placement of over 400 labourers in shoulder-widening and ditch-filling on the Fergus road and on Provincial highways No. 6 and No. 7.

On March 1, 1934, the Guelph Office of the Employment Service was moved to new and greatly improved premises at 94 Carden Street. The facilities of the new office enable the staff to render better service, particularly to women applying for work and workers.

HAMILTON—MEN

A decided improvement in general industrial conditions in Hamilton was reflected in an increase in the number of placements made by the Men's Department of the

Hamilton Employment Office. In addition to larger working forces, many firms reported an increase in the working hours per week, which in the case of one large firm involved an increase of \$70,000 per month in the payroll. The principal industry appealing to the office for assistance in securing labour was the textile industry. In one instance the office was called upon to supply the skilled working force for a plant in the Maritime Provinces. There is an improvement in the type of business secured by the Employment Office, as compared with the earlier years of the Service, as employers are realizing more and more that the Service is in a position to supply skilled as well as unskilled help, and are, therefore, availing themselves of the facilities at their disposal to a greater extent than formerly.

While there is no handicapped section of the Hamilton Office, the disabled receive every consideration and assistance and 55 of them were placed in permanent jobs during the year and 148 were given casual work. In canvassing employers, representatives of the Service always stress the splendid type of disabled ex-service men and civilians who are registered at the office.

The Hamilton Office undertook the supervision of the labour supply for the programme of the Provincial Department of Highways in Wentworth and Haldimand Counties. Contact was made with municipal officers and relief departments and 3,125 men were placed in jobs throughout the winter and early spring. Reporting on the service rendered by the Hamilton Office to another Department of the Provincial Government the superintendent writes:—

“In co-operation with the municipal authorities we also arranged the outfitting, medical examination and escorting to their destination of over 200 men to the Department of Northern Development camps on various highways. The expense of escorting was taken care of by the municipality and it is worthy of note that only one man was marked absent at train time. Many of the men expressed their satisfaction at the splendid way they were fitted out before leaving. Food and hot coffee were supplied for the journey by the Lions' Club Kitchen and helped to make more comfortable the rather severe journey, most of which was undertaken in 15 to 30 below zero weather.”

HAMILTON—WOMEN

Orders for girls and women for factory employment exceeded the figure for 1933 and many applicants at the office reported they had been recalled to their former positions. A new firm employed girls recruited, in co-operation with the Employment Service, from the art classes in the Technical School.

Clerical positions were at a premium, even experienced workers finding it difficult to secure employment. Many office workers signified their willingness to accept domestic service temporarily, but their inability to provide the required references hindered their placement. Other applicants for domestic work, who were problem cases from the point of view of the Employment Office, were those who had high wages in past years and found it impossible to adjust themselves to present day conditions by accepting lower paid jobs. The relationship between employer and worker is so intimate in this phase of employment work that factors of personal habits, temperament and disposition must be taken into consideration to a much greater extent than in factory work.

KINGSTON

It is interesting to note the variations in employment conditions in the same industry in different sections of the Province, as revealed in the reports submitted by

the superintendents of the Employment Offices. While Guelph, for example, reported an improvement in farm demand and improved rates, the Kingston office stated that the calls for farm help were below normal and that wages paid were quite as low as in 1933, averaging from \$10.00 to \$15.00 per month and board.

With the locomotive works idle, the largest industrial plant did not provide an outlet for the unemployed. A few orders for mining machinery represented the total business for the year. The building industry, on the other hand, was active with the following projects under way: Royal Military College, barracks at cost of \$700,000; Queen's University alterations to cost \$80,000. In addition, a large number of masons, carpenters, painters, building labourers and other mechanics were placed on various repair works. The total of all such men placed on these building operations through the Employment Office was 1,060.

The office also selected and placed in the two National Defence unemployment relief projects 1,713 single men. In co-operation with the Department of Highways the superintendent supervised the selection and placement of 975 men on shoulder-widening, ditch-filling and grading jobs in the Kingston district. The usual procedure was followed, under which names of eligible men were secured from the Reeves, mayors and relief officers of the municipalities affected.

KITCHENER

The report of the superintendent of the Kitchener Office indicated the extent to which a public employment office can serve not only the municipality in which it is located but the entire district assigned to it. The volume of business transacted in 1934 exceeded all previous years and a high degree of service was rendered to the applicants, as well as to the employers, both in industry and in municipal positions.

Farm placements, however, were the lowest in years due to two factors, the tendency of farmers' sons to remain at home, and the systematic canvass of farms by young men tired of enforced idleness in the cities, who walked or hitch-hiked through the country districts in search of work.

The rubber footwear factories reported increased business during the year. An interesting development in Kitchener was the springing up of small industries, comprised of local unemployed furniture mechanics who invested their limited capital in small companies in the hope of creating employment for themselves. It was reported that they were "at least making a living". A total of 74 women and girls were placed in industry and 323 in domestic work.

The high point of the year in casual placement work was reached in November, 1933, when 1,954 men were placed on city relief projects. To the superintendent was entrusted the responsibility of recruiting and transferring 180 from Kitchener and district to Northern Development camps on the Minden Dorset road and to camps at Turkey Point and Rondeau Park. Later the superintendent also conducted the registration of unemployed men for provincial highway work in nine centres, registration for which totalled over 900 and 378 placements were made.

Other highway projects in the district where the work was done by contract resulted in over 100 additional placements and 70 men were placed on a bridge construction job carried on by the Suburban Roads Commission.

During the past four years every man receiving relief in Kitchener was required to register at the Employment Office and to keep his card stamped at regular intervals.

This procedure furnishes a guarantee to the municipality that every man receiving relief is keeping in close touch with the most likely source of employment. The superintendent assumes the responsibility for the placement of men on municipal relief work, rotating them in accordance with instructions from the relief authorities. At the present time, all physically fit relief recipients are directed to various jobs and required to work in payment for relief. The city provided clerical assistance to the Employment Office in dealing with the large numbers of applicants involved. Evidence of the appreciation of the municipal council for the assistance rendered by the Employment Office was expressed in a resolution of thanks to the superintendent for his untiring services.

LONDON—MEN

Farm placements made by the Men's Department of the Employment Office in London increased slightly over the previous year. Wage rates offered by employers were higher, ranging from \$10.00 to \$25.00 per month, as compared with \$5.00 to \$20.00 in 1933. Placements in the manufacturing industries were also slightly higher, but the superintendent comments upon the extent to which the installation of labour-saving machinery in one particular plant has reduced the number of employees required.

Activity in the construction industry was stimulated by a \$250,000 extension to the Ontario Hospital. The workers on this job were all recruited through the Employment Office. The construction of a library at the University of Western Ontario at a cost of \$125,000 and a \$90,000 addition to a local factory also provided employment for many building tradesmen and labourers, who were placed by the Employment Service.

The London Office co-operated with the municipality in recruiting and transferring 238 men to Northern Development camps at Canoe Lake, Huntsville, Gelert, and other points. In addition, some 600 men were placed on provincial highway work in the vicinity of London, the selection of eligible men being made by the Employment Office superintendent in co-operation with local Reeves, mayors, and relief officers. An extensive programme of local unemployment relief work was handled through the office, resulting in the largest number of casual placements in the history of the office. The municipal officials of London expressed their great satisfaction with the assistance which they received in this connection.

The office was requested by the postmaster to select the extra help required for the Christmas rush, and in choosing the men preference was given to those who had seen service overseas.

LONDON—WOMEN

The difficulty of securing employment in clerical work at the present time prompted the superintendent to express the following opinion: "The applicants should realize that it is necessary to be more than a mediocre worker in order to secure a position under present conditions. To specialize in some particular line should be the aim of clerical workers and in fact of all workers."

Numerically the supply of domestic workers exceeded the demand but actually there was a shortage of workers who were acceptable to employers. A factory worker may be willing to accept domestic work but there are two main difficulties in placing such a worker, lack of experience and the employer's belief that the worker will leave

her service at the first opportunity to return to the work for which she is trained. A similar difficulty is found in the placement of married women in household occupations. The employer is reluctant to take on such a worker thinking that she will give up the work as soon as her husband secures employment.

Wage rates for household work appeared to be lower in London than elsewhere in the Province. Offers were received as low as \$4.00 a month, with the average ranging from \$10.00 to \$12.00. Some employers asked for help, in return for which board and lodging were to be the only payment, but such offers were refused by the Employment Service, in accordance with our general policy.

NEW TORONTO

The principal activity of the New Toronto Office throughout the year was in connection with unemployment relief projects. The supplying of labour for these projects involved the determining of quotas for nine towns and five townships, making and maintaining contacts with 14 municipalities through the office of the mayor, reeve or relief officer, registration of all the unemployed eligible for the work and, finally, arranging for the transfer of the men to the various jobs and their rotation on pre-arranged schedules.

In the district including Oakville, Trafalgar Township, Nelson and Burlington, 588 men were given employment lasting from two weeks to two months between November and July. The grading and ditch-filling on No. 2 highway resulted in the placement of 277 men from Peel County. Two months later work was commenced on a contract for grading between Huron-Ontario Street and the Port Credit bridge and furnished employment for 237 men also from Peel County, 85 per cent. of whom were rotated every two weeks.

In January 462 men were given employment for from two weeks to five months on the erection of a bridge over the Credit River. In the early stages of the work the men were rotated every two weeks but this practice was discontinued when the span rose to a considerable height above the river-bed. When work on the contract for grading the middle road between the Credit River and Oakville was commenced, employment was provided for 242 men from Peel and 292 from Halton County. Placements on the additions to the Ontario Hospital totalled 3,113 men, quotas of whom were drawn from seven municipalities.

During the year registrations in the Employment Office numbered 5,760 men and 187 women; placements totalled 7,518 men and 78 women. The excess of placements over registrations is explained by the rotation of men on relief work. The staff conducted 81,543 interviews.

NIAGARA FALLS

Due principally to unemployment relief projects, the placements made by the Niagara Falls Office exceeded by 1,542 those of the previous year. It is significant to note that 51 per cent. of the jobs lasted one week or less. The Employment Office controlled entirely or co-operated extensively in the placement of men on four highway construction jobs and the policy of rotation was followed in order to provide work for as many men as possible. The wide range of employment offered on highway construction projects is indicated by the fact that of the 1,496 men placed, 1,317 were for labourers' jobs and the remaining 179 were for 14 other classes of jobs, ranging from timekeepers to waterboys.

The closest co-operation was maintained between the Employment Service and the municipal authorities charged with the administration of relief. The system of having all persons receiving relief call at the office once a month was continued and in addition, when employment was secured for a person on relief, the relief officer was notified.

The effectiveness of an efficient employment clearance system is illustrated by the statement showing 51 "transfers-in" to the Niagara Falls area from Toronto, Hamilton and St. Catharines of workers for 14 different classes of employment.

A summary of the activities of the Women's Department of this office indicated that the majority of the placements made were for various forms of domestic employment. An analysis of the placements by occupation is as follows:—Household workers, 347; hotel and institutional workers, 134; factory and office workers, 99; farm domestics and canning factory workers, 10; store and miscellaneous workers, 14; total, 604.

At the close of the fiscal year the superintendent made an employment survey of the power development companies, railroads and forty leading industries in Niagara Falls and Stamford. The survey indicated that the working force totalled 3,632 as compared with 3,200 at the end of the last fiscal year.

NORTH BAY

Commenting on the lumbering industry in the vicinity of North Bay, the superintendent writes as below:—

"At the moment of writing this report, October 31, 1934, bush activities are in excess of the peak achieved last year, the number of camps operating in this district, so far, being approximately 22, and these furnish employment to slightly more than 1,500 men. This number compares with a total of 260 men employed at logging in this zone two years ago, and approximately 1,000 last season. This increase in operations comes at a particularly opportune time, for it takes care, in part, of the many hundreds of workers released from the highway camps during the past few weeks, upon the completion of the eastern portion of the Trans-Canada Highway. Wages are considerably better this season, about the equal of four years ago and a 100 per cent. increase over the wages paid locally two years ago. Our placements in this group will approximate four times those of last season.

Among the many signs of improvement, the increase of sawmill activity is one of the most encouraging. Many small villages and hamlets which had been kept by direct relief during the previous years, found employment for periods varying between two and a half and five months."

Closely allied with the lumbering industry, is the pulp and paper business, which also showed a marked improvement as compared with last year. For the first time in three years there was a brisk demand for pulpwood peelers and cutters. Unfortunately, however, the outbreak of strikes in the industry interfered with the anticipated volume of employment.

For the first time in five years, the two transcontinental railways called on the office to supply "extra gang" labourers. Men were also supplied to the firm constructing a \$300,000 dam at Temiskaming, while alterations and repairs kept a number of building tradesmen busy in North Bay itself. Other building tradesmen were sent to Kapuskasing to carry out a programme of renovation in the company-owned houses in that town.

The completion of the North Bay-Mattawa stretch of the Trans-Canada Highway resulted in a marked decrease in the placements on road construction. On the other hand, the office recruited over 700 men for work on the landing fields being constructed by the Department of National Defence. The arrangements for placing men in these camps involved medical examination, the provision of lunch baskets for the journey, and the despatching of the men on the train leaving North Bay at 6.30 a.m.

Over 400 women were placed by the office during the year and this number could have been increased by at least 100 if qualified applicants had been available to fill all the positions which were offered. The occupations in which placements were made included houseworkers, waitresses, soda fountain attendants, and one professional tea cup reader. The unusually large tourist trade also resulted in many orders from tourist camps in the vicinity of the city. The business of catering to the tourist trade resulted in several months' work at good wages for guides, canoe men, choreboys, cooks, waitresses, kitchen girls and cabin girls.

OSHAWA

The practice of maintaining regular contacts with established industries, as well as offering the facilities of the Service to new firms, was continued by the superintendent of the Oshawa Office, with the result that there was an ever-widening use of its facilities by employers and applicants. Even in the case of industries with their own employment department, the co-operation of the Service was appreciated, as the Dominion-wide facilities enabled the employer to get in touch with skilled workers elsewhere in the Province, or wherever they might be located in Canada.

In filling orders for men to be employed in the shoulder-widening programme of the Department of Highways, the Oshawa office selected men from lists supplied by the reeves of the various municipalities along the route of the work. The reeves involved met at Orono, bringing with them lists or estimates of the number of men available and eligible for the work, and a quota satisfactory to all present at the meeting was drawn up and followed in rotating the gangs.

A survey of employment conditions in the principal industries of Oshawa at the end of the fiscal year indicated that there had been a seven per cent. increase in the number of employees, and a twenty-four per cent. increase in the number of hours worked in a typical plant.

The registration and placement of women exceeded any previous year. This was due, in part, to the improvement in the premises following the removal of the office to its present location.

At the conclusion of the fiscal year, the superintendent of the Oshawa Office received a letter from the Mayor of the City, expressing appreciation for the service rendered the municipality:—

“As Mayor of this city may I at the close of your fiscal year, express my appreciation of the efforts you have made towards placing unemployed citizens at work. It has been a very difficult time to secure employment and necessarily your work has not been as successful in placing people as it is in good times. Nevertheless, your efforts have contributed materially to our success as a city in handling our difficult problem and I wish to place on record my appreciation of all you have done for this city during the year just closed.

I hope that in the coming year there will be more opportunities for placing those who make application to you.”

OTTAWA—MEN

October 31, 1934, saw the conclusion of the most successful year in the history of the office. Applications totalled 13,686, vacancies 7,075, and placements 7,029. It is interesting to note that these placements were exclusive of any municipal relief work. The placement of farm help was the highest on record, 789 finding employment in this occupation, and the selection of placement of 1,500 men on eleven highway projects in the vicinity of Ottawa resulted in increasing the activity in connection with this type of work beyond all previous records. In the immediate vicinity of Ottawa placements were divided between the county and the city on a fifty-fifty basis, while selection for work more than fifteen miles from Ottawa was made entirely from county applicants. Close co-operation was maintained between municipal and county authorities and also welfare officials, in order to ensure that only qualified men eligible for this form of employment were engaged.

In addition, the selection of all skilled tradesmen for a new government building at Rockcliffe was handled through the office, and the superintendent and staff cooperated with the representatives of organized labour in selecting and rotating carpenters, bricklayers, plumbers, steam fitters, cement finishers, and other skilled workers for this job. During the year 1,201 men were also sent to the unemployment relief camp projects at Rockcliffe, Trenton, Barriefield and Petawawa.

In Ottawa and Toronto a separate division of the Employment Office has been established for serving the needs of handicapped men. The salary of the officer in charge of this section is paid in full by the Federal Department of Labour, under the terms of the agreement relating to the Employment Offices' Co-ordination Act.

Contact was maintained throughout the year with the principal employers of labour in the city, as well as with the Department of Pensions and National Health. Handicapped men were placed in the following occupations during the year under review; bakers, carpenters, clerks, press feeders, butlers, waiters, plasterers, janitors, watchmen, automobile salesmen, auto finishers, clothing pressers and various other jobs. Total placements of handicapped men reached the high figure of 267 during the year, 225 of whom were ex-service men. Interviews with employers and applicants totalled 4,054.

OTTAWA—WOMEN

As in the case of the Men's Department, the activities of the Women's Department of the Ottawa Office exceeded those of the previous year. The number of employers utilizing the services of the office increased to a noticeable extent, while the number of applicants remained about the same. There was a decrease in the number of "problem cases" among the applicants, due primarily to the fact that this type of worker is now being cared for by the various welfare agencies.

Trained nurses in Ottawa appeared to have suffered more than any other class of skilled help. Many were reluctant to accept domestic employment for fear of jeopardizing their standing in their profession. Musicians also had a difficult time during the year but hesitated to apply for assistance because such a step would react on their standing in musical circles.

There probably never was a time when wages were so elastic. The average wage for an experienced cook-general was \$25.00 although \$30.00 and \$35.00 were sometimes offered. Experienced housemaids, parlormaids and houseparlormaids received

\$25.00 to \$30.00 on an average and occasionally \$35.00 and \$40.00 were paid. General maids with a knowledge of cooking were usually offered \$15.00 to \$20.00 and mother's helps from \$5.00 to \$12.00 per month.

The necessity for some form of training school for domestic workers expressed itself in a course in elementary household science conducted at two of the public schools under the direction of a local association of women. Members of families in receipt of relief were invited to attend the classes, and the Employment Office co-operated in the project to the extent of recommending some twenty-five girls to attend. Those recommended in this way were carefully selected from among the applicants who had expressed a willingness to undertake domestic employment, but who lacked the necessary training or experience.

PEMBROKE

Farm orders placed with the Pembroke Office were fewer in number than during the previous year, due largely to the fact that farmers' sons remained at home on account of the difficulty of securing work in the towns and cities. Local manufacturers reported an average improvement of ten per cent. over the previous year.

Approximately 250 men from Pembroke and the vicinity obtained employment on the construction of the Barry's Bay Highway, a shorter route connecting Toronto and Pembroke. The strength of the personnel at the Petawawa Unemployment Relief Camp stood at 1,500 at the end of the year. This camp provided an outlet for the placement of single unemployed homeless men throughout the year. The erection of permanent buildings at the Petawawa Military Camp furnished employment to a rotating group of carpenters, bricklayers and plasterers.

A marked improvement in the demand for lumber was reflected in an increase in the placements in this industry. One company employed 150 men, while an increased number of "jobbers" went into the woods in the fall of 1934. The monthly wage rates paid by jobbers ranged from \$26.00 to \$35.00 per month and board. Piece work rates were as follows: \$1.50 per cord for pulpwood cutters, to cut and "bunch", less 80 cents per day board; match and boxwood cutters, \$2.25 per M., B.M., plus 25 cents per M. bonus, less the same board charge; blacksmiths sent to the camps received \$50.00 to \$60.00 per month, while cooks and cookees received \$50.00 to \$60.00, and \$25.00 respectively.

At the conclusion of the fiscal year there were 290 families on relief in Pembroke. During the final month of the year, however, one hundred men were removed from the relief lists and placed in various lumber camps. The families of men on relief who accepted employment in the woods were supported until the husband drew his first month's pay.

PETERBOROUGH

Employment conditions in Peterborough during 1934 showed an improvement over the previous year. Highway construction, manufacturing and farming called for more men than during the previous year. The textile trade was particularly active, while the cereal mills report increased business, due to a larger export trade. Two local manufacturing concerns closed their doors, releasing about 200 employees.

In the building trades, painters were busy, but many carpenters and bricklayers were unemployed practically all the year. A total of 277 local men were placed on two

highway jobs in the immediate vicinity of Peterborough. In addition, 339 men from Peterborough, Lindsay, Opps, and North Monaghan were placed on shoulder-widening and ditch-filling jobs.

The local office was called on to supply a few of the 700 men employed by the Department of Northern Development on the Burleigh Falls-Bancroft road. The majority were secured from the local Welfare Board.

Experienced domestics were in demand throughout the year, but there were fewer calls than usual for casual workers. Many placements were made in the summer hotels in the Kawartha Lakes district.

PORT ARTHUR

As in many other centres throughout the Province, close co-operation was maintained with the municipal authorities in connection with local unemployment relief projects. When contracts were awarded for street paving, it was specified on the face of the contracts that all the labour required should be secured through the Employment Office.

Gold discoveries in the Long Lac and Sturgeon River districts resulted in the influx of hundreds of transients, hoping for a chance to secure work on the properties or with prospecting parties.

Placements in the logging industry remained on approximately the same level as in 1933. Pulpwood cutters were offered \$3.50 per cord of eight-foot wood, with board ranging from 75 to 85 cents per day. Tie-cutters received 12 cents each for "axed" ties.

The improvement in general business conditions reported by Port Arthur merchants can be largely attributed to the mining boom in the district. Approximately 2,000 men were employed in the Sturgeon River and Long Lac areas, and the Employment Service supplied labourers, cooks, carpenters, bricklayers, electricians, pipe-fitters, and stationary engineers to the various new companies.

Placements on highway construction were lower than in 1933. Throughout the year men were sent to the contractors on the Schreiber and Kenora sections of the Trans-Canada Highway. Extra-gang labourers and section men were called for by the railroads, particularly on the Long Lac division of the Canadian National Railway and the increased passenger and freight business resulted in the recall of several train crews for this division.

ST. CATHARINES

The St. Catharines superintendent made an interesting study of the variations in the demand for help throughout the year, due to seasonal fluctuations in the demand for the products of the different factories. This fluctuation is particularly noticeable in the automobile industry. One large concern, for example, commences its operations in October, reaches the peak of production in January, and completes its "run" in June. Other companies are so busy at certain seasons of the year that they find it necessary to increase their working forces and hours for a time, laying off the workers during the slack period, or operating on greatly reduced hours. The paper industry, however, maintained a fairly level production rate during the year.

Activity in the building industry was practically on a par with 1933. The largest contract was awarded for filling in the old Welland Canal, but the use of machinery

reduced the number of men employed. Traffic through the Welland Canal was below that of 1933, due largely to the low water levels in the St. Lawrence River and canals. Other transportation, however, provided an increased volume of employment.

Commenting on the supply and demand in the domestic field the superintendent reported as below:—

“The general shortage of domestic workers, especially in the trained class, makes it very difficult at times to fill orders quickly, but in view of existing conditions this had a very favourable reaction as it resulted in many girls entering domestic service who could not find employment in their own line of work. Many of these girls were sufficiently trained to enable them to fill some of the higher priced positions and in this manner they are helping to overcome the shortage of trained domestics. The discontinuance of bringing trained domestics from the British Isles and other countries has been very beneficial to single girls of this district by providing a field of employment which would otherwise be closed to many of them and would leave them entirely without opportunity of securing employment.”

The Employment Service continued its close co-operation with the relief administration, and the policy of having recipients of relief report at the Employment Office at least once a week was followed, as in previous years. This policy has several beneficial effects as it enables the office to supply a more accurate report of the number unemployed and makes possible a more varied classification of workers so that quicker service may be rendered the employers. This system does not impose a hardship as relief recipients are allowed sufficient latitude to accept short jobs and to report any day they are not employed.

ST. THOMAS

Due largely to the provincial highway placements in the spring of 1934, the St. Thomas Employment Office found work for approximately 600 more persons than in 1933. Between May and September 564 men were recruited for road work, in co-operation, as usual, with the reeves and other municipal officers.

The farm demand exceeded 1933 by 82 orders. It is interesting to note that farm placements are not confined to the summer months, as one might expect. The lowest number placed on farms in any one month was in November, 1933, when 16 placements were made. The peak was reached in October, 1934, with 97 farm orders. The total for the year was 490, or an average of approximately 40 each month.

The demand for women for household work did not show much variation from the preceding year. The office placed a total of 433 women in all occupations during the twelve-month period under review.

SARNIA

The demand for farm help was much the same as in 1933, but Sarnia was one of the offices reporting a higher wage rate. During the summer months the average offered was \$15.00 to \$25.00 per month and board, with day rates ranging from \$1.00 to \$1.50.

Manufacturing in Sarnia was noticeably better than last year. Some of the local industries reported a 25 per cent. improvement, and two concerns had an even better year's business. There were 183 building permits issued, with a total value of

\$131,072.50, as compared with 174, totalling \$54,377.50 in the previous year. The increase in the demand for building tradesmen, and an unusually heavy demand for painters and decorators during the summer months were also reported by the office.

All men given work on city relief projects, for which they received wages, were supplied through the Employment Office. Each man was employed for from two to three weeks, and those eligible were determined on the basis of information supplied by the relief administration.

Over 600 men were placed by the office on day labour and contract highway construction projects in the vicinity of Sarnia. The superintendent visited the towns along the route of the various jobs, and conducted a registration of the unemployed, working in conjunction with the local authorities in each case.

Each year sees an increase in the number of orders received by the office for girls and young women in domestic, factory, and clerical employment. Wages offered for household help took a marked drop for no apparent reason during the summer months, but had returned to normal at the conclusion of the fiscal year.

SAULT STE. MARIE

The superintendent of the Sault Ste. Marie Office reported the most successful year in the last five. Placements were more than double those of 1933, and covered a wide range of employment, among which the following were outstanding:—Logging and pulpwood cutting, highway construction, forestry and household services. In addition, placements were made in the mining industry, in farming, building construction, transportation, pulp and paper products, and other industrial activities.

Over 1,100 men were sent to the pulpwood camps, and this number would have been higher if the industry had not suffered a temporary set-back, due to a strike. The office also worked in close co-operation with the Department of Northern Development in the registration of men anxious to secure work on the Trans-Canada Highway, and during the year 829 men were sent to the road camps.

Wages in household service showed an improvement over the previous year, ranging from \$10.00 to \$25.00 per month, the majority of the offers, however, being at the lower end of the scale. There were 194 girls and young women placed in domestic positions of assumed permanency during the year, and 70 casual placements were made, the majority being during "house-cleaning" time.

A rather unusual type of employment peculiar to Sault Ste. Marie and some of the other northern employment offices is the provision of fire-fighters on short notice, and without regard for ordinary governmental "office-hours". On one particular Sunday, for example, fifteen different fires were reported, and the superintendent was kept busy all day securing men to send out to the different conflagrations. The men were sent by rail, water, or aeroplane, according to the circumstances, or were rushed in trucks to fires adjacent to the city. The rate of pay offered was \$2.00 a day, with board, and transportation both ways, and a total of 241 men were supplied to the Forestry Department during the summer months.

While the number of placements in the mining industry was by no means large, the orders called for skilled men in most cases. A master mechanic was placed at \$7.00 a day and other orders were received for cooks, cookees, steel sharpeners, and blacksmiths.

While Sault Ste. Marie is not an agricultural centre to the same extent, for example, as Chatham or Kingston, the office was asked to supply 75 farm hands during

the year. This was double the number asked for in 1933, and clearly indicates improving conditions throughout the district.

STRATFORD

Commenting on the unusual developments in Stratford during the twelve months ending October 31, 1934, the superintendent writes, in part, as below:—

“The year was a remarkable one in the industrial life of this city, because of the almost unbelievable recovery of the woodworking plants after the disastrous strike of last fall which had tied them up completely for a period of seven weeks. Not only did the furniture industry suffer, but an adverse reaction was felt by every business in the city. The agreements signed by the various factory managements and their employees have worked out on the whole in the best interest of both sides and in one case the wages have been raised voluntarily in some departments above those agreed upon. At the first of the year production was lower than in former years but progress has been steady and practically all furniture factories were working full time at the end of the fiscal year. This recovery was not confined to the furniture plants but other local industries shared in the general progress. The Canadian National Railway shops have been adding constantly to their staff in all departments and men who had been out of work for as long as three years were back on the payroll with excellent prospects of staying there.”

The Employment Service was called upon to supply labour for two government projects during the year. On the work of alterations to the Normal School, the workers were rotated in three-day shifts for mechanics and two-day shifts for labourers. Over 200 men received work on this basis during 1934. The second project was the shoulder-widening and ditch-filling work carried on by the Department of Highways. As this work was carried on from five different centres at the same time, the superintendent's description of the procedure followed will be found interesting:—

“The supplying of labour presented some difficulty because of the distance from the Stratford Office to the scene of operations, which in the case of the Clinton-Wingham highway was close to forty miles. This problem was overcome to some extent by conferring with the mayors and Reeves of the towns and townships in the county where the highways were being constructed. Lists of the unemployed men were taken from the Reeves' statements and application forms were supplied, upon the completion of which the men were registered in this office. By arranging with the local town and township councils to have them notify their unemployed when work was available for them, a great deal of trouble and expense was avoided. Where the labour available was in excess of requirements the men were rotated in two-week shifts. We deviated slightly from the schedule laid down for our guidance which called for an eight-hour day and a six-day week, so that the men worked ten hours a day for the first four days and completed their 48-hour week on the Friday by working eight hours. This was done in order that, should wet weather or any other cause temporarily prevent the men from working, it might still be possible to put in the regular total of hours by working on Saturday. This arrangement proved very satisfactory and undoubtedly avoided a number of complaints. Altogether 566 teamsters and labourers were employed during the period of highway work.”

Farm placements were fewer in number than in 1933, although the wages offered were above those of the preceding year. The superintendent suggested that the scarcity

of workers interested in farm jobs might possibly be connected with the volume of highway work available for the unemployed.

SUDBURY

An encouraging aspect of the report of the Sudbury superintendent is his statement that farm placements were in excess of 1933, and when he states that many of the men were required for clearing land for farm purposes, one realizes that pioneer days in Ontario are not altogether a matter of history.

During the year the Sudbury office placed 1,800 men in employment in the lumbering industry and the employers expressed their satisfaction with the selection made by the staff. Of the two large scale employers of labour in the mining industry near Sudbury, one employed 5,000 men, which was 1,000 more than ever before, and the other maintained his customary working force of 550.

Placements in Northern Development relief camps dwindled almost to zero since the policy was adopted of giving preference to settlers. Vacancies in the National Defence airport camps were not popular with the applicants during the summer but more interest was apparent with the approach of the cold weather.

With wage rates and placements showing a decided upward trend in the Sudbury area, prospects looked more encouraging for the future than in the majority of towns and cities in Southern Ontario. There is still a sufficient supply of local labour, however, to take care of the probable demand throughout 1935.

TIMMINS

Reporting on the mining situation in the Timmins area, the superintendent writes, in part, as below:—

“There was a very noticeable increase in the mining industry from almost every part of the district, progress having been made in the re-opening of old properties, while much prospecting, developing, and diamond drilling was carried on . . .”

The outstanding mines have their own employment offices, but the Timmins Office of the Employment Service was called on to supply 273 men during the year. The number seems small compared with the large numbers of men engaged in mining in the district, but more than three-quarters of the orders received by the office were for highly skilled help, including a mill superintendent, mine captains, shift bosses, mining engineers, solution men, master mechanics, hoistmen and shaftmen. Some of the mines posted notices on their properties that all help was secured through the Employment Service. The men welcomed this arrangement, as it rendered unnecessary their former practice of walking from mine to mine, only to find that no one was being engaged. To apply at all the principal producing mines in the immediate vicinity of Timmins would involve a walk of eighteen miles.

Just over 1,000 men were placed in the logging industry, the majority being pulpwood cutters employed on a piece-work basis. The strikes in this industry temporarily disturbed the employment of men through this office.

Unlike every other office in the Province, Timmins reported a shortage of building tradesmen during the year. As the principal building material is wood, carpenters were in demand for the construction and alteration of dwellings and stores. At one time

during the year, the shortage of plumbers and tinsmiths was so acute that it was necessary to send to North Bay for qualified men, the employers utilizing the Service's clearance machinery in this connection.

At the end of January, 1934, the town council of Timmins asked the Employment Office to supervise the placement of the labour on municipal unemployment relief work. Preference was given to married men, in accordance with their individual needs, and the shifts were rotated on a two-week basis.

As in the case of Sudbury, the farms in the district have some of the aspects of early pioneer life. Dairy farms appear to be most successful, judging by the demand for help, but there was also a fair demand for men experienced in market gardening. The creditable total of 114 men was reached by the office in connection with farm placements.

TORONTO—MEN

Despite the fact that considerable improvement was noted in many industries during the fiscal year, business conditions were far from normal, with the result that unemployment still remains a serious problem.

Production in the rubber industry, according to one of the large firms, showed an increase of approximately 33 per cent. over last year. Automobiles and accessories also reported a decided improvement. One plant kept a staff of 500 consistently busy in the manufacture of cars, while the sale of automobiles was far in advance of last year. Progress in the leather industry was shown throughout the year, while in the textile and cloth manufacturing industries declines were reported, resulting in reductions in staff and in the working hours. The principal manufacturers of radio receiving sets reported on the prosperous condition in that industry, estimating 165,000 sets produced for the year, or an increase of 90 per cent. over the previous year. Night shifts were necessary in some of the plants making radio accessories in order to cope with the orders.

Because of increased business in the manufacture of office supplies, one firm moved to larger quarters in Hamilton and will increase the staff from 200 to 500. The Toronto Office of the Employment Service worked in close co-operation with this firm in supplying workers required and arrangements have been made to have the Hamilton Office of the Service placed at the company's disposal.

The increase in building and construction caused a slight improvement in the iron and steel industry. Although the value of building permits issued in Toronto was almost double that of last year, it is still far below the figure required to meet the local situation.

During the winter and spring this office was responsible for the selection of men and the distribution of work in connection with relief projects arranged by the city. As it was found necessary to check qualifications with relief files in the City Welfare Department, a member of our staff was stationed in the Welfare Department, where he was instrumental in placing 2,700 applicants for at least one week's employment. Many skilled building tradesmen received employment for longer periods on account of the amount of skilled work involved on the projects. Through this office 1,256 single, homeless, unemployed men were selected from the residents in the hostels under the jurisdiction of the City Welfare Department for work in the various airway camps operated by the Department of National Defence. The office was responsible for arranging for the medical examination of these men and for their transfer to the camps, all of which entailed considerable work after office hours. In addition, 925

single, homeless men were transferred to work camps under the jurisdiction of the Northern Development Branch. As a result of these transfers and of the more favourable employment conditions, the number of single, homeless, unemployed men in the city hostels was reduced to approximately 1,000, many of whom were rejected for roadway or camp work as unfit. Considerable placement work was also done on highways in the Toronto zone under the Ontario Highways Department. Great care was required in keeping in touch with contractors, mayors, reeves, and relief officers in the municipalities where the work was being carried on in order that there might be an equitable distribution of workers from the municipalities concerned and to check the numbers placed by the contractors.

The Industrial, Farm and Handicapped Divisions reported a substantial increase in placements made. While the increase in industrial placements in general was great, the most gratifying feature was the increase of regular placements by 64 per cent. over last year. For farm placements there was a slightly higher rate of wages paid for single experienced help, and the demand for married couples was not great.

The Handicapped Division had another successful year in the placement of partially disabled ex-service men and other citizens. The special federal scouts attached to this important division of the Toronto office worked untiringly in their efforts to obtain suitable employment for the applicants registered. A large proportion of the vacancies recorded in this division were filled satisfactorily by handicapped men, but many orders had to be transferred to other divisions of the Service as the requirements of the employers were too exacting for any of the applicants in the Handicapped Division to give satisfaction.

The Boys' Division has been reorganized to take care of the young men up to the age of 22 years, who have had no regular employment since leaving school and are in danger of losing any benefit of training they have had on account of lack of opportunity. Every effort is now being given to this class of applicants to assist them in becoming established in their proper sphere and prevent them from drifting into the unskilled ranks.

After a period of more than five years in unsuitable quarters, the Toronto Office will commence the new fiscal year in its new up-to-date building, the first structure erected on the North American Continent exclusively for employment office purposes. There are 15,000 square feet of usable floor space, exclusive of corridors, store rooms and boiler rooms. The entrance to the Men's Department is at 70 Lombard Street and to the Women's at 77 Richmond Street East. The provision of adequate facilities will undoubtedly enable the Employment Service to render a higher degree of service to the public. An interesting feature in connection with the construction of this building is the fact that it was built by unemployed men selected by this office without a single accident of a serious nature happening during construction. Crews of men were employed on two-day and three-day shifts with the result that temporary employment was provided for 5,732 men.

The following figures represent the number of applicants on file in the Toronto office whose chances of obtaining work through this or any other agency, it is estimated, are practically nil because of disabilities. On the live file of 1,720, there are 163 whose disability is age, the average being 70 years; 74 whose disability is age plus some infirmity and 21 who have some special disability. In addition, there are 43 in receipt of war veterans' allowances and 21 in receipt of old age pensions. Many of the applicants over 70 lack residence qualifications for old age pensions.

In concluding this report, I should like to pay tribute to the employers of Toronto for their much appreciated co-operation with this office during the year and to the large number of unemployed citizens registered who, despite their many discouragements, have displayed splendid fortitude.

TORONTO—WOMEN

Reporting on the placement of clerical and industrial workers in the Women's Employment Office in Toronto, the superintendent writes in part as follows:—

CLERICAL AND INDUSTRIAL SECTION

“For the first time in five years the total number of clerical and industrial orders showed an increase over the figures for the previous year. The combined total was approximately 17 per cent. higher. The apparent improvement, however, was not as real as might be hoped for. In the first place, the increase was largely in casual placements, the regular placements showing only a slight increase in the industrial and a decrease in the clerical section. Secondly, the tendency for regular placements to offer temporary rather than permanent employment seemed to be more prevalent, in fact very few employers stated that they were seeking permanent employees.

“The situation for clerical workers did not change to any great extent during the past year. With unemployment so widespread, those who were working kept a careful watch for anything which might aid their unemployed friends and vacancies were not reported to employment offices. With regard to wages, conditions were somewhat better. A few temporary orders offered \$17.00 and \$18.00 per week, which rates were higher than those offered last year. Although for the most part wages remained closer to the minimum standard of \$12.50 per week, employers were more willing to state what was to be paid. Evidently the public interest in these matters is having some effect.

“In the industrial section, where the increase in orders, though slight, was steady, various lines of manufacturing were heard from. About 24 per cent. of these orders went to girls under 18 years, although this class comprised only 12 to 15 per cent. of the total number on the industrial file. Orders for unskilled older women were usually for work in the canning factories. The types of experienced help demanded included such workers as labellers, packers, solderers, assemblers, punch press and textile operators, box and bindery workers. The one outstanding placement for the year was an experienced designer of a knitted goods company, with experience in Great Britain and Europe. The initial salary was \$27.50 per week. The trend of manufacturing toward short, busy seasons rather than steady production was responsible for increasing the numbers on relief.

HOUSEWORKERS SECTION:

REGULAR DOMESTIC SECTION

	Applicants	Interviews	Vacancies	Referred	Placements
1934	23,354	63,849	9,031	7,551	4,527
1933	15,855	42,232	7,869	7,738	4,747

CASUAL DOMESTIC SECTION

	Applicants	Interviews	Vacancies	Referred	Placements
1934	3,574	9,915	2,822	2,822	2,822
1933	4,020	11,468	2,611	2,611	2,611

REGULAR DOMESTIC SECTION

"As revealed by the above figures, there were numbers of vacancies listed during the year which were not disposed of satisfactorily. In this connection we should like to point out difficult phases to be met with in dealing with certain requests for help and in trying to place domestics other than those who are experienced or at least domesticated.

"1. Vacancies where one maid is expected to undertake the combined duties of two maids with equal efficiency. Frequently by the time a suitable applicant was available for such an order, it was found that the position had already been filled.

"2. Orders demanding heavy duties, such as cook-general, including all the house work and laundry, for a family with from three to seven children.

"3. Long hours and poor wages for non-resident work, such as general for rooming house, hours 8 a.m. to 8 p.m. at \$3.00 per week and meals.

"4. Experienced married couples at \$25.00 to \$30.00 per month.

"In enumerating the problems encountered in the disposing of applicants through placement, the following might be mentioned:—

"1. About 30 per cent. of the applicants are of a problem type, having experience in many places, but never staying longer than two or three months in any one place and having very decided ideas as to what they will and what they will not do.

"2. Many applicants register by letter, but unless their experience is outstanding, employers are not interested without a personal interview.

"3. Institutional workers who will not consider private service although institutional work is decidedly scarce.

"4. Applicants over forty who are not acceptable to employers.

"5. Housekeepers who wish to be placed in a motherless home.

"6. Applicants of a superior type, trained for various other types of employment such as teachers, nurses, dietitians, supervising housekeepers, hostesses and governesses. It is seldom that domestic vacancies can offer opportunity to such as these.

"7. At least 50 per cent. of the applicants are non-resident worker-seekers, and this type of work has been very scarce this year. While many of such applicants are experienced workers, there are many others who are obliged to register in order to secure voucher relief or rental assistance from the Welfare Department. Of the relief applicants the majority are housewives with children and no experience outside their homes within the last five to twenty-five years. Under present conditions the disposal of such workers is almost impossible.

"In reviewing the year's work in this Section we note that farm vacancies were seldom filled, although wages offered suggested an increase over the previous year, some being \$10 to \$20 per month. The busiest months for placements were May and September, the beginning and ending of the summer season. The summer business with hotels, golf clubs, etc., was not particularly active but many good placements were made.

"The continuance of regular classes for cooks-general at the Y.W.C.A. served to benefit a small number of untrained domestics who were anxious to increase their knowledge and better their positions. Others who could have availed themselves of this opportunity, declined to do so.

CASUAL SECTION

"Never before were there so many applicants, who, though registered in the Regular Section, were to be found at some time in this Section too. The need of non-resident work was never greater, that being the only type of work so many applicants could consider. Frequently those most in need of such work were least acceptable to employers. Many applicants classed as our best workers do not frequent the office, as they have secured steady days by being recommended from one employer to another and by being recalled by former employers.

"Wages maintained a fair showing in this line of work, but hours on many orders fell short of a full day's work, thus reducing the workers' earnings. Some employers sought help at \$1.00 per day, but with little result. The prevailing wage acceptable to the workers ranged from \$1.50 per day or 25 cents per hour."

WINDSOR

The manufacturers of automobiles, automobile parts and accessories reported increased business as compared with 1933. At the conclusion of the fiscal year experienced tool and die makers were being sought by the industry and through the clearance system of the Employment Service men were being brought from Toronto, Hamilton, St. Catharines, Guelph and other centres.

The lifting of the ban on the export of liquor resulted in increased activity in the local distilleries, which gave employment to several hundred men and women over a period of several weeks. This gain was offset, however, by the establishment of a blending plant in Detroit, which necessitated the laying off of many workers in the Walkerville plant of the same company.

Farm placements were lower than in 1933, due partly to the hot, dry summer, which affected the crops, and also due to the number of transient workers applying directly at the farms.

One hundred and twenty-five men from the Border Cities were placed in the unemployment relief camp at Rondeau Park, operated under the direction of the Department of Northern Development.

The Windsor Office played a prominent part in the recruiting of men for highway work in Essex County. Contact was made with 27 separate municipalities in order to apportion the work on the basis of need throughout the entire county. There were 319 labourers, 59 trucks, 51 teams, 2 foremen and 1 timekeeper sent to the day labour jobs under the immediate control of the Department of Highways. A paving job on highway No. 18 carried out under contract resulted in the placement of 47 labourers, 23 trucks, 8 truck drivers, 3 teams, 1 grader and 1 foreman. Another paving job on the same highway took 160 labourers, 5 trucks, 4 truck drivers, 10 teams, 2 crane operators, 1 foreman and 1 carpenter. In addition, a contract on highway No. 2 absorbed 78 labourers, 10 trucks, 8 truck drivers, 10 teams, 4 cement finishers, 2 pump men and 1 water boy.

A number of factories employing female help were running with full staff. Contrary to the usual situation, the canning factories were able to secure sufficient help in

the vicinity of the various plants, making it unnecessary to send to Windsor for women and girls during the rush season.

The women willing to attempt domestic work, even if without previous experience, seemed to have a better chance in Windsor than elsewhere in the Province. The demand for houseworkers was in excess of the previous four years, and the wage rates offered showed a corresponding increase.

A considerable number of the applicants were stenographers, bookkeepers, office workers, salesclerks, hotel workers, seamstresses and factory workers. Most of such applicants were not qualified and were reluctant to accept domestic work.

During the year there were no serious complaints registered regarding the operation of private employment agencies and no prosecutions under the Act.

Factory Inspection Branch

ACTING CHIEF INSPECTOR—JOS. R. PRAIN

This is the forty-eighth annual report of the Factory Inspection Branch covering the fiscal year 1933-34. The upward trend which was evident in industrial conditions during last year was again apparent and slowly but surely industry is approaching normalcy.

The inspectorate of the Branch had an exceptionally busy year and in spite of the fact that the staff suffered greatly through illness and deaths among the inspectors, over a thousand more inspections were made this year than in 1933. Many complaints were received and the interest of the general public in the working hours and conditions of their fellows was evident in the number of complaints received, hundreds of which came over the telephone and were not listed in the statistical portion of this report. The publicity given these matters in the press during the past year was largely responsible for this, and investigation of the complaints frequently disclosed a condition to be remedied which would be difficult to detect unless the inspector were forewarned. The complainants were advised of the requirements of the law, if any, which relate to their complaint and in this way they become familiar with the statutes which are enacted to protect the health and welfare of the workers. Some of the complaints were founded on hearsay, or in passing from one to another became exaggerated, and upon investigation did not disclose anything requiring remedial action, and some were fostered by disgruntled or discharged employees. However, we welcome these complaints as showing interest in working conditions and in the laws of the Province.

The use of double-shift and overtime permits showed an increase again this year and, as stated before, the issuance of the double-shift permits means increased employment for that industry over a more or less extended busy season, while the overtime permits usually represent a seasonal rush of short duration. Fewer prosecutions were resorted to during the last year and very little difficulty was encountered in enforcing the requirements of the Act. The prosecutions of last year have borne fruit and show effect on many more than the few principals actually involved in the court proceedings. Most of the prosecutions this year involved employers in localities remote from Toronto and will bear fruit in the respective districts in the future. Education of the employers in the recent amendments to the Act was patiently undertaken and, as soon as it was felt that this was being taken advantage of, strict enforcement followed and prosecution of the worst offenders in the different localities had a salutary effect on the whole.

An amendment to section 71 of the Factory, Shop and Office Building Act has remedied a condition which has long required correction. This section in effect reduces the working hours of bakers to fifty-six during a calendar week and requires a rest period of twenty-four consecutive hours for a baker following a work-period exceeding nine hours. The fullest co-operation has been received, and is herewith acknowledged gratefully, from the bakers' association and we feel that little difficulty will be experienced in enforcing this enactment. Every bakeshop in Ontario employing male bakers has been advised of the amendment and instructed to arrange their hours accordingly.

Many additional permits for home-work were issued during the year and as these permits are not required to be renewed annually, unless the address is changed, several

thousand must be in use in homes in the Toronto area. The observations of our lady inspectors on the matter of home-work are embodied in their respective reports and these remarks are based on intimate knowledge on their visits to the homes when issuing the permits.

It will be noted that accidents increased over last year and more regrettable still is the number of fatalities which occurred in industry. Falls and falling objects were as usual responsible for a large percentage of the accidents, and fatalities due to burns and scalds were high, because of an accident in a warehouse where repairmen were working on a pair of boilers, one of which was cold. The parting of an expansion joint on the steam header between the boilers sent live steam over the workmen, scalding them so badly that all three died within a few days. These men were all experienced steam fitters and yet the opening of a valve caused this tragedy.

The figures given in the statistical part of this report will seem to show fewer persons employed in industry and commerce, but we are confident that this is not the real situation. Due to the long illness and ultimate decease of two of our inspectors, their districts were uncovered for some months except when an urgent matter required attention when another inspector was sent to investigate. Moreover, the additional duties which devolved on the factory inspectors from the Minimum Wage Board required many repeat visits to firms where statistics had already been taken. Complaints also were responsible for many visits and, therefore, while the past year was an exceptionally heavy one for the Branch our inspectors were not able to cover their territory thoroughly during the busy seasons. These remarks will explain the apparent discrepancy between the number of persons reported as employed, and the general improvement in conditions which each inspector reports, and why the Province was not thoroughly covered in the busy seasons, although more visits were made by a depleted staff.

Our appreciation is again due to the Director of the Industrial Hygiene Branch of the Provincial Department of Health and to his staff, who have at all times placed at our disposal their experience and technical knowledge of industrial diseases and hazards. We called on them on numerous occasions to inspect with our inspectors plants where hazards might be present, or develop, due to chemical processes. Two women were affected by benzol fumes in a shoe factory which resulted fatally. In this instance, the distributor of the cement being used, had not labelled the containers, as required by the Regulations under section 57 of the Act and no precautions were considered necessary by the employer. In spite of these fatalities, we consider that the benzol regulations are being generally observed, and samples are secured periodically where benzol is likely to be the solvent. Further than this, all manufacturers in Ontario of rubber compounds or cements are required to submit samples of their products to the Industrial Hygiene Branch for analysis as to the benzol content, as are all distributors for Ontario of these products manufactured outside the Province.

Six cases of pneumoconiosis and silicosis were reported from dusty processes and every effort is being made to control conditions in this regard. Stonecutting, grinding, mould shaking and sandblasting produce the greatest hazards and our inspectors use every possible means to educate the employers and employees concerned as to the insidious effects which usually do not develop sufficiently to be noticeable for several years. Our foundry inspector is particularly active in this matter as most of the sandblasting is done on castings, etc., and his report which is appended herewith deals at length with silica hazards and their control. One case of lead poisoning was reported

and, with the co-operation of the firm concerned, conditions were remedied so that it is unlikely that anything more will develop from that source. Most manufacturers have been made aware of the hazards in their particular processes and comparatively little trouble resulted considering the ever increasing use of chemicals in industrial processes. No casualties have been reported from chrome poisoning for several years, although many cases developed when it first came into widespread use a few years ago. Education and close attention by our inspectors have shown marked results here.

Several cases of lead poisoning among children were reported from Montreal hospitals about a year ago and we immediately took steps to see that a similar outbreak would not occur here. Samples of all paints used on children's toys and furniture were secured and analysed and disclosed that several firms were using a paint containing lead. They were advised of this and instructed to use only paints containing a very low percentage of lead. The manufacturers of toys and children's furniture immediately fell in line and we do not anticipate the children in Ontario will suffer from lead poisoning if they chew only on toys made in this Province. It is interesting to know that probably the largest manufacturer of dolls in the world is located in Toronto and this development has occurred within comparatively recent years.

The Branch began the year just passed without the services of Mr. Jas. T. Burke, who, as Chief Inspector, had directed the work of the Branch for over thirty years. Many expressions of regret at his retirement have been received from employers and employees all over the Province and even more keenly is his loss felt within the Branch itself.

Inspector H. A. Clark, following a lengthy illness, passed away in June last, after serving the Branch faithfully and well for twenty-seven years. His experience and ability were an asset to the Branch and his passing is sincerely regretted by his colleagues and the public in the district in which he served for so many years. Still another death weakened our staff when Inspector W. T. Brennagh of Hamilton passed away in October following an extended illness. He also had served the Branch for many years and his loss is felt keenly in the Hamilton and Niagara Districts and among his co-workers in the Department. Our lady inspector in the Eastern portion of the Province, Miss N. Hamilton of Ottawa, resigned following her marriage and was succeeded by Miss K. Reesor, who was a member of the inside staff of the Branch for many years and well versed in the requirements of factory inspection. Miss Reesor has done remarkably well as an inspector and investigator, and is a valuable acquisition to the inspectorate. Mr. J. F. Stewart was transferred from the Employment Service during the summer to assist in covering the district made vacant by the death of Mr. Clark, and has been rendering efficient service.

I wish here to express my sincere appreciation of the splendid support given at all times by the executive heads of the Department and the hearty co-operation received from all members of the staff of the Branch, who have laboured steadfastly and in some instances put in extra hours for the benefit of the Branch.

The following statistical information is taken from our records and is of interest and value in graphically depicting the magnitude and scope of the work of this branch:

	Year 1933	Year 1934
Total inspections and revisits.....	22,364	23,429
First inspections	17,797	18,398
Second inspections	4,567	5,031

In addition to these are investigations of accidents and complaints, inspection of buildings on grounds during the Canadian National Exhibition and the Ottawa Exhibition, and at the homes of applicants when delivering contract permits under Section 51.

There were also the usual special visits, office calls and conferences incidental to inspection.

Employees in above industries, mercantile establishments and office buildings numbered 268,422.

Year	Males over 16	Males 14-16	Females over 18	Females 14-18	Total	Children under 14 dismissed
1933	195,523	10	94,914	803	291,252	2
1934	183,232	342	83,830	1,018	268,422	1

HOURS OF LABOUR

Hours	Males					Females				
	45	50	54	58	60	45	50	54	58	60
Year 1934	99,935	28,810	16,414	1813	16,857	54,095	13,822	4,856	593	3,730

Also 27,497 employees male and female, working approximately 50 hours per week.

Orders issued relating to various requirements of the Act totalled 4,851 as compared with 4,255 in the year 1933.

PERMITS

Applications for permits, overtime and others, numbered 2,246 and were issued as follows:

Year	Double Shift Permits Section 33	Overtime Section 32	Bakeshop Section 71	Fruit Camps Section 38	Contract Workers Section 51	Total
1933	67	1,278	108	13	206	1,672
1934	94	2,073	27	12	220	2,246

COMPLAINTS

Two hundred and forty-seven complaints were received during the year. Upon investigation 112 were upheld, 91 not upheld, 36 are pending investigation and 2 do not come within the jurisdiction of this branch. Some investigations cover more than one complaint. Subject of complaints are:

Year	Heat	Elevators	Fire protection	Child labour	Lavatories	Sanitation	Boilers	Guards	Ventilation, dust, fumes, etc.	Overtime	Hours of labour	Manufacturing in basements	Sunday work in bakershops	Miscellaneous	Violation of Minimum Wage Act	Violation of Operating Engineers Act	Violation of Adolescent School Attendance Act	Not under our jurisdiction	Mechanical exhaust	Total
1933	5	6	5	2	10	4	9	11	7	70	4	2	32	15	4	1	5	1	193	
1934	12	5	15	1	14	6	18	1	10	15	85	1	28	10	5	10	2	2	247	

VIOLATIONS

Violations of the Acts in the enforcement of which the Inspectors have a responsibility were submitted as follows:—

Of the Operating Engineers Act.....	30
Of the Adolescent School Attendance Act.....	11
Of the Minimum Wage Act.....	1669
Of the Steam Boiler Act.....	7

PROSECUTIONS

Proceedings were taken against eleven firms, under Section 30 of the Factory, Shop and Office Building Act. Conviction was recorded in eight cases, the other three cases being remanded.

ACCIDENTS

Two thousand four hundred and forty-six accidents were reported for the year 1934, of which thirty-two were fatal, as compared with 1,890 reported in 1933 with twenty-three fatalities.

Fatalities were due to:

Asphyxiation	1
Belts, pulleys, shaftings	1
Burns and scalds.....	8
Drowning	1
Electricity	3
Elevators	3
Explosions	2
Falling substance	3
Falls	2
Flying missiles	2
Industrial disease	3
Infected wounds	1
Machinery connections	2
Total	32

EXPLOSIONS

The following explosions were reported during the past year, six of which caused injuries to employees.

January 2, 1934—A gas explosion took place in a pipe foundry.

January 4—A molten iron explosion took place in an iron corporation.

January 29—Hardening solution exploded in the Toronto, Hamilton & Buffalo Railway Company.

April 9—Tar still exploded at an oil company's plant.

June 9—Gas oven exploded in restaurant.

September 6—Tank exploded in laundry.

October 12—Air tank exploded in garage.

No steam boiler explosions were reported during the year under section 58 of the Act.

The following extracts from the reports of the factory inspectors indicate the general level of conditions in the factories of the Province and the trend of business during the fiscal year 1933-34.

R. ALBROUGH

It is pleasing to report that business conditions improved somewhat during the past year and that a feeling of confidence in the future is being restored.

The safeguarding of machinery received my careful attention and many improvements were made in lighting, ventilation and general working conditions. In most plants safety is now recognized as an important part in plant maintenance and employers have shown a distinct desire to co-operate with the factory inspectorate in this regard.

Referring to the question of steam boilers and other pressure vessels, this is a branch of the work which requires a great deal of attention. The annual inspection of pressure vessels is treated in a rather dilatory manner by some of the small garage owners, who seem to think that "any old tank" is good enough for the storage of compressed air, and that such vessels require little or no attention after they are installed. Accordingly they are tucked away in corners and in other locations where conditions are specially favourable for dangerous corrosion. In a number of cases air receivers were being operated without safety valves or other safety devices, the excuse being that the belt would slip when a certain pressure was reached.

Inspection of stores and restaurants, principally in relation to the hours worked by female employees, is a matter of regular routine and often difficult to handle. It was necessary to take court proceedings against five restaurant owners for working girls later than twelve midnight after notice had been given them. In all cases convictions were recorded.

Bakeshops, with a few exceptions, are being maintained in a sanitary condition. Special care was given in bringing to the attention of master bakers the amendment of the bakeshop section of the Factory, Shop and Office Building Act, which required that fifty-six hours per week be the maximum for the employment of bakers. Work in connection with the enforcement of the Minimum Wage Act took considerable time and reports of investigations and questionnaires were turned over promptly to the Board, with the result that many corrections were made in the wages

of female employees. Comparatively few complaints were received with regard to the Operating Engineers Act and this district appears to be well supplied with certificated engineers.

H. BOURNE—INSPECTOR OF FOUNDRIES

From a considerable number of examinations of employees working in foundries in both Canada and the United States, it has been found that a certain percentage of such men are suffering from silicosis. Our energies have been directed towards the education of both employers and employees as to the hazards and the proper means of protection, before the dust comes to the breathing line of the operator.

I wish to express my views as to certain hazardous conditions and remedies, both by the use of mechanical agencies and the application of common sense in producing castings. Different grades of castings cannot be handled in the same manner, and it is, therefore, necessary to have several types of equipment. Cast iron sanitary ware, stove plate castings, malleable iron and steel castings are usually sand blasted in regular steel cabinets, the operator working inside the cabinet. In such cases the operator should be provided with a suitable helmet from a pure air source and the ventilation inside the cabinet should be such that the dust would be released freely and at the same time a proper amount of fresh air retained in the cabinet.

Other castings, such as builders' hardware, brass and aluminum castings and those of lighter grades should be sand blasted in automatic sand blast barrels which are dust proof and effective in protecting the operator. In some of the smaller shops this work is carried on in small cabinets with two arm holes through which the operator working on the outside manipulates the nozzle within the cabinet which is provided with a glass so that he may watch the work he is doing inside. These cabinets are usually unsatisfactory due to the fact that the structure becomes loose and dust seeps through to the outside. For this reason operators on this type of work should be provided with masks or respirators. Tumbling mills are used in many foundries for cleaning purposes. These mills should be dust proof or enclosed in dust proof boxes with a sufficient exhaust system to remove the dust to the outside of the building.

Gangways should be kept level and wet down at least twice daily and, where it is the custom to place castings in gangways from the moulders' floors, these gangways should be wet down before the dry sand is riddled into wheelbarrows or other conveyances. Where heavy castings, such as large electrical castings, cylinders, lathe beds and others are cleaned, the men should be equipped with respirators.

During the past few years a substance known as "parting" which is in flour form has been used and is shaken on the mould and pattern through a fine mesh cloth bag. This "parting" has been known to contain as high as 90 per cent. silica or tripoli and in some operations a cloud of this hangs around the head of the operator during most of the work period. Some of the foundry supply firms have been able to reduce the silica content of this "parting" but apparently only one or two of the firms have been able to cut it down to a point where it does not represent a serious hazard to the health of the moulders. The shaking out of castings from moulding boxes exposes the workmen to dangers as in most such operations they stand directly over the mould while they are shaking out the casting. It would not be practicable for these men to wear the helmet with air line attached, as they must go from one floor to another, but proper respirators should be worn.

Beams and window ledges should be kept clean so that dust will not accumulate until some vibration brings it down on the workmen. The use of goggles, leggings and

correct shoes is also necessary to reduce hazards in foundries. The co-operation of foundrymen has assisted us greatly in our efforts to make foundries safer places for work and with improved economic conditions more funds will be available for the purpose of placing these shops in better condition.

WILLIAM BURNS

This year the factory inspectors were called upon to give increased assistance in the administration of the Minimum Wage Act. In some of the plants in my district where it was found that the wages paid to female employees were not in conformity with the orders of the Minimum Wage Board, it was necessary only to point this out to those responsible and the matter was promptly rectified. In other instances, however, reports of low wages were forwarded to be dealt with by the Minimum Wage Board.

A complete check up was made on all pressure vessels in power houses to make sure that they were receiving the necessary inspection and also that the engineers and firemen in charge of boilers and power plants had the proper grade of certificate and that these certificates were posted in the plant in accordance with the requirements of the Operating Engineers Act. It was found necessary to reduce the pressure on many galvanized iron kitchen range boilers used as high pressure air tanks and where the work would not allow of substantial reduction of pressure, owners were advised to replace vessels with a tank built in accordance with the Steam Boiler Regulations.

Suction in ventilation systems was given careful attention, in order that foul air, vapors and gas should not contaminate the air in workrooms. Additional exits and fire escapes were ordered to be installed as an extra precaution against fire. Many orders were given for guards to cover exposed gearing and other places where employees might become entangled in revolving or moving mechanisms. The manner in which owners responded in remedying dangerous conditions was very gratifying.

W. S. FORSTER

In conformity with the Factory, Shop and Office Building Act approximately 1,400 premises were inspected in this district, which includes 120 small towns and villages and contains some 400 cheese factories. It was necessary to make about 300 specific recommendations in order to maintain the desired level of safety and welfare and the genial co-operation of employers in complying with such suggestions is a constant source of gratification to the inspector.

The usual vigilance was necessary to see that machines were kept guarded, elevators kept in safe condition, steam and pressure vessels certified, and that individual negligence is thoroughly discouraged. Individual negligence, which is beyond the control of everyone except the delinquent, causes a high percentage of the mishaps which sometimes cost the delinquent dearly. A fatality worthy of mention in this connection occurred when a lad deliberately crawled under an elevator gate and stood on the hatch pulling the cable. The elevator crushed him between the hatch door and the side of the shaft.

Building, textile and lumber trades showed some improvement, while certain others remained at about the same level as last year. The inspections were quite encouraging this year from the standpoint of safe and healthful environments for the workers and the result has been a sense of security for all employers.

W. C. CROZIER

Many recommendations were made for the placing of guards on machinery and the requirements along this line were complied with in almost every instance in this district. The enforcement of the annual boiler inspection section requires considerable time and travelling as most of the portable sawmills are located in remote portions of the district and sometimes are difficult to get at. However, on account of the hazard attached to the operation of steam boilers, no effort was spared to inform owners of these plants of the requirements of annual inspection and the necessity for adequate guarding of saws and other sawmill equipment. During the year increased activity was apparent in many industrial lines, such as woollen and worsted mills, lock works, packing firms and other small plants, many of which applied for overtime permits.

J. P. FERGUSON

During the year most of the factories in my district were inspected once, and where it was found necessary, more frequent inspections were made. A vast improvement was made in the three tanneries in this district in the provision for health, safety and better working conditions, which speaks well for the management. This industry is very busy at the present time and the number of employees was increased over the total for the previous years.

In industries where benzol is used it was found necessary to make frequent inspections. In the shoe plants a folding cement containing benzol was being used without any provision for protecting employees from the fumes. After an interview with the management regarding this danger, the use of this cement was practically discontinued in this district.

In dry cleaning plants, where gasolene, stodsol, carbon tetra-chloride and trichlorethelene are being used, every care is taken to see that rooms are air-conditioned every two to five minutes, and that the equipment is maintained in good condition to avoid leaks and to see, where gasolene and stodsol are used, that the machines are well grounded. By maintaining this standard the health of the employees has so far been free from injuries in these plants.

Periodical inspections were made in the buffing and polishing industry and all exhaust systems were carefully tested. From time to time it was found necessary to make recommendations for repairs to the pipes and to have the separators and systems cleaned out. Neglect of this causes the suction to drop and the dust is not taken away so effectively. More care should be exercised to see that exhaust systems are kept in good working condition. Many recommendations were also made for the guarding of machinery, repairs to interlocks, gates and cables on elevators and fire escapes, and most of these were completed satisfactorily.

Care was taken to see that all uninsured steam boilers and pressure vessels in this district were given annual inspection. Only one violation of the Operating Engineers Act was reported. Accidents were fewer than in previous years and only one was fatal, caused by a gas explosion in an oven. Visits were made by members of the staff of the Industrial Hygiene Branch to various plants in my district. Their co-operation and advice were of great value and I wish to express my appreciation of their services.

MISS N. GARDEN

Some improvement was found in the numbers employed in the majority of factories in my district and there was the usual demand for overtime permits for

seasonal rushes. Practically no trouble was experienced with proprietors of restaurants for employing female workers later than twelve o'clock midnight and only one case of child labour was found. This happened in a canning factory where the manager attempted to evade the law, explaining that the name of the child did not appear on the payroll, the money earned being included in the mother's pay. With the effective co-operation of the local school attendance officer, several cases of adolescents working without the necessary permit were located. Many complaints of breaches of the Minimum Wage Act were received but in the majority of cases adjustments were made and the employees concerned were satisfied with the result of the investigation by the Minimum Wage Board and the interest taken in their welfare. In one instance it became necessary, after repeated verbal and written warnings, to prosecute an employer for infraction of section 32 of the Factory, Shop and Office Building Act and the result was a verdict against the offender. Accidents were fewer in number and none to female workers were fatal. Benzol poisoning contracted in a shoe factory, however, proved fatal for two young girls.

MRS. GURNETT

Regular inspection of practically all industries in my district were made during the year and it is gratifying to report that there was greater activity in all lines of business, which was better than for several years. The majority of employers are careful to observe the regulations, but some get started on rush orders and neglect to apply for permits to work female employees after half past six. They are usually surprised and sometimes quite belligerent when shown that they have contravened the Act, feeling that when they get business they have a right to get it done in their own way and not according to regulations.

Several women who had hand embroidery, faggotting and fine hand sewing from the many dress houses conceived the idea of renting a large room adjacent to the factory district and bringing the home workers together to do the work. The workers were all foreign born and adept at needle work. They were lonely in a new country and all enjoyed working together where they heard their own language. However, as there were more than five persons employed, frequently from ten to twenty, in each of these places, they had to be designated as a factory according to section 8 of the Factory, Shop and Office Building Act.

When delivering home work permits, I received several complaints of factory owners who, when the completed work was returned, would cut down the price previously agreed upon by ten or twenty cents because other women had offered to do the work for the lower price. On the other hand, one large firm enquired if the minimum wage was paid the workers, before giving a hundred dresses out to be faggotted. Naturally there were complaints from the Bonanza embroidery industry because of the unfair competition. In one firm I was shown \$10,000 worth of embroidery machinery lying idle because hand work was so cheap. The owner felt that some protection was due him as his factory is under government inspection and regulation. When delivering home permits one comes in contact with sad cases and during the school holidays many children were found helping with this work, as they no doubt do in the evenings during the year. As one mother said, "It keeps the children off the street."

MRS. G. E. HORNELL

More firms than ever before are giving out work, such as jewellery, comforters, tags, etc., to be done at home. Frequently permits are returned because the pay is too low and eleven such permits were refused in one week by the applicants for the same reason.

Many of these home workers live in outlying districts where double carfare is required for obtaining and returning the work, which leaves little of the 60 cents earned for from seven to twelve hours' work. In one case girls who were unable to earn the minimum wage in the factory at the piece work rate were given the work to do at home where there is no restriction as to hours, and the workers admitted they worked day and night. In some instances work is redistributed and a lower rate of pay prevails. As permits for homework are required only in municipalities of over 50,000 population, it is not possible to obtain an accurate record of the amount of such work done throughout the Province.

S. J. MALLION

During the past few months there has been some improvement in business conditions in a number of factories in my district, more particularly in those manufacturing textiles, cosmetics, perfumes, drugs and food products. There was also increased activity in automobile factories and firms making automobile accessories. Very little factory building was carried on during the year, a few additions only being made in this district. The lack of building operations has almost completely paralyzed the planing mill business. An idea of conditions is indicated in the reply to the question, "How is business in your line?" made by the owner of a large mill. He replied, "There is no such thing as a planing mill business any more." Thousands of dollars' worth of planing mill machinery is lying idle.

When inspecting bakeshops, I informed operators of the new provisions regarding hours of labour for bakers as provided in section 71 of the Act. Generally speaking, this section is being well observed and all bakeshops are in splendid condition, as are also all canning factories and other food factories. Regular visits were made to restaurants for the double purpose of seeing that sanitary conditions prevailed and the prescribed hours of labour for female workers were being adhered to.

A number of recommendations for inspection of boilers and pressure vessels were made during the year and such recommendations were usually complied with promptly. Special attention was given to refrigeration equipment and where gas masks were not provided, recommendations were made to have these purchased, and installed in a convenient and suitable place. These masks are not only a protection to the employees in case of need, but are of commercial value as a leak or break in the ammonia line may often be repaired with the use of a mask without shutting down the system.

J. MONTIETH

Many sawmills in the northern section of my district which have been idle for years commenced operations this season, although the cuts were small. Boilers in all mills were inspected by qualified engineers before the mills started operations, and no accidents were reported at any of the mills. Most of the domestic tanks used as air tanks in garages and service stations have been scrapped and standard types of air tanks installed, which lessens the possibility of accidents. The requirement that all containers of benzol and substances containing lead or benzol be labelled is being strictly adhered to by both manufacturers and distributors. In the women's hat industry, where benzol was used in the thinners, a substitute is now being used which is much less harmful to the hat dipper and is giving good satisfaction. Engravers who still use benzol have had exhaust systems installed and employees coming in daily contact with benzol fumes are having regular medical examinations. A new machine is now being installed in some of the cleaning and pressing establishments which will lessen greatly the hazard of trichlorethylene fumes. Persons operating

the old style machines could not avoid inhaling fumes when moving the soaked garments from the washer to the drier. The new machine is an entirely closed system, requiring no handling of garments and the garments are hung in a cabinet to be deodorized before being pressed. The combined fumes from washer and cabinet are exhausted to the outside of the building.

MISS K. REESOR

During the nine months as inspector in this district I have made 1,372 inspections and visits, 101 of which were in connection with complaints of violations of the Minimum Wage Act and 15 were regarding other complaints. In 17 per cent. of the 554 firms inspected in this district, exclusive of Ottawa, female employees were working too long hours on Saturdays, if not too long in the week. As a rule my suggestion of overcoming this difficulty by bringing one girl in later in the morning and giving another a longer meal hour was accepted, particularly when it was pointed out that, with less duty in the early part of the day, the girls would be able to give their best salesmanship in the evening when it was needed.

MRS. E. SCOTT

Following the amendments to the Minimum Wage Act last April, additional responsibility was placed on the factory inspectors for its enforcement, such as investigating complaints, taking off wage sheets and reporting infringements of the Act, as well as seeing that minimum wage cards are kept posted. The amendments to the Act had to be explained to employers, whose interest was keen because of publicity in the press. Our investigations resulted in adjustments of wages and arrears covering several months for women and girls who were being underpaid. It is gratifying to state that conditions in my district improved greatly and that there is an upward trend in all lines of business.

J. PENDER WEST—EXAMINER OF PLANS

Probably no class of industry has suffered more severely than the building trades during the general depression of the last few years and the extent of the decrease in industrial building since the banner years 1927 to 1929 is graphically indicated on the accompanying diagram from which it will be seen that in the fiscal year 1928-9 the estimated value of the buildings, which were approved in accordance with section 14 of the Factory, Shop and Office Act, attained the all time high record of \$35,237,150, whilst in the fiscal year 1932-33 the estimated value of approved buildings had dropped to \$2,534,000, a figure lower than any other we have on our records. The fact that the estimated value for buildings in the year just past rose to \$6,426,550, supports other indications that industry in Ontario is once more on the upward grade. The number of plans submitted increased from 115 in 1933 to 202 in 1934.

A significant feature in the year's record is the large proportion of the building which is being done by firms who are already established in the Province and are adding to their plants. Over one-half of the buildings for which plans were approved come within this class and it must be considered a most encouraging sign that firms who have struggled through the depression, now consider that the time has arrived to provide for increased business.

In opposition to the foregoing optimistic view, it has been pointed out that planing mills and other woodworking plants are showing little or no increase in activity. In explanation of this it must be remembered that very little wood is used

in the construction of the modern factory—the walls are of brick and concrete, the floors of concrete, the roofs generally of steel trusses covered with fire-proof materials and the window sash are nearly always of steel. There is little doubt that the use of wood in construction will be almost entirely restricted in future to domestic and temporary buildings and to forms in concrete work. The general prevalence of fire-

proof construction in important industrial and public buildings will necessarily limit the use of wood in these structures.

Another interesting feature has been the number and character of new processes which are being installed and developed as a result of the forward strides being made by modern research. Most of these require careful study to ensure the safety and

health of employees in the new industries before plans can be approved and the co-operation of those responsible for the design of the plants is gratefully acknowledged. The assistance of the director and other officials of the Division of Industrial Hygiene has been invaluable in connection with these plans and their technical knowledge and experience have always been placed unreservedly at our disposal.

Most of the plans submitted for approval show that the modern architect and engineer have a sound knowledge of the various factors affecting the safety and health of occupants of buildings and it is not often necessary to ask for more than minor changes in the design. It may fairly be stated that the industrial buildings in Ontario will bear comparison, from the points of view of safety and efficiency with those in other countries. This statement is not intended to convey the impression that all, or even the majority of these buildings approach perfection, but some of those more recently erected embody most, if not all, of the most modern improvements in factory building. These are generally erected by the larger firms with extended experience who have carefully noted items in previous buildings which were undesirable or capable of improvement and have incorporated these improvements in the newer buildings.

Probably the most outstanding point of deficiency in the greatest number of buildings is insufficient or improper lighting and it may safely be said that no one factor has a greater bearing upon efficiency, health and safety. In most cases of newer buildings the glass area of windows is sufficient but in very few cases is any provision made for cleaning the glass, the result being that within a few months 50 per cent. of the lighting is lost. In very few factories is any provision made for the regular cleaning of lamp bulbs and shades or their replacement when defective.

It should also be remembered that improper lighting may be as great a cause of trouble as insufficient lighting. Glare on the worker's eyes either direct or reflected from polished surfaces, shadows upon the work, flickering or swinging lights, are all faults easily remedied, but will cause defects in work and are prolific causes of accidents.

H. A. WINNETT—POLISHING AND BUFFING INSPECTOR

During the fiscal year industrial conditions showed a marked improvement in the industries which I cover. Each of the factories for which I am responsible was visited twice at least and in some instances it was necessary to make an extra visit in order to see that recommendations had been complied with. Factory managers are like any other cross section of humanity; some are out to have the best conditions obtainable and others, though they are in the minority, do not care what the conditions are so long as they can keep out of trouble and produce the goods. It was necessary to make a number of recommendations in regard to air pipe construction and capacity.

The chrome plating problem has been pretty well settled, manufacturers having become "chrome conscious" and realizing now the necessity for having a proper exhaust system, rubber gloves, etc., for the protection of their employees. The principal thing is to keep up to the mark, watch for new plants and see that proper protection is provided for the workers.

There is also the protruding set screw which we never seem to get clear of. A set screw becomes loose, somebody picks up the first one to hand that will fill the bill regardless of the length and in it goes with the result that we find them sprouting where none grew before. This danger requires constant watching. Very few women are employed in plating and polishing plants and child labour does not exist.

Boiler Inspection Branch

ACTING CHIEF INSPECTOR—E. T. URQUHART

INSPECTORS—N. S. SMITH, J. N. BRIGGS, W. H.
BARRETT, J. STEVENSON

A decided increase was shown during the past fiscal year in all phases of the work of the Boiler Inspection Branch, more particularly in connection with unfired pressure vessels, of which 214 more than last year were fabricated and inspected during construction in the shops of the various manufacturers. Most of these vessels were of welded construction.

Inspections this year of second-hand boilers and other pressure vessels exceeded those of last year by 199. There were 289 designs submitted and approved, an increase of 38 over last year. It is indeed gratifying to report that it was possible to take care of the additional work throughout the year, which resulted in an increase of revenue amounting to \$2,416.81, when we consider the fact that we were handicapped by being understaffed.

Although the boiler manufacturers in this Province did not operate to full capacity, they maintained a portion of their staff continuously, and in some cases it was necessary for a time to work day and night.

Throughout the Province more boilers and other pressure vessels were sold or exchanged, and the additional vessels installed in existing plants were greater in number. Some plants re-opened after a period of inactivity, and their pressure vessels were again inspected with a view to safe operation. In some instances new pressure vessels were installed, all of which clearly indicates an upward trend in industry.

Several investigations were made in connection with pressure vessels and equipment, which had failed while under pressure, and we are pleased to state that in three instances only did the results prove to be of major proportions, the remainder being of a minor nature.

On November 27, 1933, alterations were being made to an eight-inch steam main connecting two boilers in a warehouse in Toronto. One of the workmen employed by the firm in charge of this work cut off with an acetylene torch the steam outlet connection of one boiler, thinking that the steam in the other boiler had been shut off. Due to an apparent misunderstanding the steam had not been shut off, and as there was a slip expansion joint without guides or bolts in the steam main between the boilers, the steam pressure blew out the portion of the piping which had been severed at one end by the workman. Three men died from the effects of scalding. The anticipated changes had not been reported to this branch before the accident occurred.

On April 19, 1934, one man was killed and several injured when an accumulator tank exploded in the main yard of an oil company. This tank was of the open type.

having a vent to the atmosphere and used for the accumulation of hot tar from stills on the same circuit. The explosion which had occurred apparently inside of the tank resulted in the tearing apart of the top head, and a portion of the shell. All of the oil refinery equipment is inspected continuously by inspectors employed by the company, and the cause of the explosion could not be determined definitely.

We received a telephone call on October 4, 1934, from the Toronto Police Department, advising a boiler had exploded at a Convalescent Home in Toronto. We found upon making an immediate investigation that two round cast iron sectional hot water heating boilers had been in use in this institution, being connected to common flow and return headers and having a stop valve on each connection to the boilers. The boiler in question had not been in use during the past summer and the caretaker had previously closed the stop valves on the flow and return lines. This fact had apparently been overlooked by the caretaker, and when the fire was lighted sufficient steam pressure was generated to cause a fracture of the weakest boiler section. The caretaker who at that time was evidently in front of the boiler received scalds, the effects of which resulted in his death a few days later. The heating system is an open type having an expansion tank, and if the stop valves had not been closed this unfortunate accident would not have occurred.

Class "B" Certificates (used pressure vessels).....	804
Class "C" Certificates (heating boilers, low pressure accepted by affidavit of shop foreman).....	180
Class "D" Certificates (new pressure vessels, accepted by affidavit of shop foreman).....	568
Class "E" Certificates (new boilers under 3 h.p. accepted by affidavit of shop foreman).....	21
Duplicate Certificates.....	16

The amount of monies transmitted to the Treasurer of Ontario for the fiscal year ending October 31, 1934, totalled \$14,636.80.

Board of Examiners of Operating Engineers

CHAIRMAN—J. M. BROWN

MEMBERS—W. J. SCOTT, S. G. ROSE

INSPECTOR—W. J. JORDAN

The statistical figures given below constitute the twenty-sixth annual report of the Board, covering the fiscal year ending October 31, 1934.

Although there was a decrease in the number of certificates issued as compared with the preceding year, the report reveals an increase in the amount of revenue received. Last year the net revenue amounted to \$23,177.06. This year the net revenue amounted to \$24,522.60, an increase of \$1,345.54. In explanation of this increase it should be remarked that the greatest revenue derived from increased examinations and re-examinations, which did not add to the number of stationary certificates in circulation except in the case of firemen and fourth class. Another item of increased revenue is found in the higher renewal fees of those engineers who neglected to renew their certificates in the prescribed time. Increased text book sales also assisted in the total revenue. In the number of certificates issued, including renewals, the total this year was 16,250. Last year the total was 16,516. Three years ago the certificates issued including renewals numbered 17,505, so that today there are 1,255 fewer certificates in operation than in the year ending October 31, 1932. Arranged in classes or grades the decrease in certificates during the last mentioned period is as follows:—Fourth Class, 637; Third Class, 147; Second Class, 212; Hoisting, 207; Traction, 238; Plant Registration, 45. Firemen and First Class certificates increased 213 and 18 respectively.

This is as it should be, for in times of economic depression the fewer certificates there are in circulation the more opportunities there are for employment for engineers who hold certificates.

In the number of certificates issued by examination and including those candidates who failed to pass, the decrease last year as compared with the former year was 27½ per cent. in stationary plant operation examinations, and 41 per cent. in construction plant operation examinations. This ratio is still being maintained, emphasizing the continuing static state of the construction and building trades.

Of the 1,486 examinations held during the year 1934, 601 candidates were examined at the Head Office in Toronto, while 885 candidates were examined at thirty-six other large centres.

The decision of the Board three years ago to compile and issue suitable text books for the use of the Ontario engineers has created much additional work for the staff and this work has been carried out without extra help. To date, six text books have been issued and requests for these are being received not only from Ontario but from all parts of Canada and the United States and also from India.

In 1932 the sale of text books amounted to \$1,385.35. In 1933 the text book sales amounted to \$1,422.05 and this year the total was \$1,729.40.

Besides conducting examinations and issuing certificates of competency the Board is responsible for the enforcement of the Act. The abnormal economic conditions of the past year or two have made rigid enforcing somewhat of a difficult task. We are pleased to state, however, that the duties of the Board in this connection have been materially lightened by the co-operation extended by employer and employee alike.

Apprenticeship Board

CHIEF INSPECTOR—A. W. CRAWFORD

DISTRICT INSPECTORS—WALTER THORNE, TORONTO; J. R. JOHNSTON, OTTAWA

The prolonged inactivity and lack of employment in the building trades have made it impossible to revive operations under the Apprenticeship Act, but conditions are improving and there are signs of renewed interest which should result in new developments during the coming year. Conditions vary throughout the Province and it may be several years before the whole programme of apprentice training can be put into operation in all sections, but it is expected that an increasing number of boys will be indentured in the larger centres and adequate provisions made for their training both on the job and in special school classes.

The experiences and difficulties of the past six years have paved the way for an extension of organized apprentice training to other occupations and industries. Enquiries are being received from representatives of the hairdressing and barbering services in connection with the establishment of training facilities under the Act. Several meetings have been held to discuss the situation and plans are being made to commence activities in the immediate future if sufficient representation can be secured. No general revival of apprentice training is expected, however, until industrial conditions have considerably improved.

Only four meetings of the Apprenticeship Board were held during the year. At a conference between the Board and members of the staff in June, it was decided to allow matters to stand for the time being with the expectation that improving conditions would make it desirable to call conferences with representatives of employers and employees early in 1935, for the purpose of reviving classes and making adjustments in the work.

Further reductions were made in the Apprenticeship staff at the close of the year, when the assessment officer and two inspectors were transferred to the staff of the Minimum Wage Board. Several members of the clerical staff were transferred to other offices and the work is now being done by the Chief Inspector, who is also Chairman of the Minimum Wage Board, two inspectors, and a senior clerk-stenographer. Closer co-operation has been established with other branches of the Department of labour and the transferred inspectors are continuing to secure reports and make inspections for the Board. It is felt that the work and expenditures have been reduced to a minimum.

Some employers are continuing to indenture apprentices despite the fact that day classes have been discontinued and little is being done by way of special evening classes for apprentices even in the large centres.

The number of boys registered during the past year was 15 as compared with 27 for the previous year (See Tables Nos. 1 and 2). The total number of registered

apprentices on October 31, 1934, was 343, a decrease of 304 for the year. The number of completions 185, was practically the same as for 1933 but cancellations of contracts numbered 134 for the past year as compared with 13 for 1933.

Practically all apprentices not actively engaged in learning the trades have been struck from the rolls and it is expected that a considerable number of these young men will re-enter the trades and complete their training as conditions improve. One evidence of improving conditions is the fact that a number of employers in the plumbing, steamfitting, sheet metal, and electrical trades are asking for inspectors to locate former apprentices of other firms for temporary and, in some cases, permanent employment. Practically all of the indentured apprentices in these trades in the Toronto district have been reabsorbed or have taken up another occupation. A sudden revival in trade would bring about a decided shortage in both skilled mechanics and apprentices.

Hamilton	Cap factory workers	Oct. 22	For renewal of union agreement; untermiated at end of fiscal year	175	1,200
Totals 94 strikes				18,198	256,311

These figures do not include the strike of musicians, 200 of whom throughout Canada were involved in a strike from June 16 to July 11, when approximately 4,600 working days were lost.

The number of industrial disputes in Ontario reported to the Federal Department of Labour for the fiscal year ending October 31, 1934, showed a considerable increase, indicating greater unrest than for many years. There were 94 strikes, involving 18,198 persons and causing a time-loss of 256,311 working days.

Compared with the years during the period 1921-1934, there were in 1934 more strikes and more persons were involved in the strikes than in any other year in the period. The time-loss due to these strikes was greater than in any year since 1922.

The logging industry suffered the greatest loss of time due to strikes, when 16 in this industry caused a loss of 123,365, or nearly half the total number of days. The clothing and textile industry ranked second with the 18 strikes causing a loss of 75,155 working days, or more than half the balance of time-loss. Furniture factories, a printing and publishing firm and the boot and shoe factories had almost equal losses of 13,648, 13,500 and 12,514 working days.

Of these 94 strikes, 33, in which 5,947 persons were involved with a time-loss of 29,377 working days, were settled in favour of the workers; 31, in which 4,044 persons were involved with a time-loss of 72,921 days, were settled in favour of the employers; 27, in which 7,048 persons were involved with a time-loss of 119,313 days were partially successful or indefinite as to outcome; and 3, in which 1,159 persons were involved with a time-loss of 34,700 working days, were unterminated at the end of the fiscal year.

As to the causes, the question of wages was the cause or partial cause of 74 strikes in which 16,241 persons were involved with a time-loss of 221,568 working days. Of these 74 strikes, 20 were due to wages only; 15 were due to wages and hours; 27 to wages, hours and union matters; and 12 to wages and union matters. Of the balance, 16 strikes were due to union matters only; 2 were sympathetic; 1 was due to hours only and 1 may be classified as miscellaneous. The question of union matters was the cause or partial cause of 55 strikes, in which 9,511 persons were involved with a time-loss of 132,738 working days.

WAGES AND HOURS OF LABOUR

REPORT

OF THE

Minister of Education

FOR THE YEAR 1934

TO THE HONOURABLE HERBERT ALEXANDER BRUCE, M.D.,
Colonel in the Royal Army Medical Corps, F.R.C.S. (Eng.),
Lieutenant-Governor of the Province of Ontario.

YOUR HONOUR,—

I beg leave to present to Your Honour the Report of the Department of Education for the year 1934.

A survey of the work of the Department for 1934 would be incomplete without reference to the retirement of two of its senior officials—Dr. A. H. U. Colquhoun and Dr. F. W. Merchant. For more than twenty-eight years, Dr. Colquhoun discharged the duties of the Deputy Minister of the Department in a most acceptable manner. During this long period successive Ministers have enjoyed the advantages of his wisdom and experience. Dr. Merchant's services in the field of education in this Province have extended over a period of nearly sixty years, while his active connection with the Department began thirty-four years ago. From 1900 to 1908, he was Principal of the London Normal School; from 1908 to 1911, he filled the position of Chief Inspector of Public and Separate Schools. Of special significance, however, were his services to the Province in formulating and introducing the system of Technical and Industrial Education now established as a most important unit in the training of young men and women in our urban centres. From 1923 to 1930, he held the position of Chief Director of Education; and from that date until his retirement he was Chief Adviser to the Minister. It is my privilege to express the gratitude of the Province for the services rendered by these two officials of the Department.

The year 1934, like its immediate predecessors, has been beset with many difficulties in the administration of educational affairs. Local school authorities have been obliged to reduce their expenditures to a minimum, with the result that in many cases the salaries of teachers have been still further reduced. Certain local authorities have been able, however, to restore to teachers a portion of the reductions made in salaries during previous years. Equally serious has been the necessity in many instances of crowding an excessively large number of pupils in particular classes. In spite of these conditions there is no evidence indicating that the effectiveness of the work of the schools has been impaired. I wish to express my appreciation of the fidelity of the teachers of the Province in the discharge of their duties amidst these difficult conditions. Members of school boards and of boards of education have frequently experienced difficulty, likewise, in persuading municipal councils to accept their requisitions for educational purposes. Experience has indicated that friendly conference between councils and boards has produced a reasonable and satisfactory solution of these difficulties. While the necessity for rigid economy must be accepted, there is need for protecting the rights of children to obtain the advantages of education

Public and Separate Schools

The total enrolment in the elementary schools of the Province has been well maintained. The total enrolment on May 31st, 1934, was 584,027, as compared with 584,883 on May 31st, 1933.

Despite adverse conditions of weather the average of attendance in both urban and rural schools increased slightly over that of the previous year.

The rural schools of the Province present certain unique problems. During the year 1934 there were 129 schools with an average attendance of fewer than six pupils, and 620 schools with an average attendance of six to ten pupils, or 749 schools with an average attendance not in excess of ten pupils. While the maintenance of certain of these schools may be justified by local conditions, the existence of such a large number of schools with a small attendance is of doubtful wisdom from the point of view of the economic use of public funds, as well as from that of the interests of the pupils. The provision of a remedy for this situation is receiving the attention of officials of the Department.

Attention is directed, likewise, to the increase in the number of Fifth Classes being conducted in the elementary schools of the Province. This increase reflects two conditions—the desire of an increasing number of pupils to receive instruction beyond the present High School Entrance examination, and the inability or unwillingness of parents to send their children away from home to secondary schools. In general, it is desirable that, as far as possible, provision should be made for the instruction of boys and girls during the period of compulsory attendance without the necessity of their leaving home. Fifth Classes have unquestionably contributed to this end. In so far as Fifth Classes have extended the period of instruction in rural elementary schools for a year beyond that which would otherwise have been possible, they have rendered a valuable service. The work being done in Fifth Classes throughout the Province is not, however, of uniform excellence. There is reason for the belief that this advanced work is being offered in certain ungraded schools in which the large attendance makes it impossible for the teacher to give adequate attention to Fifth Class pupils, and in others in subjects in which the teacher does not possess the training necessary to produce satisfactory results. Inadequate training in such Fifth Classes has been revealed when pupils proceed to more advanced work in the secondary schools. It may, therefore, become necessary to limit the instruction in Fifth Classes to schools in which such conditions exist as will ensure the maintenance of recognized standards of scholarship.

Correspondence Courses and Railway School Cars

One of the most significant features of the development of this Province during recent years has been the extension of agricultural settlement in the Clay Belt of Northern Ontario. As the fringe of settlement is pushed forward, it is not always possible, by reason of economic conditions, to erect new school buildings and pay for the services of a teacher. The lack of highways and the rigorous climatic conditions prevailing in the northern districts increase the difficulties of maintaining schools during the Winter months. The Correspondence Courses instituted by the Department several years ago have made it possible for children residing in these areas to receive instruction in the work covered in all the grades of the public school. Outlines of the courses of study in each grade have been prepared for the guidance of pupils; exercises are completed regularly and corrected by a staff of qualified teachers in the Department.

The total enrolment in these courses during 1934 was nearly 1,800, and the work accomplished by the pupils was most satisfactory. The standing of a large number of pupils instructed by Correspondence Courses who wrote the Entrance examinations indicates the thoroughness and adequacy of this method of instruction. The many expressions of appreciation of the advantages of this service have been the source of real satisfaction to the officials of the Department.

Another and somewhat different frontier is being served by the Railway School Cars in Northern Ontario. A sixth School Car, added this year, meets the needs of communities located on the Canadian National Railway line between Sioux Lookout and the Manitoba boundary. Not the least significant of the services performed by the Railway School Cars is the instruction in the English language given to adults of foreign origin.

Secondary School Education

The report of the High School Inspectors points out that there is a considerable increase in the number of congested classes throughout the Province as a result of enforced economy on the part of municipalities during the depression; that there has been a decided improvement in the qualifications of High School teachers, as measured by their higher certificates; and that increased attention is being given to music both as a regular subject on the school timetable and as one of the extra-curricular activities promoted by members of the staffs. It is encouraging to observe that the Continuation School Inspectors report that, despite the depression, boards of trustees have, on the whole, maintained the salaries paid to their teachers during more prosperous times. The percentage of graduates now on the staffs of the continuation schools has increased in the last two years from 25 per cent. to 44 per cent., and many of the continuation schools are now providing Upper School courses in order to meet the academic requirements for admission to the Normal Schools.

Attention is directed particularly to the historical review of the growth of vocational education in this Province from 1910 to the present, contained in the report of the Director of Vocational Education. Reference is made to the whole-hearted support which industry and the labour organizations have given to the work in these schools, and to the success which has attended the opening of evening classes for the unemployed in several of the vocational schools of the larger centres. The Principal of the Ontario Training College for Technical Teachers, Hamilton, gives an account of the development of the professional training of vocational teachers from 1925, when the Training College was first established, to the present. He also refers to a reciprocal arrangement between the Ontario Training College for Technical Teachers in Hamilton and the Ontario College of Education in Toronto whereby a graduate of one institution may, by an additional Summer Course, meet the requirements for a certificate from the other. He also deals with the subject of vocational guidance, which is now receiving special attention by means of Summer Courses for teachers carried on in Hamilton. The report also points out the need for vocational teachers of general shop work who will be qualified to teach in vocational schools in rural communities, where farm mechanics, motor mechanics, etc., should be subjects of instruction.

Professional Training

Notwithstanding the surplus of unemployed, fully-qualified teachers for secondary schools, 533 students were enrolled in the High School Assistants' Courses at the College of Education. This compares with 587 in the preceding

year, but the number of teachers is still in excess of the positions available. A gratifying proof of the interest secondary school teachers are displaying in the matter of professional improvement is shown by the enrolment in Pedagogy Courses. This year there were 247 students so enrolled, an increase of 53 over last year. During the year three of these students were awarded the degree of D.Paed., and 53 the degree of B.Paed.

A marked falling off is shown in the attendance at the Provincial Normal Schools, there being a total enrolment of 1,808 students in contrast with that of 2,586 in 1933. This decrease is mainly due to the withdrawal of the Second Year Courses, which had been in existence for four years. There is still an over-supply of qualified teachers for elementary schools.

Schools Attended by French-Speaking Pupils

This year again marks a steady advance in the efficiency of the schools attended by French-speaking pupils. Teachers with higher grade professional certificates are gradually replacing those with the lower qualifications of past years. The attendance at the University of Ottawa Normal School has now reached proportions that will ensure an adequate supply of well-trained teachers to fill all vacancies occurring. A further gratifying feature of the situation is the increased sense of responsibility regarding equipment and accommodation now being shown by both ratepayers and trustees.

Comparison of conditions existing in 1925-27 with those of the present year shows a gratifying record of progress. Classes in the last school year in which the pupils write English with a facility approximating that of children in an average school attended by English-speaking pupils of the same grade have increased from 31 per cent. to 50 per cent.; while classes in which pupils cannot speak English at all have decreased from 10 per cent. to zero. Classes in the last school year in which pupils speak English with a facility approximating that of English-speaking pupils of the same grade have increased from 35 per cent. to 60 per cent.; while classes in which the pupils have no ability at all to speak English have decreased from 35 per cent. to zero.

Side by side with this improvement in the command of English is shown also an increase in the satisfactory reading and writing of French. In 1927, the classes in Form I reading French satisfactorily for their grade was 30 per cent.; in 1934, this had risen to 70 per cent. In the same period classes in Form IV reading French satisfactorily rose from 50 per cent. to 76 per cent. In the speaking of French the results, to a great degree, vary in accordance with the opportunities afforded for speaking the language outside of the school. Those in localities where French is the prevailing language have naturally shown the greatest improvement in this respect.

On account of the numbers of First and Second Class teachers now being graduated from the University of Ottawa Normal School, it has been decided that after 1935 no further Third Class certificates will be issued. This will mean the closing of the Model Schools situated at Embrun, Sturgeon Falls, and Sandwich.

During the period when teachers with higher professional and academic qualifications were still unavailable, these schools performed a most useful service to the cause of education in Ontario. "The closing of the Model Schools marks the passing of an institution which educational evolution in this Province renders now unnecessary".

Auxiliary Classes

The work being accomplished by the teachers of Auxiliary Classes throughout the Province is most commendable. In these classes training is given to backward and psychopathic children whose mental age is not less than the minimum legal school age. In addition to the types of pupils already referred to, classes have been organized for teaching lip-reading to children classed as "hard-of-hearing"; sight-saving classes for pupils whose eyesight prevents them from making satisfactory progress with ordinary text-books are also provided in the larger urban centres. In Toronto, in both public and separate schools, Open Air Classes have been established for delicate, anaemic, or under-nourished children; while in several centres classes have also been established for children in hospitals, sanatoria, wards or homes for the incurable, children's homes, shelters, and orphanages. In Ottawa, Toronto, and Kitchener, over 200 disabled children are given regular instruction either in schools or in their own homes. Between 2,300 and 2,400 children of thirteen years or over are enrolled in what are known as Special Industrial Classes. In all, approximately 6,000 handicapped children are being cared for by 300 teachers. What these services must mean to both the children and their parents is hard to estimate.

Teaching of Agriculture

The report of the Inspector of Agricultural Classes indicates that this branch of instruction is engaging to an increasing degree the interest of school boards, of parents, teachers, and pupils. Nearly three-quarters of the elementary schools of the Province are now offering instruction in Agriculture, while in nearly eighty per cent. of the rural schools Agriculture is being taught. The teaching of Agriculture in the secondary schools of the Province has, likewise, been extended. Twenty-five collegiate institutes, sixty-one high schools, and thirty-six continuation schools are now offering this subject as part of the regular course of study. Nearly 14,000 pupils were enrolled in these classes during the year. There has been a distinct improvement, likewise, in the qualifications of teachers of Agriculture in the secondary schools of the Province; nearly one half of these are graduates of the Ontario Agricultural College.

Of special interest is the work being done in a limited number of schools in Agriculture, Farm Mechanics, and Home-making, under the regulations for vocational schools. At Beamsville, Ridgetown, Renfrew, and Stamford, these courses have been in operation for a number of years, and marked progress has been made. At Simcoe, in September, the Board of Education introduced the courses in Agriculture, Farm Mechanics, and Home-making, and excellent progress has been noted. Boards desiring to introduce vocational courses in these subjects should provide an extension of the high school courses in Agriculture, and accommodations for Farm Mechanics and Home-making, so that the probable enrolment and likelihood of success may be determined before the final adoption of the vocational scheme.

Attendance

The report of the Provincial School Attendance Officer gives a history of the advances made in school attendance requirements from 1871 to the present. In 1871, children between seven and twelve years of age were required to attend for four months every year. A penalty was attached for failure to do this, except where poverty, ill-health, or distance could be shown as a reason for

failure to fulfil the requirements. In 1874, trustees were empowered to impose a penalty of \$1.00 per month per child not attending. In 1881, age limits were changed to include all children between eight and thirteen, with a requirement of an attendance for eleven weeks each term. Truant officers were appointed to enforce this regulation. In 1885, the compulsory period was raised to 100 days each year. In 1891, the upper age limit was extended to eighteen years, with certain exceptions, and attendance for the whole school year was made the objective. In 1919, the title of Truant Officer was changed to that of Attendance Officer.

Formerly, the percentage of attendance was based on the ratio between the average attendance and the total enrolment for the year. As many pupils left school during the year and many others began throughout the same period, it was felt that this method did not give a true picture of the situation, and the method was consequently abandoned. The plan now adopted is to estimate the number of days the pupil should be legally present and to compare it with the actual attendance. The sum total of legal pupil days estimated on this basis, and the sum total of the actual attendance, is now used as a basis in arriving at the percentage of attendance. The report also shows the increases in attendance percentage from 1930 to 1934: All urban schools from 90.28 per cent. to 92.84 per cent.; all rural schools from 87.11 per cent. to 89.35 per cent.; and all elementary schools from 89.10 per cent. to 91.56 per cent.

APPENDIX A

REPORT OF THE CHIEF INSPECTOR OF PUBLIC
AND SEPARATE SCHOOLS

Changes in the Provincial Inspectoral Staff, 1934

I. BY DEATH:

Two Inspectors were taken by death during the year 1934, Mr. J. A. Taylor at St. Thomas on August 10th, and Mr. Robert Wright at Hanover on June 27th.

Mr. Taylor was a native of Bowmanville, and was born in 1863. He received his elementary and secondary school education in Huron County. He attended the Goderich Model School in 1893 and taught for several years in the Township of Wawanosh, Huron County. In 1897 he graduated from Queen's University with Specialist standing in Science, and attended the Normal College at Hamilton during the session of 1897-98. In September, 1898, he was appointed to the staff of the Dutton High School, subsequently becoming its principal, a position which he held until appointed as the first principal of Wingham High School in September, 1906. He resigned this post to accept the position of Public School Inspector in the County of Elgin, his duties there beginning on February 1st, 1909. This position he held until his death in August, 1934.

As a teacher, Mr. Taylor was eminently successful. He took a personal interest in his students and gave them special help and direction. As a result, the Matriculation and University Scholarship lists quite often contained the names of his students. As an Inspector he had the respect of his boards of trustees, and was an inspiration to his teachers and pupils, who looked forward with genuine pleasure to his semi-annual visits.

Mr. Robert Wright was born at Flesherton in 1871, and was the son of one of the early pioneers of Grey County. He attended public school in his native county and obtained his secondary school education in the Collingwood Collegiate Institute. After teaching for some time, he entered Queen's University and graduated in 1910 with Specialist standing in Mathematics. Subsequently he was appointed principal of the Hagersville High School and later principal of the Leamington High School. He became Inspector in Grey County on July 2nd, 1917.

Mr. Wright was a man of outstanding ability, of kindly disposition, and tactful in meeting school problems. He had the confidence of his teachers and the love of his pupils. The schools of his inspectorate made splendid progress during his tenure of office.

II. RESIGNATIONS:

Mr. W. F. Bald, B.A., LL.B., retired as Public School Inspector for Bruce County (West) on December 31st, 1934, after having served in that capacity since September 1st, 1910. Under his supervision, the schools of his inspectorate maintained a good standard.

Mr. A. A. Jordan, B.A., B.Paed., resigned as Public School Inspector for York County (No. 3) on August 31st, 1934. Mr. Jordan began his duties as

an Inspector on September 1st, 1915. As an educationist, Mr. Jordan has had a splendid record. The services he has rendered to teacher-training and to inspectoral work have been outstanding.

Mr. R. C. Rose, B.A., resigned as Public School Inspector of Carleton County (West) on August 31st, 1934, after an experience of over fifteen years. Mr. Rose gave excellent leadership to the cause of education during these years of service.

Mr. T. C. Smith, M.A., resigned as Public School Inspector of Lanark County (West) on August 31st, 1934. Mr. Smith began his duties in Lanark County on February 1st, 1922. His years as an Inspector were devoted to the maintenance of high standards in his schools.

Mr. P. J. Thompson, B.A., retired as Public School Inspector for Middlesex County (East) on December 31st, 1934. He received his appointment on January 1st, 1900, and has had a distinguished record as an Inspector. He was a leader in the work to which he devoted himself.

Mr. H. J. Vallentyne, B.A., resigned as a Public School Inspector in the City of Toronto to accept the principalship of the Ontario School for the Blind at Brantford under the Department of Education. The appointment dates from January 1st, 1935. Mr. Vallentyne has had a splendid record of experience as a teacher, a principal, and an inspector, and the inspectoral staff is honoured in his selection for this new field of work.

III. APPOINTMENTS:

The following were appointed to the provincial staff of Inspectors during 1934:—

Mr. T. R. McEwen, B.A., Principal of Prospect Public School, Port Arthur, to Frontenac County (North) and Addington County, to succeed Mr. G. E. Pentland, M.A. His duties began on September 1st, 1934.

Mr. H. B. Fetterly, M.A., Principal of the Ontario School for the Deaf at Belleville, to York County (No. 1) to succeed Mr. Robert Gillies, B.A. His duties began on September 1st, 1934.

Mr. G. C. Dobson, B.A., B.Paed., of the staff of the Weston High School, to Bruce County (West) to succeed Mr. W. F. Bald, B.A., LL.B. His duties began on January 1st, 1935.

Mr. W. Frank Smith, B.A., B.Paed., Principal of the St. Mary's Collegiate Institute, to Simcoe County (West) to succeed Mr. W. A. Marshall, B.A., B.Paed. His duties began on January 1st, 1935.

Mr. J. R. Pickering, B.A., B.Paed., of the staff of the Hamilton Technical School, to District Division XIII to succeed Mr. D. G. Smith, B.A. His duties began on January 1st, 1935.

IV. TRANSFERS:

Mr. A. L. Campbell, M.A., was transferred from York County No. 2 to York County No. 4 to succeed Mr. A. A. Jordan, B.A., B.Paed. The transfer dated from September 1st, 1934.

Mr. J. E. Wilkinson, B.A., B.Paed., was transferred from York County No. 6 to York County No. 2, to succeed Mr. A. L. Campbell, M.A. The transfer dated from September 1st, 1934.

Mr. Robert Gillies, B.A., was transferred from York County No. 1 to York County No. 6 to succeed Mr. J. E. Wilkinson, B.A., B.Paed. The transfer dated from September 1st, 1934.

Mr. G. E. Pentland, M.A., was transferred from Frontenac County (North) and Addington County to Grey County (South) to succeed the late Robert Wright, B.A. The transfer dated from September 1st, 1934.

Mr. R. A. A. McConnell, B.A., was transferred from District Division XI to Lanark County (West) to succeed Mr. T. C. Smith, M.A. The transfer dated from September 1st, 1934.

Mr. W. A. Marshall, B.A., B.Paed., was transferred from Simcoe County (West) to Lincoln County to assume the duties of Mr. G. A. Carefoot, B.A., B.Paed., who was given leave of absence for the school year because of ill health. The transfer dated from September 11th, 1934.

Mr. D. G. Smith, B.A., was transferred from District Division XIII to Middlesex County (East) to succeed Mr. P. J. Thompson, B.A. The transfer dated from January 1st, 1935.

Mr. R. R. Maurice, B.A., was transferred from Roman Catholic Separate District Division II to Roman Catholic Separate District Division V, to succeed Mr. R. Masse, B.A. The transfer dated from September 1st, 1934.

Mr. A. Gascon, B.A., was transferred from Roman Catholic Separate District Division III to Roman Catholic Separate District Division II, to succeed Mr. R. R. Maurice, B.A. The transfer dated from September 1st, 1934.

Mr. R. Masse, B.A., was transferred from Roman Catholic Separate District Division V to Roman Catholic Separate District Division III, to succeed Mr. A. Gascon, B.A. The transfer dated from September 1st, 1934.

The Schools and the Inspector

Slow improvement in the economic conditions brightened somewhat the outlook for the schools in 1934; but the rural schools continued to suffer for lack of money with which to purchase necessary library books and other school equipment. Repainting and repairs to schools during the year fell much below the average of normal times.

When the people are hard pressed financially, irritations are caused more readily and the school official requires to be more considerate, sympathetic, and tactful in his criticisms and requests. In the main, however, cordial relations and good understanding prevailed between school boards and inspectors. It may be also that the deeper study of the opinions and interests of others, during these trying times, will have a value in leading toward better future co-operation among the inspectors, the teachers, the boards of trustees, and the people. It is certain that the educational official cannot give the best leadership and inspiration and bring about the greatest progress in the schools when there exists a feeling of hostility and criticism toward the local school official or toward the central educational authority.

The officials of the Department of Education are aware of the many vexing school problems which the inspectors are required to solve, and the tact, good judgment, and earnest efforts of the inspectors are highly appreciated.

School Attendance

The importance of regular attendance is being realized more and more. The best equipped and best manned school must fail to function, with a

fluctuating attendance. This the educational forces have come to realize, with the result that in 1934 the high level reached in 1933 was not only maintained but improved upon, in spite of a general handicap of the severest winter in the recent history of the Province. The rural schools attained an average of 89.35 per cent. as compared with 89.09 in 1933, and urban schools 92.84 as compared with 92.40, the general average for all schools being 91.56 for the entire year. There is no doubt that the system which maintains such a standard of efficiency is laying the foundation for progress which will be reflected, not only in the type of scholarship, but in the ultimate quality of citizenship, for which end the schools mainly exist.

Teachers' Salaries

At midsummer, 1933, and again at midsummer, 1934, drastic reductions were made in teachers' salaries in the smaller urban centres and in the rural areas. It was unavoidable that the people, whose incomes had dwindled to a fraction of what they were in 1929, should insist upon and find relief in lower taxation; and no body of people has accepted the loss of income more graciously and with less open complaint than the teachers. They have responded with their best work; and it may be said, with full evidence from all parts of the province, that the elementary schools have maintained their efficiency during the year 1934.

There is a grave danger, however, that as economic conditions improve and attractive openings offer in commercial and industrial life, many of the schools may find that their teachers will not continue to be those best suited for the profession. All who are interested in the elementary schools will agree that the quality of the teaching staff is the chief factor in their success; and when the pendulum swings too far in the direction of very low salaries, there will be a migration of many of the best teachers into other more remunerative fields of activity.

The official publication, "Schools and Teachers," for November, 1934, shows a number of salaries in rural ungraded schools around the \$450 to \$550 level. This represents a very great decrease from the general \$1,000 level of 1929.

It is hoped that, purely in the best interests of the children, the salaries of teachers may not continue below a level which will attract into the profession young people with fine capabilities and natural aptitudes for teaching.

Progress in Rural Schools

If one can discern a main direction in which rural elementary education is moving, after consideration of the many changes proposed not only by educationists but also by the laity, it is that the schools should provide for each child, more and more, the type of training best suited to the child's capacities and future needs, and that in the rural areas this provision should be made in schools as near to his place of residence as the limitations of the public purse will permit.

At the present time many rural parents are finding themselves unable to send their children to the nearest town high school. The result is that a greatly increased number of rural schools in Ontario are attempting to do Fifth Form work. In some of the schools this work is being well done; but a better selection of subjects might be made and more efficient teaching given if selected schools centrally located would undertake to do the work. At this point the Ontario system proves inadequate, since no permanent co-operation can be secured among a number of school sections.

Each year, as more people study the educational needs of the province, it becomes evident that rural schools cannot make much further progress until they are placed under larger units of administration. Under some type of administration which will place a number of rural schools under one board it will be possible to offer senior elementary courses of more suitable type at selected centres. Agriculture can be better taught. Sewing and cooking classes can be offered. Elementary commercial subjects can be introduced. Music can become an important subject. Health services can be introduced. The rural boy or girl who will discontinue regular school attendance at approximately sixteen years of age will receive a completed course of training. The boy or girl who will go forward to higher schools will not be impeded in progress; and no boy or girl will be stamped a failure because he or she is partly unsuccessful in a purely academic course. At the present time this is too often the case.

Furthermore, it will be possible to eliminate present wastages of expenditure. Small schools, not needed, can be closed. Both inexperienced and experienced teachers can be placed where they will be able to do their best work and can be transferred, before a school suffers too greatly, when difficulties arise.

Much can be written from the experiences of parents and educationists against the school section as meeting present-day school needs in rural areas. Ryerson saw, throughout his period as Superintendent of Education in Ontario, that the school section was too small a unit for the time when the province would become well settled; but Ontario has stood still in this respect for a fifty-year period. England, Scotland, Denmark, and many parts of the United States have seen the need for the larger unit and have advanced far in this direction. The time is rapidly coming when Ontario must make a step forward in this respect or take second or even lower place in point of modern educational services for rural areas.

Fifth Classes

Fifth classes have formed a part of the organization of the elementary schools in this province for upwards of three-quarters of a century. During a period when high schools were few and far apart, many of the elementary schools had fifth classes and not a few teachers obtained their first qualifications as teachers in classes of this type. Where an efficient teacher was in charge, excellent work was done. In 1891 the public school leaving examination was instituted, the purpose of which was to induce pupils who did not propose to attend high school to remain longer in the public school. The plan proved ineffective; consequently, in 1896 continuation classes were established with a view to providing a general education beyond that to be obtained in the elementary school. These classes soon were designated as continuation schools, but became, in reality, small high schools. For a quarter of a century or more, continuation schools, which were widely distributed throughout the province, attracted almost all of the fifth class pupils, and fifth classes in the elementary schools became the exception rather than the rule.

Within the last decade, however, and particularly during the past three years, there has been a decided trend toward the extension of the programme in the elementary school, several factors contributing to this extension,—(1) the desire to reduce the costs of secondary education, especially during the years of depression; (2) the compulsory school attendance of pupils beyond fourteen years of age; (3) the better articulation of the courses of study in fifth classes with those of the middle school forms of the high schools; and (4) the regulation requiring boards of trustees to establish fifth classes where properly qualified pupils in the section desire the work to be taken.

In the school year 1934-35 no fewer than 8,323 pupils are in attendance in these fifth classes, and in the Grade A and Grade B classes, almost without exception, very satisfactory work is being done; and the inspectors report that even in the Grade C classes, and those which are not classified, very creditable progress is being made by the pupils where a capable teacher is in charge.

A great deal of latitude is afforded in the selection of the courses of study for these classes. The selection is made by the principal, the board of trustees, and the inspector, with the sole object of best serving the needs of the pupils. The fifth class can give a completing course to those pupils who do not intend to take a subsequent course in a high school, or it can give a course which will articulate with the courses of the middle school forms of the high school. In either case the desired purpose is served.

The comparative table which appears below gives certain statistics with respect to fifth classes for the school years 1931-32, 1932-33, 1933-34, and 1934-35:—

	1931-32	1932-33	1933-34	1934-35
Number of Fifth classes.....	1,316	1,206	1,485	1,553
Number of Grade A classes.....	111	122	138	140
Number of Grade B classes.....	115	126	128	154
Number of Grade C classes.....	193	237	241	284
Number not classified.....	897	721	978	975
Attendance.....	6,617	7,828	8,077	8,323
Legislative Grants.....	\$55,155	\$56,582	\$52,638	\$62,211

Railway School Cars

The area served by the Railway School Cars in Northern Ontario has been extended in 1934 by the addition of a sixth car, operating on the Canadian National Railway between Sioux Lookout and the Manitoba boundary. This field had long remained fallow and the scattered groups of settlers are warmly appreciative of the inauguration of the service. This car is the last word in point of equipment for school purposes, and is designed to minister to the comfort of teacher and pupils, even in the low sub-zero temperatures prevalent in that region.

The general work of the school cars continues to give large returns to pupils and communities. Certain features are producing impressive results. The cars have shortened the span from Primer to High School Entrance by at least a year, despite the fact that pupils have an actual attendance in the school car of only four to ten days per month. Pupils have developed initiative and self-dependence through being thrown largely on their own resources. Railway Superintendents report that their employees are becoming more efficient in their work, and, owing to their increased facility in English, are able to carry out their duties in reporting and correspondence with satisfaction to the management. On the whole, the cars have altered the entire life of the communities and are fitting the coming generation to take its place in the ranks of happy and progressive citizenship.

Correspondence Courses

The correspondence courses, inaugurated by the Department of Education eight years ago, have been of great benefit, particularly to pioneer settlers in Northern Ontario who are as yet without school accommodation. Those eligible for admission to those courses are:—(1) Children of school age who are so far from a school that they are unable to attend during any part of the year. (2) Those who are able to attend school during part of the year, but during the winter months are unable to attend because of bad conditions of the roads or on account of the school being closed. (3) Persons of school age who, by reason of physical condition, are unable to attend school but who are physically

and mentally capable of doing the correspondence lessons. (4) Other cases are considered on their merits. At present the courses cover only public school work from the Primer Grade to the High School Entrance examination, but they may be extended later to include fifth class work.

At the present time the total enrolment in these courses is about 1,800. Of these, there are 36 cases of children in various parts of Ontario who, though within reach of a school, are physically unable to attend school. The parents of these children are very grateful that the correspondence lessons are available. They consider these lessons afford one of the finest pieces of service rendered by the Department of Education. During the eight years these courses have been in operation hundreds of letters of appreciation have been received from those making use of them. The following is an excerpt from one of these letters:—
 “I thank you for the correspondence course lessons. They are indeed wonderful and it is so good to know that a child can get an education, even though living far from a school.”

Interchange of Teachers Within the British Empire

In the last ten years there have been 291 exchanges between Ontario teachers and teachers in other parts of the British Empire. These exchanges have included teachers from England, Wales, Scotland, Ireland, Australia, New Zealand, and South Africa; also from British Columbia, Alberta, Saskatchewan, and Nova Scotia. During the present school year, 1934-35, there are 34 Ontario teachers on exchange, 32 being from elementary schools and 2 from secondary schools. These include teachers from Toronto, New Toronto, Guelph, Windsor, MacTier, North Bay, Haileybury, Islington, Niagara Falls, London, Sarnia, Kirkland Lake, Simcoe, Wallaceburg, Chatham, and Owen Sound.

“As the interchange movement began spontaneously and naturally, we may legitimately assume that it bears within itself the seeds of future growth. We hope that it will be given free scope, for it creates true missionaries, as disinterested as they are enthusiastic, who speak the things they know, and perform a service the value of which cannot be over-estimated.”

Summer Courses, 1934

The attendance at the summer courses held by the Department of Education in the summer 1934 was as follows:—

Agriculture:	For the Elementary, Intermediate, Specialist and Farm Mechanics' certificates, at Guelph and Kemptville.....	350
Art:	For the Elementary, Supervisors' and Specialist certificates, at Toronto.....	192
Auxiliary Class:	For Ordinary, Lip Reading, and Special Industrial certificates, at Toronto.....	78
Commercial:	For Elementary and Specialist certificates, at Toronto.....	175
English-French:	For Teachers' certificates, at Ottawa, Windsor, Haileybury, and Sturgeon Falls.....	305
Health Teaching:	Certificate of attendance, at Toronto.....	53
High School Assistants:	For Provisional High School Assistant's certificate, at Toronto..	79
Household Science:	For Elementary certificate, at Hamilton.....	28
Kindergarten Primary:	Parts I and II, at Ottawa, Toronto, and London.....	205
Manual Training:	For the Elementary and Specialist certificates, at Hamilton....	33
Oral-French:	For the Junior and Senior certificates, at Quebec.....	59
Physical Training:	For the Elementary, Supervisor's, and Specialist certificates, at Kingston and Toronto.....	271
Science Refresher:	Certificates of attendance, at Toronto.....	15
School Nurses:	For certificate as School Nurse, at Hamilton.....	34
Upper School Subjects:	For Departmental standing, at Kingston, Toronto, London, North Bay, Ottawa, Windsor, and Port Arthur.....	701
Vocational Guidance:	For Part II standing, at Hamilton.....	20
Vocational Subjects:	At Hamilton.....	78
Vocal Music:	For the Elementary, Supervisor's, and Specialist certificates, at Toronto and London.....	196

The total attendance was almost three thousand. For the past two years a fee of \$10.00 has been charged for admission to any of the summer courses. This fee pays only part of the total cost of the courses, and seems to be regarded by the majority as reasonable.

Rural School Fairs

The twenty-fifth anniversary year of Rural School Fairs in Ontario was one of the most successful since their inauguration. The high esteem with which they are regarded as a method of correlating class room work with practical methods is amply evidenced by the continued and growing support of the rural people of Ontario. From a small beginning in 1909, at which time 58 pupils made 174 entries in the first Rural School Fair in Ontario, to the 1934 record of 507 School Fairs with 4,769 schools and 111,522 pupils making a total of 336,090 exhibits, is a quarter of a century of progress.

Close co-operation was evidenced again in 1934 between the Ontario Departments of Education and of Agriculture, working through their Public School Inspectors and Agricultural Representatives in the drafting of prize lists and the superintending of Fairs. As in 1933, all grain, vegetable, and flower seeds were supplied by the Ontario Department of Education, while the distribution of such seed was taken care of through the local county offices of the Ontario Department of Agriculture.

The prize lists of the rural school fairs are comprehensive and allow exhibition and competition in a variety of home and school projects. Practically every line of farm work is represented in classes of live stock, poultry, grain and seeds, weeds, roots and vegetables, and fruit, while the school work offers competition in writing, art, public speaking, and reading, besides exhibitions of numerous displays and collections. The Agricultural Representatives and the Public School Inspectors endeavour to prepare a prize list adapted to the agricultural conditions of the community concerned.

In giving credit for the successful growth and continuance of Rural School Fairs in Ontario, one cannot refrain from mentioning the excellent support and the time and effort devoted to this work by the rural teachers and the parents of the children. School Fairs are truly a co-operative community effort to advance agricultural education.

School Health Supervision

From time to time one is impressed with the lack of interest in the physical well-being of children in relation to the school programme, despite the fact that all accepted educational and health authorities have long since agreed as to the desirability of some practical manifestation of such interest either by school boards or boards of health.

A state or community interest in the health of the individual is as old as civilization. This fact, however, apparently in no way affects the attitude of those who view school health supervision as an unnecessary innovation.

While no one presumes to differ with the right of the individual capable of mature judgment to adopt any attitude he may wish as regards his own health, except in respect to communicable forms of illness, in the light of our present knowledge it is difficult to accept the idea that the parent, whose knowledge of health and hygiene is too often based on racial custom and illusionary dogmas, should be the only agency interested in ensuring for his offspring the maximum of present and future health. When economic conditions warrant, it would

appear wise to give consideration to some form of compulsory school health supervision.

The Survey in Arithmetic

Through the co-operation of the Inspectors, a survey was made of the work in Arithmetic of Senior Fourth grades by submitting to fifty selected pupils in every public and separate school inspectorate in the province a paper in written Arithmetic, a paper in oral Arithmetic, and a paper on the meanings of arithmetical terms. A questionnaire was sent also to each Inspector for the purpose of obtaining his opinion of the defects in the work and his suggestions as to ways and means by which the work might be improved. The findings which resulted from an examination of the answer papers of the pupils substantiated those advanced by the Inspectors and showed the need of making effective the recommendations which they have offered.

The consensus of the opinions of the Inspectors was:—

That the results obtained in the subject were not commensurate with the time devoted to it. The reasons assigned were as follows:—

- (1) The academic course in Arithmetic taken by the teachers is inadequate.
- (2) Insufficient oral work.
- (3) Too much time given pupils in which to solve problems. More intensive work is desirable.
- (4) Strict adherence to type solutions and little encouragement given to originality.
- (5) Pupils are not trained to make calculations by short, direct, and practical methods.
- (6) Checks are not habitually used.
- (7) The subject is not motivated. Too much time is spent on long mechanical operations.
- (8) Lack of thoroughness. Infrequent reviews.
- (9) Insufficient supervision.
- (10) Pupils have little knowledge of the properties of numbers. This knowledge is the basis of quick and accurate calculation.

This analysis suggests ways and means of improvement. A report of the findings and suggestions as to how the work in the subject may be improved has been forwarded to each Inspector.

Qualifications of Teachers

The end of the year 1934 finds the Department of Education making a careful study of the requirements for the admission of candidates to the Normal Schools, and also of the requirements for permanent teaching certificates. The discontinuance of the second-year course at the Normal Schools at midsummer, 1934, will not mean that a retrograde step has been taken in so far as the selection of better teachers is concerned. It is realized more and more that the efficiency of the schools depends upon the quality of the teaching staff more than on all other factors.

Since September, 1921, the Ontario Department of Education has been training First Class as well as Second Class teachers in the provincial Normal Schools. The requirement that all candidates to be admitted to the Normal Schools in September, 1935, shall hold the Upper School standing will be a further

step toward a better provincial teaching staff. The proposed stiffening of certain academic requirements in Lower, Middle, and Upper School work will give the teacher a better academic preparation; and the requirements for permanent certificates to be announced by the Minister of Education before midsummer, 1935, will advance still further the possibilities for more highly trained teachers.

General Remarks

As the year 1934 drew to a close there was unmistakable evidence that economic conditions were improving. For the fiscal year November 1st, 1933, to October 31st, 1934, it was found necessary to expend \$169,904.23 in special assisted grants in order that all the public and separate schools in the province might be kept open for the full number of legal school days. In nearly all cases the boards of schools requiring special assistance will be able to maintain their schools with less help in 1935. At the end of the year 1934 the District Public School Inspectors reported that, in general, the finances of school boards were in better condition and that the schools were being supported with less difficulty.

The public and separate schools have enjoyed again, during the year 1934, the kindly interest and material help of many organizations and individuals; and the determination of boards of trustees to maintain the efficiency of the schools in the face of most serious economic difficulties has been evident everywhere in the province.

I am indebted to my colleagues in the Department of Education; to Dr. J. T. Phair, Director of the Division of Child Hygiene, Department of Health; and to Mr. R. S. Duncan, Director of Agricultural Representatives, Department of Agriculture, for contributions to this report bearing on the respective activities coming under their charge.

V. K. GREER,
Chief Inspector.

Toronto March 1st, 1935.

APPENDIX B

REPORT OF THE HIGH SCHOOL INSPECTORS

The attendance of pupils in Ontario High Schools and Collegiate Institutes has for some years shown an annual increase. This was higher than usual during the two or three years previous to June, 1933. For the school year 1933-34, however, the total enrolment of 68,013 was 590 less than that of the preceding year, despite a slight increase in the number registered in the Upper School. In a few centres the decrease in attendance was attributable, at least in part, to an improvement in the local employment situation. Significant of the close check on school costs was a decrease of 12 in the total number of teachers employed. Notwithstanding this there were actually 42 more male teachers on the staffs than during the year ending June, 1932. An indication of the improvement in the qualifications of the teachers is that the number with specialist standing has been increased by sixty.

Although there were no important changes in school accommodations, the buildings were generally maintained in good conditions, and in a number of cases class-rooms were brightened by redecoration. During the year the Continuation School at Rainy River was raised to the rank of a High School.

The congested classes which are now of common occurrence, are forcing school principals to adopt devices to secure a more uniform distribution of pupils and a wider use of the school buildings. The commonest measures are the extended school day with the "staggered" type of organization and the use of individual time-tables.

The teachers are responding in a most laudable way to the demands which economic conditions are making on them. Salaries have in many instances been drastically reduced and the amount of work has been increased by the higher ratio of pupils to teachers. Moreover, teachers are giving valuable service to communities in encouraging and even materially assisting pupils from homes where unemployment has lowered the morale. In addition to this, many of the teachers are giving much time to activities that are more or less directly related to the work of the class-room. One of the most important of these activities is the work being done in music.

This subject finds a place in the life of the High School in various ways. In two schools provision has been made to permit pupils to follow the programmes of music appreciation which are broadcast from time to time. In many, flourishing orchestras or bands, usually directed by some member of the staff, frequently render programmes at opening assemblies before appreciative student bodies. On one occasion a portion of a symphonic movement was creditably rendered and listened to with close attention by approximately 800 pupils. The members of school orchestras usually own their instruments and take private instruction out of school hours. As they meet for orchestral practice in school they must develop an appreciation of musical compositions which no amount of mere listening could impart. A further advantage is found in working together for a common end. In many schools the chorus singing is an inspiring feature of the school assembly. Occasionally this singing is led by a glee club. The most valuable results, however, are being secured in schools where music is a part of the regular school programme and is under the direction

of a legally qualified instructor who receives the annual Legislative grant. Eleven of the 208 High Schools and Collegiate Institutes earned this grant during the school year. The greatest need is for qualified teachers able to hold the attention of pupils and capable of inspiring in them a love for finer music.

The following teachers with thirty or more years' experience in Ontario schools retired during the year:

William G. Anderson, Dunnville High School; Wesley Bellamy, Port Rowan High School; Lyman Brown, Owen Sound Collegiate Institute; Janet W. Carter, Galt Collegiate Institute; Luther J. Clark, North Toronto Collegiate Institute; Margaret Cook, St. Thomas Collegiate Institute; Samuel J. Courtice, Leamington High School; Edith R. Delmage, Haileybury High School; Edgar U. Dickenson, Wallaceburg High School; William A. Graham, Glebe Collegiate Institute, Ottawa; Robert S. Hamilton, Galt Collegiate Institute; Elizabeth Henstridge, Kingston Collegiate Institute; Charles W. Horton, Malvern Collegiate Institute, Toronto; Annie L. Hudson, Ingersoll Collegiate Institute; John Jeffries, Jarvis Collegiate Institute, Toronto; Donald MacKay, Alexandria High School; Robert Shaw, North Toronto Collegiate Institute; Rose I. Strang, Kingsville High School; John F. Thompson, Port Hope High School; Margaret Tuer, Port Hope High School; Lester R. Whitely, Owen Sound Collegiate Institute.

In addition, we record, with deep regret, the death of the following after twenty or more years of service: Philippa Hickey, Cobourg Collegiate Institute; Dr. Thomas A. Kirkconnell, Lindsay Collegiate Institute; Donald A. MacKay, Lisgar Collegiate Institute, Ottawa; Robert N. Shorthill, Oakwood Collegiate Institute, Toronto.

High School Inspectors.

Toronto, December 31st, 1934.

APPENDIX C

REPORT OF THE INSPECTORS OF CONTINUATION SCHOOLS

Number of Schools

At the beginning of 1934 there were in the Province of Ontario 219 Continuation Schools. Of these, Marmora and South Porcupine have since become High Schools. New Continuation Schools have been established at Preston, Red Lake, and White River. Thus, at the end of 1934, there are 220 Continuation Schools in operation. These may be classified as follows:—

Seven-teacher schools.....	1
Six-teacher schools.....	1
Five-teacher schools.....	1
Four-teacher schools.....	9
Three-teacher schools.....	49
Two-teacher schools.....	145
One-teacher schools.....	14
	220
Increase for the year.....	1

There were engaged in these schools 503 teachers, an increase of 9 over the previous year.

Salaries of Teachers

In view of the great economic depression which has prevailed for the past few years, it is interesting to note the salaries paid to teachers in the Continuation Schools. As most of these schools are situated in small towns or villages, or in rural districts where the financial situation has been very acute, it is a pleasure to find that there has been no great decrease in the salaries. Indeed, as the following figures for 1934 will show, the various Boards of Trustees have been, in the main, considerate and fair in their treatment of the teachers.

Average salary of Principals.....	\$1,466.00
Decrease for the year.....	18.00
Average salary of Assistants.....	1,069.00
Decrease for the year.....	34.00
Average salary of all Teachers.....	1,242.00
Decrease for the year.....	30.00

Qualifications of Teachers

It is gratifying, also, to find that the academic qualifications of the teachers in the schools are steadily improving. Each of the past three years has shown an increasing number of university graduates and of specialists on the staffs. The fact that many graduates of the Ontario College of Education could not secure positions in the High Schools has turned the attention of such teachers to the Continuation Schools. The following table shows the movement during the past three years:—

(a) Graduate and non-graduate teachers:			
University graduates.....	1934	223	
Non-graduates.....	1934	280	
		503	
Percentage of graduates.....	1932,	25.15	
“ “ “.....	1933,	35.02	
“ “ “.....	1934,	44.22	
(b) Specialists on staffs.....			
“ “ “.....	1932,	52	
“ “ “.....	1933,	73	
“ “ “.....	1934,	97	

Men and Women Teachers

For many years by far the greater number of teachers in the Continuation Schools were women. In 1929 the percentage of women teachers was 63.3. The following shows the situation for the past three years:—

	Percentages	
	Men	Women
1932.....	34.28	65.72
1933.....	38.66	61.34
1934.....	43.82	56.18

Inspectoral Visits

During the year at least one visit of inspection was made to each of the 220 Continuation Schools of the Province. In some cases, where circumstances made it advisable to do so, a second or even a third visit was made by the Inspector in order to assist Boards of Trustees or Principals or teachers in their work, to examine the progress of the pupils in the various subjects of study, and to see how far and with what success suggestions made at the regular inspectoral visit had been carried out. In all, about eighty schools were thus visited a second time. The Continuation School Inspectors are of the opinion that these latter visits are very helpful to teachers in assisting them in carrying out the policy of the Minister regarding teachers' recommendations for pupils' standing in the subjects of the various examinations.

Limitations of Courses in Continuation Schools

On account of the small staffs in Continuation Schools, certain limitations must be made regarding optional subjects:—

- (1) Not more than two languages besides English may be taught.
- (2) Except on the report of the Continuation School Inspector and with the approval of the Minister, obtained beforehand, only Lower School courses may be taken in a Continuation School with only one teacher.
- (3) None of the Upper School courses may be taken in a Continuation School with a staff of only two regular teachers.
- (4) Except on the report of the Continuation School Inspector and with the approval of the Minister, obtained beforehand, none of the Upper School courses may be taken in any Continuation School.

In former years students attending two-teacher Continuation Schools could prepare themselves for Entrance to the Second Class Certificate Course of the Normal Schools. Departmental regulations now require all students desirous of becoming teachers to prepare for Entrance to the First Class Certificate Course of the Normal Schools. This means that prospective teachers must take Upper School courses. In the circumstances it will be necessary for students of the two-teacher Continuation Schools to go elsewhere, either to Grade "A" Continuation Schools or to High Schools for a final year's work before entering a Normal School.

Upper School Courses in Continuation Schools

In order to assist Principals and Boards of Trustees proposing to have Upper School courses taught, the Inspectors sent out a circular letter in 1934. Extracts from this circular are given below:

"The recommendation of the Inspector with regard to Upper School courses will depend upon the qualifications of the staff and upon the character of the work done in the Lower and Middle School courses. Where efficient work is

being done in the Lower and Middle School classes the Inspectors will feel justified in making recommendations under the following conditions:

1. Where at least one of the three teachers is a University graduate, three Upper School subjects may be taken.
2. Where at least two of the teachers are University graduates, four Upper School subjects may be taken.

“By alternating the subjects or groups of subjects from year to year it will be possible for students in Grade “A” Continuation Schools with well qualified staffs to obtain all of the Upper School course required for admission to the First Class course of the Normal Schools or to the various courses offered by the Universities.

“As far as possible Upper School subjects should be taught by university graduates, and the selection of such subjects should be made in accordance with the academic training and qualifications of the teachers concerned. Boards should not seek permission to engage teachers holding Interim First Class certificates to teach any Upper School work. Moreover, in making application to the Minister for permission to have such subjects taught, Boards should submit the following information:

1. The Upper School subjects to be taught, and the names and qualifications of the teachers concerned in each case.
2. The total attendance in the school and the enrolment in each Form.
3. An analysis of the proposed time-table.

“If the staff has four or more teachers it may be possible to carry on more than four courses, but the approval of the Minister must be obtained before any Upper School course may be taught.”

Financial Conditions in Some Continuation Schools

In the Report of the Continuation School Inspectors for 1926 the following statement occurs:—“The Inspectors feel it their duty to point out that in Continuation Schools maintained by single school sections there is a possibility that the Continuation School may be carried on at a profit to the school section. This is due to the fact that the teachers of Continuation Schools in the townships rank as Public School teachers when claim is made on the township or townships for a share in the uniform township levy toward the payment of salaries. If a large proportion of the students in attendance at a Continuation School reside outside the district maintaining the school, the trustees may be able to maintain the school without direct cost to the ratepayers of the district.”

Since 1926 it has been found not only that some Continuation Schools in rural districts have been able to carry on without a direct levy on the school section, but in some cases have been able to accumulate a surplus because receipts for Continuation School purposes have exceeded expenditures. Where the county pays fifty per cent. of the cost of secondary school education, and the municipality from which the students come pays the remaining fifty per cent. of the cost, rural school sections maintaining Continuation Schools have been able to build up a surplus.

Agriculture

During the past few years there has been evident a growing interest in the teaching of Agriculture in Continuation Schools. Boards of Trustees and parents have been desirous of having the course of study arranged so that

Agriculture may be included. In rural districts, Agriculture has been provided for in many cases by having it in place of Botany and Zoology of the Lower School course, and Physics and Chemistry of the Middle School course. This plan has worked out very satisfactorily, as the transition to Agriculture has been gradual. At first, Agriculture is introduced into the Lower School; if successful there, it is later introduced into the Middle School. As there is now an adequate supply of teachers properly qualified to teach Agriculture, it is probable that there will be a steady increase in the number of schools teaching this subject. The active interest and support of Inspector Davies has been of great value in promoting the study of Agriculture.

Successful Work in Continuation Schools

In spite of the youth, the limited experience, and the meagre academic preparation of many of the Continuation School teachers, it is a pleasure to report that the character of the work done by the pupils compares very favourably indeed with that done by pupils in larger schools with more experienced and more highly qualified staffs. Factors other than teaching staffs account to some extent for this success, however. Perhaps the most important of these is the smaller size of the classes in the Continuation Schools. These classes usually consist of from ten to twenty pupils, as compared with classes of from thirty to forty pupils in larger schools. Small classes permit more direct personal consideration and more individual instruction on the part of the teacher, and as a result ensure more earnest application on the part of the pupil. Another factor is the time that must be given to personal work and study by the pupils under the direct supervision of the teachers. Freedom for seat work and for independent study by the pupil is due to the fact that there are usually a greater number of classes than teachers in these schools. As a result, pupils have a large number of periods free to work at their seats. Under intelligent and careful supervision, these study periods may be very valuable, as they tend to develop habits of industry and independence among the pupils.

The Inspectors feel it a duty and a pleasure to refer again to the earnestness, patience, and enthusiasm shown by the teachers in the Continuation Schools. As the staffs are small in most of these schools, the range of subjects taught by each teacher is wide. This necessitates much study and preparation, and makes the work strenuous. The teachers have been conscientious in their efforts to prepare themselves to teach effectively. Many of them are attempting to carry on college work extra-murally and many have given up weeks of time during their vacations to take summer courses provided by the universities and by the Department of Education. The energy and the seriousness of purpose of these teachers are beyond praise.

G. K. MILLS,
J. P. HOAG,
S. D. RENDALL,

Continuation School Inspectors.

Toronto, 31st December, 1934.

APPENDIX D

REPORT OF THE DIRECTORS OF ENGLISH INSTRUCTION AND FRENCH INSTRUCTION ON THE SCHOOLS ATTENDED BY FRENCH-SPEAKING PUPILS, 1934-35.

During the school year now closing, steady advance has been made in the efficiency of the schools attended by French-speaking pupils. The scheme for the direction of these schools proposed by the Committee of Inquiry in its Report of 1927 has already been justified by the results. To those acquainted with the conditions of seven years ago and with the conditions existing to-day, the contrast is a matter of surprise and satisfaction. The progress made has exceeded the expectations of the Department when the present plan for the direction of these schools was placed in operation.

For the substantial advance that has been secured, three factors are principally responsible: (1) improved qualifications of teachers, (2) more thorough supervision of schools, and (3) a splendid spirit of co-operation on the part of those interested in the schools in carrying out the proposals of the Department.

In former reports, we have emphasized the importance of raising the standard of the qualifications of the teachers, and have expressed satisfaction with the rapidity with which this is being accomplished. The progress in this regard since 1927 has been remarkable, and has been especially evident during the past year. In 1927 there were only 133 teachers, or 13 per cent. of the teaching staff, holding First or Second Class certificates in the schools attended by French-speaking pupils; during the year just closing, there were 660 teachers, or 60 per cent. of the whole teaching body, with this standing. This number represents 141 more teachers with the higher qualifications than there were last year. In view of the steadily mounting attendance at the University of Ottawa Normal School of teachers in training for First and Second Class certificates, we may confidently anticipate that in the near future the schools will be completely staffed by teachers of the higher grades.

The second factor in the advancement of the schools is effective supervision. The inspectors in charge have been assiduous in guiding the teachers in their work, in improving methods of instruction, and in setting standards for achievement. The improvement that they have secured through persistent effort in these directions is in general very marked and in individual cases little short of astonishing. As directors we have been able to visit each year nearly twenty per cent. of all the French-speaking classes in the Province, selecting for inspection a different group each year for several years in succession. It has been a matter of keen gratification to us to note the great progress that has been made in individual schools in the interval between our visits. In particular, we have been pleased to find very considerable improvement in the rural schools of Eastern Ontario, which have heretofore been the weakest group—an improvement which is the reward of unremitting efforts on the part of the Inspectors of that area.

Not the least important factor in the general improvement is the cordial spirit of co-operation existing among those who are concerned with the welfare of the schools. Ratepayers and trustees show an increasing sense of responsibility in the improvement of the equipment and accommodation; school boards are cordially co-operating with the inspectors in the selection of well-qualified teachers; teachers are loyally following the suggestions and directions of the inspectors; inspectors and training school staffs are zealously carrying out the various phases of the Departmental scheme for raising the standard of the schools. Without this mutual confidence and co-operation the present plan could not have achieved the success by which it has been so far attended.

During the year, in company with the local Inspectors, we visited 183 rural and urban classrooms and tested more than six thousand pupils in the various school subjects, both orally and in writing. The schools visited are typical of the inspectorates in which they are located, and as a group they represent a cross-section of the whole body of the schools attended by French-speaking pupils. The conditions existing in them may fairly be regarded as characteristic of the whole situation. A comparison of the results of our examination of these schools with similar results in different groups in former years and with the results which we obtained in a much larger group for the Committee of Inquiry in the investigation of 1925-27 should therefore give a fair idea of the progress that is being made. In the following paragraphs, we shall submit tables summarizing the results of our tests.

English Reading

English reading is rapidly improving in all the classes of the schools from the standpoints of pronunciation, fluency, expression, and understanding. The following table shows the percentage of the classes examined in which the reading was satisfactory in 1927 and in the last two years:

	Form I	Form II	Form III	Form IV	Form V
1925-27.....	25	23	25	36	70
1933-34.....	54	52	51	57	89
1934-35.....	69	67	68	72	90

English Conversation and Oral Composition

In no other department of the work of the schools in English has there been such remarkable improvement in the last three or four years as in the conversational work and oral composition in Forms I and II. The uninformed visitor to these schools would be surprised at the facility in the use of oral English acquired by French-speaking pupils of six to ten years of age, who in the majority of cases seldom or never hear English outside the walls of the school. The stress that has been laid on this phase of the work by the training school staffs and by the inspectors has resulted in improved technique by the teachers and greater success in this difficult and exacting task. The following table shows the percentage of junior classes in which conversation and oral composition were satisfactory during the years taken for purposes of comparison:

	Form I	Form II
1926-27.....	36	20
1933-34.....	60	52
1934-35.....	83	70

Written English

In all the schools we visited during the year, we gave tests in spelling to the Form II classes and in written composition to Forms III, IV, and V. The table below shows the number of exercises read and the gradings assigned:

	Excellent	Good	Fair	Poor	Very Poor	Zero	Total
Form II (Spelling)	229	216	127	146	103	4	825
Form III (Composition)	132	361	370	360	107	4	1,334
Form IV (Composition)	121	330	267	180	29	1	928
Form V (Composition) ..	31	132	108	98	17	0	386
Total	513	1,039	872	784	256	9	3,473

In the following table the above results in written composition are reduced to percentages and compared with the percentages obtained during the investigation of 1925-27 and those obtained in the schools we inspected in 1933-34:

Grading	PERCENTAGE OF PUPILS HAVING THE GRADING								
	Form III			Form IV			Form V		
	1925-27	1933-34	1934-35	1925-27	1933-34	1934-35	1925-27	1933-34	1934-35
Excellent.	0	8	10	2	11	13	1	6	8
Good	6	27	27	29	31	36	27	43	34
Fair	20	28	28	25	28	29	28	29	28
Poor	35	27	27	26	22	19	32	16	25
Very Poor	22	9	8	8	8	3	11	6	5
Zero	17	1	0	10	0	0	1	0	0

It will be noted that the figures for this year indicate a substantial improvement over those of last year and a gratifying advance over those of 1925-27. However, it must be acknowledged that the proficiency of the schools in written English has not yet reached the standard desired. The vocabulary and sentence structure of most of the compositions are on the whole satisfactory, but too many mistakes occur in the forms of verbs and pronouns, which always give trouble to French-speaking pupils. The teachers who are obtaining the best results are those who are giving special attention to these details by conducting frequent and systematic drills in connection with characteristic difficulties.

Ability to Speak English in the Last School Year

Though there are many schools having Fifth Forms, the final year for the majority of the pupils is that spent in the Senior Fourth class. The efficiency of the schools so far as oral English is concerned may be gauged from the ability of the pupils in that class to speak English. In the following table the schools are divided into four types according to the ability of the pupils in oral English in the last school year, and the percentages of the classes in each type are given for the three periods under comparison:

	PERCENTAGE		
	1925-27	1933-34	1934-35
(1) Classes in the last school year in which the pupils speak English satisfactorily, that is, with a facility approximating that of English-speaking pupils of the same grade	35	56	60
(2) Classes in which the pupils speak fairly well but with limited vocabulary and a considerable number of mistakes	15	26	25
(3) Classes in which the pupils are able to answer questions upon their school work but are unable to maintain a continuous conversation or to organize their speech in a connected way	15	18	15
(4) Classes in which the pupils have no ability to speak English . . .	35	0	0

It is a source of satisfaction to note the rise in the percentage of schools of the first type, the lowering of the percentage of the other types, and the complete disappearance of schools of the fourth type, which constituted more than one-third of the total number in 1927.

Ability to Write English in the Last School Year

As in the case of oral English, the proficiency of a school in written English may fairly be measured by the ability of the Senior Fourth pupils in that regard. In the following table four types of school are listed with the percentages in each type for the years under comparison:

	PERCENTAGE		
	1925-27	1933-34	1934-35
(1) Classes in the last school year in which the pupils write English satisfactorily, that is, with a good vocabulary and few mistakes, and with a facility approximating that in the average school attended by English-speaking children	31	48	50
(2) Classes in which the pupils write fairly well but with limited vocabulary and with a considerable number of mistakes	25	29	30
(3) Classes in which pupils write a little but poorly	34	23	20
(4) Classes in which pupils cannot write English at all	10	0	0

While these percentages indicate progressive improvement, it cannot be said that they are completely satisfactory. As has been already intimated in a former paragraph, the principal weakness of the schools from the English standpoint lies in the character of the written composition. While there are many schools, particularly in the urban centres, where the work is well done, there are others in which the work is of a distinctly inferior quality, and these schools lower the general average. However, it is confidently expected that with the rapidly improving character of the teaching there will be a corresponding rise in the standard of the written English.

French Reading

The following table shows the percentage of classes examined during the year in which pupils read French satisfactorily as compared with the percentage of satisfactory classes in this subject in 1927:

	Form I	Form II	Form III	Form IV
1927	30	25	37	50
1935	70	65	74	76

The above table indicates that in 1927, the standard of French Reading was unsatisfactory in a large majority of the schools. The low percentage of satisfactory classes in Form I, where good habits of reading are generally formed, is significant. In these classes, it was usually found that the pupils were progressing very slowly and that the reading was lacking in expression. Faulty habits of reading formed during the first two or three years of school usually persisted during the whole of the elementary school course, as is evidenced by the comparatively low percentage of satisfactory classes in Forms II, III, and IV. In view of the fundamental importance of reading in relation to language training, one must conclude that in 1927 the pupils in a large majority of the schools must have been working under a very serious handicap in their attempt to acquire a satisfactory knowledge of French.

The above table reveals also a very marked improvement in the ability of the pupils to read French since 1927. Most encouraging are the results now being obtained in the junior classes where the majority of the pupils acquire the ability to read interesting stories written in simple French by the end of the first year of school. In many schools which are provided with supplementary

reading books which appeal to the junior grades, the pupils who have developed a taste for reading during the first year acquire a complete mastery of the mechanics of reading with little effort on the part of the teachers. This interest has overcome, to a very large extent, the lack of expression which in 1927 was characteristic of the pupils' reading even in the senior classes in a large number of schools.

Written French

The following table shows the percentage of classes examined during the year in which written French was satisfactory as compared with the percentage of satisfactory classes in this subject in 1927:

	Form II	Form III	Form IV
1927.....	35	9	27
1935.....	54	57	64

The above table shows that, in 1927, the written French in the schools attended by French-speaking pupils was, generally speaking, below a reasonable standard, as more than 90 per cent. of the Form III classes and nearly 75 per cent. of the Form IV classes did not write French satisfactorily for their grades. In view of these conditions, the teaching staff and the inspectors have been endeavouring to train the pupils to write French correctly. It is pleasing to state that their efforts are meeting with success and that there has been a very rapid improvement in the ability of the pupils in the writing of their mother tongue.

In the schools inspected during the past year, we gave written tests in French to all the pupils who had been attending school for more than a year. The results of these tests reveal the following facts:

(1) In most of the schools, the pupils of the junior grades are being successfully trained to write simple French involving certain grammatical inflections of an elementary nature and are being given a good foundation for the formal study of French Grammar at a later stage.

(2) Although only 9 per cent. of the Form III classes had reached a satisfactory standard in written French in 1927, 57 per cent. of the Form III classes which were inspected during the past year handed in written exercises which were considered satisfactory for the grade.

(3) Of the Form IV classes we examined last year, 64 per cent. had reached a satisfactory standard in written French as compared with 27 per cent. in 1927. If a comparison is made on the basis of the total number of compositions which were written by the pupils, it is noted that the percentage of compositions marked satisfactory has doubled since 1927 and that the percentage of compositions marked poor or very poor has decreased from 49 per cent. in 1927 to 17.4 per cent. in 1935.

(4) The following grading was assigned to the compositions written by the Form V classes: 61 per cent. were graded satisfactory, 25 per cent. fair, and 14 per cent. poor. This grading compares very favourably with the average grading given in 1927 to the Form V classes of French-speaking pupils.

It may safely be concluded therefore that, since 1927 the schools attended by French-speaking pupils have made a vast improvement from the standpoint of the written French and that, with the stress that is being placed on this phase of language training, they will continue to improve rapidly.

Oral French

In the schools which we inspected last year, we found that, with few exceptions, the pupils' language is carefully supervised and that a serious attempt is

made to teach the children to speak French correctly. In the junior classes, lessons in oral composition based on picture study, stories, etc., are frequently taken. In the senior classes, lessons in literature, history, and geography serve to improve the vocabulary and to give the pupils practice in oral expression.

The standard of the spoken French varies considerably with the localities in which the pupils live. In the centres where the pupils have little opportunity to speak French outside of the school, the French vocabulary is usually somewhat limited and the pupils do not express themselves as freely and accurately in French as the pupils who live in centres where French is the prevailing language. It must be stated however, that the task of training these pupils to speak French correctly is not an impossible one, as is proved by the excellent results obtained by many teachers who have been in charge of pupils who speak but little French outside of school.

Arithmetic, History, Geography, and Writing

Although methods of teaching arithmetic are gradually improving with the higher qualifications of the teachers, there is ample evidence that too many teachers do not train their pupils in habits of accuracy and rapidity in mechanical work. It might be noted also that not enough attention is being given to the solution of problems in the junior grades and that, as a result, the pupils in the senior grades often show poor ability in the interpretation of problems. In order to overcome this deficiency, the inspectors have been urging the teachers to lay more stress on the teaching of oral arithmetic in all the grades.

During the past year, we observed some very commendable results in the work in history and geography. The text-book method of teaching these subjects which was fairly prevalent in 1927 is gradually disappearing from the schools as the qualifications of the teachers are being improved. In most of the schools, the lessons are conducted orally, the pupils taking an active part in the work and showing a keen interest in the subject matter. When history and geography are taught in both French and English, as is now the invariable practice in these schools, the pupils have an excellent opportunity to improve their ability to speak and write the two languages.

The character of the writing in the schools depends largely on the writing habits which are formed in the junior grades and on the attitude of the teacher towards this particular phase of the work. With some few exceptions, the writing in the schools which we inspected last year, was, on the whole, fairly satisfactory. Excellent work was observed in certain primary classes despite the large enrolment of first year pupils.

The High School Entrance Examination

The following table shows the number of successful French-speaking candidates at the High School Entrance examination during the past five years, with the percentage which this number bears to the total enrolment of the schools:

	Urban Schools	Rural Schools	Total	Percentage of Total Enrolment
1929.....	594	290	884	2.5
1930.....	617	345	962	2.8
1931.....	865	383	1,248	3.5
1932.....	879	504	1,383	3.8
1933.....	1,043	518	1,561	4.1
1934.....	1,110	517	1,627	4.3

This table shows that although the percentage of pupils who passed the High School Entrance examination last year is still too small as compared with the total enrolment in the schools, there is a gradual increase in the number of pupils who complete the course in Form IV. It is fully expected that the percentage of successful French-speaking candidates at the High School Entrance examination will eventually reach the general average for the whole Province when all the schools attended by French-speaking pupils are staffed with graduates of the University of Ottawa Normal School.

The greater number of well trained pupils who reach the senior grades is a hopeful sign. In 1927, a large percentage of rural schools had no Fourth Form; at the present time, practically all the rural schools have pupils enrolled in this Form. In the Separate Schools of the City of Ottawa, although the school population has increased only about 20 per cent. since 1927, the number of pupils in Form IV is now approximately three times as great as it was eight years ago.

Enrolment of Pupils in Fifth Form and High School Classes

A striking evidence of the progress which has been made by the schools is the larger number of French-speaking pupils who are now following courses beyond Form IV. During the past year, the enrolment of French-speaking pupils in Fifth Form and Lower School classes was approximately four times as great as in 1927. There were, moreover, approximately 500 French-speaking pupils taking Middle School and Upper School courses at various centres throughout the Province. It should be noted that, with the exception of the science subjects for which the special French course may be substituted, the subjects of examinations and the standards required for the Lower, Middle, and Upper School courses are exactly the same for French-speaking as for English-speaking pupils. From these facts, it must be concluded that the standard of education of the French-speaking population is rapidly advancing.

The Training Schools

The following tables show the attendance at the Departmental training schools for French-speaking teachers during the year 1934-35:

University of Ottawa Normal School

	Male	Female	Total
First Class Course.....	10	14	24
Second Class Course.....	20	179	199
Total.....	30	193	223

Sandwich Model School

	Male	Female	Total
First Year Middle School Course.....	3	18	21
Second Year Middle School Course.....	9	19	28
Total.....	12	37	49

Embrun Model School

	Male	Female	Total
First Year Academic Course.....	8	13	21
Second Year Academic Course.....	9	10	19
Professional Course.....	7	17	24
Total.....	24	40	64

Sturgeon Falls Model School

	Male	Female	Total
First Year Academic Course.....	13	17	30
Second Year Academic Course.....	23	19	42
Professional Course.....	9	19	28
Total.....	45	55	100

The enrolment which has been growing steadily at the University of Ottawa Normal School during the past few years, augurs well for the future of the schools. Owing to the large attendance, the number of teachers graduating yearly with First and Second Class certificates is now sufficient to fill the vacancies which occur in the schools, and the Department has therefore decided that Third Class certificates will not be issued after this year. This will result in a rapid elimination of teachers who hold low grade certificates and in their replacement by graduates of the Normal School.

As the training of Third Class teachers will be discontinued after this year, the Model Schools will no longer be operated. The Department of Education has been well served for many years by the staffs of the Model Schools. The individual members have without exception been diligent, industrious, and faithful in the discharge of their difficult tasks, and the cause of education in this Province owes to them a debt of gratitude. At a time when teachers of the higher grades were not obtainable, these schools rendered a distinct service in providing for French-speaking communities a staff of teachers as highly qualified as conditions would permit. To the graduates in recent years is due in no small measure the credit of raising many of the rural schools to the present standard of efficiency. The closing of the Model Schools marks the passing of an institution which educational evolution in this Province renders now unnecessary.

General Conclusion

At the inception of the present scheme for the direction of the schools attended by French-speaking pupils, there were many people who questioned its practicability. Many were sceptical regarding the possibility of giving a large body of children a satisfactory training in two languages as well as in the other elements of a general education. That doubt and disbelief have disappeared from the minds of those who know the present conditions in the schools. The success of the plan, even in the short period of its operation, is a proof of the wisdom of the Committee by whom it was originated. This Province has sought the solution of a difficult educational problem by attacking it from a purely educational standpoint, and has given a convincing demonstration of what can be accomplished by patient, persistent, systematic effort on the part of a band of workers co-operating with mutual understanding in a common cause.

W. J. KARR,
Director of English Instruction.

A. J. BENETEAU,
Director of French Instruction.

Toronto, June 21st, 1935.

APPENDIX E

REPORT OF THE DIRECTOR OF PROFESSIONAL
TRAINING

Notwithstanding the large surplus of unemployed fully-qualified teachers for the secondary and elementary schools in the Province of Ontario the attendance at the several teacher-training schools shows only a slight decrease from that of former years.

The Ontario College of Education

For the session of 1934-35 in the various courses at the Ontario College of Education there was an enrolment of 880 distributed as follows:—

(1) In the Intermediate Household Science Course (for women).....				10
(2) In the High School Assistant's course:				
	Male	Female	Total	
Intra-mural.....	205	229	434	
Extra-mural.....	10	10	20	
Summer Session (1934).....	52	27	79	
	<hr/>	<hr/>	<hr/>	
	267	266	533	
(3) In the Pedagogy Course:				
Summer (1934).....		95		
Winter (1934-35).....		120		
Non-attending.....		<hr/> 32		
			247	
(4) In the Specialist Courses not included in the High School Assistants' Courses...				41
(5) In the Librarian's Courses.....				<hr/> 49
				880
(6) Of the 533 students registered in the High School Assistant's course 302 selected the language option and 231 that of Mathematics and Science.				
(7) The list of Specialists was as follows:—				
	Intra-Mural	Extra-Mural	Total	
Classics.....	11	5	16	
English and History.....	24	16	40	
English and French.....	3	6	9	
Latin and French.....	1	1	2	
French and German.....	19	5	24	
French and Spanish.....	3	..	3	
Household Science.....	12	1	13	
Agriculture.....	19	..	19	
Mathematics and Physics.....	19	4	23	
Music.....	2	1	3	
Science.....	10	9	19	
Art.....	15	..	15	
Physical Education.....	41	..	41	
	<hr/>	<hr/>	<hr/>	
	179	48	227	
(8) In the Supplementary Courses there were registered:				
In the Public School Course.....		150		
In the Elementary Art Course.....		48		
In the Commercial Course.....		74		
In the Music Course.....		25		
In the Physical Education Course.....		<hr/> 132		
				429

- (9) The academic standing of those registered as teachers-in-training for High School Assistants' certificates was:

B.A., or M.A.....	481
B.A. Sc.....	6
B.Sc.....	6
B.S.A.....	22
B.H.Sc.....	5
B.Comm.....	13

533

- (10) Canadian Universities outside Ontario were represented by registrants, as follows:

Acadia.....	1
Alberta.....	2
Dalhousie.....	1
Mount Allison.....	1
New Brunswick.....	2
King's College.....	1
McGill.....	3
Manitoba.....	6
Saskatchewan.....	3

20

- (11) In June, 1934, three candidates in pedagogy were awarded the Degree of Doctor and fifty-three the Degree of Bachelor.

Provincial Normal Schools

At the Provincial Normal Schools there was a marked falling off in attendance. This was due mainly to the withdrawal of the Second Year course after an existence of four years, for three of which attendance was voluntary and for one obligatory. For the session of 1934-35 the Normal School enrolment was:

(1)	First Class			Second Class			Grand Total
	Male	Female	Total	Male	Female	Total	
Hamilton.....	43	123	166	6	22	28	194
London.....	40	125	165	14	49	63	228
North Bay.....	37	90	127	18	45	63	190
Ottawa.....	33	124	157	11	65	76	233
Peterborough.....	33	81	114	11	24	35	149

Toronto.....	107	215	322	25	76	101	423
	333	855	1118	98	301	399	1587
Kindergarten-Primary (Toronto).....					52	52	52
Total.....					353	451	1,639

Normal Model Schools

(2)	Boys	Girls	Total
Ottawa.....	280	230	510
Toronto.....	365	316	681
Total.....	645	546	1,191

Certificates

Of the 778 teachers-in-training who in 1933-34 attended the Normal School Second Year course, 470 obtained Permanent First Class, 253 Permanent Second Class, and 14 Permanent Kindergarten-Primary certificates. There were also 142 teachers who extramurally raised their professional certificates from Permanent Second to Permanent First Class.

At the Normal Schools there were awarded to the Second Year teachers-in-training 1,861 elementary certificates in special courses as follows:—

Elementary Agriculture.....	487
“ Manual Training (Pt. 1).....	122
“ Household Science (Pt. 1).....	221
“ Physical Education.....	142
“ Art.....	517
“ Vocal Music.....	372
Total.....	1,861

Changes in the Teaching Staffs

Miss Allene B. Neville, Instructor in Household Science, London Normal School, resigned her position, and her superannuation took effect on September 1st, 1934. She was succeeded by Miss Isabel Davidson on September 7th, 1934.

Mr. Charles Ramsay, Instructor in Art, North Bay Normal School, resigned his position on August 31st, 1934. He was succeeded by Mrs. Jennie Irwin, B.A., on September 7th, 1934.

Miss Edna P. Dunning, Instructor of Music, Ottawa Normal School, resigned her position on August 31st, 1934. She was succeeded (temporarily) by Miss Jessie Cople on September 7th, 1934.

W. E. M. Aitken, M.A., Ph.D., Stratford Normal School, was transferred to the Toronto Normal School to fill the vacancy created by the retirement of Mr. E. E. Ingall, B.A., in September, 1933.

Major Ernest H. Price, Physical Training Instructor, Normal School, Toronto, resigned his position on November 30th, 1934. He was succeeded by Mr. Nat Keefe on September 7th, 1934.

Miss Norma Lindsay, Assistant Teacher on the staff of the Toronto Normal-Model School, resigned her position on August 31st, 1934. She was succeeded by Miss Jessie M. McKay of Toronto.

Miss Rhea S. Mossop, Assistant Kindergarten teacher on the Staff of the Toronto Normal-Model School resigned her position on August 31st, 1934. She was succeeded by Miss Margaret Campbell of Hamilton.

Teachers' Institutes

In most of the inspectorates throughout the Province the Teachers' Institutes were held as usual although the Department was unable to render assistance by restoring the grants or by providing lecturers.

DUNCAN WALKER,
Director of Professional Training

Toronto, August, 1935.

APPENDIX F

REPORT OF THE DIRECTOR OF VOCATIONAL
EDUCATION, 1933-34

The present report, following as it does the advent of a new Administration, would appear to be a timely medium for reviewing the growth of vocational education and the steps leading to the establishment of this type of school in the Province of Ontario.

Briefly, the introduction of vocational training into the Provincial School system came about as a result of investigations conducted in 1910 by Dr. John Seath, Superintendent of Education for Ontario, and a Royal Commission on Industrial Training and Technical Education appointed by the Dominion Government the same year. Extensive research was made both in Europe and the United States of America; and as Dr. Seath and the Federal Commission recommended the introduction of some form of vocational training, the Ontario Legislature passed the "Industrial Education Act" of 1911, and the Federal authorities later passed the "Technical Education Act" of 1919, which made provision for financial assistance to the Provinces of \$10,000,000 to be extended over a period of ten years.

The Formation of Night Classes

In 1913 the Minister of Education appointed Dr. F. W. Merchant the first Director of Industrial and Technical Education for the Province. In the early years development was necessarily slow. Although the authorities, both Provincial and Federal, were convinced of the necessity for industrial training, a public opinion favourable to this type of education had to be formed. The efforts of the Director and his staff for some time were devoted to organizing evening classes for adults. This phase of the work proved to be beneficial and popular. The highest enrolment was in 1930-31 when over 47,000 employed persons were enrolled. The subjects of study included English, mathematics, and science on the cultural side, the more practical general trade subjects for men, and domestic science and domestic art for women. There was also a strong demand for instruction in commercial subjects. The attendance unfortunately dropped during the "depression" years to 45,000 in 1931-1932; 34,000 in 1932-1933; and 22,351 in 1933-1934. Increased employment and prosperity will undoubtedly restore the popularity of these classes. Time and success have vindicated their establishment; they are apparently here to stay.

It is interesting to note that English has always been the most popular academic subject. The work accomplished by evening classes in assisting new Canadians to speak and write English is not only appreciated by them, but is of national importance.

Day Vocational Schools

More difficulty was experienced in establishing day classes. It was realized that the more pressing problem of supplying for day school pupils a course of some practical as well as cultural value called for vision, organization, and courage. A commencement was made, and by 1916 Toronto, Hamilton, London, Brantford, and Sault Ste. Marie had established vocational schools, and Haileybury and Sudbury mining departments.

In the early days the subjects of study in these schools and departments were not fixed by Departmental regulation, but were determined by the local authorities. The time of the students was divided almost equally between the academic and the practical subjects. Broadly speaking, this arrangement still obtains. The academic background originally consisted of English, history, geography, mathematics, and elementary science. This programme has proved sound; and these subjects remain the backbone of the curriculum, so far as academic instruction is concerned. The practical subjects for boys originally included mechanical drawing, woodworking, and machine shop practice; and for girls, cookery, millinery, and dressmaking. Although, in some of the larger schools, it may be said that almost every trade is now taught, the subjects mentioned still retain a position of priority on account of their basic usefulness.

Technical Matriculation

Among the original participants in the scheme, as already stated, were the towns of Haileybury and Sudbury. These centres created a good precedent by inaugurating mining departments and co-operating with Queen's University at Kingston. The idea spread, and it was not long before the Technical School in Toronto had established a general Technical Matriculation course which prepared pupils for admission to the Faculty of Applied Science of the University of Toronto. This course is now offered in several other centres. It extends over a period of five years, and includes all compulsory subjects for matriculation and, in addition, arithmetic, mechanical drawing, and shop practice. The subjects last mentioned are optional, usually serving to replace Latin. These options may be selected only by students who are certified by the Department of Education as having been in attendance at a technical school in the Province of Ontario.

Special Courses

In an effort to connect the curriculum with the industrial needs of the community, special courses of study have been established in several schools. The best examples are the mining courses at Haileybury and Sudbury, which include surveying, ore dressing, metallurgy, and assaying, and on account of which extra financial assistance has been given by the Government.

Special classes have also been organized in stationary and marine engineering, navigation, electricity, pulp and paper, and textiles. Toronto and Hamilton were pioneers in introducing a course in practical art.

Obstacles Overcome

The intention in providing vocational courses in day schools was to direct attention to the vocations and also to give the pupil a training in the subjects forming a basic preparation for them. A sound general education was, and still is, considered imperative. Many obstacles had to be surmounted in establishing these schools because of lack of accommodations and equipment. Dr. Merchant pointed out in his report of 1914 that, without Provincial or Dominion assistance, no rapid advance could be made in the new field; suitable buildings and adequate equipment were indispensable to give efficiency and permanence to the movement. Fortunately, the needed financial support was forthcoming from the Provincial Government, which provided generous grants, and from the statutory subsidy of the Dominion Government under which the Province of Ontario received from 1919 to 1929 over three millions out of the ten million dollars provided by the Technical Education Act.

Progress

Year by year the attendance of pupils grew, and there was a steady increase in the amount of money voluntarily spent by the municipalities. Government grants increased correspondingly, and the success of the plan was assured. The following comparative table gives a comprehensive picture of the growth of the work for the past decade:

	1922-23	1932-33	1933-34
Number of Schools—Day	16	61	59
“ “ —Evening	51	58	28
Number of Pupils—Day	9,402	35,116	33,178
“ “ —Evening	33,511	33,737	22,351
Number of Teachers—Day	337	1,395	1,386
“ “ —Evening	1,097	1,164	749
Government Grants	\$638,217	\$1,465,219	\$1,277,452
Municipal Expenditure (Net)	\$1,233,397	\$5,218,543	\$4,434,842

As a result of the experience gained in the formative years of the vocational system, the Department, through its own experiments and those of other countries, acquired a fund of information regarding the needs of the system and the best means of organizing it to meet those needs. Changes in the curriculum and time-tables and in the governing legislation itself have taken place from time to time. The passing of “The Vocational Education Act” in 1921 repealed the former law known as “The Industrial Education Act.” In turn, the Act of 1921 was superseded by “The Vocational Education Act” 1930, which is in force at the present time. New Regulations based on this final legislation became effective on July 1st, 1930.

Adolescent School Attendance Act

The most important step toward the general acceptance of the vocational idea in education was the passing of The Adolescent School Attendance Act of 1919. The new type of school made available the opportunity for securing a more adequate education than had hitherto been possible to adolescents, who by this Act were obliged to attend school until they reached the age of sixteen years. The vocational schools made provision for courses in industrial, home-making, and art schools, and in technical, commercial, and agricultural high schools. The compulsory attendance feature resulted in the enrolment at these centres of thousands of young people whose future would be more concerned with industry and commerce than with intensive study at a university, preparation for which was one of the chief aims of the high schools at that time. The industrial, homemaking, and art courses came to be naturally favoured on account of their suitability for young people entering non-professional occupations. The Act sought to provide not only for the extension of full-time education to adolescents between fourteen and sixteen years of age, but also for the compulsory establishment of part-time courses of instruction for those who held home permits or employment certificates under the provisions of the Act.

Training of Teachers

One of the greatest difficulties encountered in the early development of vocational education was the lack of properly trained teachers in the practical subjects. There was no lack of skilled mechanics, but experience showed that a skilled mechanic was not necessarily a good teacher. He seldom realized that his product was to be trained boys and girls rather than material things. Several methods of overcoming this difficulty were tried. First, evening teacher-training classes were organized; next, summer courses were established. Neither method provided sufficient instruction in the principles of pedagogy or adequate

practice in actual teaching. Eventually the present Training College for Technical Teachers was established at Hamilton in 1925, and from a twenty-week course which might be spread over two or even three years, the Regulations now provide for a continuous twenty-five weeks' training from October to April in each year. This has been a complete success. Graduates of the College have proved themselves to be competent instructors.

Inspection

Each vocational school in the Province is inspected annually by special officers appointed by the Minister of Education. The inspection of these schools presents a problem different from that of other schools. The wide variety of courses offered demands Inspectors with special qualifications and training in order that the work may be effectively supervised. The need for such special qualifications will be apparent when it is realized that the courses include a wide variety of shop instruction, specialized commercial practice, household science and household arts, and scientific agriculture. The aim of the Inspectors during the past few years has been to improve the character of the courses and the standards set up for examinations and promotions. It should be noted that vocational schools do not operate under authorized courses of instruction. The principal and staff are free to establish such courses as will meet the needs of the locality. As they have no uniform programme, the Inspector must be prepared to deal with widely differing points of view and objectives. He must also be sufficiently qualified to inspect the general academic subjects of the curriculum.

Commercial Education

Prior to the passage of "The Industrial Education Act" many high schools and collegiates had established commercial classes. These classes were usually of only two years' duration. Considerable pressure was brought to bear on the Department to have such classes operated under The Industrial Education Act. Finally it was agreed that schools and departments establishing a three years' course, with approved accommodation and equipment and a qualified staff, should participate in the grants provided under "The Industrial Education Act" and its Regulations.

The commercial departments of the vocational schools were organized to meet the need of a broader and more extended course for those who wished to enter some department of business life. A survey of representative business houses in the city of Toronto furnished data upon which to frame such a course. Training in penmanship, arithmetic, English, and spelling was emphasized by business executives as being as important as stenography, accounting, and typewriting. It was suggested that persons entering office employment should have some skill in the use of the more common office machines, and there was a general opinion in favour of teaching salesmanship. As many persons engaged in commercial pursuits are neither accountants nor stenographers, the suggestion was made that the course in commerce should be comprehensive enough to furnish training for this class of employee. Many business men regard a study of economics and commercial geography as fundamental to a business education, and believe the study of materials, processes and products of manufacture to be an important factor for salesmen, stenographers, and accountants. The Department has therefore framed a suggested Course of Study for Commercial Schools in which all these topics have been given due weight. This course has proved of great assistance to students looking forward to employment in commercial occupations, and, in extended form, has been accepted by the University

of Toronto for matriculation into the Department of Commerce and Finance in the Faculty of Arts.

GENERAL

Evening Classes for Unemployed

The report of a Committee appointed by the Young Men's Christian Association with the co-operation of the Toronto Board of Education, the University of Toronto, the Workers' Educational Association, and other community organizations to find out the educational background of unemployed Toronto citizens who were in attendance at evening classes furnishes some interesting sidelights on the relationship between day school education and adult employment. The Committee undertook to encourage unemployed adults to attend free evening classes and thus prepare themselves for a future of greater usefulness. It was found that the educational attainments of a stated number of applicants were as follows: about 70 per cent. had received elementary education, from 27 per cent. to 28 per cent. had attended secondary schools, while only 2 per cent. or 3 per cent. had attended University.

The efforts of this Committee met with considerable success. Registration grew from 120 in 1931-1932 to 677 in 1934-1935. Applicants were given advice as to suitable subjects of study, and were absorbed into the regular evening school classes. Analysis of comprehensive statistics contained in the report rather emphasizes the need for more direction and guidance to students before entering upon their secondary school studies; for example, 67 per cent. of the unemployed students under review were formerly engaged in industry, but only 8 per cent. had received training in a day vocational school. Again, 33 per cent. were previously employed in commerce, but not more than 20 per cent. had received day school commercial training.

In this connection the Department for several years has been providing a course in "Vocational Guidance" at the Training College for Technical Teachers at Hamilton. This course is open to experienced teachers of all grades, but is particularly recommended to public school teachers, because of their potential influence in guiding the children of the elementary schools into suitable secondary courses.

Support of Industry

The vocational school was developed to meet the demand of industry and organized labour. It was said that the apprenticeship system did not function under modern methods of manufacture, and that the secondary schools should offer courses which would train the youth of the Province for the occupations in industry and commerce in which they would eventually find employment. The school authorities have endeavoured to meet this demand. Courses have been established in various fundamental occupations. Instruction is given in these occupations by persons who were formerly occupied as journeymen in the trades. The youth of this Province have been provided with the opportunity of acquiring the knowledge necessary to bring out individual aptitudes, and to develop in some degree the skill of the trade or occupation in which they may hope to become employed. It has been the duty of the school authorities to steer a straight course without favour to either the employer on the one hand, or organized labour on the other. In general, it may be said that the confidence of both these parties has been retained. The vocational school endeavours to find employment for its graduates, and a great deal has been accomplished in this direction. Much remains to be done, however, in linking the school with

available opportunities for employment. The performance of such service is valuable not only to the student, but also to the school, in that it keeps the school authorities aware of the needs of the employer. It is not uncommon to find employers who are uninformed of the aims and programmes offered by the vocational school, or of the fact that the school was developed to train young people for the occupations of industry and commerce.

In a recent report made by the Federal Board for Vocational Education of the United States, entitled "Vocational Education and Changing Conditions", the following seven major points were emphasized:

First: Most people must work in order to live.

Second: In order to work successfully, they must keep up to date in their occupational equipment.

Third: So rapid and extensive are the changes in occupations and the corresponding changes in the equipment workers need that the procession of demands on them seems to be continually passing by while they stand still.

Fourth: If workers do not keep up with the procession, they meet with lower wages, reduced employment, and loss of occupation; and the further they lag behind, the sooner they join the unemployable group or become a part of the social scrap-heap.

Fifth: The only agency we know which can help them to keep up to date with the occupational equipment in skill and knowledge they need is some form of vocational training.

Sixth: Only an adequate system of public vocational education will meet the needs of prospective and of employed workers in the various occupations.

Seventh: All the trends in the conditions affecting the matter emphasize the inter-state and national character of the problems of vocational education in the States.

From such reports as this it is apparent that the vocational school has a great responsibility not only to provide the proper type of education for our young people, but to offer similar training for adult employed persons which will keep them "up to date", and thereby ensure that they will not become unemployed, or unemployable, through failure to keep pace with the advances of modern science and invention. The Ontario system of coupling a sound general education with training in the basic principles of different trades would appear to afford the most effective preparation for facing the constantly changing conditions to which modern industry and commerce are subjected in this machine age.

Employment Survey in Ottawa

The results of a survey of many industries made by the Ottawa Technical School during the past year are of more than passing interest. Various shops were visited with the purpose of endeavouring to find out the relation of the school to the industries and, at the same time, to acquaint industries with the work of the school. Invitations were extended from time to time to engineers, military men, etc., to inspect the work of the school, and the response has been gratifying. The Principal reports that, through the efforts of the school, many boys have obtained appointments in the Army, citing as an illustration two boys recently sent to the Royal Canadian Engineers at Halifax and five to the Royal Canadian Air Force at Camp Borden. Letters have been received testifying that youths with technical experience are preferred. In the course of the survey 125 shops were visited, representing 639 skilled and 300 unskilled employees.

Many employers expressed themselves in favour of giving preference in employment to beginners who had received training in a vocational school.

Incidentally, the survey served as an advertising channel. Many firms were unaware that there was such an institution as the Technical School; many did not understand the purpose of such an institution. The accomplishments and aims of the school were explained and the sympathy of the majority was aroused. There appears to be abroad, however, a feeling akin to suspicion as to the real objects of the school, and this must be overcome before it can function efficiently as a reliable link between the boy or girl and the job. The fact that many firms stated their preference for technically-trained students is encouraging to the school staff, who feel that a foundation has been laid for closer co-operation with the firms of the neighbourhood. Extracts from the Survey:

"The *Printing* Department of our Technical School has a very happy relationship with the printers of Ottawa. Sixty-four (64) out of one hundred and eighty (180) employed printers in Ottawa are graduates of the Technical School."

"In *sheet metal* work it is noted that 'firms prefer boys in the industrial course to those in the matriculation course'."

"The work in *art* was considered 'highly commendable'."

"The fundamental principles of *motor mechanics* should be taught rather than particular knowledge of some specific machine. Boys should be trained as salesmen, to be courteous to customers, and skilled in locating 'trouble'."

"Night classes in *woodwork* were greatly appreciated."

"*Machine Shops* prefer technical students and emphasize the necessity for a good general education."

The initiative shown by a survey of this nature is to be commended. Added to the efforts of the Advisory Vocational Committee, which is connected with industry in each district through its appointed members representing employers and employees, the vocational school, wherever found, should prove useful to the youth of this Province in helping to solve the complicated problem of employment.

Conclusion

The vocational school is now firmly established in this Province. It occupies a position of importance among other educational institutions. In the early years it was necessary to promote this new type of school in order that both boards and parents might be informed of the value of instruction so radically different from that previously available. These schools have now proved their effectiveness and are fully accepted by the public. The enrolment in both day and evening classes would suggest that they have met the demands which were placed upon them. Technical education provides the special knowledge and skill required for work. Skill has been described as knowledge completing itself in doing the thing it knows. There is no opposition between knowledge and skill; skill is knowledge in action. National wealth and industry are directly related to education, and must become more and more dependent upon it as civilization advances. The vocational schools are endeavouring to meet the challenge to produce the type of citizen best suited to the new order of things brought about by changed conditions in our social and economic relationships.

F. S. RUTHERFORD,
Director of Vocational Education.

Toronto, March 1st, 1935.

APPENDIX G

**REPORT OF THE PRINCIPAL OF THE ONTARIO
TRAINING COLLEGE FOR TECHNICAL
TEACHERS FOR 1934**

As 1935 marks the tenth anniversary of the establishment of the Ontario Training College for Technical Teachers it would seem fitting to set forth in this report a summary of the activities of the College during the past ten years.

Teacher-Training for Vocational Teachers

The first definite plan for the establishment of a system of vocational schools in Ontario was outlined by Dr. John Seath in his report "Education for Industrial Purposes." The recommendations which he made regarding the types of schools, the content of the courses of study, the methods of management, and the means of support, have formed the framework about which the present system of vocational schools in this Province has been built.

He recommended as a first essential the establishment of an Ontario Industrial and Technical College, for the training of industrial teachers and of highly skilled craftsmen, and for the conduct of correspondence courses for workmen. He pointed out the necessity for the training of competent foremen and of highly skilled workmen, such as are found in Europe, and the urgent need for the training of shop instructors in the methods of teaching if a system of industrial and technical schools is to be established. "Competent teachers for our schools we must have at any cost, and their training must be provided by the Province. We need a new breed, with a new outlook and with new ambitions. To attempt to organize a system without first providing for the training of such teachers would be most unwise."

The passing of The Industrial Education Act of 1911, and the appointment of Dr. Merchant as Director of Technical Education, marked the initial stages of the growth of the system of vocational schools as we now have it. Evening vocational schools were established in many places, followed soon after by day vocational schools in a number of the larger urban centres.

No provision, however, was made at first for the training of teachers of practical subjects in the methods of teaching. Skilled craftsmen were appointed to teach these subjects, and it was found, as was to be expected, that no matter how competent they might be in their trades, they lacked skill in the presentation of their subjects. To aid in overcoming this difficulty a series of evening class extension lectures in methods of teaching and in class management was given during the year 1917-18 by Dr. Merchant and Dr. W. H. Rutherford to the shop teachers in Toronto, Hamilton, and London.

In 1919 The Technical Education Act of Canada was passed by the Dominion Government. Under this Act the Federal Government undertook to provide grants to the Provinces, for a period of ten years, to aid in the establishment of technical schools.

The outstanding problem still to be solved was the means of providing a supply of competent teachers. A conference of Ministers of Education, Deputy Ministers, and Directors of Technical Education, was called in Ottawa in October, 1920, by the Federal authorities for the purpose of discussing some plan for the

training of teachers of vocational schools. It was agreed that the success of vocational schools would be determined largely by the efficiency of the teachers. While it was recognized that competent teachers could be imported, or that Canadian teachers could be sent to other countries for training, it was felt that neither of these plans offered a satisfactory solution.

It was the considered opinion of the conference that one teacher-training institution could supply all the vocational teachers needed for Canada, and that it should be supported jointly by the Provinces and by the Dominion. A central institution would have the advantages of better accommodation and equipment, and of a more efficient staff. Moreover, the bringing together from all parts of Canada of teachers to be trained would give them a wider national outlook.

Accordingly it was resolved that immediate action be taken to carry out the following scheme.

- (1) That the Federal Government and the Provincial Governments co-operate to establish and maintain a central institution.
- (2) That the basis of co-operation be as follows:
 - (a) the Federal Government to provide the accommodation, and one-half the cost of maintenance;
 - (b) the Provinces to bear one-half the cost of maintenance, in proportion to the population of their cities, and towns of 3,000 or over;
 - (c) the ownership and management to be in a Board of Governors representing the Provinces and the Dominion;
 - (d) the institution to have a dual staff—English and French.

This resolution was forwarded to the various Provinces, asking for co-operation, with an understanding that if six or more signified willingness to co-operate the scheme should be adopted.

The Provinces did not take immediate action, and owing to the need for economy, the Dominion Government decided not to proceed with the plan suggested, at the time.

In Ontario, where the technical school programme was developing more rapidly than elsewhere in Canada, the need for training shop teachers became increasingly urgent. Pending some final decision by the Dominion Government, the Ontario authorities established a tentative scheme to run from 1921 to 1924, with the intention of later establishing their own permanent scheme if necessary.

This tentative scheme provided for a ten weeks' course in two summer sessions of five weeks each. Instruction in principles of pedagogy, general methods, class management, and courses of study was provided. As the sessions were held during the summer holidays, no provision could be made for practice-teaching under actual class-room conditions. Certificates were granted to those teachers who passed the examinations in the lecture courses, if after the next annual inspection the inspectors reported that the teaching of those concerned was satisfactory.

The attendance at these summer courses was as follows:—

	Men	Women	Total
1921.....	25	59	84
1922.....	30	85	115
1923.....	46	78	124
1924.....	68	59	127

It soon became apparent that the requirements for admission to the course would have to be revised. While the primary purpose of the course was to

provide training in teaching for the untrained vocational teachers already on the staffs of the technical schools, applicants hoping to become teachers were admitted. The requirements for admission were competence in the trade concerned, and a fair general education. It was found that many applicants had been admitted whose general education was so limited that they could not profit by the instruction given. Others had been admitted whose trade competence was not all that it appeared to be in their applications. Accordingly a general education qualification of at least two years of high school work or its equivalent was required, and a more careful scrutiny was made of the statements of applicants and of their employers regarding trade experience.

That the summer schools did not provide practice-teaching under actual-class-room conditions was recognized from the beginning as a weakness. Experience emphasized this weakness, and demonstrated once again that any satisfactory method of teacher-training must provide opportunity for a considerable amount of practice-teaching.

This scheme of giving the training in the summer, when the technical schools were not in session, had been adopted as a temporary measure because there were so many untrained shop teachers in the schools that to require them to attend at any other time would seriously inconvenience the schools.

In the meantime it became apparent that the proposed plan of the Provinces and the Dominion for the establishment of a central training college for all of Canada would have to be abandoned. In the circumstances, the Ontario Department of Education undertook to establish a provincial institution.

In 1925 the Ontario Training College for Technical Teachers was opened in Hamilton, in temporary quarters provided in the Technical Institute, and began its first session on April 20 of that year, the classes of the Technical Institute being used for observation work and practice-teaching.

In 1926 steps were taken to provide adequate accommodation for this Training College. Property next to the Technical Institute was purchased and a building erected thereon, which was taken over by the Training College in August, 1928.

As there were still untrained teachers in the technical schools, the sessions of the Training College were arranged so that half the course could be taken during the summer holiday season. The programme provided for a ten weeks' course, including practice-teaching, during the autumn or during the spring term (after evening classes had closed), and two summer sessions of five weeks each. This time-arrangement was an adjustment that had to be made in view of the fact that the supply of qualified teachers did not at that time meet the demands of the increasing number of schools.

The standard of admission to the course was raised and the requirements were stated more specifically. Provision was made for a preliminary examination of applicants who could not present documentary evidence of having completed two years of high school work, and for testing applicants who could not produce satisfactory documentary evidence of trade skill and knowledge.

Experience showed that applicants of mature age who could meet the other requirements for admission found difficulty in making the adjustments and adaptations required to enter a new field of activity, and further that, even if they did succeed in securing certificates, they found difficulty in obtaining positions. Accordingly in the Announcements for 1928-1931, only those within certain age limits were encouraged to apply for admission to the Training College, and in 1932 an age requirement for admission was set, the limits for men being

23-38 years, and for women 21-35 years. This requirement is for the protection of both the applicants and the schools.

The twenty-weeks scheme with part of the work in two summer sessions was an emergency measure made necessary by the demand for teachers. This scheme soon presented certain difficulties. It was difficult to co-ordinate the work of the long term with the work of the two summer sessions, more particularly in the case of teacher-in-training who did not return at the first opportunity to complete the course. It was difficult in the spring session, which began after Easter, to provide all the required practice-teaching, due to the fact that examinations, holidays, cadet inspections, sports, and the closing of the Technical Institute before the end of June, materially reduced the number of class-periods available for this purpose.

As the number of available teachers finally overtook the demand, and the conditions which made the time-arrangement desirable no longer existed; it became possible to provide a twenty-five weeks' course with continuous attendance during the regular school year. The new time-arrangement has been much more satisfactory than the old. It provides more time for the course, enables the staff to give the teachers-in-training some preliminary insight into methods before they are plunged into practice-teaching, and above all provides opportunity for about twice as much practice-teaching, including a few days of full-time teaching.

Students from Other Provinces

Shortly after the establishment of the Training College, inquiries regarding the terms upon which students from other Provinces might be admitted were received. Pending some formal agreement between Ontario and the other Provinces, provision was made for admitting such students on the request of the provincial authorities, and on the payment of \$25.00 for a five weeks' course and \$50.00 for a ten weeks' course. Seventeen students, from Nova Scotia, New Brunswick, Saskatchewan and Alberta, have been admitted on these terms. No formal agreement regarding the matter has yet been effected.

Extension Courses

For some years a considerable number of the evening class teachers in vocational subjects were employed during the day in their regular callings, and gave only one or two evenings a week to teaching. While most of these teachers had no professional training they could not be expected to take any of the regular courses provided for full-time teachers. For their benefit short intensive courses in methods of teaching were given in a number of places in evening sessions at convenient times. The enrolment was as follows:—

	Place	Enrolment
1926.	London.	31
	Guelph.	30
	Kitchener.	13
1927.	Hamilton.	19
	St. Catharines.	40
1928.	Ottawa.	58
	Perth.	7
1930.	Windsor-Walkerville.	35

Since 1930 no extension classes of this nature have been carried on, owing in part to the fact that no member of the staff of the Training College was available, and in part to the fact that as a greater number of certificated day-school teachers became available for evening class work the number of un-certificated teachers of evening classes decreased.

Vocational Guidance

During the Dominion Conference of October, 1920, the question of establishing some scheme of vocational guidance received considerable attention. While it was recognized that many teachers had done something to help good students select occupations, it was felt that a comprehensive and systematic method was needed. Dr. Merchant set forth the following as functions of an agency to affiliate the schools with the industries:

- (1) special study of the abilities and aptitudes of children to determine the vocations for which they are best fitted, by providing try-out or exploratory courses or experiences;
- (2) study of vocations;
- (3) study of means available for training children for vocations;
- (4) placement of pupils in the industries;
- (5) a "follow-up" plan by which the agency provides help and guidance to young people during their first years in employment.

A resolution was passed appointing a committee consisting of the Federal Director of Technical Education and the Provincial Directors of Technical Education to formulate a scheme of vocational guidance. While this committee has not yet made a definite report, one of the results of this resolution was that the Training College in 1925 included vocational guidance among the subjects of study required for a Vocational Certificate. All teachers of practical subjects who have obtained certificates through the Training College have had some instruction in the principles and practices of vocational guidance.

In 1930 a special course for a Vocational Guidance Certificate was offered, open to teachers with First Class Public School Certificates, High School Assistants' Certificates, or Vocational School Certificates, and five years' successful teaching experience. The latter requirement was set as it was felt that only persons of some maturity and experience should be entrusted with vocational guidance.

The course consisted of two parts, each of which could be completed in one summer session.

The registration in this course has been as follows—

1930.....	Part I.....	25
1931.....	" II.....	18
1933.....	" I.....	13
1934.....	" II.....	22

The total number of certificates so far issued is twenty-five.

As a result of the interest aroused in vocational guidance the class of 1934 appointed a committee to investigate the desirability of organizing a society for the study of this subject. This committee held a number of meetings with interested people during the past months, and on January 19, 1935, there was formed the Ontario Vocational Guidance Association with Mr. C. S. Browne, Peterborough, President; Dr. G. P. Cosgrove, Department of Psychology, University of Toronto, Vice-President; and Miss S. L. Muir, 27 Albany Ave., Toronto, Secretary. This Association plans to bring together for study and discussion personnel workers, employment managers, labour employment officers, psychologists, and placement officers in schools. The aims of the Association are set forth as follows:

- (1) to provide means of exchange of information and viewpoints among those concerned in assisting individuals to choose, prepare for, enter, or successfully adjust themselves to occupations;

- (2) to select, organize, and make available to those engaged in guidance, information regarding the occupational world, methods of studying the individual, and principles of vocational adjustment;
- (3) to aid in the accumulation of new information necessary to adequate guidance through co-operation in research carried on by members of this Association and by other bodies;
- (4) through group methods to inform young people and parents regarding job requirements, conditions, and demand, educational facilities of the community, principles of vocational choice, and all available sources of vocational counsel;
- (5) to develop relations between various guidance and placement agencies, so that a complete and continuous programme of vocational guidance may be available during the school period and later;
- (6) to encourage the establishment of facilities for the training of persons in the technique of educational and vocational guidance.

Courses for Specialists' Certificates in Vocational Subjects

For some years vocational certificates were of one grade only. It soon became apparent that some vocational teachers were more highly skilled, better educated, and more competent and progressive than others. It was therefore felt that these teachers should be afforded an opportunity of obtaining some recognition of their higher attainments such as obtains in other classes of teachers by the provision of Specialists' certificates. The need for this recognition was emphasized by the practice of many school boards of establishing salary schedules in which a higher salary is paid to a teacher with a Specialist's certificate than to one with a certificate of a lower grade. Provision was therefore made for two grades of Vocational certificates, Ordinary and Specialist, corresponding to the provisions made for other types of certificates.

Courses for Specialists' certificates in vocational subjects were instituted in 1928. The courses provided for instruction in English, mathematics, and science, equivalent to that required for Middle School standing (raised in 1932 to Upper School standing), in economics and industrial History, and in special methods of vocational education. The courses are given in summer sessions, and may be completed by the candidate in three, four, or five sessions, depending upon his previous attainments. In addition to completing satisfactorily the lecture courses, a candidate for this certificate is required to pass a practical trade test of such a standard as to show that he is a highly skilled and competent craftsman.

The registration in this course has been as follows—

Year	Attendance	New Enrolments
1928.....	28	28
1929.....	46	29
1930.....	65	39
1931.....	100	53
1932.....	63	13
1933.....	42	10
1934.....	52	21
	396	193

To date 193 teachers have enrolled in the course and 61 have met the requirements for Specialists' Vocational Certificates.

Courses for Permanent Ordinary Certificates

For many years teachers with Interim Ordinary Vocational Certificates were granted Permanent Certificates after two years' teaching experience approved by an Inspector.

Shop teachers are skilled craftsmen recruited from the trades, and as most of these served an apprenticeship in their youth and so had not the benefit of an adequate secondary school education, a course in general education has been provided in the Training College for them. The course is equivalent to the Middle School course in English, Mathematics and Science, and may be taken in summer sessions. Vocational teachers who have not Middle School standing in these subjects are now required to take the course before being granted Permanent Ordinary Certificates. This course was offered for the first time in 1934, with a registration of 9 teachers.

Course for Vocational School Principals' Certificates

To become principal of a vocational school an applicant is required to have a Vocational School Principal's Certificate. To obtain this certificate an applicant must, among other requirements, show that he has such knowledge and appreciation of the vocations, and of the problems and organization of vocational schools, as the Minister may require.

To provide an opportunity of obtaining this knowledge and appreciation the Training College has established a course for a Vocational School Principal's Certificate. Part I of the course corresponds to some extent to the course for a Vocational Guidance Certificate, and may be taken in two summer sessions. Part II of the course is extra-mural and consists of a critical study of prescribed published matter concerning vocational education, of a survey of the local industries of the candidate's community, and of the study of special type schools. The course was offered for the first time in 1934, with a registration of 13 persons, all of whom had High School Principals' Certificates.

Course for Ordinary Manual Training Certificates

For some years before the establishment of the Training College no courses for Ordinary Manual Training Certificates were offered and, as the need for re-establishing such a course became evident, one of the shops in the Training College was equipped for training teachers in manual training, and a course was offered in 1925. The course takes one school year, and is open to teachers with Second Class Professional Certificates, and to skilled mechanics who can meet certain requirements.

The registration in this course has been as follows—

1925-1926.....	4
1926-1927.....	8
1927-1928.....	9
1928-1929.....	8
1929-1930.....	14
1930-1931.....	11
1931-1932.....	23
1932-1933.....	5

Owing to the necessity in recent years of restricting activities as much as possible, school boards have not established new manual training centres, and in some cases have reduced the number in operation. This has lessened the demand for manual training teachers, so that the supply somewhat exceeded the demand in 1933. As a result, the course for the Ordinary Manual Training Certificate was not offered in the years 1933-1934 and 1934-1935.

If, as is hoped, there should be in the immediate future any marked development of manual training work it is probable that the demand for teachers of this work will exceed the available supply. In this case the course for manual training teachers will be offered again.

Manual training provides opportunities for manipulative experiences with the tools, machines, devices and materials of modern life; its purpose is developmental rather than vocational; it should give to the boy some insight into, and appreciation of, the industrial operations and mechanical developments of the times. If it is to do this it should provide more than the traditional experiences in woodwork; it should in addition provide experiences with the newer materials of modern life; iron, copper, aluminum, rubber, cement, bakelite, cellulose, etc. The course for the Manual Training Certificate should be revised to meet the new industrial and home environment of modern times.

Course for Specialists' Certificates in Manual Training

No course for this certificate had been offered for several years before 1926. When the Training College was established a new course for Specialists' Certificates in Manual Training was provided, open to teachers with Ordinary Manual Training Certificates. At first the work offered could be taken in two summer sessions. A revised and improved course was provided in 1930, which takes three summer sessions to complete.

The registration in this course has been:

1926.....	Part I.....	26
1927.....	" II.....	28
1928.....	" I.....	22
1929.....	" II.....	18
1930.....	" I.....	26
1931.....	" II.....	24
1933.....	" III.....	24
1934.....	" I.....	19

Summer Courses for Elementary Certificates in Manual Training, and in Household Science

These courses have been provided in the Training College since 1926. Each of them takes two summer sessions to complete.

The registration in these courses has been as follows—

	Elementary Manual Training		Elementary Household Science	
	Part I	Part II	Part I	Part II
1926.....	12	10	21	15
1927.....	11	9	27	20
1928.....	15	5	25	18
1929.....	19	6	27	22
1930.....	14	15	26	18
1931.....	20	19	35	24
1933.....	8	4	16	9
1934.....	8	6	19	9

These courses, along with a number of other summer courses, were not offered in 1932.

Special Summer Courses

Improvement courses of one kind and another for vocational teachers have been offered from time to time in summer sessions at the Training College. The following have been provided, some every year and some occasionally: machine shop practice for teachers of draughting, motor mechanics, and manual training; mathematics and science for shop teachers; mechanical drawing for shop and manual training teachers; advanced dressmaking for domestic arts teachers; methods in mathematics for technical schools for teachers of mathe-

matics. The last mentioned course was given as the result of a petition from a group of teachers of mathematics.

Vocational School Principals' Conference

In 1929 a conference of Principals of Vocational Schools was called by the Director of Technical Education to meet in the Training College during Easter week. The purpose of the conference was to provide an opportunity for a round-table discussion of the special problems in organizing and managing vocational schools. The exchange of experience proved profitable, and on the request of the Principals a similar conference was held in 1930. Since that date conferences have been held every year in one or other of the Toronto Technical Schools. These meetings are regarded by the Principals as exceedingly helpful, and as among the most important of the Easter meetings.

Relation of the Training College to the Ontario College of Education

From time to time teachers with Vocational Certificates who could meet the requirements for admission to the College of Education have applied for High School Assistants' Certificates. No credit for any work they had taken at the Training College was given them, and they were required to take the full regular course leading to High School Assistants' Certificates.

Similarly, from time to time graduate engineers with High School Assistants' Certificates who could meet the requirements for admission to the Training College have applied for Vocational Certificates. Such applicants were granted credit for the subjects of the Training College which they had taken in the College of Education, and were required to take a special summer course in the subjects specially relating to vocational school work. This provision has never been quite satisfactory. Its chief weakness was the lack of opportunity it afforded for practice-teaching and observation of vocational classes.

Recently a reciprocal arrangement has been made between the Training College and the College of Education whereby a graduate of either institution who can meet the requirements for admission to the other, may be admitted to a special summer course leading to a High School Assistant's Certificate, or to a special summer course leading to a Vocational Certificate, as the case may be. On the completion of one of these summer courses a Provisional Certificate good for one year is granted. Provision is made for observation work and practice-teaching in the field concerned, or for passing a test in teaching in such field. In order to secure an Interim Certificate the candidate must pass all the final examinations of the College in which he takes the special summer course.

The General Shop for Rural Vocational Schools

Owing to limited financial resources, a small community with a population of 2,000 or fewer is not able to duplicate the accommodation and equipment found in urban vocational schools. The number of pupils is not great enough to justify the cost of three or four shops equipped with tools and machines.

The solution of the problem of offering some vocational training in such a community seems to be the organization of a "General Shop," equipped to furnish experiences in the more common and fundamental activities of a number of trades or occupations. Such a shop could be equipped with a modest supply of tools and machines selected to provide some acquaintance with trade practices in woodwork, machine shop practice, sheet metal work, electrical installation

and maintenance, motor mechanics, forging, harness making, farm mechanics, or other fields suitable to the locality. In the hands of a capable and understanding teacher such a shop would serve to arouse a new interest in school work in the case of boys who have greater aptitude for practical work than for academic subjects. It would afford the opportunity, so well provided in urban technical schools, of discovery or exploratory experiences, and of giving boys who show interest or aptitude in any of the fields for which the shop is equipped at least some elementary skill training in the field. The lack of such a shop is one of the disadvantages which boys in smaller communities suffer in comparison with their fellows in urban centres.

The real difficulty in carrying out such a scheme in smaller communities is not in the cost of establishing the shop, but in the obtaining of a properly trained teacher with some skill and knowledge in each of the fields. The ordinary manual training teacher has not a sufficient variety of manipulative skills or of trade knowledge to meet the situation. On the other hand, the vocational shop teacher is skilled in one field only. General shop teachers with the necessary experience are not available. Graduates of certain four-year courses in technical schools would probably make satisfactory teachers for such work, if given further training in suitable mechanical operations and performances, and in methods of teaching.

If vocational schools are to be established in rural communities, it means the installation of general shops with resident teachers, or possibly itinerant teachers working between two or more centres. As the success of the general shops will depend upon the efficiency of the teachers, every effort should be made, before such shops are established, to provide adequately trained teachers.

Enrolment at the Training College, 1934

The total enrolment for 1934 was 204, which included 15 duplications, thus leaving 189 individuals. This was a decrease of 51 as compared with 1933.

The decrease is due in part to the suspension, for the time being, of the courses leading to the Ordinary Manual Training Certificate, and to the Domestic Arts Certificate, and in part to the reorganization of the regular course into a continuous twenty-five weeks' course, no part of which is given in the summer session. Although the vocational schools are crowded, school boards are engaging fewer teachers than formerly in proportion to the attendance. This decreased demand for teachers has affected to some extent the number in training. However, as soon as school boards feel free to add teachers to take care of the greatly increased enrolment of pupils, there will be a general demand for more vocational teachers. For some vocational subjects there are, even in these times, few certificated teachers available.

The annual enrolments (individuals) in the Training College, since it was established, have been—

Year	Enrolment
1925.....	183
1926.....	204
1927.....	239
1928.....	270
1929.....	276

APPENDIX H

REPORT OF THE INSPECTOR OF AGRICULTURAL CLASSES

Under the general plan now in operation, the Regulations of the Department of Education have provided for instruction in Agriculture as an optional subject since 1913. To meet new conditions changes have been made from time to time in the details of the courses. The consistent increase in the number of schools taking the work each year indicates that in a large measure the courses have met the approval of trustees and parents.

Agriculture is an optional subject and hence three things are essential for success in the individual school. First, local opinion must be favourable. Second, the trustees must be willing to make the necessary expenditures for accommodations, special equipment, and supplies. Third, the teacher must be interested, capable, and efficient. In schools where these three factors are found, instruction in Agriculture is at its best and is appreciated by both pupils and parents. During the period since 1913, the development of a better understanding of the place of Agriculture as one of several subjects on the curriculum, improvements in accommodations and additions to equipment for teaching the courses, better qualifications of teachers, and the growing popular demand for courses related to practical activities outside the school have all had a strong influence on the extension of the work.

The importance of Agriculture as a subject on the curriculum of schools serving rural areas is indicated by the following: Over the three-year period, 1931-34, an average of 44 per cent. of the pupils who left rural elementary schools at the age of fourteen or over left school permanently, while 56 per cent. entered secondary schools. A conservative estimate indicates that 75 per cent. of the pupils who enter secondary schools do not complete the full course. Applying these percentages to a group of 100 pupils, we find that 44 from the rural elementary schools and 42 from the secondary schools, or a total of 86 pupils, presumably complete their formal education in the schools of their home locality. Hence, if Agriculture is not taught, these pupils receive little to develop and broaden their knowledge of the subject during their school life. On the other hand, when Agriculture is taught they will have studied a wide range of agricultural subjects and will be better fitted to continue the study of Agriculture and to benefit from attendance at Short Courses held by the Department of Agriculture or by Agricultural Vocational Schools.

While the progress made in the past, as outlined in subsequent paragraphs, is most gratifying, there are many reasons for the belief that agricultural instruction will, in the future, have a still larger place in the curricula of both elementary and secondary schools.

Public and Separate Schools

The development of agricultural instruction as a part of the course of study in the Public and Separate Schools has been marked by steady and continuous progress since the first introduction of Nature Study and School Gardening in 1903. New courses were introduced in 1914 and instruction in Agriculture as an optional maximum course was provided for. Since 1914 Agriculture as a

subject has been introduced into the Normal School courses; Summer Schools have been maintained for further qualifications of teachers; and better understanding by trustees and parents of the purpose in the work has resulted in a steady increase in the number of schools reporting the teaching of Agriculture.

The number of schools which have met the requirements of the Regulations and qualified for grants for Form III, Form IV, and Form V is shown in the abbreviated table given below.

Year	Number of Schools	With School Gardens	With Home Gardens
1903.....	4
1910.....	17
1913.....	159
1914.....	264	208	56
1920.....	1,648	702	946
1928.....	3,595	1,059	2,536
1931.....	4,658	1,330	3,328
1932.....	4,906	1,334	3,562
1933.....	5,047	1,526	3,521
1934.....	5,201	1,594	3,607

There are 7,188 elementary schools in the province, and the above figures show that 72.1 per cent. reported giving instruction in Agriculture last year, while 4,774 of 6,139 rural schools, or 77.7 per cent., and 427 of 1,049 urban schools, or 40.7 per cent., taught Agriculture. The figures given above indicate that Agriculture as a subject of instruction is becoming more general in the schools.

In rural schools, through the instruction given in the class room, provision for school and home gardens, and for participation in School Fair activities, pupils are receiving much information which was not available in the school a generation ago. Further, in the school where Agriculture is taught, books, bulletins, periodicals, charts and pictures on agricultural topics may be secured for the school library and are available for the use of pupils and of others in the community.

During the past year a revised form (Agric. Cir. No. 3) has been used for making reports. Suggested topics formerly given on this form have been omitted and teachers have been urged to develop an outline of a four-year progressive course. In several Inspectorates such outlines have been prepared by the Inspector and the District Representative of the Department of Agriculture. In other Inspectorates the teachers of Agriculture have met and drawn up a three- or four-year outline of topics. A four-year outline is also available at the Department. Information on different topics is available for teachers in various books and bulletins, lists of which have been sent to all Inspectors. During the year, over 5,000 sets of pictures of breeds of live stock secured from the Department of Agriculture have been sent to Inspectors for distribution to the schools in which Agriculture is taught, and many favourable comments have been received regarding the value of these pictures.

One of the difficulties associated with the development of the work has been the lack of qualified teachers. Under present regulations all teachers at Normal School receive instruction in Agriculture and are permitted to teach the subject in ungraded schools. Special certificates, the Elementary and the Intermediate, are granted by the Department. During the past year teachers giving instruction in Agriculture held the following standing: Elementary 1,552; Intermediate 144; Part I Elementary 86, and Part I Intermediate 10; making a total of 1,792 who had qualified through taking courses in addition to the Normal School training.

The annual reports from Boards indicate that in many localities the work is meeting with the approval of trustees and parents. The following statements taken from reports submitted to the Department illustrate how the subject is regarded by those actually concerned:

Southampton Public School, Bruce County—Inspector W. F. Bald.

The trustees and ratepayers are well satisfied with the teaching of Agriculture. Many backward pupils take a keen interest in Agriculture.

(Signed) D. N. McDONALD,
Chairman.

U. S. S. No. 9½ and 15, Matilda, Dundas County—Inspector W. J. Stewart.

Agriculture was taught in our school satisfactorily. The school garden and school grounds were kept in good condition.

(Signed) ISAIAH LOUCKS,
WILLIS A. MCINTOSH,
WALTER E. WHITEFERR,
Trustees.

S. S. No. 5, Delaware, Middlesex County—Inspector P. J. Thompson.

We, the undersigned trustees of this section consider the teaching of Agriculture one of the best subjects taught in the school.

(Signed) ROBERT TROWSE,
EARL EICHENBURGE,
JOHN BARNEY,
Trustees.

S. S. No. 16, East Montague, Lanark County—Inspector J. C. Spence.

This work has been carefully carried on by both teacher and pupils and they take a great interest in the garden and in the School Fair.

(Signed) H. J. SHAW,
Secretary-Treasurer.

In addition to the courses for Form III and Form IV, Agriculture of the Lower School course was taken in fifth classes of 441 Public and Separate Schools under the Public School Regulations. Under the High School Regulations the Lower School Course is taken in the following schools:

Britt Consolidated; S. S. No. 7 Biddulph; S. S. No. 10 East Zorra; Elizabeth Ziegler Public School, Waterloo; General Mercer Public School, Toronto; Hearst Public School; Hespeler Public School; Point Anne Public School; Port Arthur—Central Public School, St. Andrews R.C.S.S., St. James Public School; Port McNicoll Public School; Port Stanley Public School; S. S. No. 5 Sandwich East; Tecumseh Public School; No. 4 Wellesley R.C.S.S.; No. 8 Windham R.C.S.S.; No. 1 Woolwich Public School; No. 7 Woolwich Public School; No. 8 Woolwich Public School.

Owing to the number of subjects which must be taken in the elementary school the teacher can give only a limited time to instruction in Agriculture. In thickly populated areas where schools are close and the roads are open throughout the winter, another plan might be adopted where it is desired to stress agricultural instruction beyond what can be given by the regular teacher. A number of school Boards might co-operate and arrange for an itinerant teacher who would spend half a day a week at each school. This plan has not as yet been tried in Ontario, but there is every reason to suppose that it would meet with success in many parts of the Province.

Secondary Schools

Three schemes are provided as stated below, any of which may be taken in those schools which meet the requirements of the Department of Education.

1. Optional classes in Lower and Middle School as a part of the course which may lead to Normal Entrance or Junior Matriculation.

2. Department of Agriculture under the High Schools' Act.
3. Department of Agriculture under the Vocational Education Act.

Under scheme (1) above, Agriculture was taught during the year in the following schools. Under (a) are the schools in which Lower School courses only are taken, under (b) both Lower and Middle School.

Collegiate Institutes:

(a) Cobourg, Cornwall, Fort William, Goderich, Ingersoll, Orillia, Oshawa, *Picton, Perth, York Memorial. Total 10.

(b) Barrie, Belleville, Brockville, Clinton, East York, Kitchener, Lindsay, Napanee, Port Arthur, Renfrew, Runnymede, Scarborough, Smith's Falls, Stamford, Strathroy. Total 15.

High Schools:

(a) Cobalt, Essex, Etobicoke, Grimsby, *Kapusksing, Leamington, Markdale, *Markham, *Meaford, Newburgh, Niagara, Norwood, Rainy River, Shelburne, *Simcoe, Thorold, Uxbridge, Waterdown, *Waterford, *Wingham. Total 20.

(b) Alliston, Amlerstburg, Athens, Beamsville, Bowmanville, Bracebridge, Brighton, Burford, Burlington, Caledonia, Cayuga, Dundas, Dunnville, Elmira, Fergus, Fort Frances, Hagersville, Haileybury, Iroquois, Kincardine, Kingsville, Listowel, Midland, Milton, Mitchell, Nepean, New Liskeard, Norwich, Oakville, Petrolia, Port Elgin, Port Perry, Ridgetown, Ridgeway, Saltfleet (Stoney Creek), Smithville, Stirling, Tweed, Watford, Whitby, Winchester. Total 41.

Continuation Schools:

(a) †Belmont, Burk's Falls, †Castleton, Coldwater, Eganville, *Englehart, Florence, Fordwich, Merlin, *Merrickville, *Princeton, Sparta, *Sundridge, *Teeswater, *Tilbury, Wales, †Wellesley. Total 17.

(b) Agincourt, Brownsville, Comber, Drayton, Drumbo, Embro, Pelham (Fenwick P.O.), Ilderton, Lobo (R.R. No. 2 Ilderton), Lynden, Lyndhurst, Mindemoya, Minden, Mount Brydges, Mount Elgin, Mount Pleasant, Mount Albert, New Hamburg, St. George, Thamesford, Wheatley, Woodville. Total 22.

Note: *Introduced Agriculture in September, 1934.

†Discontinued Agriculture June, 1934—owing to changes in teachers.

A summary of the above shows that Agriculture is now taken in twenty-five Collegiate Institutes, sixty-one High Schools, and thirty-six Continuation Schools. During the year the work was discontinued in three Continuation Schools, but was introduced in one Collegiate Institute, seven High Schools, and six Continuation Schools, making a net increase for the year of eleven schools. It will be noted that in a total of 78 schools both Lower and Middle School courses are taken.

In this phase of instruction, which was first introduced in 1913, there has been a definite and continuous development as is shown in the following table:

Year	Collegiate Institutes	High Schools	Continuation Schools	Total
1913.....	..	1	1	2
1918.....	8	13	4	25
1923.....	8	23	4	35
1928.....	14	44	23	81
1931.....	24	44	32	100
1933.....	24	54	33	111
1934.....	25	61	36	122

The schools in which Agriculture is taught are not confined to certain areas, but are well distributed over the Province. The subject is now taken in one or more schools in all except five counties and three districts. Agriculture, when permanently established in Collegiate Institutes and High Schools, has been continued in most cases from year to year as a subject on the curriculum. In Continuation Schools, owing to frequent changes in teachers, there has been less continuity in the work, as Boards have not always been able to secure teachers qualified for the particular position, who were also qualified in Agriculture. During the year approximately 10,800 pupils have been enrolled in Lower School and 3,153 in Middle School classes in Agriculture. One hundred and forty-seven teachers are engaged in giving instruction in Agriculture in the Secondary schools. Of this number, eighty-eight hold the Specialist certificate, sixty-six of whom are graduates of the Ontario Agricultural College; forty-five hold the Intermediate certificate, and four have completed Part I of the Intermediate course. The supply of qualified teachers now exceeds the demand and Boards should have no difficulty, in the future, in securing teachers of Agriculture.

The courses under this scheme are optional with the science subjects in the Normal Entrance and Junior Matriculation courses and hence must be distinguished from those of a vocational nature provided under schemes (2) and (3). The prescribed courses include a study of the agricultural subjects and related sciences. As far as possible the instruction in the laboratory and class room is made practical through the examination of specimens and materials and the performing of experiments. Gardening is taken in 80 per cent. of the schools and in many instances pupils have a share in the care of flower beds and shrubbery as a part of the work in Agriculture. Home projects are an important feature of the work in all schools, and thus provision is made for a correlation of school work and home activities. Since Agriculture is taken in the regular class periods it is seldom possible to take the class away from school for a whole half day for live-stock judging or similar activities, but arrangements are made for occasional visits to creameries, dairies, egg grading stations, apiaries, orchards and farms for observation and study.

The following schools are taking work under the scheme indicated in (2) above: Drayton, Elmira, Listowel, Port Perry, Wheatley, and Whitby.

In these schools, time is given to the study of Agricultural subjects in addition to that provided for the optional courses. At Port Perry and Whitby instruction is given in Farm Mechanics for boys and in Household Science for girls. At Port Perry the modified plan of organization introduced last year is now in effect in first and second forms. In each year forty periods per week are assigned to academic subjects and ten periods to Agriculture and Farm Mechanics for boys and Household Science for girls. The ultimate result of this scheme cannot be fully determined for another two years, but as far as first and second years are concerned, the plan is meeting with approval. The broadening of the course during the first two years will at least be of benefit to the pupils who leave school during, or at the end of, this period.

Under (3) above, the following schools are maintaining classes and qualifying for grants under the Vocational Education Act: Beamsville, Renfrew, Ridgetown, and Stamford. In the first three, courses in Agriculture and Farm Mechanics are provided for boys and in Homemaking for girls. At Stamford provision is made for boys only. Students enrolled in these departments spend between 40 and 50 per cent. of the time of the first two years on the vocational

subjects, the balance being assigned to academic studies. At Beamsville and Ridgetown credit is allowed for the academic subjects taken which are required for Normal Entrance, and pupils who complete the Vocational Course have thus secured credit on a number of subjects and may, if they desire, complete standing for Normal Entrance by attending High School. At Ridgetown in September, 1934, all pupils of first year were enrolled in a general course. Forty per cent. of the time of the first year is given to vocational subjects. Pupils desiring matriculation will begin Latin and French in the second year and additional time will be provided in the third and fourth years. While this move is but an experiment, it will at least be of value, in that all pupils will in the first year have an opportunity to take vocational as well as academic subjects, and should at the end of the year be better able to choose the course they wish to follow. The Winter Short Course held at Ridgetown in January, 1934, had an enrolment of 21 young men and 24 young women. These courses, which are carried on under the direction of the Board, by the Principal and members of the staff, are held annually and provide instruction in Agricultural and Home-making subjects for those who have left school, or who are unable to attend the regular classes. This feature of the work at Ridgetown is one that might well be introduced into other schools.

In September, 1934, the Board of Education at Simcoe introduced instruction in Vocational Agriculture and Home-making under a tentative agreement with the Department of Education. An agricultural class room, a workshop, and a household science room have been equipped. Forty-one pupils are enrolled in the first year. Boys receive instruction in agricultural subjects and in farm mechanics and girls in household science and in household arts for about 40 per cent. of the time, while the balance of the time is given to academic subjects. It is the aim of the Board to extend this course, which is meeting with general favour, and ultimately to establish an agricultural and home-making department.

This procedure is commended to Boards that are interested in introducing such Departments. Through an extension of the work of the High School courses in Agriculture and tentative provision for instruction in Household Science and Household Arts, the probable enrolment, the interest of pupils, and the likelihood of the success of such courses may be ascertained before the final adoption of a vocational scheme.

Certificates and Summer Courses

Three special certificates in Agriculture are issued by the Department of Education.

An Elementary certificate may be obtained by a teacher who completes successfully two summer courses of five weeks each either at the Ontario Agricultural College, Guelph, or the Agricultural School, Kemptville. This certificate is also granted to those who have completed the four-year course in Agriculture followed by a course at Normal School.

The holder of an Elementary certificate is qualified to teach Agriculture in a Public or Separate School.

An Intermediate certificate may be obtained by a teacher who completes two Summer Courses at the Ontario Agricultural College. The minimum requirement for admission to the Intermediate Course is a First Class certificate, with Upper School standing in Biology and Physics or Chemistry. The holder of this certificate is qualified to teach Agriculture in a Public or High School.

A Specialist certificate may be obtained by a graduate of the Ontario Agricultural College who completes the course for a High School Assistant's certificate and passes the examinations of the Specialist course at the College of Education. This certificate may also be obtained by a teacher holding the Intermediate certificate, if otherwise qualified, on completion of a third Summer Course and a course in Farm Mechanics.

Summer Courses in Agriculture at the Ontario Agricultural College and the Kemptville Agricultural School have been an important factor in the development of agricultural instruction in the schools. Each year teachers from different parts of the Province gather for five weeks' study. Last year at Guelph, teachers from 87 Inspectorates were enrolled and 231 were teaching in the Public and Separate Schools. In addition to the information obtained from attendance at classes, these teachers gain much from their associations with each other, and return to their schools with renewed vigour and enthusiasm.

During the third week of the Summer Course a refresher course for teachers in secondary schools was held. Forty-one teachers attended the course and all found the discussion and lectures during the five days of interest and value.

The following tables show the attendance at the Summer Courses for the past five years:

Attendance at Ontario Agricultural College, Guelph

Year	Elementary				Intermediate					Inspectors		Farm Me- chanics	Total
	I		II		I		II		III	Parts			
	Men	Women	Men	Women	Men	Women	Men	Women	Men	I	II

1932.....	48	29	77
1933.....	26	30	56
1934.....	19	28	42

Normal Schools

Instruction in Agriculture is given as a part of the regular course at each of the seven Normal Schools. This course does not lead to any special certificate, but the topics of the Public School Course are covered. Teachers who are engaged in ungraded schools may teach the course in Agriculture following their Normal School Course, but should at the first opportunity qualify for the Elementary certificate by attendance at Summer Courses.

NORMAN DAVIES,
Inspector of Agricultural Classes.

Toronto, March 11th, 1935.

APPENDIX I

REPORT OF THE INSPECTOR OF AUXILIARY CLASSES

Statistical Information for the School Year, 1933-1934

Training Classes.—For backward and psychopathic children and those who cannot successfully pursue the ordinary grade work, but who can be trained and whose mental age is not less than the legal school age.

Progress

(a) *Training Classes.*—It is very satisfactory to note that no auxiliary training classes have been discontinued this year and that the Mimico class in the John Fisher School is being reopened. Throughout the years of depression only eight school boards were forced to discontinue classes on account of financial stringency. Since September, 1934, new training classes have been opened as follows: 1 in Kirkland Lake, 1 in S.S. No. 6, Stamford, and 2 in the Separate Schools of Toronto. School progress accomplished by auxiliary class pupils as a result of the use of special teaching methods, social readjustments effected by the personality teaching characteristic of these classes, and relief afforded the regular grades through the segregation of backward pupils are advantages so obvious in school areas where training classes have been established that the people of these communities are accepting special education as a permanent feature in the school system. Devotion displayed by the auxiliary class teachers in charge of this work has been the dominant factor in bringing about this happy state of affairs. A second feature in popularizing auxiliary education has been Parents' Day Exhibitions. Among those who this year have notably succeeded in thus demonstrating the effectiveness of work being carried on in their classes may be mentioned Miss Campbell, of Owen Sound; Mrs. Mac-

Kenzie, of Ingersoll; Miss Gammon, of St. Thomas; Miss Phillips, of Silverthorn; and Miss Mackenzie and Miss Stockwell, of Fairbank.

(b) *Promotion Classes.*—In September of this year senior boys' promotion classes were opened in the St. Francois d'Assise and the St. Joseph's Separate Schools, Ottawa, and a second boys' promotion class was established in the Queen Victoria School, North Bay. In Toronto an experimental venture in special training for what might be termed superior auxiliary type boys was initiated in the Church Street School. Boys in the eastern central part of the city who could not be accommodated in the overcrowded Junior Vocational School, or whose retardation could not be altogether accounted for by a low mentality rating, were selected and given a modified course of public school instruction characterized by more concrete methods of teaching and the addition of considerable hand work. While the school is yet in the experimental stage, the success of the venture seems to be assured. Boys who constituted problems in the regular grades are now finding happiness and success in their new environment. The school has become so popular that voluntary applicants for placement exceed accommodation.

(c) *Physically Handicapped.*—A lip-reading and speech correction itinerant teacher has been attached to the Kitchener staff. Auxiliary education in Kitchener has been developed along what might be considered model lines for a city of medium size, comprising as it does two junior training classes, one senior girls' and one senior boys' promotion classes, one visiting teacher for sick and crippled children, one speech correction teacher for children who are suffering from partial deafness and faulty speech, and seven sight-saving units. In Toronto a fourth lip-reading class was opened last September at the Ogden School. A class for totally deaf adolescent girls was organized in the Central Technical School and another for totally deaf adolescent boys in the Junior Vocational School. These pupils had been afforded ordinary public school education either in the oral classes at Clinton Street or in the Provincial School at Belleville, and the experiment of giving them regular vocational training in the technical schools of the city was conceived and tried out. Reports up to date indicate that these boys and girls are making even better progress than was anticipated. The pupils are thus enabled to enjoy and profit by home and social contacts during the trying years of adolescence and are afforded opportunity to learn various trades in association with speaking people under conditions similar to those which they will find in industry.

(d) *Rural Units.*—In addition to those reported under statistical information for the school year, the following units have been organized during the latter part of 1934:

SIGHT-SAVING UNITS:

Bruce County	1
Dundas County	2
Essex County	18
Frontenac County	1
Grey County	2
Grenville County	2
Lambton County	1
Lincoln County	1
Middlesex County	3
Stormont County	1
Waterloo County	3
Welland County	2
York County	3

York County.....	1
	3

RURAL TRAINING UNITS:

Elgin County.....	1
Grenville County.....	46
Huron County.....	2
Prince Edward County.....	26
Russell County.....	1
Waterloo County.....	4
	80

It is gratifying to note the rapid spread of auxiliary education in the counties, bringing as it does to handicapped pupils in country, village, and town schools educational advantages heretofore exclusively enjoyed by the children of larger areas.

Home Instruction Units are organized under Regulation X (1) (f), which provides that trustees and school boards in towns, villages, and rural areas may engage a qualified teacher to give not fewer than 100 hours of instruction in at least fifty visits during the school year, the Department reimbursing the board for expenditures made in the purchase of approved learning equipment and material where such has been deemed necessary, and one-half the special salary paid the teacher. Wherever possible, pupils confined at home by physical disability, or by protracted illness are advised to take correspondence courses. The combination of Home Instruction Units and Correspondence Courses should within the course of the next year or two have made provision for the education of all Ontario pupils who from whatever cause are unable to attend school.

Scattered throughout the Province there are now 74 Sight-saving Units, a number almost equal to the total enrolment in the sight-saving classes of Toronto. Altogether there are some 200 sight-defective pupils in the Province whose educational welfare is being looked after. There are estimated to be about 400 children in Ontario who stand in need of sight-saving instruction. At the present rate of progress the great majority of these should be provided for within the next two years.

Sight-saving Units are equipped with a small table and chair so that the pupil may be seated convenient to the blackboard for assignment work and at different parts of the room throughout the day according to variations in lighting. Exercises are done in large hand with black primary pencils on sight-saving paper. The Department furnishes the pupil with magnatyped Spellers and the Primer, First, and Second Book Readers. Through the courtesy and co-operation of the 'Toronto Sight Saving Teachers' Association and the 'Toronto Board of Education, arrangements have been made whereby the Department will be in a position to furnish sight-saving pupils outside Toronto with an abundant supply of magnatyped material to be used in intermediate and in senior grades. Records show that the average sight-saving pupil enters a special class or unit nineteen months retarded. After enrolment in a Sight-saving Unit such retardation is noticeably reduced.

Very satisfactory progress is being made and very successful results secured in the establishment of Rural Training Units for direct learning children. The County of Glengarry, which had been surveyed for the purpose of auxiliary

education during the previous year, and in which some 18 Training Units were then established, was visited in company with Inspector Edwards this autumn. In one school a boy who after five years' attendance had made no appreciable progress and who had become a persistent truant and a behaviour problem, was found after a year of special instruction to be able to read "Peter and Peggy" with facility, to add rapidly and accurately, to construct well made reed baskets (of which ability he was very proud), to have attended school every day during the autumn term, and to have completely readjusted his social behaviour in relation to the school, the teacher, and the other pupils.

In another section a very despondent girl with an I.Q. only slightly above 50, had, rather to the amazement of the visitors, been taught to read and to make change with money. She is this year continuing her reading and practical arithmetic courses but will devote a considerable part of her time to sewing and knitting. In a two-room school three pupils in the primary room had been readjusted to grade and were successfully carrying on, while other pupils of somewhat lower intelligence were making satisfactory progress in both academic and vocational work.

Auxiliary Training Units have been established by two methods:

1. Through the reporting of isolated cases by teachers or inspectors.
2. Through County surveys.

In 1933 North Waterloo and Glengarry Counties were more or less completely surveyed and organized. In October of this year Miss Helen DeLaporte, Assistant Inspector of Auxiliary Classes, and Inspector G. Young made a very thorough and complete survey of Grenville County, in the course of which some 61 children were examined in 32 schools and in 4 homes. As a result of this survey applications were sent in from 24 schools; and 46 Rural Training Units and 2 Sight-saving Units were established. In the course of the survey a number of children suffering from various speech defects were noted and the teachers were advised to give them five-minute lessons per day according to methods outlined in the chapter on that subject in "Training Handicapped Children". In a letter of recent date Inspector Young, reporting on these speech correction cases, writes: "I tested them in conversation and reading and understand all but one now. I was surprised to find such progress in so short a time." The results obtained in Grenville County through the use of speech correction methods as outlined in the Manual "Training Handicapped Children" confirm reports from other centres that a teacher spending five minutes a day with one or two pupils can by these methods effect very great speech improvement.

During the autumn term Inspector C. E. Stothers gave mental examinations to 59 pupils in some 20 rural and village schools of Prince Edward County, reporting the same on form A.C. 3, filled in according to instructions outlined in form A.C. 7, and forwarding these reports to the Auxiliary Class Inspector in Toronto. Advisements were given concerning special educational facilities for each of these children and up to date 26 rural training units have been applied for and established.

Inspectors of other counties have signified their intention of conducting surveys in the near future. With the good example set by North Waterloo, Glengarry, Grenville, and Prince Edward Counties it is hoped that survey work throughout rural Ontario will soon become an accomplished fact and that all children requiring special educational facilities in these areas will receive attention.

Teacher Training

All teachers of Auxiliary Classes are specially trained in a five-weeks' Summer Course. The minimum qualifications of applicants are: (1) Normal School graduation; (2) three years' teaching experience; (3) a certificate from their Inspector of special aptitude for the work.

Courses are provided for teachers in: (1) Training and Promotion Classes; (2) Special Industrial Classes; (3) Oral, Lip-reading and Speech Correction Classes; (4) Sight-saving, Orthopedic, and Hospital Classes. In the summer of 1934 courses (1), (2), and (3) were given. Forty-four entrants enrolled for the training and promotion classes; 22 for the special industrial classes, and 13 for the lip-reading and speech correction courses.

Brief courses were given in the Normal Schools of the Province to acquaint teachers-in-training with methods of dealing with auxiliary type pupils, especially in rural schools. The many communications received by the Department from recently graduated teachers concerning exceptional pupils in their charge is ample proof of the interest created in the welfare of handicapped children by these Normal School lectures.

The Auxiliary Class teachers throughout the Province have been organized into eight associations. The monthly or bi-monthly meetings of these groups are well attended and the teachers are stimulated by (1) discussion of problems; (2) exhibition of craft work; (3) study of new methods.

Valuable assistance is rendered by the annual O.E.A. meeting and by the "Special Class Teacher". "The Special Class Teacher" is a magazine devoted to the interests of special education and published by the Auxiliary Class Section of the O.E.A. Its pages contain a wealth of suggestions and advice concerning the training and treatment of retarded, physically handicapped, and behaviour problem children.

The convention of the International Council for the Education of Exceptional Children met in Toronto, February, 1934. Among the six hundred attending were some of the most eminent educationists from our neighbouring country. Typical classes in Toronto were visited, and close inquiry made concerning auxiliary education throughout the Province. Among the points to which the visitors made reference were:

- (1) The adequacy and comprehensiveness of the work as carried on in Ontario.
- (2) The accommodation and equipment afforded (not too luxurious, not too meagre).
- (3) The zeal of the teachers.
- (4) The specific character training given pupils.
- (5) The successful effort to afford Ontario rural school children the advantages of auxiliary education, this Province being the only place in the world where an attempt has been made to fully organize such work.

H. E. AMOSS,

Inspector of Auxiliary Classes.

Toronto, February 2nd, 1935.

APPENDIX J

REPORT OF THE PROVINCIAL SCHOOL ATTENDANCE OFFICER.

The key to the efficiency of any school, in a system well-organized and capably manned, is a full complement of pupils as a steady-going unit of attendance. Experience has amply proven that, to this end, dependence cannot be placed solely on parental initiative. Measures must be taken to meet inertia, indulgence, and incompetence in the home or possible exploitation of children in the industrial field which all too often rob the child of his rights and lower the efficiency of the school. The freedom of the child for educational development must be guaranteed so that he may reach maturity with mental powers alert and physical powers undwarfed by labour in excess of his endurance. Compulsory education is merely the arm of protection thrown around the growing child. Ontario followed the example of older lands which had put to the test the plan of unrestricted parental liberty, and in due time, adopted the principle of controlled attendance.

In this Province the movement found footing only at the time of Confederation when the credentials of the scattered units of population were being weighed and educational standards were brought under review. Public sentiment was slowly maturing on the question, and public expression in the course of a few years became more and more pronounced. In 1870, such comments as the following, gleaned from reports and appeals for improvement, show the trend of opinion:

"The actual enrolment in this district is only 550 out of 1,441; two-fifths of the children are attending only two days per week."

"A school year of four months should be increased to six."

"A wise, thoughtful, compulsory law would be a blessing to check the half-vagrant life of the children."

"The sentiment is growing that compulsory attendance with reasonable modification is the only necessary and fair sequence of Free Schools."

Feudal theory up to this time had held sway and was the insuperable barrier to Free Schools and the compulsory principle. In 1871 this relic of the past was swept away, Free Schools were adopted, and the ground was cleared for a forward move. A compulsory attendance was enacted which provided that every child between seven and twelve years of age had the right to attend school for four months, and a penalty could be applied for failure save where poverty, ill-health, or distance could be successfully pleaded. The history of the successive advances is interesting. In 1874 an alternative penalty was added whereby Trustees might impose a rate-bill of \$1.00 per month per child not attending. In 1881 the compulsory age limits were raised one year to include all children eight to thirteen years of age. The compulsory period was changed to eleven weeks in each term and Truant Officers were appointed to replace control by Boards of Trustees. In 1885 the compulsory period was altered to 100 days in each year and for the first time truancy legislation was incorporated in a separate Act. In 1891 the upper age limit was extended to eighteen years and the entire school year was set as the objective. The year was for the first time clearly defined

as comprising two terms to run from August 3rd to December 22nd and January 3rd to June 30th for rural schools, and for urban schools on the same basis save for opening on the last Monday in August. The Act was changed in 1911 to read September 1st for all schools and in 1914 two distinct Attendance Acts were framed, one for children eight to fourteen years, and the other for adolescents fourteen to sixteen years of age. In 1919 these acts were revised and amended, the name Truant Officer was replaced by Attendance Officer, and a system of locally appointed rural and urban officers was provided for under the supervision of a branch of the Department of Education. Collective responsibility for the educational care of the child was slow in taking form but in the span of a normal life it has come, by carefully planned stages, to embrace the full formative years of childhood and to meet with universal support. The course of progress since Confederation is graphically presented in the following diagram:

Diagram No. 1
Enrolment and Average Attendance
Elementary Schools
1867-1934

A careful analysis of Diagram No. 1 discloses many interesting facts. On general lines, while the stimulus due to Confederation bore fruit in enlarged and improved attendance, the first fifty years saw only a moderate advance. It is clearly noticeable that the last seventeen years far outdistanced the previous fifty. But in the entire period the improvement is significant. While the

enrolment increased by only 65 per cent., the average number attending increased by 211 per cent. The gain can come from two sources only, viz., increase of population and improved control. Immigration had reached its maximum prior to 1914. During the war years the movement was stationary and thereafter legislative action reduced it to a minimum. Immigration may have been responsible for any increase prior to 1914, but in the two decades following, the gain both in total enrolment and in average attendance is due mainly to improved organization and supervision of attendance.

Measurement of Attendance Efficiency

The ratio of the average attendance to the total enrolment, reduced to a percentage, has been the traditional method of arriving at and expressing the standard of regularity attained. This method is of long standing and world-wide in use but is essentially unsound and misleading. Enrolment never represents a homogeneous unit of all-year pupils. It comprises also new-comers and school "leavers" at all stages of the year and transfers and re-transfers of pupils from room to room and school to school, re-registered at each remove. Whole year pupils, part-timers and duplications are all represented in the enrolment. Because of this fact, its use as a base of reckoning is outlawed. The average attendance represents the same unsafe components. The index of efficiency derived from the enrolment and the average attendance is obviously an incorrect criterion of attainment. This method has, therefore, been abandoned. The new base, now in use, is the statutory time in days during which the school is required to operate. A perfect attendance for the full-time registrant is the legal total fixed by statute, and for the part-timer that number of school days for which he should be legally enrolled. Thus duplications by re-registration in different rooms or schools are successfully excluded. The sum total of pupil-days estimated on this basis is known as the Perfect Aggregate Attendance, and the ratio between this and the Actual Aggregate Attendance, reduced to a percentage, is the true measure of efficiency.

Movement in Attendance Efficiency

Schools have varying difficulties to contend with from year to year which affect the level of attendance. Climatic and health conditions are among the most telling factors, especially in rural areas. The winter of 1933-34 was almost without precedent in its length and severity, and blocked roads and temperatures so low as to carry an element of risk wrecked regularity of attendance and closed many schools. Despite the handicaps, attendance for 1934 shows a fractional improvement over 1933, as may be seen in the following table:

Table No. 1

Class of School	1930	1931	1932	1933	1934	Increase in per cent. over 1930
City Schools.....	90.67	91.62	90.88	92.21	92.82	2.15
Town Schools.....	89.05	92.48	91.14	92.92	93.28	4.23
Village Schools.....	90.72	91.95	90.79	92.47	92.49	1.77
County Rural Schools.....	87.83	89.30	88.54	89.30	89.68	1.85
District Rural Schools.....	83.43	87.71	87.69	87.98	87.69	4.26
All Urban Schools.....	90.28	91.84	91.08	92.40	92.84	2.56
All Rural Schools.....	87.11	89.05	88.40	89.09	89.35	2.24
All Elementary Schools.....	89.10	90.81	90.09	91.17	91.56	2.46

The year 1930 is taken as a base since this was the first year in which the new system of recording attendance and calculating measurement of efficiency was in use. Substantial gains are in evidence in each succeeding year and in the period as a whole. District schools led in the increase with 4.26 per cent., town schools following closely with 4.23 per cent. The average gain of 2.46 per cent. for all schools means that over 15,000 more pupils were securing an adequate education than in 1930.

In 1934 the Provincial leaders in the matter of attendance have set a commendable standard of efficiency:

URBAN LEADERS		RURAL LEADERS	
	Percentage		Percentage
City of Kitchener.....	96.16	County of Waterloo.....	94.22
Town of Elmira.....	98.03	District of Manitoulin.....	94.89
Village of Fenelon Falls.....	97.49		

The County of Waterloo has won the rural leadership for the second year in succession due to the interest of teachers and officers, the co-operation of homes, and the consistent supervision of Inspectors.

Diagram No. 2
Progress in Attendance
Elementary Schools
1926-1934

Diagram No. 2 shows in a visual way the progress of the various classes of schools for the eight-year period 1926-34. In the case of urban schools, the curve reveals a fairly uniform improvement throughout. By 1928 a re-organized

system of attendance supervision was devised whereby the duties of teachers, Attendance Officers, and Inspectors were clearly defined, their interrelations carefully articulated and systematic co-ordination established. The results are clearly noticeable in the upward rise of the curve in connection with every class of school. District schools made the most pronounced advance but all schools have risen to a standard which will be reflected in their general progress.

SECONDARY SCHOOLS

Enrolment and Attendance Efficiency 1932-33 and 1933-34

Table No. 2

	Enrolment		Percentage		Increase
	1932-33	1933-34	1932-33	1933-34	
Continuation Schools.....	11,364	11,070	90.15	90.69	.54
High Schools and Collegiate Institutes.....	68,603	68,013	91.90	93.32	1.42
Vocational Schools.....	34,578	31,491	89.59	92.63	3.34
	114,545	110,574			

Table No. 2 gives the enrolment as on the last school day in May for all classes of Secondary School. For three years there had been a steady and rapid rise in numbers from 98,277 in 1930-31 to 114,545 in 1932-33. For the first time in a decade, a decline in enrolment is recorded in every class, making a total drop of 3,971 between 1932-33 and 1933-34. This may be explained partly by the gradual resumption of normal conditions in industry, and partly by the retirement of pupils who had taken temporary advantage of school. Pyramiding of numbers inside the school has ceased, and recession to occupational life is resumed. All schools achieved a commendable record in regularity of attendance in 1933-34 and a substantial gain is shown over the preceding year.

Table No. 3

COMPARATIVE STATEMENT OF ENROLLED ADOLESCENTS (14 and 15 years) 1931, 1932 and 1933

Elementary Schools	Form I	Form II	Form III	Form IV	Form V	TOTALS		
						1931	1932	1933
1931.....	281	1,087	6,709	27,845	3,259	39,181
1932.....	233	983	7,442	27,971	3,957	40,586
1933.....	214	921	7,034	27,383	5,437	40,989

Secondary Schools	First and Second Years	Third and Fourth Years	Fifth Year			
1931.....	35,017	9,180	292	44,489
1932.....	34,878	9,938	261	44,877
1933.....	33,995	6,840	135	40,970
	GRAND TOTALS.	83,670	85,463	81,959

Table No. 3 is a comprehensive statement of the number of enrolled adolescents in elementary and secondary schools for 1931, 1932, and 1933, as on the last school day in May. The totals are practically a constant quantity. Of the 40,989 total for 1933, 8,169 are below Form IV. These may be regarded as retarded pupils. The condition is being slowly relieved as there are 489 fewer than in the preceding year. In Secondary Schools the contrast between adolescent enrolment in the first two years and in the third year is significant. The anxiety of pupils to try out their newly acquired status in High School work, and the pressure of the compulsory provision of the Adolescent Attendance Act account for the heavy enrolment in the lower forms. Financial limitations and the attainment of the age limit are in large part responsible for the sudden decline in numbers in the succeeding forms.

Table No. 4

Retirement from School of Adolescents (14 and 15 Years)

Elementary Schools	Form II	Form III	Form IV	Form V	1931	1932	1933
Rural Schools, 1931...	482	1,639	5,480	1,090	8,691
“ “ 1932...	489	1,521	5,976	1,323	9,309
“ “ 1933...	477	1,598	6,366	1,513	9,954
Urban Schools, 1931...	160	883	2,217	169	3,429
“ “ 1932...	200	1,193	2,269	303	3,965
“ “ 1933...	152	917	2,403	292	3,764
TOTALS....					12,120	13,274	13,718

Secondary Schools	First Year	Second Year	Third Year	Fourth Year	Fifth Year	TOTAL 1933
Continuation Schools..	447	336	321	175	41	1,320
High Schools and Collegiate Institutes.	1,558	1,405	1,195	806	707	5,671
Vocational Schools.....	3,162	1,799	1,747	974	635	8,317
TOTALS....	5,167	3,540	3,263	1,955	1,383	15,308

The above table gives in concise form the number of pupils between fourteen and sixteen years of age who retired permanently from elementary schools in the years 1931, 1932 and 1933, and in 1933 for secondary schools. The elementary school figures do not include any who proceeded to secondary schools and the secondary school figures do not include Middle School or Upper School graduates. In 1933 a total of 13,718 elementary school pupils out of 40,989 or 33.5 per cent. retired, and 15,308 out of 40,970 or 37.3 per cent. from secondary schools. Of these numbers, 8,441 in rural elementary schools failed to reach the High School Entrance stage and 3,472 in urban schools. In secondary schools, 15,308 or 13 per cent. retired without attaining any recognized Departmental standing. A grand total of 29,026 severed connections finally with school, and of these comparatively few found a place in the field of industry.

Table No. 5
Summary of Enrolment and Retirement of Adolescents, 1935

Elementary Schools	Enrolment	Number Retired	Retired	Remaining
Urban.....	26,202	3,764	14.36	85.64
Rural.....	14,787	9,954	67.31	32.69
TOTAL.....	40,989	13,718	33.46	66.54
Secondary Schools.....	40,970	15,308	37.36	62.64

This table shows the numbers who retired, apart from those who graduated. The question naturally arises in the mind of the inquirer—"How many adolescents remain in school by choice after reaching the minimum leaving age under the compulsory Acts?" The above table gives the answer. Liberties are large in rural elementary schools but even there 32.69 per cent. remained despite their chance to leave. The tendency to remain is stronger in urban schools where 85.64 per cent. continued their school connection. In Secondary Schools 37.36 per cent. retired and 62.64 per cent. remained. Compulsory laws do not act mechanically. They serve to tide pupils over the irresponsible years and to educate pupils and parents to the wisdom of school connection as a foundation for life.

Table No. 6
COMPARATIVE STATEMENT OF EMPLOYED ADOLESCENTS
1931, 1932 and 1933

The Attendance Acts are framed on lines designed to give the maximum educational returns to the child without entailing undue hardship on the home. Up to fourteen years of age the pupil is expected to be continuously at school but extreme conditions of need in the home are met by an allowance of a maximum of six weeks' absence in each term. Beyond fourteen, Home Permits and Employment Certificates may be given on proof of necessitous conditions, requiring the pupil's services or income from gainful occupation.

Table No. 6 shows the number of minors in domestic or industrial employment in the years 1931, 1932 and 1933. The table forms a good barometer of working conditions, viz., a heavy draft in 1931 on youth to bolster depleted incomes in the home, a rapid recession of openings in 1932, and a gradual restoration of conditions in 1933. The back-flow into the schools has ceased, the labour market has somewhat revived, and normal conditions are being restored.

Table No. 7
Part-Time Classes for Adolescents, 1933-1934

Junior Vocational School....	12	11	0	24	24
Public School.....	1	0	112	179	291
TOTALS.....	24	50	213	403	616

The above table, as compared with former years, reflects the changed employment conditions upon which part-time classes depend. Gradually in the smaller part-time centres, numbers fell till finally the classes dropped below a working unit when the classes were dispensed with and the pupils absorbed in the regular full-time classes. Employment of minors practically ceased except in Toronto where 616 remain employed under "earn and learn" conditions.

In order to conserve for the child, who is thrust into the working world at an immature age, the educational benefits of continued school connection as well as vocational guidance in his occupational life, the law wisely requires part-time instruction for 400 hours per year or practically one day a week. This time is adjusted in half-day periods to suit the convenience of the employer. Splendid co-operation has been given and both pupil and employer profit by the connection. The Public School part-time adolescent classes under Principal Watt are an outstanding example of their need and value. The 291 pupils are moving on in large numbers to High School Entrance standing and beyond that stage are pursuing commercial and other studies in advanced classes, by their own choice, thanks to the sympathetic interest and co-operation of the Board of Education. These classes are a standing proof of the wisdom of part-time work under capable management.

Pupil Migration—1933

Windsor Area.....	1,414	464	3.05

No more pressing problem confronts educational forces than the intra-year movement of pupils from one residential area to another. The movement is much less grave in Ontario than in the neighbouring country where the proximity of temperate and tropical climates creates seasonal employment resulting in

large scale migrations. The continuity of school connection is the desideratum. An attitude of indifference is engendered by frequent change which entails losses amounting in many cases to months. Time elapses and serious loss occurs before the child is located, sequestered as he may be in the congested areas of urban centres or in the forested or hilly tracts of our rural districts. To overcome the difficulty, the transfer card is the most effective device used in progressive lands to follow up the moving child from point to point and notify the school and attendance forces of his arrival.

Infractions of the law so serious or so persistent as to call for legal proceedings have been falling in number in the past few years. Although the number of complaints lodged with the Magistrate was larger in 1933 than in 1932, recourse was more frequently had by the Magistrate to other than judicial action to meet the situation. In 1932, twenty-five per cent. of all complaints were referred to the courts and resulted in conviction whereas in 1933 the number dropped to fourteen per cent. Employers have co-operated in respecting the law and the parent has come to realize that the education of the child is the best contribution that can be made to his welfare and his success in life. Privation, in these days of financial pressure, has complicated the attendance problem but the ready co-operation of the social welfare, relief and health organizations, has greatly assisted the attendance forces and reduced to a minimum the loss for the child.

Rounding Out the System

A system of education should furnish facilities whereby every child in its sphere of operation regardless of physical or geographical limitations may be brought within its compass and share in its privileges. Ontario is well on its way to realize this ideal. The standard system of sectional rural schools will meet the demands of regular settlement but in a province with such extremes of settlement conditions, many homes and groups are so isolated as to defy inclusion within this ordered system. To meet such abnormal conditions, Correspondence Courses and Railway School Cars add to the regular facilities and reach out a helping hand to these sequestered homes. Otherwise, hundreds of children would be left beyond the range of educational opportunity. Much remains to complete the system, but a creditable level of attainment has been reached in caring for the full quota of youth for whose educational welfare the Province may be held to account.

Toronto, May 18th, 1935.

J. B. MACDOUGALL,
Provincial School Attendance Officer.

APPENDIX K

REPORT OF THE INSPECTOR OF PUBLIC LIBRARIES

During 1934 I completed my tour of visits to the active public libraries (and branches) of the province, commenced in the fall of 1932. This involved travelling by motor for 15,800 miles, in addition to various trips by train, principally in North-Western Ontario. As many libraries are situated in rural communities remote from railways, they must be reached by motor, if at all. Many inspections are necessarily made during evening hours. Thirteen libraries only I have not yet visited; three have been organized since I was in their respective districts. Nine others were visited by Miss Spereman, whose visits in 1934 for purposes of inspection, and instruction in classification of stock or installation of records included: Ennotville, Forest, Mount Albert, Millbrook, Petrolia, Pinkerton, Port Elgin, Perth, Richmond Hill, St. Jacob's, Stayner, Stouffville, Tweed, Teeswater, Tilbury, Wyoming.

Of the 508 libraries on the active list, 222 are Free, i.e., tax-supported; 286 are Association, including Lambton County Association. The towns of Bowmanville, Burlington, Cobalt, Cobourg, Copper Cliff, Dunnville, Kirkland Lake, Napanee, Sandwich, all exceeding 3,000 population, still possess only the Association type. In one county only, Lanark, all libraries are free. One county only, Russell, continues without any public library whatever.

Board Meetings and Records

Despite the statutory requirement of monthly meetings for Free public library boards, all too frequently this provision has been ignored. For example, library "A" (Free) serves a population of approximately 800; the Board had not met since 1922. Library "B" serves approximately 550; no minute book was kept at all and meetings were held annually or even less frequently. Cash books must be audited by the Municipal Auditors; this provision is almost universally observed. While many of the smaller libraries are particular to keep neat and accurate records, many others neglect to do so. Many have no form of accession record showing titles and cost of books in stock. In others proper accession records and shelf-lists had been installed years ago by Miss Spereman, but had been allowed to fall into disuse when a new library Board or a new librarian took charge. The most serviceable form of record (which is now being recommended to smaller libraries) combines shelf-list and accession details on regular catalogue cards. This is much less difficult to prepare than a card catalogue, which generally speaking, should not be attempted except by a trained librarian. Many of the smaller libraries lack an accurate inventory of the stock. For this reason alone, the shelf-list record is indispensable. Library "W", serving a community of approximately 7,000 people, had neither accession book, shelf-list nor circulation register available at the time of inspection. Library "T", serving approximately 4,000, had no shelf-list, only an inaccurate record of accession with none of withdrawals, and its stock was sorely in need of discarding and inventory. Circulation registers of uniform design are supplied by the Department without charge to all free public libraries. It is regrettable that some still submit estimated figures among their sworn annual

statistics both for book stock and circulation. One reason is that many have as yet declined to install a proper charging system, using book cards and pockets. A further difficulty is that the classification of books is often decidedly inaccurate, with the great bulk of assorted classed books included in classes 000 or 800. Registration of membership records have frequently been ignored or overlooked entirely. Library "X", serving approximately 5,000, reports over four times more borrowers than the entire population of the community men, women, and children.

Finances

It is unfortunate that many municipalities are either unwilling or unable to comply with the provisions of the statute in furnishing to free library boards appropriations at the rate of 50 cents per capita. This failure may be traced sometimes to the carelessness of the boards in not submitting annual estimates as provided by the Act. In the majority of instances, however, the difficulty is clearly indifference of public opinion. Library "C" serves a community of over 22,000; the Board receives approximately \$6,800. Library "D" serves over 11,000; the library receives approximately \$2,350. Library "E", however, serves approximately 800 and is fortunate in receiving a municipal appropriation of \$600 or 75 cents per capita. Library "F" serves approximately 1,500; it occupies a Carnegie building valued at \$7,500, and receives a municipal appropriation of \$725, of which \$425 is returned to the municipality as rent! Most library Boards are being severely handicapped by lack of funds.

As a consequence, expenditures on salaries and book stocks are low. The American Library Association recommends the following standards in budgeting:

Income \$1.00 per capita

Expenditures—

Books and Periodicals, 25%

Salaries, 50% to 55%.

Maintenance and Miscellaneous, 25% to 20%.

Since the basis of this budget is income of \$1 per capita, it must be altered somewhat to meet the Ontario rate of 50 cents per capita. It is useful, however, in indicating relative values. Library "H", serving approximately 1,400, dispensed with its librarian, who received \$360 a year, and engaged a successor on part-time who is reported to receive less than \$2 per evening that the library is open, one-half of this amount in cash, and one-half to apply on arrears of taxes for property held in the municipality. Library "J" serves approximately 5,000; its chief librarian receives \$480 per year. Library "K" serves approximately 1,400; its municipal appropriation is \$200, of which \$160 is paid to the librarian for rent and services. Less than \$40 is expended on periodicals, and no new books have been placed in stock for circulation since 1925. Library "L" serves over 4,000; its municipal appropriation is \$1,200; librarian's salary \$600; book expenditure approximately \$125. Library "M" serves a population of approximately 4,000; last municipal appropriation, \$350; salary of librarian, \$400; no book expenditure during last year.

Book Selection

Though book selection is perhaps the most important and most difficult of the librarian's duties, it is all too frequently treated with indifference. Library "N" serves approximately 1,800; it has a book stock of approximately 4,600, from which little discarding has been effected over a long period of years. Books

are purchased only once a year by a deputation which spends the day in an adjoining city. Library "O" (Association) serves approximately 300, though there is a summer population of over 2,000; it reports an adult book stock of 1,128, of which 88 only are Non-fiction. Four volumes of Non-fiction were purchased last year, and 35 Fiction. Library "R" (Association) serves approximately 400 and reports a book stock of approximately 2,500 volumes, from which no discarding has been done for years. In the last two years it has bought no new books, and reports waning interest. Like a number of other libraries founded years ago, it contains an excellent selection of such XIX Century standards as Dickens, Thackeray, Huxley, Carlyle, Macaulay. This is evidence of sound taste in selection originally, which obviously does not exist at present.

In many Free and Association libraries there has been of late years an overwhelming demand for Fiction; consequently, classed books have received too little attention from readers and purchasing committees. Libraries administered by experienced librarians, however, report increasing interest, especially in the classes of Sociology, Natural Science, and Useful Arts. A growing public interest in problems of economics and politics, in recent scientific developments, and in the prosecution of hobbies, indicates that these classes should receive more general attention. It is perhaps unfortunate that the term Fiction is so vague, since authorities agree that *good* fiction rates artistically very high, and promotes the acquirement of cultivated tastes. It would appear that some alteration in classification should be effected in order to distinguish first-rate from banal works.

Administration

Library authorities have been slow to realize the importance of organizing an effective Juvenile Department. Library "K", above mentioned, prohibited school students from membership. Only within recent years, in fact, has age limitation of borrowers been generally withdrawn. The result of neglecting children's work is what might have been foreseen: the adult readers of past generations, for whose benefit the library stock was almost entirely selected (as, for example, library "R" above-mentioned) have passed away; the Juvenile readers have meantime grown to maturity, without having become acquainted with the library. Consequently many adults of the present generation feel no interest or enthusiasm for the library, and decline to give it their support. It is urgent that no further time or opportunities be lost in developing a love of books and familiarity with libraries in the youth of to-day. Efforts to stimulate public interest sufficiently to provide effective library service may indeed prove unavailing until the present generation of boys and girls have reached maturity, and will be in a position to exert their influence through the franchise.

A number of libraries, both large and small, have organized a Story Hour for children, usually on Saturday morning. Some libraries have been experimenting in co-operation with the schools by furnishing collections of books selected for the several grades, and loaned for periods of two months or more. Conditions in smaller municipalities would indicate that a greater degree of co-operation between public schools and public libraries will strengthen the work of each and obviate a certain amount of duplication which occurs at present.

The principal difficulty in carrying on effectual public library reference work is inadequacy of staffs rather than lack of books. Much useful work can be done by a capable librarian with a very limited outlay, provided other duties will

permit attention to reference workers. In this regard a well selected periodical collection is of the utmost value. Many libraries, especially those in the larger centres, have commenced files of periodicals and clippings, which are inexpensive and readily kept up-to-date. Selection of periodicals in a number of other libraries is of doubtful merit, as the public may reasonably be expected to procure its Fiction reading from books. Expenditure on such recreational periodicals is frequently ill-proportioned, amounting in some instances to 100 per cent. of the book expenditure. Even where the selection has been carefully made, little use is often made of back numbers of periodical files. The *Canada Year Book*, an invaluable reference work, is supplied free of charge to every public library, although some have never placed it on the shelves.

One hundred and eleven municipalities in the province have been fortunate in securing, free of cost, substantial Carnegie library buildings. It is to be regretted that certain of these have treated lightly the obligation undertaken by their authorities to furnish for annual upkeep 10 per cent. of the original amount bequeathed. Libraries "F" and "G" above-mentioned are by no means isolated examples. Library "S" received one of the last grants made by the Carnegie Corporation, \$7,000. Its municipal appropriation is less than \$500. Library "M", above-mentioned, occupies a Carnegie building valued at approximately \$20,000—the municipal appropriation is \$350. In general, however, buildings have been adequately maintained. Many, especially in the larger centres, are points of outstanding civic interest. Some can be rendered much more convenient for modern conditions by interior alterations, since they were erected at a time when open access to the shelves was not permitted. In consequence, the interior is filled with numerous useless partitions and railings, most of which could be removed without structural damage.

If the quality of work accomplished in many of the medium-sized and smaller libraries leaves considerable to be desired, the principal reason, as indicated above, is the lack of funds. This entails low salary, or salaries, and makes it impossible for the Board to secure a sufficiently competent or numerous staff; it is impossible also to keep the shelves supplied with fresh, up-to-date reading matter. In consequence, public interest declines; thus the difficulty of securing finances is aggravated, and the vicious circle is completed.

Changes in library status during 1934 are indicated herewith:

	Removed from list	Added to list
Free	Ridgeway	Gore Bay
Association	Alma Dunvegan Emsdale Long Branch Gore Bay	Eagle River Hornepayne Ridgeway

The Free Library Commission of Wisconsin has estimated that good modern library service can be accomplished only by libraries with annual incomes of \$4,000 or more, serving communities of 4,000 or more population. Though all authorities will not give assent to this basis of calculation, it calls attention sharply to the folly of diffusion of effort and finances among numerous, autonomous, struggling units. It is not surprising, therefore, that the larger centres of

Ontario are in a position to provide more adequate and more effective service than smaller communities and more sparsely populated areas. For the latter the obvious solution is federation in county or regional organization, as described elsewhere in this report. The Wisconsin figures are based on an income of \$1 per capita. Of 27 Ontario cities, municipal library appropriations exceed the statutory requirement of 50 cents per capita in 6 only; exactly meet it in 3 only; are below it in 18. Despite this handicap, most of these larger libraries are administered by trained, experienced librarians and staffs, and are making distinct contributions to the educational, cultural, and recreational necessities of their communities.

The projected amalgamation of municipalities constituting the Border Cities will doubtless result in the establishment of library branches in certain of their urban areas which now are sorely in need of such service. Hamilton with four outlying branches and Ottawa with three already provide effective city-wide service. The Hamilton library has accomplished notable results, especially in respect to its reference facilities, emphasizing technical, vocational, and commercial departments. In Ottawa, with 44 per cent. of its population French-speaking, unique bilingual facilities are offered. This latter library also publishes at frequent intervals extensive annotated book lists and reading courses, five such special pamphlets having appeared since 1931, in addition to the annual bulletin of accessions in French and in English. Kitchener is another bilingual library which receives too little recognition for its services to German-speaking citizens, and for its generally efficient administration. Particular facilities for non-English-speaking citizens are supplied at Port Arthur and, especially, Fort William, as well as at Sault Ste. Marie, and North Bay. London and Sarnia form nuclei of county library associations in Middlesex and Lambton counties respectively; from these, important developments are to be expected. Kingston, like Toronto, Hamilton, Ottawa, and London, is a university centre, enjoying the advantage of co-operation between the university and the public library. Drama and fine arts have received special attention here.

Many of the larger libraries have accumulated valuable collections of pictures, pamphlets, and lantern slides, supplementing regular book resources. A number engage in such "extension" activities as lecture courses, literary clubs, dramatic associations, and fine- and applied-art exhibits, (including loans from the National Gallery, as well as from horticultural and other "hobby" clubs.) As part of readers' advisory service, reading lists and book lists are prepared for individual and for general use, though seldom published in pamphlet or brochure form.

Public libraries supply book service to schools in various cities, frequently without reimbursement. An important project has been undertaken at Orillia, where library board and school board are co-operating in organizing juvenile work under the direction of a trained librarian loaned from the Toronto public library staff.

Special mention is due the Toronto public library, serving with distinction through its 16 outlying branches the province's largest city. One of its outstanding features is the generous provision for boys' and girls' work. Such a progressive and enlightened policy consistently pursued for over 20 years so establishes the importance and prestige of the library in the minds of adolescents as to ensure beyond peradventure the interest and support of the adult citizens of the future. 41,690 new borrowers were registered during 1933. In addition to the regular circulation, reference, and cataloguing departments, special activities

at the main library include the Hallam Room, featuring technical, dramatic, and secondary school books and service; the music collection, with annual issues of over 21,000 works; the bindery and book repair, handling annually over 45,000 volumes. Occasional special book lists are issued in pamphlet form. This library has also published the volume *Books for Boys and Girls*, with successive supplements. This is a select annotated juvenile book list. It publishes annually *The Canadian Catalogue of Books*. An exhaustive and monumental Bibliography of Canadiana is now in the press. This library's extensive reference collection, numbering approximately 150,000 volumes (including manuscripts), contains various works not to be found elsewhere in Canada, and very rarely in foreign countries.

The table given above outlines the nature and scope of travelling library service during the past year. The number of cases of books circulated has

increased slightly; the recorded circulation substantially. There is difficulty in securing reliable statistics, since evidently books are passed from one reader to another without being recorded in the register. Decline of adult fiction is offset by the increase of non-fiction and the decided increase of juvenile books. More schools, and especially more public libraries, are receiving service, the latter increasing nearly 45 per cent. over the previous year. With the active co-operation of the Chief Inspector of Public Schools, further increases in school service are anticipated. An attempt has been made to furnish to the libraries, works, especially of Juvenile and Non-Fiction, which are too expensive for local purchase, but are nevertheless in demand. During the year, 1,755 volumes were added to the travelling library stock, accessioned, shelf-listed, and prepared for circulation under the supervision of Miss Spereman. The first detailed inventory of stock was also nearly completed. Five hundred and forty-four volumes were discarded, which were assorted with 1,480 volumes received from defunct libraries for distribution as donations, principally to public libraries and construction camps. Donations totalling 812 volumes were made to the following public libraries: Bancroft, Brampton, Craighurst, Dungannon, Eagle River, Elora, Fordwich, Grantou, Hepworth, Hornepayne, Kimberley, Petrolia, St. Jacobs. Fifteen donations to camps, schools, and miscellaneous organizations totalled 1,322 volumes.

The object of travelling libraries is to supplement the available book stock of smaller public libraries, as well as to serve Women's Institutes, Farmers' Clubs, Study Clubs, and Schools in communities, rural or urban, where public library service is not accessible. The entire collection contains approximately 25,000 volumes, representing 10,000 titles. Requests for special titles or for special types of literature will always be filled so far as possible; for example, agriculture, household science, travel, biography, economics, boys' and girls' books. Each case holds from 40 to 50 volumes. Occasionally requests are received for cases entirely of fiction. Such applications cannot be granted, since the libraries are intended for educational purposes.

For practical reasons no catalogue is published. New books are being purchased constantly, worn-out volumes are being withdrawn, and much of the collection is always in circulation throughout the Province. Select lists appear annually in the February *Ontario Library Review*.

The borrowing community is asked to pay carriage charges on arrival; the Department will pay for the return. The regular period for a loan is four months, though cases may be returned at any time.

The Department prefers to lend through an organized association of some kind. The books must be open for service to the entire community, and not only to members of an association, club, or church. Arrangements must be made for a suitable custodian. Entries must be made in the register enclosed in every case of books, according to the instructions, and returned with the case. Accurate records are required; estimates are not acceptable.

Ontario Library Review

The present subscription list includes group subscriptions to all free public libraries, 222; association public libraries, 42; individuals (Ontario), 31; individuals (other provinces), 25; individuals (other countries), 12; press and exchanges, 219.

Through the courteous co-operation of the King's Printer, Ottawa, and the various departments of the Provincial Government of Quebec, copies of all their respective publications are furnished this office for listing in the "Review". Various articles of timely interest are generously contributed by experienced and expert librarians both within and without the Province. The Book Selection Guide is prepared by Miss Spereiman. Circulation is in charge of Mr. Herbert.

Agenda

Since any democracy is governed by public opinion, authorities have pointed out that the wise and provident government is the one which "crystallizes into legislation the settled judgment of a majority of the people." But is that all? It is true that no democratic government can proceed counter to the public will. At the same time it can, and on occasion, should anticipate the development of public opinion. The most important event in the history of this Dominion was brought to pass when the Fathers of Confederation boldly affirmed their belief that public opinion would support their magnificent project.

Granted, then, that government at times should give a lead to public opinion, how long may it continue to advance in the face of public indifference or hostility? Only so long as there is a reasonable prospect that public opinion is open to conviction. Library boards enquire, "Why does the Public Libraries Act prescribe no penalties for municipal authorities which disregard its provisions?" The reply is that it is impossible to legislate a community into self-improvement against its will. No legislature can afford to lose touch with its electorate nor to disregard its wishes. Until public opinion is impressed with the value of the public library for recreational, cultural, and educational purposes in any progressive municipality, efforts of libraries and library boards will be rigidly circumscribed. Therefore, at all costs, the interest of juvenile readers should receive attention. When they arrive at maturity their influence may well prove decisive. The greatest obstacle to library progress in the province at this time would appear to be the apathy of public opinion, resulting directly in insufficient financial provision.

Paradoxically enough, a further obstacle may be described as too intense local patriotism in certain areas. At a time when the pooling of resources and the consolidation of effort seem to be essential to success, or even to survival, in commerce and industry, it is regrettable that some communities continue to cling tenaciously to what they proudly term their independent "tiny" libraries and schools. These institutions might be made infinitely more efficient and serviceable as parts of a broader organization. Can it be true that the descendants of men who effected the Confederation of the provinces have lost the desire or the genius to consolidate their weak and struggling educational institutions? The time has come when it should be impossible to dignify any and every non-descript jumble of volumes strewn about in untidy, neglected surroundings as "our library". Such collections of books as are found at "libraries" C1, D1, and E1, can only by gross exaggeration be termed libraries. Yet two of them continue to receive county grants as such, although none is paid by the Department. Under modern conditions this is a matter not of congratulation, but merely of reproach. Science has already succeeded in overcoming barriers of time and space. But there are also barriers of local prejudice and parochialism.

The temporary gratification of the civic pride of possession is scarcely sufficient warrant for organizing "tiny" local libraries. If they have any resources beyond the enthusiasm of a handful of supporters, these resources are

often quickly dissipated. After the initial expenditure further funds are lacking. The book stock is quickly read out; the community loses any interest it ever had; the library, far from enjoying or meriting prestige, becomes a laughing-stock. The number of such "libraries" sprinkled within its borders is no adequate criterion of the progressiveness of any region's citizenry; they would receive infinitely better book service through the Department's travelling libraries.

The permanent solution of province-wide library service would appear to be organization by counties, or by regions (including two or more counties or districts.) Only the counties of Lambton and Middlesex have as yet taken steps toward such organization. Lambton Association comprises all (19), Middlesex over 50 per cent. (16) of the libraries within the county boundaries. By pooling a portion of their resources, the member-libraries in these associations effect bulk purchases of books, and regular exchanges of collections one with another, a plan which makes available four times the book service possible by individual, outright purchase.

With an aroused public interest and a disposition to consolidate weaker autonomous libraries into stronger, more efficient groups more adequately financed and directed, other administrative plans can be undertaken. The time is at hand for requiring certification of librarians under certain conditions. With an efficient library school graduating annually from 40 to 50 trained librarians, it is difficult to appreciate the wisdom shown by boards, in larger centres at least, in continuing to engage unqualified, untrained persons to administer their library services.

Provision for superannuation is another need. Many, in fact most librarians who have devoted the best years of their life to serving the public, have been unable to provide for their declining years from the savings out of their modest, and frequently meagre salaries. When they have passed the prime of life, what shall they do? Younger, more vigorous persons are waiting to replace them. What shall library boards do, lacking an equitable schedule of superannuation?

Co-operation of public libraries and public schools has been emphasized above. Provision of reading facilities to patients in hospitals is yet another service which the public libraries will undertake when resources permit. The therapeutic advantage of suitable recreational reading during convalescence needs no elaboration here. The solace of reading should be freely available to the sick in any hospital of the Province.

Library boards are well advised in promoting the selection of suitable persons to replace their members who from time to time withdraw from active service. Many boards in the Province owe a debt of gratitude, too often unacknowledged, for the unselfish services of men and women who have devoted years of effort and enthusiasm to promoting the cause of libraries and of reading. Unbroken continuity in such work can be ensured only if younger board members are being constantly recruited to take over and carry on as these others retire. In the library's interests as well as their own, "key" members of any board should decline to continue assuming more than their share of responsibility. Otherwise, their eventual retirement is bound to result in certain confusion of policies and administration. By delegating a large part of their privileges and responsibilities to officers such as the secretary, treasurer, or librarian, a number of boards follow the lines of least resistance, and continue to function without by-laws, without committee, without bothering. While temporarily satisfactory results are at times secured, such arrangements lack the broad basis of permanence.

The appended tables are prepared by Mr. Herbert, who checks annual reports. These statistics relate to the calendar year 1933 on the basis of which grants were paid up to the closing of the fiscal year, October, 1934. Both free and association libraries report substantial reductions of aggregate total expenditure, and of book expenditure, but slight increases of books in stock. This is partially explained by the increased use of travelling libraries by the smaller public libraries. In this way the latter borrow the more expensive and less frequently circulated volumes instead of adding them to permanent stock at considerable outlay. The saving may then be applied to the purchase of more inexpensive works. A further shrinkage in legislative grants is to be noted, since these are based chiefly on book expenditures, which are still falling. Increased grants based on the librarian's qualifications are available for the ensuing year.

Both types of library show decreases in aggregate of circulation. Partial recovery from the most acute stages of the economic depression has doubtless resulted in less leisure time for reading. Again, in many libraries, book stocks are being read out and worn out faster than they are being replenished; hence, there is a certain waning of readers' interest. Aggregate recorded circulation of books in the province, including travelling libraries, indicates: for 1933: 15,488,064; for 1932: 15,675,052.

F. C. JENNINGS,
Inspector of Public Libraries.

Toronto, January 31, 1935.

It is noted that three factors tended to lower the enrolment for the month of September. First, a number of senior students, who had been in the school for twelve years or more, were advised to graduate, owing to the fact that continuance in school after adult manhood or womanhood has been reached tends to develop an institutional attitude of mind, which unfits pupils to hold their own in the struggle of life. Secondly, a survey of the school indicated that there were some fourteen pupils, who, because of cerebral injury, had a mental age considerably below that of a five-year-old child. Pupils of this degree of intelligence have been found unable, when possessed of full hearing equipment, to make progress in ordinary public and separate school grades, and when deaf, are equally incapable of any appreciable progress in the O. S. D. The parents or guardians of these children were requested to withdraw the pupils from the school and effect a more desirable placement.

The Toronto Board of Education established classes for deaf girls in the Central Technical School and for deaf boys in the Junior Vocational School with the result that several pupils, living in Toronto, chose (wisely it is deemed) to complete their education at home. The proposed organization of classes for deaf pupils by the Ottawa and the Hamilton School Boards would seem to be a move in the right direction. In municipalities of 100,000 and over, the educational needs of many deaf children might well be looked after locally, so that these children may receive the benefit of home surroundings and of normal social contacts.

With respect to statistics on the reported causes of deafness, it might be noted that, contrary to common public opinion, heredity is not a large factor in the cause of deafness. The most considerable factor is that listed as congenital when the parents are persons of normal hearing. The presumptive cause, in such cases, is birth injury. Owing to the extension throughout the Province of child clinics and the increasing supervision exercised by health authorities, the number of cases of deafness, caused by common diseases among children, is diminishing from year to year.

Plant

The new dormitory for junior boys and girls was opened in September, 1934. Accommodation has been provided in the new building for some 25 boys and 25 girls between the ages of five and eight years. The large, airy sleeping rooms are equipped with modernistic cots and dresserettes. At each end of the building, extensive play-room accommodation has been provided for the youngsters, the boys at one end and the girls at the other. The boys' and girls' bathrooms are each equipped with five inviting porcelain tubs which the youngsters, after taking their nightly bath, find joy in rubbing sparkingly clean.

The rooms for the supervisors are convenient to the dormitories, and an emergency hospital room has been provided for cases of illness during the night, which do not seem to require hospital service. Altogether, this is a well-designed and well-constructed building. The casual visitor could not but notice with joy the pride and pleasure these happy youngsters take in their new quarters.

During the late summer and autumn months considerable improvements were made about the school property. The buildings were renovated, repainted and redecorated, and unsightly overgrowths were cut down. The campus was cleared up and beautified with flower beds. The electric light system has been overhauled and modernized. Class rooms for the teaching of cleaning and pressing and power operating have been opened up and equipped.

Repairs and Alterations

In the autumn of 1934 considerable repairs and alterations were made throughout the plant and a more efficient system of organization introduced in the maintenance department. All the buildings were thoroughly cleaned, repainted and redecorated; the electric system was overhauled and modernized, while the general appearance of the Institution was much improved through the cleaning-up of the grounds and the planting of flower-beds.

Administration

In August Mr. Fetterly, who for four years had served as Superintendent of the school, was appointed to the position of Public School Inspector in North York. During his term of office, Mr. Fetterly succeeded, by means of talks and lectures, in familiarizing the people of this Province with the O. S. D. and the effective work being accomplished at that institution. As a result of this in-

creased publicity, the school population increased from 305 in June, 1930, to 335 in June, 1934. In conjunction with Miss C. Ford and Miss E. Deannard, he was instrumental in introducing more modern and more effective methods of teaching throughout the school, more particularly in the departments of primary reading and of vocal speech.

Dr. Amoss, Inspector of Auxiliary Classes, was appointed Acting Superintendent to fill the position vacated by Mr. Fetterly.

Health

Excellent provision has been made for the welfare of the children in the O. S. D. by providing large, airy class-rooms, dining halls and common rooms for the day, and dormitories with plenty of air space, floor area, and available rooms for the expansion of sleeping accommodations in case of epidemic.

The hospital of some thirty beds, in charge of a trained nurse, is well equipped and every provision is made for the prompt isolation of the sick. With early isolation, there is not only less danger of infection, but also less danger of serious complications, such as pneumonia, secondary infection of ears, etc.

The children are vaccinated against smallpox and receive diphtheria and scarlet fever immunization.

The milk is from the school herd, which has been treated by the Government and is free from tuberculosis and Bang's disease.

The food is the best procurable and receives much attention in its preparation; supplementary feedings of milk and cream are given to the undernourished.

Because of the early recognition of disabilities of the children by the staff, little time is lost in admittance to hospital and treatment is at once commenced.

Reorganization

The program of study in the Ontario School for the Deaf has been subject to a certain degree of reorganization in an attempt to give the boys and girls of that institution a better preparation for life through the introduction or the extension of courses in vocational and technical training. While recognizing the excellent character of the work which has heretofore been accomplished by the School, the Minister is of the opinion that a young man or woman who has received special and adequate training in a trade or calling suited to his or her particular ability is in a better position to face the battle of life than one who has been in receipt of education along general lines only.

To this end the School has been divided into Junior, Intermediate, and Senior sections.

In the Junior School, boys and girls between the approximate ages of five and eleven are grouped in regular grades, each in charge of a class teacher. Instruction is given in language, lip-reading, and oral speech, as well as in the fundamentals of reading, writing, spelling, composition, arithmetic, and other foundational subjects. It is highly desirable that all pupils should enter the School between the ages of five and six in order that facility in language, lip-reading, and speech may be gained during the plastic learning stage. Nevertheless, for pupils who have been unable to enter until a later age, special primary groups have been arranged.

Pupils between the approximate ages of eleven and fourteen are placed in the Intermediate School. It is to be noted that a child's vocational training is not being held up on account of academic limitations, nor is his academic advancement being denied because of difficulties in the matter of oral speech and of lip-reading.

Instead of being divided into grades with each class under a class teacher, the Intermediate School is arranged into eight rotating groups which move from room to room or from room to shop. Academic work is in charge of five special teachers, who conduct departments in arithmetic, reading and literature, English and composition, geography and nature study, history and civics. This arrangement permits: (1) a selection of teachers particularly gifted or accomplished in the art of presenting certain topics to non-hearing children and in the further development of such special teaching proficiency; (2) the adequate equipment of each departmental room with special materials and devices suited to the teaching of the subject in hand; (3) a contact between special teacher and pupil continued over a period of several years which allows the individual needs of each student to be more carefully studied and to receive more considered attention; (4) the more rapid advancement of pupils along lines of proficiency. For example, a boy who displays special ability in arithmetic and geography may at any time be promoted to more advanced groups in these departments without having progress in these subjects delayed on account of weakness in language. These rotating groups are likewise taught art, manual training, household science, speech and rhythm in special rooms in charge of special teachers.

In the Intermediate School, courses in vocational guidance and vocational training are begun. Once or twice a week each rotating group visits the vocational guidance instructor and studies with him the various lines of employment which may be profitably pursued by non-hearing people. The nature of various occupations, opportunities of employment afforded by each, remunerations paid, possibilities of promotion offered, qualifications required of employees, etc. are discussed in detail. The boys of the Intermediate School are divided into six and the girls into six rotating vocational groups. Once each day over a period of six weeks the boys go to one or other of the vocational instructors in carpenter work, printing, shoemaking and shoe repairing, farming in its sub-branches (market gardening, poultry raising and fruit growing), tailoring, cleaning and pressing, commercial art; and the girls to one or other vocational instructors in dressmaking, millinery, beauty parlour work, laundry, cooking, and commercial art. At the end of each six weeks' period the rotating vocational groups change instructors, completing the full round in the year.

While considerable vocational training will be afforded by this arrangement, the major purpose in view is to give pupils try-out contacts with various forms of employment so that each may discover, through actual experience, the trade or calling for which he is best suited and may display to the instructors in charge his particular aptitudes. At the end of each six weeks' period, the instructors will report on the proficiency shown by their charges and, toward the close of the year, each student will be called into consultation with the vocational and vocational guidance instructors together with the superintendent for the purpose of helping him or her to select wisely a line of employment for specialized training. Communication will be made with parents concerning the results of these consultations and, where a satisfactory agreement has been reached, pupils may be permitted to specialize toward the close of their Intermediate School period.

The Senior School, comprising pupils fifteen years of age and upward, has likewise been divided into eight rotating groups. Four of these groups during the morning and four during the afternoon session visit each day special academic rooms in charge of specialized instructors, who conduct classes in the social sciences of geography, history, and civics; arithmetic and grammar; reading and literature, English and composition. During one or two periods a week each group receives instructions in art, rhythm, and business procedure.

Intensive and specialized vocational instruction is given in the Senior School. After the experimental try-out courses in the Intermediate School, and as a result of frequent conferences with instructors and superintendent, pupils are here required to decide finally upon the trade or calling in which they are to receive specialized training. Courses in carpenter work, shoemaking and shoe repairing, printing, baking, tailoring, cleaning and pressing, business, commercial art, farming with its various branches, market gardening, fruit growing, poultry raising, and general agriculture have been provided for boys. Courses in dressmaking, fancy sewing, power machine operating, beauty parlour work, laundry work, cooking, general housework, business and commercial art have been provided for girls. The four groups which spend their mornings in the academic rooms spend their afternoons in shop practice; the four afternoon academic groups attend various shops during the morning periods. By this arrangement all the senior pupils are provided with an adequate vocational training independent of their academic progress. Careful attention is also given in the Senior School to the correlation of academic studies with shop practice.

While full advantage is being taken of the various activities connected with the School to secure practice in regular trade operations, courses of study have been so systematized that pupils do not carry on these practices at random, but proceed from skill to skill according to recognized educational procedure.

Note is made of the fact that a number of new vocational departments have been recently added. Inquiry has shown that non-hearing people can pursue with profit such agricultural activities as market gardening, poultry raising, and fruit growing, as well as general farming. These occupations can be carried on in the vicinity of towns and cities and at a comparatively small initial expense and, even in times of depression, afford a livelihood without danger of lay-off. Courses of instruction in these departments are now being given to a large and enthusiastic group of students by an agricultural specialist, and full advantage is being taken of the farm connected with the School in matters of training and practice.

Baking is a second new vocational venture for boys which promises well in the matter of industrial placement. The student group in this department receive regular class room instruction in procedures connected with the making of bread, cake, pie, and candy; and then go to the bakery to put their class learning into practice. Already the pupils have enjoyed bread and various deserts made by the boys.

Classes have been organized and rooms equipped in power machine operating, manicure and beauty parlour work for girls; and in barbering, tailoring, cleaning and pressing for boys.

The main plan of reorganization is thus seen to be not the creation of an expensively equipped technical department but rather a full utilization of all the extensive activities about the school plant, to the end that pupils may be provided with real practice in actual industrial operations to supplement their lecture room and library studies.

Appreciation is expressed of the splendid co-operation extended by the entire teaching staff and by the employees about the plant in this attempt to provide the boys and girls of the School with adequate vocational instruction combined with an apprenticeship type of practice.

H. E. AMOSS,

Acting Superintendent.

Toronto, February 2nd, 1935.

APPENDIX M

REPORT OF THE SUPERINTENDENT OF THE ONTARIO
SCHOOL FOR THE BLIND

Attendance

At the opening of the session in September, 1933, 110 pupils were enrolled and during the term five pupils were admitted, bringing the total up to 115—fifty-seven boys and fifty-eight girls. The school opened in September, 1934, with 111 in residence. Of this number fifty-eight were boys and fifty-three were girls. One of these boys was sent home shortly after he was admitted as he was unsuitable. The total registration from October 31st, 1933, to October 31st, 1934, was 132, one less than for the preceding year. The average attendance for the year was 113. Of the 111 pupils enrolled in September, 1934, 79 were from Ontario, 9 from Manitoba, 12 from Alberta and 11 from Saskatchewan.

Nineteen former pupils did not return in September, 1934, for the following reasons: six had completed their courses; four had too much sight; three had entered High Schools; three were in poor health; one had moved to another Province; one was sent home as unsuitable; one failed to give any reason.

Changes in Staff

It is fitting that in this report reference be made to the great loss sustained by the school and all associated with it shortly after the opening in the autumn of 1933. Dr. Race, the Superintendent, in company with Mrs. Race, after spending a holiday in England, returned to Brantford to resume his duties in September. He was found to be seriously ill and it was only a short time until he was compelled to relinquish his duties. In spite of medical attention and the best of care, he grew worse and passed away on November 9th, 1933. For sixteen years Dr. Race had been Superintendent of the school. During that period those who came in contact with him spoke highly of his organization, unflinching kindness, and sympathy. He could always rely upon the co-operation of his staff, while in him the pupils found a friend ready to help them in their activities.

Owing to their approaching marriages, the resignations of Miss Jean McClure, literary teacher, and Miss Grace Turnbull, school nurse, were received during the Summer vacation. Both had rendered efficient service during the period of their connection with the school.

On September 1st, 1934, Mr. W. B. Donkin, for twenty-eight years instructor of Manual Training, was superannuated. During this period he gave most efficient and faithful service, at all times maintaining a deep interest in the work of the boys. Pending a permanent appointment, Mr. R. Trouton, Boys' Supervisor, is in charge of the work in Manual Training.

Health of the Pupils

Dr. Marquis reports that the health of the pupils as a whole was fairly good for the past year. There were two mild cases of scarlet fever, but these two boys were immediately removed to the Isolation Ward of the General Hospital. There were seven cases of infected fingers, toes, etc., one sinus case

with eye complication, two cases of discharging ears, seventy-seven cases of influenza, besides minor ailments. There were two accident cases, a sprained ankle, and a fractured arm. In an effort to reduce the comparatively large number of cases of influenza, colds, etc., Dr. Marquis has prescribed cod liver oil for all pupils underweight. This is having very satisfactory results.

Oculist's Report

CONDITION OF SIGHT:	Male	Female	Total
1. Limited Objective Vision in Both Eyes	6	3	9
2. Limited Objective Vision in One Eye.....	1	0	1
3. Quantitative Light Perception in Both Eyes.....	1	0	1
4. Perception of Light in One Eye Only.....	2	1	3
5. Without Light Perception in Either Eye.....	2	0	2
	12	4	16

One or two pupils in the above group were found to have better than the average vision of pupils in this school and they could probably be educated visually if their homes were convenient to a sight-saving class.

DISEASES CAUSING BLINDNESS:	Male	Female	Total
1. Ophthalmia Neonatorum.....	0	0	0
2. Trauma, Sympathetic Ophthalmia, and Uveitis.....	2	1	3
3. Congenital Cataract.....	1	0	1
4. Retino-Choroiditis.....	2	2	4
5. Myopia	2	0	2
6. Optic Atrophy.....	3	0	3
7. Buphthalmus and Glaucoma.....	1	1	2
8. Congenital Lesions, Aniridia, Dislocation of Lens, etc....	1	0	1
	12	4	16

There are fewer cases of blindness due to preventable causes than in previous years. There are only two cases of injury, and one case of sympathetic ophthalmia. Most of the cases are congenital in origin.

On checking over a number of pupils examined in previous years it was found that the ocular condition of some had improved considerably.

SCHOOL EXAMINATIONS

Literary Work

W. J. Morrison, B.A., B.Paed., Inspector of Public Schools, inspected the school during the last week of May, 1934. In his report he made reference to a paper read by Mr. George F. Meyer of Minneapolis before the International Council for Exceptional Children during the recent conference in Toronto, in which he enumerated certain principles that should govern the teaching of the blind. Mr. Morrison very happily remarked that most of these principles already are part of the course of training in the Ontario School for the Blind.

In his reference to the staff he remarked, "My observation of the work of all the teachers, from Form I Junior, to the High School Class, in various tests in many subjects leads me to report that the children are well prepared in the subjects of the various forms, and that a large percentage of each form is ready for promotion".

He also recommends that the New Ontario Primer be printed in Braille for the use of Form I Junior.

Of the fourteen pupils who wrote on the Entrance examination in June, 1934, only one failed, and of the successful candidates eight obtained Honour standing.

Music

Dr. Albert Ham conducted the practical and theoretical examinations in music on May 30th, 31st, and June 1st.

"Theoretical tests included Rudiments, Harmony, Counterpoint, and History of Music. The Practical Tests embraced Piano-playing, Violin, Organ, Singing, Voice-production, and Part-singing.

"The piano class has made marked progress during the past year; the violin class did much better work than in the two previous years. The organ class is doing very good work. The vocal class showed much promise, all reaching the honour standard."

There were no failures in the music examinations.

Since his last inspection of the music classes, Dr. Ham has moved to England. We regret the necessary severance of his connection with the school.

Dramatic Work

During the school year a number of concerts were presented in the Auditorium. As has been the custom for the two previous years, another operetta, "The King of Sherwood", was presented. Three performances were given to large and appreciative audiences who quite enjoyed seeing Robin Hood and his merry men disport themselves in the aisles of the forest. The operetta was prepared under the direction of Mr. F. Lord, Musical Director, assisted by practically the whole teaching staff, and provided an interesting finale to a successful year's work.

Field Day

In addition to well-organized physical training classes in the gymnasium, much interest is shown in our Annual Field Day. Pupils work steadily all year to obtain distinction in its various events. The activities are practically the same as in one held by seeing pupils. Among the outstanding achievements of this year's meet might be mentioned the following: rope climb of 16 feet by a senior boy, 2 3/5 seconds; shot put, weight 8 pounds, 31 feet, 4 inches; standing broad jump, 9 feet, 6 inches; 75 yard dash, time 8 3/5 seconds, the last three by another senior boy. One of our senior girls made in three consecutive jumps, in one effort, a total of 21 feet, 3 1/2 inches.

Prizes and Trophies

Miss Ella Koch, who left the school in June, 1932, on our recommendation was given the St. Dunstan's Chapter I.O.D.E. of Toronto scholarship of a year's tuition at the Toronto Conservatory of Music. As mentioned in last year's report, this was extended to a second year owing to Miss Koch's outstanding ability. It is a pleasure to report that the scholarship has been renewed for a third year.

The Louis Braille Proficiency Trophy for Girls was awarded this year to Miss Agnes Horne of Edmonton, and the Irene Wettlaufer Trophy for Boys was awarded to Rae Beacock of Warton, Ontario. The above cups, together with the prizes won in the Field Day events, were presented to their winners by Inspector Morrison on the night of the operetta in June.

The Library and Equipment

An effort was made during the past year to improve the Braille Library, to add to the equipment in the pupils' sitting rooms, and to complete the sets of individual Braille maps begun by Dr. Race the previous year. The Department of Education gave a grant of One Hundred and Fifty Dollars, which enabled the Bursar to purchase the maps and enough books to make a substantial addition to the Library. Also, the Department purchased two radios for use in the Senior Boys' and Girls' sitting rooms. These have given inestimable pleasure to the pupils. Considerable furniture for the sitting rooms was bought with the money earned by the pupils at their concerts and operettas. In this way they are getting the benefit of their own efforts and will necessarily have more pride in their equipment than if it were supplied in the usual way.

Alumni Meeting

The customary biennial meeting of the Alumni Association was held in June, 1934. About 160 former pupils were present under the presidency of Miss Ethel Squair of Toronto. For three care-free days these former boys and girls wandered about at will, reliving the days of long ago. The sessions held in the Auditorium were very interesting, the programmes being quite varied, and above all, the community singing was most enjoyable. The evening dances in the gymnasium were well attended. All went home in good spirits and, as we wished them *au revoir*, had a common hope that we all might be spared to meet again in 1936.

WILLIAM H. LITTLE,

Acting Principal.

Brantford. Ontario, November 1st, 1934.

²Covering the school year 1933-34 except for financial items, which cover the calendar year 1933.

**Approximate. Six-sevenths of legislative grants is estimated as apportioned to day schools, and part-time and special pupils are treated on the same basis as full-time for average attendance.

Previous to 1932 the attendance percentage was based on the possible aggregate. Commencing with 1930, the form classification is based on the enrolment on the last school day in May.
 Duplications of enrolment in elementary schools owing to removals from one elementary school to another during the year, or owing to transfer to secondary schools, are carefully avoided in this calculation.

The percentage of average attendance to total enrolment, viz., 76.85, is low owing to the fact that a pupil once entered on the roll, if only for a few days, is counted in the enrolment for the year. The percentage of actual to perfect aggregate attendance (91.17) as given above, represents correctly the situation as regards regularity of attendance in the elementary schools.

2. Percentage Analysis of the School Enrolment

FORM	IDEAL PERCENTAGES	ACTUAL PERCENTAGES											
		Public Schools				Separate Schools				All Elementary Schools			
		Rural		Urban		Rural		Urban		Rural		Urban	
		For Four Previous Years	For 1934	For Four Previous Years	For 1934	For Four Previous Years	For 1934	For Four Previous Years	For 1934	For Four Previous Years	For 1934	For Four Previous Years	For 1934
Primer.....	18	19.67	19.49	16.58	15.11	29.52	28.51	22.20	19.39	20.70	20.43	17.82	16.07

III. PROTESTANT SEPARATE SCHOOLS

The following is a complete list of the Protestant Separate Schools of the Province:—No. 1 Grattan, No. 2 Hagarty, L'Original, and Penetanguishene (two schools).

They were attended by 293 pupils in 1933. The whole amount expended for their maintenance and permanent improvements was \$12,367.10. There were nine teachers, of whom seven held Second Class certificates and two held First Class.

IV. COLLEGIATE INSTITUTES AND HIGH SCHOOLS

Total.....	10,180,861	20,915,594	28,196,161	30,134,183	27,553,890

Population is 1931 Dominion census figure. High Schools include Collegiate Institutes.

†Taxes collected for School Boards. *Less Legislative grants.

All Elementary School figures, also Secondary School financial figures cover the calendar year specified. Other Secondary School figures cover the school year ended 6 months after the calendar year specified.

†Commencing with 1932 the enrolment figures are for the last school day in May. Previous to this the figures cover the entire year.

‡Exclusive of 234 Vocational Day Teachers (134 male and 100 female) who also taught in High Schools and 408 Evening Vocational Teachers who also taught in Day Vocational Schools.

Percentage of successful candidates who entered Secondary School, 79.56.

SUMMARY

Enrolment Senior Fourth Grade on the last school day in May, 1934.....	59,260
Number of High School Entrance Candidates:	
Recommended by Principal on Group II.....	24,841
Number taking written test on Group II.....	28,209
	53,050
High School Entrance candidate percentage of 1934 Senior Fourth Enrolment.....	89.52%
Number of candidates successful on written test on Group II:	
By Regulation II—(1) and (2).....	17,279
(3) and (4).....	1,419
(5).....	351
(6).....	207
	19,256
Total number of successful candidates.....	*44,097
Percentage of all candidates who were successful.....	83.12%
(46.82% by Principals' recommendation and 36.29% by passing written test).

German.....	1,753	Music.....	454		
Spanish.....	78	Bookkeeping and Penmanship.....	107		
Manual Training.....	2,293	Stenography and Typing.....	110		
Household Science.....	2,192				
Music.....	1,149				
Office Practice.....	1,002				
Typewriting.....	1,791				
Shorthand.....	1,442				
Canadian History and Civics.....	763				
Penmanship and Spelling.....	4,550				
Bookkeeping.....	543				

TABLE 27 (c)—STUDENTS CLASSIFIED BY OCCUPATION OF FAMILY HEAD

Occupation	Number of Students	Percentage
Commerce.....	13,557	24.39
Trades.....	12,774	22.98
Agriculture.....	8,125	14.62
Unspecified Occupations.....	7,052	12.69
Labouring Occupations.....	6,740	12.12
Without Occupation.....	4,136	7.44
Law, Medicine, Dentistry and Church.....	2,407	4.33
Teaching.....	796	1.43

TABLE 27 (d)—ADMISSIONS, TRANSFERS, RETIREMENTS DURING THE YEAR

Beginners Admitted—from Elementary Schools.....	15,099
" Private Schools.....	272
" Other Sources.....	346
	15,717
Transfers—to some other school outside the municipality.....	1,220
Permanent Retirements (exclusive of Middle and Upper School Graduates)—	
while in First Year.....	1,558
Second Year.....	1,405
Third Year.....	1,195
Fourth Year.....	806
Fifth Year and beyond.....	707
	5,671

THE VOCATIONAL SCHOOLS

TABLE 39(a)—NIGHT SCHOOLS—Classification of Pupils by Subjects of Study

I. ARCHITECTURE, MACHINE DRAWING AND DESIGN:		Machine Shop Practice.....	495
Mechanical Drawing.....	359	Acetylene Welding.....	377
Architectural Drawing.....	435	Auto Mechanics.....	928
Structural Steel Design.....	18	Pattern Making.....	9
Sheet Metal Drawing.....	82	Watchmaking.....	33
Electrical Drawing.....	39	Electric Wiring.....	237
Machine Drawing and Design.....	157	VIII. DOMESTIC SCIENCE:	
II. ART AND DESIGN:		Cooking.....	2,895
Lettering and Showcards.....	486	Home Economics.....	73
Elementary Art.....	127	Home Nursing.....	289
Colour Study.....	516	Hygiene and Dietetics.....	238
Illustrating.....	184	IX. DOMESTIC ART:	
Industrial Design.....	116	Sewing and Dressmaking.....	3,410
Modelling.....	132	Embroidery and Lacemaking..	401
Drawing from Still Life.....	203	Millinery.....	524
Drawing from Life.....	256	Power Machine Operating.....	19
Drawing from the Antique....	135	Appreciation of Dress.....	90
Costume Drawing and Design..	131	Textiles.....	65
Pottery.....	31	X. COMMERCIAL WORK:	
Woodcarving.....	43	Penmanship.....	914
Interior Decorating.....	397	Typewriting.....	4,035
Batik.....	13	Stenography.....	3,898
Painting and Decorating.....	59	Bookkeeping.....	1,789
Anatomy.....	36	Commercial Law.....	203
Perspective.....	117	Commercial Arithmetic.....	38
Period Furniture.....	86	Business Correspondence.....	883
History of Art.....	147	Office Routine.....	795
Rugs.....	86	Business Machines.....	645
Art Metal Work.....	19	Economics.....	79
III. PHYSICS AND ELECTRICITY:		Salesmanship.....	208
Electricity.....	585	Advertising.....	196
Applied Mechanics.....	29	Rapid Calculation.....	143
Radio.....	306	Filing.....	99
IV. CHEMISTRY AND GEOLOGY:		Insurance.....	254
Chemistry I.....	210	Spelling.....	15
Chemistry for Nurses.....	65	Commercial French.....	64
Industrial Chemistry.....	123	Business Forms.....	363
V. MATHEMATICS:		XI. PRINTING AND BOOKBINDING:	
Shop Mathematics.....	395	Printing.....	123
Arithmetic.....	871	Bookbinding.....	24
Algebra.....	538	XII. ENGLISH:	
Geometry.....	308	Composition and Spelling....	1,114
Trigonometry.....	182	Elementary English.....	388
Surveying and Mapping.....	12	Public Speaking.....	86
Mensuration.....	30	Lip Reading.....	30
VI. ENGINEERING:		English for Non-English Speak- ing Persons.....	116
Aircraft Mechanics.....	126	Journalism.....	15
Steam Engineering.....	209	Dramatic Art.....	57
Power Plant Operation.....	211	XIII. FOREIGN LANGUAGES:	
Navigation.....	13	French.....	318
VII. SHOP WORK:		Spanish.....	70
General Woodworking.....	372	XIV. MISCELLANEOUS:	
Carpentry and Building Con- struction.....	107	Music (Orchestra).....	69
Joinery and Cabinet Making..	107	Swimming.....	438
Plumbing and Steamfitting....	57	Gymnasium.....	1,149

UNIVERSITY OF TORONTO

REPORT

OF THE

BOARD OF GOVERNORS

FOR THE YEAR ENDED 30TH JUNE, 1934

To His Honour the Lieutenant-Governor-in-Council:

The Governors of the University of Toronto have the honour to present their twenty-eighth annual report, including therein the President's review of the academic work of the University and its Colleges for the Session 1933-34 and the reports of various officers and departments. There are appended also statements of the funds and assets, including investments, as they stood on 30th June, 1934, together with detailed statements of the receipts and expenditures of the Board for the fiscal year which closed on that date, and the certificate of audit of the same by Mr. G. T. Clarkson of the firm of Messrs. Clarkson, Gordon, Dilworth, Guilfoyle and Nash.

The auditor's report shows that all the transactions of the year upon Revenue and Capital Accounts have been audited and found correct; that the securities representing the investments, which are held for safekeeping by the Canadian Bank of Commerce, were produced for his examination twice during the year and were found to agree with the records kept by the Bursar; and that this officer's records are well kept and all endowment and trust funds properly accounted for. The auditor also states that the market value of the investments as at 30th June was in excess of their book value by approximately \$604,684.

Rapid progress was made during the year upon the construction of the David Dunlap Observatory which is now practically finished except for the completion of the telescope and some furnishings, there having been expended on this from funds supplied by Mrs. Dunlap some \$31,894. It is hoped to have the formal opening of this building early next Spring. The other construction works referred to in last year's report, the new Botanical Building and the addition of the North Wing to the Hygiene Building, were completed by further expenditures of \$7,234 and \$3,638 respectively. During the year, also, the Governors availed themselves of an opportunity which presented itself of purchasing at an exceptionally low price, \$25,000, the property known as No. 75 St. George Street, which, situated as it is in the middle of other properties owned by the Board, will be of value for residence or other University purposes. The purchase was financed from the residue of the fund at the Board's disposal for such acquisitions, \$7,737, and from the Whitney bequest, \$17,213.

The general revenue for the year amounted to \$1,520,642. In addition there was credited to revenue the Legislative Grant of \$1,000,000 and a supplementary Special Grant of \$150,000, making a gross total of \$2,670,642. The deduction from this sum of \$60,188 for interest written to certain scholarship and trust funds left available for expenditure a net figure of \$2,610,454.

The expenditure therefrom under the appropriations made by the Board for salaries and maintenance (exclusive of the Ontario College of Education which is maintained by a separate vote) totalled \$2,507,724. In addition there was absorbed the deficit on the previous year's operations, \$37,969, making in the aggregate \$2,545,693. The resulting credit balance of \$64,761 has been carried forward to be applied towards the expenditures of the year 1934-35.

All of which is respectfully submitted.

D. BRUCE MACDONALD,
Chairman.

Toronto, 15th December, 1934.

UNIVERSITY OF TORONTO

SUPERINTENDENT'S OFFICE

SUPERINTENDENT'S REPORT

1933 - 34

No new construction of a major nature was started during the year, but the work on two buildings was completed, and on two others well advanced. With the let up on construction, the office has been able to give more necessary attention to maintenance and operation.

BUILDINGS (CONSTRUCTION)

The Botany Building was completed during the year and the account closed. The North Addition to the Hygiene Building was completed during the year. Both buildings were completed within the money provided. The Royal Ontario Museum was opened officially on October 6th, 1933. With the exception of a few small items and some furnishings, the building was completed at the end of the year. The cost will be well within the money provided. The completion of the work at the Dunlap Observatory, the gift of Mrs. D. A. Dunlap, is held up pending the delivery of the large mirror. The Administration Building is practically complete except for some furnishings. A house has been provided for the Director, a deep well and water supply has been installed, and a temporary road laid and the Dome has been built and the large telescope, minus the mirror, erected. Such items as a permanent road, fencing, and development of the property have not yet been undertaken.

During the year, the expenditure on new buildings through the office, including the Royal Ontario Museum, amounted to approximately \$121,209.75.

BUILDINGS (MAINTENANCE)

During the year, approximately \$69,000.00 was expended on Repairs and Renewals of the University buildings and Museum. This amount is considerably less than one-half of one percent of replacement valuation. This expenditure is used largely in maintaining the fabric and mechanical services in the buildings. With the appropriation available, it is impossible to keep pace with the demands for interior decorating and improved lighting.

During the year, the regular yearly practice of testing all fire hose has been followed, and the necessary replacements made. The chemical extinguishers have all been discharged and refilled. The Toronto Fire Department has made an inspection of all our buildings in Toronto.

In addition to the 57 buildings directly supervised by my office, heat and light are supplied to Knox College, Victoria College, Emmanuel College and Wycliffe College, and some power to Trinity College.

The expenditure for fuel and electricity for University buildings and the Museum, and the services to the Colleges mentioned above was approximately \$138,000.00. The consumption of electricity continues to increase. This is checked as much as possible, even to the extent of lagging behind accepted practice. Due to the wider use of electricity in its application to teaching and research, and the demand for higher lighting intensity this increase is inevitable.

EMPLOYEES AND WORKSHOPS

The average number of employees working for the office, exclusive of contracts, was 275, tradesmen accounting for 83 of this number. The merchandise distributed amounted to approximately \$80,500.00. The wage item for sundry labour was approximately \$265,000.00, while salaries of semi-permanent staff amounted to \$33,900.00, making a total of approximately \$305,000.00. These figures include services rendered to Connaught Laboratories, Hart House, Athletic Association, etc., the Museum and the Colleges.

PURCHASING

During the year, 3,519 departmental orders and 7,007 Superintendent's Stores and work orders (a total of 15,526) were sent out and in consequence 20,607 accounts were passed for payment. These purchases involved the passing of 1,247 customs entries handled within the office. In addition, accounts totalling 4,259, for work done, were sent out for payment. Every legitimate effort is made to obtain the full benefit to which the University is entitled under the Customs tariff. Every effort is also made to obtain all possible discounts by the prompt payment of accounts. The actual saving in dollars and cents may be comparatively small, but the practice of prompt payment has an invaluable effect in obtaining closer prices and in maintaining the good-will of the sales people who constitute a large body of the public supporting the University.

POST OFFICE

Last year, stamps to the value of \$21,283.46 were sold in the branch Post Office in the University. The revenue to the University from this source was \$1,002.06.

POLICE AND WATCHMEN

The Police Force, though small, has been successful in handling the problems created by the public. Its relationship with the student body is cordial and at the same time effective. The University has enjoyed the fullest co-operation from the City Police, and I wish to record our appreciation.

Every effort is made to maintain the watchmen service at a high standard, and daily reports are carefully checked.

CENTRAL PLANT

The amount of radiation heated from the Central Plant, exclusive of high pressure services, was 343,341 square feet, as against 337,734 for the previous year. The total cost of operation was \$133,867.22 as against \$123,446.31 for the year before. The total unit cost for heat and light was 38.9 cents per square foot of radiation, as against 36.5 cents the previous year. The amount of 38.9 cents was made up of 23.4 cents for heat, and 15.5 cents for light. The amount of 36.5 cents for the previous year was made up of 21.7 cents for heat and 14.8 cents for light. The average temperature, October to May inclusive, was .7 degrees below the average, against 4.5 above the average for the same period in the previous year. The increased cost is due almost entirely to this lower temperature.

Comparative tables showing the operation of the Central Plant and the distribution of charges for 1932-33 and 1933-34 are attached.

November 1st, 1934.

A. R. LEPAN.
Superintendent.

AUDITOR'S CERTIFICATE

Toronto, 20 November, 1934.

To the Governors of the University of Toronto:

GENTLEMEN:

I have verified the attached Balance Sheet of the University dated 30th June, 1934, and Schedules 1 to 10, and report that all the transactions of the year upon Revenue and Capital Accounts have been duly audited and found correct.

The securities representing your investments are held for safekeeping by your bankers, the Canadian Bank of Commerce, and were produced for my examination on 3rd July, 1934, and also at another time during the year and found to be in agreement with the records kept by the Bursar. Your securities consist largely of bonds issued or guaranteed by the Dominion of Canada and by the Province of Ontario and bonds of other Ontario Municipalities with certain corporation and other securities received as bequests. Their market value as at 30th June, 1934, was greater than their book value by approximately \$604,684. During the past year no interest was received on the following bonds which defaulted in the previous fiscal year and were reported to you at that time:

	Par Value	Book Value	Total Interest in Default
Town of Mimico 5½%, 1942-1945.....	\$21,000.00	\$21,919.25	\$2,310.00
Essex Border Utilities 5½%, 1945-1947.....	19,047.60	19,802.72	2,095.24

I also report that no income was received from certain non-trustee securities which came to you during the year from the Wallberg and Whitney bequests.

The Bursar's records are well kept and all Endowment and Trust Funds properly accounted for.

Yours faithfully,

E. C. CLARKSON,
Auditor.

V. FACULTY OF ARTS

21. SALARIES

(1) Departments in University of Toronto (\$508,602.69)

Dean's Office

A. T. De Lury, Dean (paid also \$5,365 as Professor of Mathematics)	
\$1,500 — \$158.75 (Retired 30th June).....	\$1,341 25

\$1,341 25

Mathematics

Professors:	
A. T. De Lury (see also above) \$6,000 — \$635.00.....	\$5,365 00
M. A. Mackenzie, \$5,500 — \$439.58.....	5,060 42
S. Beatty (paid also \$420 for Extension Work) \$4,900 — \$375.00.....	4,525 00
J. Chapelon @ \$4,700 (on leave of absence without salary).....
Associate Professors:	
I. R. Pounder, \$4,200 — \$302.08.....	3,897 92
W. J. Webber, \$3,800 — \$263.33.....	3,536 67
N. E. Sheppard, \$3,600 — \$245.42.....	3,354 58

Assistant Professors:

D. A. F. Robinson, \$3,150 — \$205.11.....	2,944 89
J. D. Burk, \$2,450 — \$144.68.....	2,305 32

Lecturers (Sessional):

G. de B. Robinson, \$2,000 — \$106.25.....	1,893 75
Miss M. E. G. Waddell (paid also \$624 for Extension Work) \$1,800 — \$92.50	1,707 50
Miss C. Kreiger (paid also \$300 for extension work) \$1,800 — \$92.50	1,707 50

Fellows (Sessional):

H. W. Alexander.....	700 00
R. T. Burgess.....	700 00
H. Dowker.....	700 00
A. B. McCombs.....	700 00
J. K. MacKay.....	700 00
C. E. Miller.....	700 00
D. C. Murdock.....	700 00
E. A. Schmidt.....	700 00

 \$41,898 55
Applied Mathematics

J. L. Synge, Professor, \$6,000 — \$493.75.....	\$5,506 25
A. F. C. Stevenson, Associate Professor, \$3,300 — \$218.54.....	3,081 46
B. A. Griffith, Lecturer (Sessional) \$1,800 — \$92.50.....	1,707 50
A. E. Honeywell, Jr., Fellow (Sessional).....	700 00

 \$10,995 21
Physics

Professors:

E. F. Burton, also Director of Physical Laboratory, \$5,500 — \$439.58..	\$5,060 42
J. Satterly, \$5,000 — \$385.40.....	4,614 60
L. Gilchrist (with living quarters valued @ \$225) \$4,200 — \$302.08..	3,897 92
H. A. McTaggart, Associate Professor, \$4,200 — \$302.08.....	3,897 92

Assistant Professors:

D. S. Ainslie (paid also \$475 for Extension Work) \$2,950 — \$187.40..	2,762 60
H. J. C. Ireton, \$2,800 — \$174.58.....	2,625 42

Lecturers (Sessional):

H. Grayson Smith, \$2,900 — \$183.12.....	2,716 88
C. Barnes, \$2,300 — \$131.87.....	2,168 13
J. O. Wilhelm, \$2,800 — \$174.58.....	2,625 42

Lecturers and Demonstrators (Sessional):

A. Pitt, \$2,000 — \$106.25.....	1,893 75
M. F. Crawford, \$2,300 — \$131.87.....	2,168 13
J. K. L. MacDonalld, \$1,000 — \$35.00.....	965 00
Miss F. M. Quinlan, \$1,000 — \$35.00.....	965 00

Special Lecturers:

A. B. McLay.....	200 00
John Patterson.....
Andrew Thomson.....
W. E. Jackson.....
W. E. Knowles Middleton.....

} without salary

Demonstrators (Sessional):

J. A. McPherson, \$1,500 — \$66.25.....	1,433 75
Miss K. M. Crosslev, \$1,400 — \$60.00.....	1,340 00
Miss M. Annetts, \$1,200 — \$47.50.....	1,152 50
L. H. Collingwood, \$1,000 — \$35.00.....	965 00
H. D. Smith, \$1,000 — \$35.00.....	965 00
A. F. Chisholm (without salary).....

Assistant Demonstrators (Sessional):

R. H. Craddock.....	500 00
C. R. A. Day.....	500 00
N. S. Grace.....	500 00
S. Levine.....	500 00
A. D. Misener.....	500 00
W. F. Oliver.....	500 00
G. A. Purdy.....	500 00
R. Richmond.....	500 00
F. Clark.....	400 00
E. Evans, without salary.....
W. J. Jackson, without salary.....

Miss A. T. Reed, Secretary and Class Assistant, \$2,000 — \$106.25..... 1,893 75

Miss B. M. Savage, Clerical Assistant @ \$1,500 less 1 month, \$1,375 — \$63.52	1,311 48	
T. S. Plaskett, Mechanician, \$2,500 — \$148.96	2,351 04	
Assistant Mechanicians:		
B. Clark, \$1,800 — \$92.50	1,707 50	
J. Anderson, \$1,800 — \$92.50	1,707 50	
J. Ward, \$1,800 — \$92.50	1,707 50	
G. T. Woodward, \$1,800 — \$92.50	1,707 50	
R. H. Chappell, Glass-blower, \$2,500 — \$148.96	2,351 04	
P. Blackman, Laboratory and Lecture Assistant (paid also \$20 for Extension Work) \$1,600 — \$78.75	1,521 25	
		\$63,076 00
<i>Astronomy</i>		
Professors:		
C. A. Chant, also Director of David Dunlap Observatory, \$5,500 — \$439.58	\$5,060 42	
R. K. Young (paid also \$156 for Extension Work) \$4,200 — \$302.08	3,897 92	
P. M. Millman, Demonstrator (Sessional — paid also \$500 for Extension Work) \$1,500 — \$66.25	1,433 75	
Class Assistants (Sessional):		
K. O. Wright	300 00	
M. R. MacPhail	50 00	
		\$10,742 09
Professors:		
<i>Geology</i>		
W. A. Parks, \$6,000 — \$493.75	\$5,506 25	
E. S. Moore, Economic Geology (paid also \$100 for Summer Field work) \$5,200 — \$407.08	4,792 92	
A. MacLean, \$4,200 — \$302.08	3,897 92	
Instructors (Sessional):		
D. R. Derry, \$1,400 — \$60.00	1,340 00	
J. C. Sproule, \$1,250 — \$50.63	1,199 37	
Class Assistants (Sessional):		
Dr. Madeleine A. Fritz (paid also in Royal Ontario Museum) \$600 — \$21.00	579 00	
A. W. Derby	250 00	
S. Duffell	250 00	
A. Holstein	250 00	
W. S. Savage	250 00	
E. W. Shaw	250 00	
M. F. Teskey	250 00	
H. G. Way	250 00	
J. P. Nowlan, 6 mos.	187 50	
John Monteith, Attendant, 9 mos.	675 00	
		\$19,927 96
<i>Mineralogy</i>		
Professors:		
T. L. Walker, also Director of Mineralogical Laboratories, \$6,000 — \$493.75	\$5,506 25	
A. L. Parsons, \$4,500 — \$333.33	4,166 67	
Ellis Thomson, \$3,800 — \$263.33	3,536 67	
Demonstrators (Sessional):		
W. L. Brown	500 00	
A. S. Dadson	350 00	
V. B. Meen	350 00	
Wm. Wightman, Attendant, 8 mos.	800 00	
		\$15,209 59
<i>Chemistry</i>		
Professors:		
W. Lash Miller, Physical Chemistry, \$6,500 — \$593.75	\$5,906 25	
F. B. Allan, Organic Chemistry, \$5,500 — \$439.58	5,060 42	
F. B. Kenrick, \$5,400 — \$428.75	4,971 25	
Associate Professors:		
J. B. Ferguson, \$4,400 — \$322.91	4,077 09	
J. T. Burt-Gerrans, Electro-Chemistry, \$4,200 — \$302.08	3,897 92	
L. J. Rogers, \$4,200 — \$302.08	3,897 92	
W. S. Funnell, \$3,800 — \$263.32	3,536 68	
W. H. Martin, \$3,800 — \$263.32	3,536 68	
Assistant Professors:		
A. R. Gordon, \$3,150 — \$205.11	2,944 89	

F. R. Lorriman (paid also \$420 for Extension Work) \$2,850 — \$178.85	2,671 15
Lecturers (Sessional):	
Dr. Helen Stantial, \$2,500 — \$148.96	2,351 04
F. E. Beamish, \$2,100 — \$114.79	1,985 21
Assistants (Sessional):	
Miss E. V. Eastcott, \$1,925 — \$88.15	1,836 85
F. Bremner, \$1,000 — \$35.00	965 00
Miss L. Farrell	900 00
H. A. Showalter	800 00
Miss L. Elder	787 50
A. H. Howden	700 00
A. C. Medcalf (resigned 30th April)	700 00
G. E. Moore (resigned 30th April)	700 00
A. C. Morris	700 00
J. R. Patton	700 00
F. E. W. Wetmore	700 00
E. E. Wood	700 00
J. V. Young	700 00
J. J. Chechak	600 00
H. L. Collins	600 00
F. H. Lawford	600 00
Miss M. A. McQuhae	600 00
H. E. Woodward	500 00
R. G. Romans, 6 mos.	450 00
D. L. Griffith (resigned 30th November)	150 00
Miss C. J. Sanderson, 1 month	75 00
Demonstrators, Electro-Chemistry (Sessional):	
A. H. Heatley, \$900 — \$31.50	868 50
W. O. Reevely	800 00
L. Hynes (resigned 31st January)	400 00
J. C. Morgan, 4 mos.	400 00
Laboratory Assistants:	
R. Fortescue (with rooms, heat and light valued @ \$420 as caretaker of building) \$1,150 — \$47.80	1,102 20
Wm. Banton, \$1,400; Lecture Assistant, \$200; \$1,600 — \$78.75	1,521 25
Laboratory Attendants @ \$11 to \$15 per week:	
H. Renwick, 52 weeks	624 00
John Norman, 41 weeks	451 00
H. Davis, 38 weeks, 4 days	426 00
W. Kouwenhoven, 3 weeks	45 00

 \$65,938 80

Biology

Professors:	
B. A. Bensley, Zoology, (Ob. 20 January — remainder of salary to 30th June paid to widow) \$6,000 — \$193.75	\$5,506 25
W. H. Piersol, Histology and Embryology, @ \$5,100, of which half charged to Anatomy, \$2,550 — \$198.12	2,351 88
E. M. Walker, Invertebrate Zoology, \$4,900 — \$375.00	4,525 00
A. G. Huntsman, Marine Biology (without salary)
Associate Professors:	
A. F. Coventry, Vertebrate Embryology, \$3,800 — \$263.33	3,536 67
J. R. Dymond, Systematic Zoology, \$3,800 — \$263.32	3,536 68
W. H. T. Baillie, Mammalian Anatomy, \$3,800 — \$263.33	3,536 67
J. W. MacArthur, Genetics (part time) \$2,200 — \$123.33	2,076 67
E. H. Craigie, Comparative Anatomy and Neurology, \$3,450 — \$231.98	3,218 02
Assistant Professors:	
W. J. K. Harkness, Limnobiology, \$3,350 — \$222.99	3,127 01
Dr. Norma H. C. Ford, \$2,850 — \$178.84	2,671 16
F. P. Ide, Lecturer (Sessional — paid also \$22.50 in Anatomy) \$1,600 — \$78.75	1,521 25
Demonstrators (Sessional):	
Miss J. A. Fraser	700 00
C. R. Gadaire	700 00
C. K. Gunn	700 00
C. E. Atwood	550 00
Miss A. Chorolsky	500 00
Miss H. McCaul	437 50
Miss H. Stevens	200 00

G. L. Chambers.....	200 00
Neurology:	
W. E. L. Sparks (paid also \$100 in Health Service).....	50 00
E. F. Brooks (paid also \$500 in Medicine).....	45 00
T. C. Heaton.....	45 00
C. M. Warren.....	45 00
Class Assistants, Embryology (Sessional):	
J. S. Chaikoff.....	50 00
A. E. Ashenurst.....	25 00
F. P. Ide (see also Biology) \$25 — \$2.50.....	22 50
E. M. Davidson, Prosector (Sessional).....	764 00
M. Lupovitch, Technician Demonstrator (Sessional).....	750 00
H. F. Whittaker, Technical Assistant (paid also \$120 in Dentistry)....	600 00
Miss G. Dowsley, Clerical Assistant, \$1,250 — \$54.70.....	1,195 30
Laboratory Assistants:	
H. McCormick (paid also \$100 in Surgery) \$1,650 — \$82.18.....	1,567 82
S. George, \$1,450 — \$68.42.....	1,381 58
B. L. Guyatt, Museum Curator and Demonstrator in Neurology, \$1,450 — \$68.45	1,381 55
C. Storton, Laboratory Attendant, 10 mos.....	400 00
	\$35,356 63
Less paid by School of Nursing.....	104 00
	\$35,252 63

Pathology and Bacteriology

Professors:	
Oskar Klotz, \$7,000 — \$693.75.....	\$6,306 25
W. L. Holman, Bacteriology; also Associate Director of Applied Bacteriology, \$4,800 — \$364.56.....	4,435 44
W. L. Robinson, Associate Professor, Pathology; also Associate Director of Applied Pathology, \$2,200 — \$123.33.....	2,076 67
C. Shanks, Assistant Professor, Pathology.....	250 00
H. K. Detweiler, Associate Director, Serology (Sessional — without salary, paid in Medicine).....
W. Wagner, Special Lecturer, Pathology (Sessional).....	750 00
Lecturers, Pathology (Sessional):	
T. H. Belt, \$1,700 — \$85.62.....	1,614 38
J. E. Bates.....	200 00
I. H. Erb (without salary).....
Lecturers, Bacteriology (Sessional):	
P. H. Greey, \$1,800 — \$92.50.....	1,707 50
Dr. R. Marguarite Price, \$2,150 — \$119.05.....	2,030 95
Fellows, each 11 mos.:	
Pathology:	
R. J. Galloway, \$1,000 — \$36.37.....	963 63
Miss M. V. Rae, \$1,000 — \$36.37.....	963 63
F. O. MacCallum, Bacteriology, \$1,000 — \$36.37.....	963 63
F. G. S. Christie, Museum, \$1,000 — \$36.37.....	963 63

Demonstrators (Sessional):

Pathology:

G. R. Philp.....	250 00
Smirle Lawson.....	200 00
G. H. Fetterman.....
Dr. Helen L. Vanderveer (paid \$1,148.75 in Special Research).....	} without salary.....
E. J. Clifford, Bacteriology.....	200 00

Assistants in Laboratory:

Miss N. W. Simpson, Pathology, \$1,500 — \$71.85.....	1,428 15
Miss H. M. Boyd, Bacteriology, \$1,020 — \$38.85.....	981 15
Miss M. G. Hein, Assistant Technician, \$1,140 — \$47.13.....	1,092 87

Special Technician:

Miss P. M. Dixon, 2 mos. to 1st Sept. @ \$1,020 (resigned) \$170 — \$8.66	161 34
Miss Elizabeth Fraser, 2 mos. from 1st October @ \$75; 7 mos. @ \$80	710 00

Laboratory Attendants for Preparing Media:

Miss E. A. Gordon, Senior Technician, 11 mos., \$1,200 — \$49.53....	1,150 47
--	----------

Assistants:

Miss C. Wallace, 2 mos. @ \$60; 10 mos. @ \$65, less 1½ weeks....	745 40
Lloyd Small.....	624 00
Miss G. K. R. Boyd, Secretary, \$1,260 — \$55.35.....	1,204 65
Miss H. M. Hammond, Librarian and Assistant Secretary, \$1,020 — 38.85	981 15
Miss V. L. McKinnon, Museum Stenographer, \$1,260 — \$55.35.....	1,204 65
J. F. Payne, Preparator, \$1,800 — \$92.50.....	1,707 50
Miss E. Chiddenton, Junior Attendant in Museum.....	600 00
Miss E. Cameron, Autopsy Recorder, \$960 — \$36.00.....	924 00
Miss G. F. Johnson, Autopsy Technician, \$900 — \$33.75.....	866 25

\$38,257 29

Division of Neuropathology:

E. A. Linell, Professor, \$4,500 — \$333.33.....	4,166 67
Dr. Mary I. Tom, Fellow (Sessional) \$1,800 — \$92.50.....	1,707 50

Technicians:

Miss H. P. Tett, \$1,020 — \$38.85.....	981 15
Miss V. O. Potter, Medicine & Surgery, \$1,020 — \$38.85.....	981 15

Secretary:

Miss I. Pirie, 6½ mos. to 15th Jan. @ \$1,020 per annum (resigned) \$552.50 — \$28.16.....	524 34
Miss C. Bell, 1½ mos. from 15th Jan. @ \$70; 4 mos. @ \$80....	425 00

\$8,785 81

\$47,043 10

Pathological Chemistry

V. J. Harding, Professor, \$5,500 — \$439.58.....	5,060 42
T. F. Nicholson, Assistant Professor, \$3,150 — \$205.11.....	2,944 87
R. W. I. Urquhart, Lecturer (Sessional — part time) \$1,000 — \$35.00....	965 00

Demonstrators (Sessional):

D. H. Boddington.....	500 00
D. L. Selby.....	500 00

A. R. Armstrong, Assistant (Sessional — paid also \$723.75 from Medical Research — Banting Fund) \$250 — \$9.35.....

240 65

Fellows (Sessional):

R. M. Archibald, \$1,100 — \$41.25.....	1,058 75
S. H. Jackson, \$1,100 — \$41.25.....	1,058 75

C. E. Downs, Technician, \$1,500 — \$71.85.....

1,428 15

Laboratory Assistants:

J. R. Ruffley, \$1,100 — \$44.35.....	1,055 65
Miss R. A. Welsh, 10 mos. from 1st Sept. @ \$1,100 per annum. \$916.67 — \$34.37	882 30

Laboratory Attendants:

Mrs. J. Faulds.....	750 00
Mrs. C. MacCallum.....	350 00

Miss C. A. Shannon, Secretarial Assistant, \$1,100 — \$44.35.....

1,055 65

\$17,850 21

Pharmacy and Pharmacology

V. E. Henderson, Professor, \$6,000 — \$493.75.....	\$5,506 25
G. H. W. Lucas, Associate Professor, \$3,600 — \$245.42.....	3,354 58
Fellows, Pharmacology (Sessional):	
M. H. Roepke, \$1,600 — \$78.75.....	1,521 25
A. deM. Welch, \$1,500 — \$71.85.....	1,428 15
A. Brock, Technical Assistant, \$2,000 — \$106.25.....	1,893 75
J. Brickles, Cleaner, \$1,160 — \$48.50.....	1,111 50
Miss D. Caldecott, Clerical Assistant.....	500 00
	<hr/>
	\$15,315 48

Bio-Chemistry

H. Wasteneys, Professor, \$6,000 — \$493.75.....	\$5,506 25
Associate Professors:	
G. F. Marrian, \$4,000 — \$281.25.....	3,718 75
A. M. Wynne, \$3,450 — \$231.97.....	3,218 03
Senior Fellows (Sessional):	
B. F. Crocker (paid also \$287.50 from Medical Research — Best Fund) \$1,100 — \$46.75.....	1,053 25
Miss F. I. Hargreaves (with living valued @ \$400) \$1,100 — \$41.25..	1,058 75
Fellows (Sessional):	
H. W. Lemon (paid also \$71.25 from Medical Research — Best Fund) @ \$900 (resigned 31st January) \$450 — \$22.50.....	427 50
V. Ignatieff (paid also \$71.25 from Medical Research — Best Fund) \$850 — \$29.00	821 00
S. Cohen, 4 mos.....	400 00
G. A. McVicar.....	800 00
L. B. Pett (paid also \$144.75 from Medical Research — Best Fund) \$800 — \$28.00	772 00
Miss M. Delamere, Secretarial Assistant, \$1,300 — \$58.13.....	1,241 87
Technicians:	
J. W. Fletcher, Senior, \$1,600 — \$78.75.....	1,521 25
L. Sloan, \$1,500 — \$71.85.....	1,428 15
J. H. McClary, \$900 — \$33.75.....	866 25
Miss D. I. Skill, \$900 — \$33.75.....	866 25
Laboratory Assistants:	
A. E. Giddens, @ \$1,300 (Ob. 15th March) \$975 — \$51.25.....	923 75
Mrs. L. Lumbard, 4 mos. to 31st Oct. @ \$830 per annum (resigned) \$276.67 — \$10.00	266 67
G. Lumbard, 5 mos. from 1st Nov. @ \$830 per annum; 3 mos. @ \$1,000; \$595.83 — \$15.27.....	580 56
W. Clough, 3 mos. from 1st April @ \$900 per annum, \$225 — \$4.50..	220 50
Laboratory Attendants:	
Mrs. M. McCarthy, 6 mos. to 31st Dec. @ \$550 per annum.....	275 00
Mrs. E. E. Davies, 12½ weeks from 4th Jan. @ \$21.15 per fortnight; 3 mos. @ \$750 per annum.....	319 70
	<hr/>
	\$26,285 48

Physiology

Professors:	
C. H. Best (paid also in Connaught Laboratories and \$2,500 from Medical Research — Best) \$6,000 — \$493.75.....	\$5,506 25
N. B. Taylor, \$4,500 — \$333.33.....	4,166 67
Lawrence Irving, Associate Professor, \$4,200 — \$302.08.....	3,897 92
E. T. Waters, Lecturer and Research Assistant (Sessional — with living quarters valued @ \$225 per annum to 31st Jan. — paid also \$200 for Extension Work) \$2,500 — \$148.96.....	2,351 04
C. B. Weld, Lecturer and Research Associate (part time — Sessional; paid also \$191.15 in Surgery) \$1,500 — \$76.75.....	1,423 25
Miss M. E. Huntsman, Demonstrator (Sessional) \$1,200 — \$51.25.....	1,148 75
Fellows (Sessional):	
Miss J. F. Manery, \$1,200 — \$51.25.....	1,148 75
K. C. Fisher.....	800 00
C. Aberhart (part time — see also Anatomy).....	400 00
Miss M. Cory, Departmental Librarian, \$1,250 — \$54.70.....	1,195 30
Miss D. Secord, Secretarial Assistant, \$1,250 — \$54.70.....	1,195 30
A. Elliott, Mechanician, \$1,800 — \$92.50.....	1,707 50
F. L. Robinson, Technical Assistant and Glass-blower (paid also \$481.25 from Medical Research — Best Fund) \$2,000 — \$130.20.....	1,869 80

W. Huntley, Laboratory Assistant for Teaching Laboratories, \$1,400 — \$65.00	1,335 00	
G. L. Robinson, Animal Caretaker, \$1,100 — \$44.35.....	1,055 65	
A. D. Crouch, Assistant Animal Caretaker.....	800 00	
		\$30,001 18

Hygiene and Preventive Medicine

Professors (paid also in Connaught Laboratories):

J. G. FitzGerald (part time; see also Administration and School of Hygiene)		
R. D. Defries, Hygiene and Epidemiology (part time — paid also \$1,893.75 in School of Hygiene) \$1,500 — \$130.20.....	1,369 80	
D. T. Fraser, \$4,500 — \$333.33.....	4,166 67	
Lecturers (Sessional — part time):		
G. D. Porter (see also Health Service — Men) \$500 — \$40.50.....	459 50	
M. H. Brown, \$1,000 — \$37.50.....	962 50	} paid also } in Connaught } Laboratories
P. A. T. Sneath, \$500 — \$18.75.....	481 25	
Dr. Frieda H. Fraser, \$500 — \$18.75.....	481 25	
Glass Assistants (Sessional):		
Miss G. E. Cowan, \$1,000 — \$37.50.....	962 50	
Miss H. C. Plummer (paid also in Connaught Laboratories) \$500 — \$17.50	482 50	
Miss E. A. Anderson, \$200 — \$7.50..	192 50	} Paid also in } Connaught Laboratories
C. E. Dolman, \$200 — \$7.50.....	192 50	
R. J. Gibbons, Fellow (Sessional) \$1,000 — \$35.00.....	965 00	
Miss E. Barr, Secretarial Assistant, \$1,000 — \$37.50.....	962 50	
Laboratory Assistant (a) \$720 per annum:		
Miss I. S. Roy, 10 mos. to 30th April (resigned).....	600 00	
Miss M. E. Collins, 2 mos. from 1st May.....	120 00	
		\$12,398 47

Medicine and Clinical Medicine

Duncan Graham, Professor, \$10,000 — \$770.34.....	\$9,229 16	
H. S. Hutchison, Assistant Professor (half time — Ob. 6 Jan., honorarium paid to widow)	500 00	
Associates:		
W. R. Campbell (paid also \$10 in School of Nursing) \$2,500 — \$148.96	\$2,351 04	
W. F. McPhedran (half time)	500 00	
Senior Demonstrators (Sessional):		
R. F. Farquharson, \$2,500 — \$148.96.....	2,351 04	
W. P. Warner, \$2,500 — \$148.96.....	2,351 04	
J. Hepburn (paid also \$5 in School of Nursing)	500 00	
Trevor Owen (paid also \$150 in School of Nursing)	500 00	
Junior Demonstrators (Sessional):		
R. A. Cleghorn, \$2,500 — \$148.96.....	2,351 04	
H. H. Hyland, \$2,500 — \$148.96.....	2,351 04	
E. J. Maltby, \$2,500 — \$148.96.....	2,351 04	
N. M. Wrong, \$1,000 — \$37.50.....	962 50	
E. F. Brooks (see also Anatomy).....	500 00	
W. J. Gradiner, Special Lecturer, Physiotherapy (Sessional — paid also \$200 for Extension Work)	250 00	
Fellows (Sessional):		
G. C. Ferguson, \$1,000 — \$37.50.....	962 50	
J. A. Dauphinee (without salary)		
Demonstrators, Clinical Microscopy (Sessional):		
G. W. Lougheed (paid also \$100 in Health Service).....	250 00	
H. M. Gray.....	250 00	
Research Assistants:		
H. W. Wakefield, \$1,400 — \$65.00	1,335 00	
Miss M. I. Hanna, \$1,380 — \$63.63.....	1,316 37	
Miss N. R. Hearn, Technician, Applied Physiology, \$1,320 — \$59.50.....	1,260 50	
Miss S. H. Clutton, Secretarial Assistant, \$1,320 — \$59.50.....	1,260 50	
Part-time Clinicians:		
Assistant Professors:		
F. A. Clarkson (paid also \$350 in Dentistry).....	300 00	
Goldwin Howland	300 00	

J. D. Loudon.....	300 00
J. A. Oille (paid also \$20 in Health Service).....	300 00
E. J. Trow (in charge of Dermatology).....	300 00
Associates:	
R. G. Armour (paid also \$5 in School of Nursing).....	250 00
H. K. Detweiler (paid also \$5 in School of Nursing).....	250 00
J. H. Elliott (paid also \$673.75 in Special Lectures and \$40 in School of Nursing) \$250 — \$9.35.....	240 65
A. A. Fletcher (paid also \$5 in School of Nursing).....	250 00
A. G. McPhedran (paid also \$200 in Health Service).....	250 00
H. C. Parsons.....	250 00
F. W. Rolph.....	250 00
Senior Demonstrators (Sessional):	
G. Bates (paid also \$20 in School of Nursing).....	200 00
G. F. Boyer.....	200 00
A. H. W. Caulfield (paid also in Connaught Laboratories and \$10 in Health Service) \$200 — \$7.50.....	192 50
E. E. Cleaver (paid also \$5 in School of Nursing).....	200 00
H. A. Dixon.....	200 00
B. Hannah (paid also in Connaught Laboratories and \$90 in School of Nursing).....	200 00
A. J. Mackenzie.....	200 00
J. H. McPhedran.....	200 00
W. E. Ogden.....	200 00
Junior Demonstrators (Sessional):	
E. A. Broughton.....	150 00
J. G. Falconer.....	150 00
A. R. Hagerman.....	150 00
L. M. Murray.....	150 00
D'Arcy J. Prendergast.....	150 00
Sub-Department of Paediatrics:	
F. F. Tisdall, Associate, \$2,000 — \$106.25.....	1,893 75
Dr. Gladys L. Boyd, Senior Demonstrator (paid also \$5 in School of Nursing) \$2,000 — \$106.25.....	1,893 75
Junior Demonstrators (Sessional):	
T. G. H. Drake (paid also \$5 in School of Nursing) \$4,000 — \$281.25.....	3,718 75
Dr. Pearl Summerfeldt, \$1,500 — \$71.85.....	1,428 15
L. N. Silverthorne (paid also in Connaught Laboratories) \$1,300 — \$58.10.....	1,241 90
Mrs. Marion Johnston, Research Assistant, Bacteriology, \$1,200 — \$51.25.....	1,148 75
Technicians:	
Miss R. M. Herbert, Chemistry, \$1,200 — \$51.25.....	1,148 75
Miss M. J. Kaake, Bacteriology, \$1,200 — \$51.25.....	1,148 75
Secretarial Assistant @ \$1,000 per annum:	
Miss M. F. Eriksen, 6 mos. to 31st Dec., \$500 — \$25.00.....	475 00
Miss M. Cassidy, 6 mos. from 1st Jan., \$500 — \$10.00.....	490 00
Part-time Clinicians:	
Allan Brown, Associate Professor (paid also \$60 in School of Nursing).....	350 00
A. W. Canfield, Associate.....	250 00
Senior Demonstrators (Sessional):	
A. P. Hart (paid also \$5 in School of Nursing).....	200 00
E. A. Morgan (paid also \$5 in School of Nursing).....	200 00
G. R. Pirie.....	200 00
G. E. Smith.....	200 00
Junior Demonstrator (Sessional):	
W. W. Barraclough.....	150 00
C. E. Snelling.....	150 00

 \$55,753 47

Surgery and Clinical Surgery

W. E. Gallie, Professor, \$10,000 — \$770.84.....	\$9,229 16
Fellows (full time):	
W. S. Keith (paid also \$5 in School of Nursing) \$1,800 — \$92.50....	1,707 50
A. W. Farmer (paid also \$5 in School of Nursing) \$1,500 — \$71.85....	1,428 15
S. D. Gordon, \$1,500 — \$71.85.....	1,428 15

Fellows (half time):	
J. H. Couch, \$900 — \$33.75.....	866 25
F. I. Lewis, \$900 — \$33.75.....	866 25
J. A. MacFarlane, \$900 — \$33.75.....	866 25
Fellows (part time):	
D. R. Mitchell.....	600 00
W. K. Welsh.....	600 00
Fellows (Resident — Sessional):	
G. M. Bastedo.....	400 00
E. H. Botterell (paid also \$300 from Medical Research — Best Fund)	400 00
H. R. Inksater.....	400 00
Assistant Fellows (Resident — Sessional):	
T. Beath.....	300 00
F. G. Kergin.....	300 00
R. K. Magee.....	300 00
H. F. Mowat.....	300 00
R. B. Robinson.....	300 00
T. R. Sarjeant.....	300 00
Miss T. W. MacLaren, Secretary, \$1,200 — \$51.25.....	1,148 75
Night Demonstrators for Fellows (Sessional):	
H. A. Cates (see also Anatomy) \$200 — \$14.50.....	185 50
C. B. Weld (see also Physiology) \$200 — \$8.85.....	191 15
H. McCormick, Night Attendant (see also Anatomy).....	100 00
Part-time Clinicians:	
Assistant Professors:	
H. E. Clutterbuck (resigned).....	300 00
R. R. Graham.....	300 00
W. W. Jones.....	300 00
Robin Pearce.....	300 00
D. E. Robertson.....	300 00

Superintendent's Dept., labour, \$20.20; material, \$4.65.....	24 85
	<hr/>
	\$5,652 78
Less credit for containers returned.....	1 75
	<hr/>
(Charged to Eaton Endowment).....	\$5,651 03

61. SURGERY

Supplies and apparatus (\$1,343.82):

Art Metropole, glassware, filter paper, etc.....	\$162 66
Burke Electric & X-Ray Co., X-Ray apparatus, etc.....	102 50
L. J. Cartwright, lantern slides.....	56 70
Constable & Co., reprints.....	67 30
Dictaphone Sales Corporation, repairs and parts.....	12 47
Eastman Kodak Stores, films.....	17 75
Grand & Toy, paper, covers and fasteners.....	19 50
J. F. Hartz Co., projector, film, glassware, etc.....	131 82
Hospital for Sick Children, supplies.....	194 62
International Books Ltd., subscription.....	20 00
Jas. T. Matthews, box.....	10 20
Medical Faculty (Art Service), models and drawings.....	12 67
Medical Research—Banting, animals and food.....	77 10
Photography Dept., prints and slides.....	38 41
Postage	40 12
St. Michael's Hospital, supplies.....	50 48
Stephens Sales Ltd., paper, ink, etc.....	67 45
Toronto General Hospital, bandages, laundry, etc.....	153 38
University Press, printing and stationery.....	39 85
Accounts under \$10 (5).....	24 65
Sundry disbursements by department:	
Telegrams, \$5.40; laundry, \$6.46; sundries, \$28.14.....	40 00
Superintendent's Dept., material.....	4 19
Museum of Applied Anatomy (\$215.72):	
G. E. Atkinson, photographic box and repairs.....	137 00
Eastman Kodak Stores, bulbs, lamp and holder.....	28 70
Arthur E. Hill, show cases.....	41 95
Accounts under \$10 (2).....	8 07
	<hr/>
	\$1,559 54

62. OBSTETRICS AND GYNAECOLOGY

Supplies and apparatus (\$327.36):

Thos. W. Allen, overhauling typewriter.....	\$12 00
Art Metropole, repairing microtome, etc.....	25 53

Dr. J. C. Goodwin, radium application.....	15 00	
Photography Dept.....	15 00	
Postage	15 00	
A. Walton, temperature-regulating apparatus.....	85 00	
W. R. Woodruff, copies of lecture.....	24 90	
University Press, printing and stationery.....	30 70	
Accounts under \$10 (3).....	20 63	
Superintendent's Dept., labour, \$76.62; material, \$6.98.....	83 60	
		\$327 36
63. OPHTHALMOLOGY		
Supplies and apparatus:		
Art Metropole, micro lamp.....	\$11 76	
Baird & Tatlock (London), bottles.....	64 15	
Robbins & Townsend, typewriter inspection.....	60	
Superintendent's Dept., freight.....	2 68	
		\$79 19
64. OTO-LARYNGOLOGY		
Supplies and apparatus:		
Central Scientific Co. of Canada, shutter for microphotograph, etc..	48 33	
Journal of Laryngology & Otology, reprints.....	12 18	
Photography Dept.....	33 30	
University Press, books.....	29 75	
Accounts under \$10 (4).....	15 85	
	\$139 41	
Less credit for material returned.....	4 12	
		\$135 29
65. THERAPEUTICS		
Supplies and apparatus:		
J. B. Lippincott Co., books.....	\$3.50	
University Press, books, printing and stationery.....	10 40	
		\$13 90
66. PSYCHIATRY		
Supplies and apparatus:		
Underwood Elliott Fisher Ltd., key tops.....		\$4 50
67. MEDICAL JURISPRUDENCE (Nothing spent)		
68. RADIOLOGY		
Supplies and apparatus:		
Toronto General Hospital, X-Ray supplies.....		\$400 00
69. MEDICAL BUILDING		
Heat and light.....	\$4,338 59	
Gas, water and occasional fuel (\$2,009.59):		
Gas, \$664.77; water, \$1,288.61.....	1,953 38	
W. H. Cox Coal Co.....	48 12	
Superintendent's Dept., labour.....	8 09	
Caretaker's supplies:		
Superintendent's Dept., material.....	177 66	
Cleaning (\$2,010.68):		
Allen Mfg. Co., laundry.....	13 70	
New York Window Cleaning Co.....	45 00	
Superintendent's Dept., labour.....	1,951 98	
Repairs and renewals (\$3,131.22):		
Roofers' Supply Co.....	27 16	
Routery Bros., plastering.....	92 85	
Accounts under \$10 (7).....	28 08	
Superintendent's Dept., labour, \$2,337.53; material, \$645.60.....	2,983 13	
Caretaker, F. Mottram, 12 mos. to 30th June (including attendance at Council meetings) \$1,400—\$65.00.....	1,335 00	
	\$13,002 74	
Less heat and light charged to Central Power Plant.....	4,338 59	
		\$8,664 15

70. BANTING INSTITUTE

Heat, Dept. of Public Works, Province of Ontario.....	\$6,000 00	
Gas, \$560.55; electric current, \$4,925.57; water, \$497.10.....	5,983 22	
Caretaker's supplies:		
Superintendent's Dept., material.....	532 50	
Cleaning (\$5,245.03):		
Allen Mfg. Co., laundry.....	54 12	
Rosedale Window Cleaning Co.....	60 00	
Superintendent's Dept., labour.....	5,130 91	
Repairs and renewals (\$2,124.64):		
Wm. Bartlett & Son, shades and covers.....	44 19	
City Treasurer, elevator license.....	15 00	
Accounts under \$10 (3).....	14 98	
Superintendent's Dept., labour, \$1,446.58; material, \$603.89.....	2,050 47	
Caretaker, G. S. Laing, 12 mos. to 30th June, \$1.750 — \$89.05.....	1,660 95	
		\$21,546 34
Less credits for cleaning, etc.....	3 35	
		\$21,542 99

71. ANATOMICAL BUILDING

Heat and light.....	\$2,261 19	
Gas, \$9.84; water, \$53.10.....	62 94	
Caretaker's supplies:		
Superintendent's Dept., material.....	229 59	
Cleaning (\$1,788.50):		
Allen Mfg. Co., laundry.....	21 60	
Melrose Window Cleaners.....	20 00	
Superintendent's Dept., labour.....	1,746 90	
Repairs and renewals (\$928.42):		
City Treasurer, elevator license.....	10 00	
Johnson Temperature Regulating Co., repairs and parts.....	13 30	
Vulcan Asphalt & Supply Co., repairs.....	28 50	
Accounts under \$10 (2).....	3 75	
Superintendent's Dept., labour, \$587.97; material, \$284.90.....	872 87	
Caretaker, M. J. Shepherd, 12 mos. to 30th June, \$1,400 — \$65.....	1,335 00	
		\$6,605 64
Less heat and light charged to Central Power Plant...	\$2,261 19	
Credits for cleaning.....	5 83	
		2,267 02
		\$4,338 62

72. HYGIENE BUILDING

Heat and light.....	\$12,974 41	
Gas, \$901.84; electrical energy for X-Ray service, \$11.65; water, \$2,088.64	3,002 13	
Caretaker's supplies:		
Superintendent's Dept., material.....	511 76	
Cleaning (\$6,665.04):		
Allen Mfg. Co., laundry.....	60 12	
New York Window Cleaning Co.....	45 00	
Superintendent's Dept., labour.....	6,559 92	
Repairs and renewals (\$1,796.09):		
City Treasurer, elevator license.....	20 00	
Truscon Steel Co., bronze pegs.....	85	
Superintendent's Dept., labour, \$1,412; material, \$363.24.....	1,775 24	
Caretaker, James Irwin, 12 mos. to 30th June, \$1,400 — \$65.....	1,335 00	
		\$26,284 43
Less heat and light charged to Central Power Plant...	\$12,974 41	
Credits for cleaning.....	3,201 02	
And for share of gas, water and electric current...	1,818 64	
		17,994 07
		\$8,290 36

73. GENERAL EXPENSES

Sundry expenses of the Dean (\$148.29):		
Dr. J. G. Fitzgerald, expenses of visit to Rockefeller Foundation, New York.....	\$50 08	
Dr. E. S. Ryerson, expenses as delegate to meetings of Association of American Medical Colleges at Rochester and Minneapolis.....	84 62	

The York Club, entertainment of Dr. Allan Gregg.....	13 59
Office supplies, stationery, printing, etc. (\$1,976.31):	
Masco Co., fan.....	37 47
Might Directories Ltd., City Directory.....	19 08
Office Specialty Mfg. Co., folders and guides.....	44 71
Photography Dept., students' photographs, lantern service, prints, etc.	76 19
Postage	356 50
Robbins & Townsend, typewriter repairs and inspection.....	43 30
Simmons & Son, funeral wreaths	75 50
Underwood Elliott Fisher Ltd., rentals and repairs.....	15 65
Miss D. Waugh, stenographic services, 8 weeks, 2 days @ \$25.....	208 35
University Press, books, printing and stationery.....	983 25
Accounts under \$10 (10).....	61 13
Sundry disbursements by Secretary:	
Laundry, telegrams, etc.....	35 00
Superintendent's Dept., labour, \$12.87; material, \$7.31.....	20 18
Publications, Calendar, Dean's report and Medical Bulletin (\$1,111.67):	
Postage	159 22
University Press, printing and stationery.....	952 45
Maintenance and equipment of Lecture Theatre:	
Superintendent's Dept., material.....	2 90
Artists' supplies (\$278.36):	
Occasional assistance:	
Miss E. Blackstock, 24 hours @ 50 cents.....	12 00
Miss J. Wylie, 89 hours @ 50 cents.....	44 50
Art Metropole, drawing paper, pens, etc.....	23 26
Consumers' Gas Co. of Toronto, burners.....	18 00
T. Eaton Co., smocks, humidifiers, etc.....	20 51
Ingram & Bell, slides.....	14 10
University Press, books, printing and stationery.....	15 43
Accounts under \$10 (5).....	20 73
Sundry disbursements by department:	
Stationery and art supplies, \$13.33; cleaning, laundry, etc., \$35.65	48 98
Superintendent's Dept., freight, 09 cents; labour, \$44.03; material, \$16.73	60 85
Medals (\$43.73):	
John Pinches, medals.....	37 37
Birks, Ellis, Ryrie Ltd., engraving.....	6 36
Association of American Medical Colleges:	
Membership fees.....	150 00
	\$3,711 26
Less credits for Art Service.....	30 92
	\$3,680 34

74. SCHOOL OF HYGIENE

(a) Salaries:

(1) Administration:

J. G. Fitzgerald, Director (see also Administration, Faculty of Medicine) \$5,000 — \$385.40.....	\$4,614 60
Miss O. E. Somerville, Secretary (paid also in Connaught Laboratories) \$1,000 — \$37.50.....	962 50

(2) Epidemiology and Biometrics:

R. D. Defries, Associate Director, School of Hygiene, and Professor of Hygiene and Epidemiology (see also Dept. of Hygiene) \$2,000 — \$106 25.....	1,893 75
N. E. McKinnon, Assistant Professor (paid also in Connaught Laboratories) \$1,000 — \$37.50.....	962 50

Lecturers (Sessional):

J. Craigie, Epidemiology (paid also in Connaught Laboratories) \$500 — 17.50.....	482 50
J. W. S. McCullough, Public Health Administration.....	250 00
A. E. Berry, public Health Engineering (paid also \$576.25 in Faculty of Applied Science) \$500 — \$17.50.....	482 50
Miss Mary A. Ross, Vital Statistics, \$2,400 — \$140.42.....	2,259 58
Clinical Associates, Epidemiology (part time — Sessional):	
J. T. Phair (paid also \$40 in School of Nursing).....	300 00
A. L. McKay.....	250 00

Laboratory Assistants, Vital Statistics:

Mrs. M. E. E. Morgan, \$924 — \$34.65.....	889 35
Miss S. R. McCausland.....	732 00
S. Raven, \$840 — \$30.33.....	809 67
J. Jamieson.....	660 00
R. Randall, Secretary, \$900 — \$33.75.....	866 25
(3) Physiological Hygiene:	
C. H. Best, Acting Head of Department (without salary — see also Dept. of Physiology).....
Lecturers (Sessional):	
E. W. McHenry, @ \$1,500, of which \$500 charged to Medical Research — Best Fund (paid also in Connaught Laboratories) \$1,000 — \$53.10.....	946 90
J. G. Cunningham, Industrial Hygiene, \$1,000 — \$35.00....	965 00
Research Associates:	
D. L. MacLean (paid also in Connaught Laboratories) \$2,600 — \$157.50	2,442 50
Mrs. Ruth C. Partridge, @ \$1,800, of which \$800 charged to Medical Research — Best Fund, \$1,000 — \$62.50.....	937 50
Research Assistants:	
Miss E. G. Gavin, \$1,500 — \$71.85.....	1,428 15
H. M. Barrett, Industrial Hygiene, \$1,750 — \$89.07.....	1,660 93
Miss E. L. Mahon, Secretary, \$1,100 — \$44.35.....	1,055 65
C. R. Cowan, Senior Technical Assistant, @ \$1,400, of which \$200 charged to Medical Research — Best Fund, \$1,200 — \$57.50	1,142 50
Technical Assistants:	
W. Staples, \$925 — \$34.68.....	890 32
J. D. Brown, \$900 — \$33.75.....	866 25
Miss N. Thompson, \$825 — \$21.45.....	803 55
Miss A. Jaffray, Laboratory Attendant, 9 mos., @ \$45.00.....	405 00
(4) Chemistry in Relation to Hygiene:	
P. J. Moloney, Associate Professor (paid also in Connaught Laboratories) \$4,000 — \$281.25.....	3,718 75
Miss E. M. Taylor, Demonstrator (Sessional — paid also in Connaught Laboratories) \$500 — \$17.50.....	432 50
Miss M. D. Smith, Class Assistant (part time — Sessional)....	200 00
Miss M. G. Arnoldi, Class Assistant and Secretary, \$1,000 — \$37.50	962 50
Technical Assistants:	
T. Marsh, 1½ mos. to 15th August @ \$850 per annum, \$106.25 — \$5.31	100 94
G. Kimm, 8 2/3 mos., @ \$45.....	387 60
	\$35,811 74

(b) Maintenance of Departments:

(1) Epidemiology and Biometrics (\$692.24):	
Brown Bros., binders.....	16 96
Postage	50 00
Stephens Sales Ltd., coupons, stencils, etc.....	87 95
Telephone service.....	386 40
University Press, printing and stationery.....	103 70
Accounts under \$10 (6).....	27 29
Sundry disbursements by department.....	19 94
(2) Physiological Hygiene (\$409.78):	
Canadian Laboratory Supplies, chemicals and tubing.....	36 12
Central Scientific Co. of Canada, glassware and chemicals.....	72 02
R. H. Chappell, glass-blowing.....	55 75
Connaught Laboratories, milk powder, etc.....	85 07
Ferranti Electric Co., meters.....	20 35
J. F. Hartz Co., spectroscope.....	12 00
Ingram & Bell, films.....	19 67
Pure Gold Mfg. Co., flour.....	25 00
Richards Glass Co., water bottles.....	19 44
Accounts under \$10 (7).....	29 64
Sundry disbursements by department.....	10 00
Superintendent's Dept., labour, \$1.19; material, \$23.53.....	24 72

(3) Chemistry in Relation to Hygiene (\$989.88) :	
Canadian Laboratory Supplies, motor, \$305.37; pipettes, etc. \$115.88	421 25
Central Scientific Co. of Canada, chemicals, etc.....	85 51
R. H. Chappell, glass-blowing.....	13 85
Connaught Laboratories, tubing, wire, etc.....	50 51
Mrs. Ada Hall, cleaning, 77 days.....	192 50
W. R. McKee, measuring instrument and galvanometer.....	92 40
Thermos Bottle Co., jars.....	11 51
Mrs. M. Truran, cleaning, 4½ days.....	11 25
Wilson Scientific Co., flasks and glassware.....	22 75
Accounts under \$10 (8).....	38 59
Sundry disbursements by department.....	20 00
Superintendent's Dept., freight, \$1.01; labour, \$22.22; material, \$6.53	29 75
	\$37,903 64
Paid by School of Nursing.....	400 00
	\$37,503 64
(Charged to Rockefeller Fund, Hygiene).....
Charged to Revenue, 1933-34.....	\$307,477 61
Charged to Eaton and Rockefeller Funds.....	126,700 85
	\$434,178 46

VII. FACULTY OF APPLIED SCIENCE

75. SALARIES

Dean's Office

C. H. Mitchell, Dean, \$6,000 — \$493.75.....	\$5,506 25	
		\$5,506 25

Electrical Engineering

Professors:		
T. R. Rosebrugh, \$6,000 — \$493.75.....	\$5,506 25	
H. W. Price, \$5,400 — \$428.75.....	4,971 25	
A. R. Zimmer, Associate Professor, \$3,800 — \$263.33.....	3,536 67	
V. G. Smith, Assistant Professor, \$2,850 — \$178.84.....	2,671 16	
Lecturers (Sessional) :		
B. deF. Bayly, \$2,400 — \$140.42.....	2,259 58	
R. J. Brown, \$1,700 — \$85.62.....	1,614 38	
Demonstrators (Sessional) :		
J. R. Turnbull, \$1,250 — \$54.10.....	1,195 90	
P. A. Rickard, \$1,050 — \$40.53.....	1,009 47	
M. Ward, \$1,050 — \$40.53.....	1,009 47	
J. W. Bell, \$950 — \$35.28.....	914 72	
M. H. Gillson, \$950 — \$35.28.....	914 72	
R. L. Mooney, \$950 — \$35.28.....	914 72	
J. C. R. Punchard, \$950 — \$35.28.....	914 72	
J. E. Reid, \$950 — \$35.28.....	914 72	
W. B. Whalley, \$950 — \$35.28.....	914 72	
Special Demonstrators (Sessional) :		
C. J. Bridgland.....	100 00	
M. C. Coutts.....	100 00	
R. E. Hammond.....	100 00	
J. W. Lawson, Mechanician, \$2,000 — \$106.25.....	1,893 75	
W. R. McKee, Electrician, \$2,000 — \$106.25.....	1,893 75	
W. L. Bakewell, Assistant Electrician, \$1,050 — \$40.95.....	1,009 05	
Mrs. G. E. Hammersley, Office Assistant and Librarian, @ \$1,150, of which half charged to Civil Engineering: Municipal & Structural, \$575 — \$23.90	551 10	
		\$34,910 10

Mechanical Engineering

Professors:	
R. W. Angus, \$6,000 — \$493.75.....	\$5,506 25
E. A. Allcut, \$4,500 — \$333.33.....	4,166 67
Ross Taylor, Associate Professor, \$3,600 — \$245.42.....	3,354 58
W. G. McIntosh, Assistant Professor, \$3,050 — \$196.14.....	2,853 86

Lecturers (Sessional):	
G. R. Lord (Easter Term) \$1,100 — \$28.75.....	1,071 25
T. C. Graham. \$1,800 — \$92.50.....	1,707 50
Instructors (Sessional):	
G. H. Hally, \$1,700 — \$84.64.....	1,615 36
R. C. Wiren (with living quarters valued @ \$225) \$1,700 — \$84.64	1,615 36
Demonstrators, Thermodynamics (Sessional):	
D. T. Hewson, \$1,160 — \$48.00.....	1,112 00
J. M. Corry, \$970 — \$36.04.....	933 96
F. G. Ewens, \$970 — \$36.04.....	933 96
G. W. Jacobi, \$970 — \$36.04.....	933 96
Demonstrators, Hydraulics (Sessional):	
T. J. Brant, \$1,060 — \$41.20.....	1,018 80
F. F. Dyer, \$970 — \$36.04.....	933 96
J. R. Renwick, \$970 — \$36.04.....	933 96
W. E. Micklethwaite.....	560 00
Demonstrators, Machine Design (Sessional):	
J. R. Crerar, \$970 — \$36.04.....	933 96
S. C. D. Lawson, \$970 — \$36.04.....	933 96
F. Hickey, Engineer and Machinist, \$2,000 — \$106.25.....	1,893 75
Assistant Machinist and Fireman (part time):	
T. Brown, 1,572 hours @ 70 cents.....	1,100 40
E. Burt, 1,380 hours @ 50 cents.....	690 00
W. Odd, Laboratory Attendant, \$1,200 — \$51.25.....	1,148 75
Miss M. Burt, Office Assistant and Librarian, \$1,100 — \$44.35.....	1,055 65
	\$37,007 90

Civil Engineering: Municipal and Structural

Professors:	
C. R. Young, \$5,200 — \$407.08.....	\$4,792 92
T. R. Loudon, Applied Mechanics, \$4,900 — \$375.00.....	4,525 00
Lecturers (Sessional):	
C. F. Morrison, Civil Engineering, \$2,250 — \$127.60.....	2,122 40
M. J. C. Lazier, Applied Mechanics, \$2,150 — \$119.03.....	2,030 97
W. L. Sagar, Civil Engineering, \$1,950 — \$102.79.....	1,847 21
Special Lecturers:	
L. W. Wynne-Roberts, Municipal Engineering (Easter Term).....	500 00
A. E. Berry, Sanitary Engineering (Sessional — paid also \$482.50 in School of Hygiene) \$600 — \$23.75.....	576 25
C. E. Helwig, Demonstrator (Sessional) \$1,200 — \$50.70.....	1,149 30
J. Brown, Laboratory Assistant, 10 mos., \$1,100 — \$41.25.....	1,058 75
W. Kubbinga, Mechanician (paid also \$18 in Dept. of Mineralogy and \$15.60 in Dept. of Electro-Chemistry) \$1,000 — \$37.50.....	962 50
Mrs. G. E. Hammersley, Office Assistant and Librarian (see also Elec- trical Engineering) \$575 — \$23.90.....	551 10
	\$20,116 40

Civil Engineering: Surveying and Geodesy

W. M. Treadgold, Professor (paid also \$562.50 for Summer Camp) \$4,500 — \$333.33.....	\$4,166 67
Associate Professors:	
S. R. Crerar (paid also \$500 for Summer Camp) \$4,000 — \$281.25..	3,718 75
E. W. Banting (paid also \$475 for Summer Camp) \$3,800 — \$263.33	3,536 67
J. W. Melson, Assistant Professor (paid also \$412.50 for Summer Camp) \$3,300 — \$218.54.....	3,081 46
T. L. Rowe, Instructor (Sessional — paid also \$100 for Summer Camp) \$1,400 — \$64.27.....	1,335 73
W. G. Heslop, Demonstrator, 3 mos.....	350 00
C. T. Harding, Mechanician, @ \$750 for 6 mos., of which \$450 charged to Engineering Physics and Photography.....	300 00
Miss R. Cave, Office Assistant and Librarian, @ \$1,225, of which \$600 charged to Engineering Physics and Photography, \$625 — \$27.00.....	598 00
	\$17,087 28

Mining Engineering

H. E. T. Haultain, Professor, \$6,000 — \$493.75.....	\$5,506 25
Associate Professors:	
F. C. Dyer, \$4,000 — \$281.25.....	3,718 75
J. T. King, \$4,000 — \$281.25.....	3,718 75
S. E. Wolfe, Instructor (Sessional — paid also \$50 for Summer Field Work) \$1,600 — \$77.85.....	1,522 15

G. H. Barnes, Demonstrator (Sessional) \$950 — \$35.28.....	914 72
E. Tozer, Laboratory Assistant and Mechanician, \$1,400 — \$65.00.....	1,335 00
C. Waybrant, Laboratory Attendant, Assaying, \$1,250 — \$54.70.....	1,195 30
H. J. Reilly, Assistant Mechanician, 7 mos.....	750 00
J. L. Tozer, Laboratory Helper, 29 weeks, 5 days, @ \$10 per week.....	298 34
Miss V. A. Jorden, Office Assistant and Librarian, \$1,100 — \$44.35.....	1,055 65

 \$20,014 91

Metallurgical Engineering

G. A. Guess, Professor, \$5,700 — \$461.25.....	\$5,238 75
Associate Professors:	
J. A. Newcombe, \$3,600 — \$245.42.....	3,354 58
R. J. Montgomery, Ceramics, \$3,450 — \$231.97.....	3,218 03
J. E. Toomer, Assistant Professor, \$3,450 — \$231.97.....	3,218 03
H. Ross, Laboratory Attendant, 10 mos.....	600 00
Miss H. Redmond, Office Assistant and Librarian, @ \$600 for 9 mos., of which \$300 charged to Secretary's Office.....	300 00

 \$15,929 39

Chemical Engineering and Applied Chemistry

Professors:	
J. Watson Bain, Chemical Engineering, \$5,500 — \$439.58.....	\$5,060 42
M. C. Boswell, Organic Chemistry, \$4,900 — \$375.00.....	4,525 00
E. G. R. Ardagh, Applied Chemistry, \$4,500 — \$333.33.....	4,166 67
Assistant Professors, Chemical Engineering:	
E. A. Smith, \$3,000 — \$191.67.....	2,808 33
R. R. McLaughlin, \$2,700 — \$166.04.....	2,533 96
A. M. Fitzgerald, Instructor (Sessional) \$1,600 — \$77.18.....	1,522 82
Demonstrators (Sessional):	
G. P. Beaf, \$1,150 — \$47.30.....	1,102 70
J. G. Breckenridge, \$1,150 — \$47.30.....	1,102 70
G. M. Chute, \$1,150 — \$47.30.....	1,102 70
W. H. de Montmorency, \$1,150 — \$47.30.....	1,102 70
W. C. Macdonald, \$1,150 — \$47.30.....	1,102 70
H. Boeschstein, Instructor, Technical German (Sessional — part time; see also German) \$700 — \$41.71.....	658 29
A. S. Hunt, Lecture Assistant and Glass-blower, \$1,600 — \$78.75.....	1,521 25
F. Westhead, Laboratory Assistant, \$1,100 — \$44.35.....	1,055 65
M. L. Hammond, Lecture Assistant, \$900 — \$33.75.....	866 25
Laboratory Attendants @ \$10 to \$14 per week:	
Thos. Storton, 52 weeks.....	728 00
Cecil Howes, 33 weeks.....	330 00
Ernest Livingstone, 35 weeks.....	350 00
Jack Seymour, 31 weeks.....	310 00
T. Linsey Crossley, Special Lecturer, Pulp and Paper, (Sessional).....	100 00
Miss D. Birkett, Office Assistant and Librarian, @ \$1,200, of which \$200 charged to Secretary's Office, \$1,000 — \$42.58.....	957 42

 \$33,007 56

School of Architecture

C. H. C. Wright, Professor, \$6,000 — \$493.75 (retired 30th June).....	\$5,506 25
Associate Professors:	
H. H. Madill, \$4,000 — \$281.25.....	3,718 75
E. R. Arthur, \$4,000 — \$281.25.....	3,718 75
W. E. Carswell, Lecturer (Sessional) \$2,100 — \$114.79.....	1,985 21
Instructors (Sessional — part time):	
C. W. Jefferys, Painting, \$1,750 — \$88.05.....	1,661 95
F. Coates, Modelling, \$950 — \$35.28.....	914 72
Miss J. C. Laing, Librarian and Instructor in Architectural History and French, \$1,850 — \$95.95.....	1,754 05
G. A. Arksey, Attendant in Drafting Room, 8 mos.....	800 00
D. Mackenzie Waters, Special Instructor, Architectural Design, 6 mos.....	800 00
Miss E. W. Dyer, Office Assistant, @ \$730 for 9 mos., of which \$330 charged to Engineering Drawing.....	400 00

 \$21,259 68

Engineering Drawing

J. R. Cockburn, Professor, Descriptive Geometry, \$4,900 — \$375.00.....	\$4,525 00
Associate Professors:	
W. J. Smither, Structural Engineering, \$4,000 — \$281.28.....	3,718 75
W. J. T. Wright (paid also \$278.87 as Lecturer, Technical English) \$3,600 — \$251.16.....	3,348 84

Lecturers (Sessional) :		
W. B. Dunbar, \$2,550 — \$153.24.....	2,396	76
P. V. Jermyn, \$2,100 — \$114.79.....	1,985	21
J. J. Spence, \$1,800 — \$92.50.....	1,707	50
Instructors (Sessional) :		
A. Wardell, \$1,675 — \$83.00.....	1,592	00
R. M. Clark, \$1,475 — \$69.37.....	1,405	63
G. R. Edwards, \$1,475 — \$69.37.....	1,405	63
Demonstrators (Sessional) :		
J. M. Carswell, \$1,375 — \$62.60.....	1,312	40
J. Hvilivitzky, \$1,175 — \$49.00.....	1,126	00
C. W. Woodside, \$1,175 — \$49.00.....	1,126	00
W. W. Fawcett, \$1,100 — \$43.93.....	1,056	07
M. B. Watson, \$1,100 — \$43.93.....	1,056	07
G. Brown, Attendant, 8 mos., \$1,000 — \$35.00.....	965	00
Miss E. W. Dyer, Office Assistant (see also School of Architecture).....	330	00
		<hr/>
		\$29,056 86

Engineering Physics and Photography

G. R. Anderson, Professor, \$5,200 — \$407.08 (retired 30th June).....	\$4,792	92
(a) Engineering Physics:		
K. B. Jackson, Assistant Professor, \$2,700 — \$166.04.....	2,533	96
Demonstrators (Sessional) :		
C. A. Booth, \$1,350 — \$60.90.....	1,289	10
V. L. Henderson, \$1,250 — \$54.10.....	1,195	90
(b) Photographic Service:		
Photographers:		
C. Crowther (paid also \$19.50 for overtime services) \$1,450 — \$68.45.....	1,381	55
Mrs. Muriel Milne (paid also \$7 for overtime services) \$1,200 — \$51.25.....	1,148	75
F. Stark, 9 mos. (paid also \$14 for overtime services) \$900 — \$30.00.....	870	00
W. Vance (paid also \$10 for overtime services) \$950 — \$35.63.....	914	37
Mrs. R. E. Morley, Bookkeeper, \$1,100 — \$44.35.....	1,055	65
F. Sayer, Messenger and Studio Assistant (paid also \$1 for lantern services) 50 weeks @ \$12.....	600	00
(c) Service common to (a) and (b) above (half to each) :		
Miss R. Cave, Office Assistant and Librarian (see also Civil Engineering: Surveying and Geodesy) \$600 — \$25.96.....	574	04
C. T. Harding, Mechanician (see also Civil Engineering: Surveying and Geodesy).....	450	00
		<hr/>
		\$16,806 24

Special Lectures

Special Lecturers (Sessional) :		
R. R. Grant, Accountancy and Business (paid also \$400 for Extension Work).....	\$300	00
F. H. Kirkpatrick, Public Speaking (paid also \$400 for Extension Work).....	250	00
R. E. Laidlaw, Engineering Law.....	250	00
W. J. T. Wright, Technical English (see also Engineering Drawing) \$300 — \$21.13.....	278	87
		<hr/>
		\$1,078 87

Secretary's Office

W. S. Wilson, Secretary, \$3,100 — \$200.63.....	\$2,899	37
Miss E. Birkett, Assistant Secretary, \$1,550 — \$75.30.....	1,474	70
Miss M. Fenton, Assistant, \$1,150 — \$47.80.....	1,102	20
Stenographers:		
Miss H. Redmond (see also Metallurgical Engineering — paid also \$45 as Clerical Assistant).....	300	00
Miss D. Birkett (see also Chemical Engineering) \$200 — \$8.67.....	191	33
		<hr/>
		\$5,967 60
		<hr/>
		\$257,749 04

76. ELECTRICAL ENGINEERING

Supplies (\$1,544.34) :		
Aikenhead Hardware Ltd.....	\$52	54
Aluminum Co. of Canada, sheet aluminum.....	21	73
Belder Mfg. Co., brass terminals.....	14	48

British Aluminum Co., sheet Aluminum.....	17 47
Canada Wire & Cable Co.....	30 65
Canadian Fairbanks-Morse Co., hoist.....	66 60
Canadian Industries Ltd., duco-thinner.....	14 17
Canadian National Carbon Co., batteries.....	56 16
Canadian Westinghouse Ltd., radiotrons.....	33 47
Coulter Copper & Brass Co., brass rods.....	40 38
Crane Ltd., pipe.....	16 05
Darnell Corporation of Canada, casters.....	17 85
Diamond State Fibre Co. of Canada, fibre.....	14 02
Dominion Welding Engineering Co., welding.....	25 00
T. Eaton Co., twine, tape, etc.....	22 30
Exide Batteries of Canada, cells and batteries.....	145 20
General Radio Co., plugs, dials, etc.....	34 66
D. Gestetner (Canada) Ltd., stencils, ink, etc.....	46 83
Isolantile Inc., insulators.....	20 64
National Co., dials.....	26 37
Northern Electric Co., vacuum tubes, wire, etc.....	155 49
Peckover's Ltd., steel.....	63 69
Postage	20 50
Pratt & Whitney Co. of Canada, taps and drills.....	52 71
Ryerson Press, mimeo paper.....	59 30
Service Station Equipment Ltd., air receiver tank.....	15 90
Spielman Agencies, varnish and enamel.....	11 96
University Library, lost books replaced.....	48 83
Weston Electrical Instrument Corporation, coils, screws, etc.....	48 78
University Press, books, printing and stationery.....	56 35
Accounts under \$10 (22).....	100 20
Sundry disbursements by department:	
Stationery, \$6.15; hardware, \$25.37; sundries, \$6.87.....	38 39
Superintendent's Dept., freight, \$6.02; labour, \$66.14; material, \$83.51	155 67
Furniture, printing and incidentals:	
University Press, printing.....	64 50
	\$1,608 84
Less credit from laboratory deposits.....	91 31
	\$1,517 53

77. MECHANICAL ENGINEERING

Supplies (\$756.40) :

Aikenhead Hardware Ltd.....	\$88 33
Canadian Laboratory Supplies, chemicals and glassware.....	20 69
Crosby Steam Gage & Valve Co., links, swivels, pins, etc.....	19 79
A. S. Hunt, glass-blowing.....	11 15
John Inglis Co., metal bars.....	11 66
McCull-Fontenac Oil Co., oil.....	58 95
A. C. McFarlane, patterns from blueprints.....	12 00
Monarch Belting Co., belts.....	21 25
Photography Dept., prints, etc.....	23 00
Postage	18 00
Scythes & Co., waste.....	19 22
Stephens Sales Ltd., paper.....	12 00
Taylor Instrument Co., thermometers.....	27 76
Thomson-Gordon Ltd., packing waste.....	61 33
University Library, lost books replaced.....	30 00
Accounts under \$10 (7).....	34 98
Sundry disbursements by department.....	19 96
Superintendent's Dept., freight, 93 cents; labour, \$46.10; material, \$219.30	266 33
Apparatus — Thermodynamics and Aerodynamics (\$106.31) :	
Dominion Bridge Co., metal.....	3 71
Superintendent's Dept., labour, \$52; material, \$50.60.....	102 60
Apparatus — Hydraulics (\$188.68) :	
Quality Brass Foundry, castings.....	18 63
University Press.....	1 55
Superintendent's Dept., labour, \$102.67; material, \$65.83.....	168 50
Proportion of fuel for Experimental Plant (\$1,106.51) :	
W. H. Cox Coal Co.....	1,105 76
Superintendent's Dept., labour.....	75

Furniture, printing and incidentals (\$102.65):

Photography Dept.....	15 80
University Press.....	79 35
Accounts under \$10 (2).....	7 50

 \$2,260 55

Less credit from laboratory deposits.....	198 85
---	--------

 \$2,061 70

78. CIVIL ENGINEERING: MUNICIPAL AND STRUCTURAL

Supplies (\$508.35):

Aikenhead Hardware Ltd.....	\$62 85
Baines & David, steel.....	52 97
Ottawa Silica Co., sand.....	14 27
Photography Dept.....	100 48
Postage.....	14 00
Taylor Foundry Co., iron bars.....	20 06
University Library, lost books replaced.....	38 48
University Press, books, printing and stationery.....	95 26
Accounts under \$10 (8).....	43 28
Superintendent's Dept., freight, \$10.47; labour, \$16.45; material, \$39.78.....	66 70

Apparatus (\$82.95):

M. J. Gavin, diamond drill parts.....	30 00
A. R. Williams Machinery Co., lathe chuck.....	35 25
Superintendent's Dept., labour, \$3; material, \$14.70.....	17 70

 \$591 30

Less credit from laboratory deposits.....	53 50
---	-------

 \$537 80

79. CIVIL ENGINEERING: SURVEYING AND GEODESY

Supplies (\$317.43):

Aikenhead Hardware Ltd.....	\$19 92
Art Metropole, reading glasses, tapes and refills.....	122 07
Instruments Ltd., repairs.....	62 84
Photography Dept., prints.....	13 22
Thos. Pocklington Co., plumbobs.....	25 00
Robbins & Townsend, typewriter inspection.....	4 80
University of Toronto Engineering Society, stationery.....	44 44
University Press, printing and stationery.....	14 35
Sundry disbursements by department.....	10 00
Superintendent's Dept., material.....	79

Summer Survey Camp—Equipment and Improvements:

J. E. Minto, labour and material.....	65 10
---------------------------------------	-------

Summer Survey Camp—Maintenance (\$4,616.04):

Instructional Staff (\$2,426.10):

W. M. Treadgold, services, \$562.50; living expenses, \$62.05; travelling expenses, \$18; telegrams, 75 cents.....	643 30
S. R. Crerar, services, \$500; living expenses, \$58.30; travelling expenses, \$18; supplies, \$3.....	579 30
E. W. Banting, services, \$475; living expenses, \$65; travelling expenses, \$18.....	558 00
J. W. Melson, services, \$412.50; living expenses, \$65; travelling expenses, \$18.....	495 50
T. L. Rowe, services, \$100; living expenses, \$50.....	150 00

Sundry expenses (\$1,462.34):

Britnell's Bakery, bread.....	33 99
T. Campbell, gravel.....	12 75
Coleman Lamp and Stove Co., mantles and generators.....	16 94
Currie Products Ltd., roofing.....	56 08
Arthur Dykeman, mimeographing notes.....	10 00
Harry Easton, meat.....	49 11
T. Eaton Co., oilcloth, dishes and cutlery.....	54 51
Hewitt Bros., freight and cartage.....	77 64
W. A. Lindop, gasoline.....	67 10
Loblaw Groceries Co., provisions.....	686 05
Mrs. J. E. Minto, milk.....	42 60
E. A. Rogers, provisions.....	84 58
C. Turnbull, milk.....	103 50
S. W. Welch, provisions and hardware.....	79 95

Accounts under \$10 (8).....	35 40	
Superintendent's Dept., freight, 75 cents; labour, \$50.76; material, 63 cents.....	52 14	
Payments to Help (\$727.60):		
J. E. Minto, caretaker, 12 mos., \$240; ice supply, cutting wood, and repairs, \$150.60.....	390 60	
Mrs. J. E. Minto, cook.....	325 00	
T. Campbell, labour.....	12 00	
	<hr/>	
	\$4,998 57	
Less credits: Board at Summer Camp, \$1,650; laboratory deposits, \$253	1,903 00	
	<hr/>	\$3,095 57

80. MINING ENGINEERING

Supplies (\$1,209.87):

Aikenhead Hardware Ltd.....	\$33 61	
Aluminum Co. of Canada, metal.....	10 30	
Brown Engineering Co., feeder.....	14 52	
Canadian Laboratory Supplies, chemicals, glassware, etc.....	67 46	
Central Scientific Co., glassware.....	54 39	
Denver Fire Clay Co., furnace parts, etc.....	127 45	
T. Eaton Co., utensils, etc.....	80 57	
Fletcher, Russell & Co., furnace parts.....	26 08	
Grand & Toy, stationery.....	29 00	
A. S. Hunt, glass-blowing.....	15 60	
Imperial Oil Co., oil.....	36 75	
Morgan Crucible Co., scorifiers.....	54 29	
Nichols Chemical Co., acids.....	25 74	
Ontario Rubber Co., tubing.....	17 75	
Photography Dept., rectigraphs, etc.....	14 10	
Postage	47 00	
Railway & Power Engineering Co., cement.....	11 66	
G. W. Sadler Belting Co., belting.....	15 90	
W. S. Tyler Co., paper and brass sieves.....	14 50	
University Press, books, printing and stationery.....	163 22	
Accounts under \$10 (16).....	65 17	
Sundry disbursements by department.....	27 96	
Superintendent's Dept., freight, \$55.09; labour, \$30.91; material, \$170.85	256 85	
Apparatus (\$40.35):		
J. F. Hartz Co., microscope repaired.....	5 50	
Toronto Welding Co., welding.....	25 00	
Superintendent's Dept., labour, \$1.97; material, \$7.88.....	9 85	
	<hr/>	
	\$1,250 22	
Less credit from laboratory deposits.....	61 59	
	<hr/>	\$1,188 63

81. METALLURGICAL ENGINEERING

Supplies (\$545.60):

Aikenhead Hardware Ltd.....	\$68 14	
Bureau of Standards, calibrating thermocouple.....	10 15	
Canadian Laboratory Supplies, crucibles, chemicals, etc.....	146 74	
Canadian Liquid Air Co., gas and rental of cylinders.....	15 60	
Eastman Kodak Stores, developer, slides, etc.....	86 81	
Johnson Matthey Co. (Canada), metal.....	20 37	
Nichols Chemical Co., acids.....	17 93	
Pratt & Whitney, drills, taps, etc.....	11 68	
E. H. Sargent & Co., burners.....	12 75	
Wilson Scientific Co., glassware.....	55 62	
Accounts under \$10 (16).....	66 21	
Sundry disbursements by department.....	5 99	
Superintendent's Dept., freight, \$5.31; labour, \$12.17; material, \$10.13	27 61	
Apparatus (\$106.14):		
Art Metropole, objectives.....	67 23	
Eastman Kodak Stores, prints.....	12 25	
Porcelain Enamel & Mfg. Co.....	2 82	

Thwing Instrument Co., thermocouple.....	10 45
Superintendent's Dept., labour, \$10.51; material, \$2.88.....	13 39
	\$651 74
Less credit for apparatus sold.....	2 50

 \$649 24

82. CHEMICAL ENGINEERING AND APPLIED CHEMISTRY

Supplies (\$6,432.30):

Armstrong Cork & Insulation Co., corks.....	\$58 18
Canadian General Electric Co., spot lights.....	12 15
Canadian Johns-Manville Co., asbestos fibre.....	23 00
Canadian Kodak Co., chemicals.....	59 60
Canadian Laboratory Supplies, chemicals, glassware, filter pumps, etc.....	1,070 24
Canadian Liquid Air Co., cylinder rentals and gas.....	166 08
Central Scientific Co. of Canada, chemicals and glassware.....	240 55
Cheney Chemical Ltd., chemicals.....	12 75
Dominion Oxygen Co., gas.....	60 67
A. Dykeman, test tube racks.....	22 50
T. Eaton Co., utensils.....	42 75
Electric Machinery Service, repairs.....	47 00
J. F. Hartz Co.....	10 00
O. W. Herzberg, chemicals.....	21 58
Kelvinator of Canada Ltd., bottles and chemicals.....	12 01
Lake Simcoe Ice & Fuel Ltd., ice.....	54 73
Liquid Carbonic Canadian Co., gas.....	21 20
McIntyre & Taylor, iron stands, etc.....	98 61
W. R. McKee, repairs.....	12 69
Merck & Co., chemicals.....	297 92
Jas. Morrison Brass Mfg. Co., pressure gauge.....	20 03
Nichols Chemical Co., chemicals and glassware.....	874 72
Photography Dept., slides and prints.....	14 80
Thos. Pocklington Co., repairing instruments.....	73 25
W. Robinson & Son, towels.....	47 31
Standard Chemical Co., chemicals.....	67 83
Textile Products Ltd., towels.....	90 20
Twisswire Brushes Ltd.....	19 08
Wilson Scientific Co., chemicals and glassware.....	1,228 57
University Press, books, printing and stationery.....	382 57
Accounts under \$10 (26).....	118 90
Sundry disbursements by department:	
Hardware, \$24.95; stationery and stamps, \$17.88; sundries, \$13.02.....	55 85
Superintendent's Dept., freight, \$43.38; labour, \$615.05; material, \$436.55.....	1,094 98

Apparatus (\$118.80):

Canadian Laboratory Supplies, rheo-stats.....	58 80
J. & J. Taylor Co., cutting and fitting iron tackles.....	60 00

 \$6,551 10

Less credits: Laboratory deposits, \$1,303.11; sale of material, etc.,
\$11.23; containers returned, \$190.78.....

 1,505 12

 \$5,045 98

83. SCHOOL OF ARCHITECTURE

Supplies (\$580.56):

Art metropole, paper, paints, etc.....	\$67 06
Artists' Supply Co., paper.....	54 00
Brown Bros., ledger sheets.....	11 65
Wm. Dawson Subscription Service.....	12 75
Photography Dept., prints, slides, etc.....	91 01
Postage.....	20 00
F. E. Simpson, repairing and whitewashing casts.....	10 00
Robt. Simpson Co., dishes.....	47 73
University of Toronto Engineering Society, drawing supplies.....	55 40
University Press, books, printing and stationery.....	75 20
Accounts under \$10 (11).....	59 57
Superintendent's Dept., freight, \$12; labour, \$16.64; material, \$47.55.....	76 19

Apparatus, including books (\$93.08):

Aikenhead Hardware Ltd., tools.....	67 83
McLean Publishing Co., subscription.....	2 00

Robt. Simpson Co., books.....	10 00	
University Press, books.....	13 25	
Models for Life Class:		
Prof. C. H. C. Wright, reimbursement for payments made.....	30 00	
Staff expenses — outdoor sketching classes:		
Prof. C. H. C. Wright, expenses (five members of staff).....	104 00	
		\$807 64

84. ENGINEERING DRAWING

Supplies \$247.76):		
Photography Dept., prints, slides, etc.....	\$42 82	
Roneo Co. of Canada, stencils.....	11 82	
University of Toronto Engineering Society, drawing supplies.....	13 28	
University Press, books, printing and stationery.....	40 85	
Accounts under \$10 (4).....	18 88	
Superintendent's Dept., freight, 14c; labour, \$110; material, \$9.97..	120 11	
Printing Instruction Sheets (\$65.81):		
Roneo Co. of Canada, stencils, ink, etc.....	31 96	
University Press, printing and stationery.....	33 85	
		\$313.57
Less credit from laboratory supplies.....	39 70	
		\$273 87

85. ENGINEERING PHYSICS AND PHOTOGRAPHY

(a) Engineering Physics:			
Supplies:			
Aikenhead Hardware Ltd.....	\$52 51		
Central Scientific Co., lenses.....	43 94		
Consolidated Plate Glass Co. of Canada.....	12 50		
W. R. McKee, repairs.....	30 20		
University of Toronto Engineering Society, drawing supplies...	16 00		
University Press, printing and stationery.....	20 65		
Accounts under \$10 (5).....	21 85		
Superintendent's Dept., freight, 9c; labour, 63c; material, \$32.11	32 83		
		\$230 48	
Less credit from laboratory deposits.....	7 15

VIII. FACULTY OF DENTISTRY

91. SALARIES

(a) *Regular Staff*

Professors:

W. Seccombe, Preventive Dentistry, also Dean of Faculty (paid also \$38.50 in School of Nursing) \$6,000 — \$496.46.....	\$5,503	54
A. D. A. Mason, Clinical Dentistry (paid also \$92.30 in Faculty of Medicine and \$70 for Extra Mural Lectures) \$5,000 — \$388.51...	4,611	49
F. M. Lott, Prosthetic Dentistry (paid also \$30 for Extra Mural Lectures) \$5,000 — \$385.41.....	4,614	59
A. E. Webster, Operative Dentistry, \$4,000 — \$281.25.....	3,718	75
T. Cowling, Dental Technology and Metallurgy (paid also \$75 for Extra Mural Lectures) \$2,000 — \$97.50.....	1,902	50
G. C. Cameron, Dental Pathology and Bacteriology (paid also \$230 for Extra Mural Lectures) \$3,000 — \$191.67.....	2,808	33
S. S. Crouch, Dental Anatomy.....	700	00
E. W. Paul, Dental Surgery and Anaesthesia (paid also \$200 for Extra Mural Lectures).....	680	00
F. J. Conboy, Dental Praxis.....	400	00
R. Gordon McLean, Dental Praxis (paid also \$50 as Associate in Dentistry)	200	00
I. H. Ante, Crown and Bridge Prosthesis (without salary — paid \$110 for Extra Mural Lectures).....		
Dentistry:		
W. G. Switzer, \$4,000 — \$281.25.....	3,718	75
H. A. Hoskin (with living quarters valued @ \$225) \$4,000 — \$281.25.....	3,718	75
Orthodontia:		
C. A. Corrigan, \$2,500 — \$148.96.....	2,351	04
C. A. Kennedy, also Librarian and Curator of Museum, \$1,100 — \$41.25	1,058	75

F. A. Clarkson, Medicine (paid also \$300 in Faculty of Medicine)	360 00
F. E. Risdon, Oral Surgery (paid also \$25 for Extra Mural Lectures)	180 00
E. S. Ryerson, Assistant Professor, Surgery (see also Faculty of Medicine) \$400 — \$32.25.....	367 75
Associates:	
Dentistry:	
S. M. Richardson, \$3,150 — \$205.11.....	2,944 89
L. F. Krueger (paid also \$105 for Extra Mural Lectures) \$1,500 — \$66.25	1,433 75
G. H. Coram, \$1,400 — \$60.00.....	1,340 00
H. A. Ross.....	500 00
G. D. Beierl.....	750 00
F. L. Cole (paid also \$160 for Extra Mural Lectures).....	670 00
J. H. Duff (paid also \$35 for Extra Mural Lectures) \$945 — \$33.10	911 90
W. T. Holmes, \$1,000 — \$35.00.....	965 00
W. L. Hugill (paid also \$25 for Extra Mural Lectures).....	670 00
G. V. Morton.....	670 00
J. M. Sheldon (paid also \$35 for Extra Mural Lectures).....	670 00
R. R. Walker.....	670 00
R. S. Woollatt.....	670 00
R. Gordon McLean (paid also \$200 as Professor).....	50 00
Miss W. C. Riddle, Histology, Bacteriology and Pathology (paid also \$15 for Extra Mural Lectures) \$2,160 — \$119.92.....	2,040 08
Prosthetic Dentistry:	
R. J. Godfrey, \$1,200 — \$47.50.....	1,152 50
R. G. Ellis, \$2,200 — \$113.00.....	2,087 00
M. A. Cox, Preventive Dentistry.....	640 00
J. H. Johnson, Dental Surgery and Anaesthesia (paid also \$65 for Extra Mural Lectures) \$2,800 — \$174.58.....	2,625 42
C. H. M. Williams, Periodontia (half time — paid also \$110 for Extra Mural Lectures) \$1,500 — \$66.25.....	1,433 75
Demonstrators, Assistants, etc. (Sessional):	
P. G. Anderson, Demonstrator, Dentistry.....	495 00
E. M. Rigsby, Instructor, Dental Technology.....	240 00
C. C. Rous, Lecturer, Applied Chemistry and Metallurgy (see also Office Staff) \$300 — \$19.50.....	280 50
J. Kreutzer, Fellow, Bacteriology and Pathology, \$1,000 — \$35.00... ..	965 00
Miss Doris F. J. Berry, Preventive Assistant, 10 mos., \$950 — \$33.25	916 75
T. M. Scott, Demonstrator, Prosthetic Dentistry.....	750 00
E. J. Pratt, Special Lecturer, English (see also Faculty of Medicine — paid also \$500 for Extension Work).....	360 00
G. L. Assie, Instructor, French (see also French, Faculty of Arts) \$180 — \$8.65	171 35
R. S. Hosking, Instructor, English Expression (paid also \$15 in Social Science and \$200 for Extension Work).....	100 00
T. R. Marshall, Clinician, Orthodontia (without salary).....
Laboratory Assistants:	
Technicians:	
W. V. Byrne, Dentistry, 10 mos., \$1,900 — \$91.25.....	1,808 75
Miss I. A. Bumby, Bacteriology and Pathology, \$1,020 — \$38.85	981 15
H. F. Whittaker, Dental Histology (see also Anatomy).....	120 00
Mrs. M. Gratton, Histology (part time) 34 weeks @ \$9.....	306 00
H. Aylward, \$1,144 — \$47.40.....	1,096 60

 \$68,379 63

(b) *Infirmiry Staff (including Nurses)*

Nurses:	
Miss L. A. Cameron, Supervisor, Dental Nurses in Training, also Graduate Nurse in Infirmiry, 10 mos., \$1,300 — \$53.75.....	\$1,246 25
Miss B. J. Gee, @ \$900 for 10 mos. (resigned 30th April) \$720 — \$27.90	692 10
Miss F. G. Whitehead, 8 mos.....	800 00
Miss A. H. Rose, 8 mos.....	756 00
Miss E. E. Jones, 10 mos.....	714 00
Miss A. J. Park, 10 mos.....	714 00
H. G. Lucas, Records Clerk, \$1,820 — \$93.80.....	1,726 20
Mrs. L. Barraclough, Laundress, 40 weeks @ \$16.45.....	658 00

 \$7,306 55

(c) Office Staff

C. C. Rous, Secretary (paid also \$280.50 as Lecturer) \$2,800 — \$181.13	2,618 87
Miss F. A. Cook, Secretary to the Dean, \$1,560 — \$76.00.....	1,484 00
Miss R. C. Hopkins, Assistant to the Secretary, \$1,200 — \$51.25.....	1,148 75

96. SALARIES

(a) Household Science:		
Miss A. L. Laird, Professor (with rooms, heat and light valued @ \$280) \$4,200 — \$302.08.....	\$3,897 92	
Assistant Professors:		
Miss A. C. Willard, \$3,450 — \$231.97.....	3,218 03	
Miss C. F. Valentine, \$2,700 — \$166.04.....	2,533 96	
Lecturers (Sessional):		
Miss E. W. Park, \$2,400 — \$140.42.....	2,259 58	
Miss K. E. Bennett, \$2,300 — \$131.87.....	2,168 13	
Miss G. R. F. Rose, \$1,950 — \$102.79.....	1,847 21	
Assistants (Sessional):		
Miss H. R. Coatsworth, \$900 — \$31.50.....	868 50	
Miss R. Carter, \$850 — \$29.75.....	820 25	
Miss M. A. Lind.....	800 00	
Miss D. B. Fleming, Research Assistant (Sessional) \$1,000 — \$35.00.....	965 00	
	\$19,378 58	
Charged to Massey Treble Bequest.....	2,858 75	
		\$16,519 83
(b) Food Chemistry:		
Dr. C. C. Benson, Professor, also Secretary to Faculty (with rooms, heat and light valued @ \$280) \$4,200 — \$302.08.....	\$3,897 92	
Miss J. R. Panton, Lecturer (Sessional) \$1,950 — \$102.79.....	1,847 21	
Instructors (Sessional):		
Miss E. I. Walker, \$1,300 — \$53.75.....	1,246 25	
Miss A. S. Aslin, \$1,200 — \$47.50.....	1,152 50	
Assistants (Sessional):		
Miss K. A. Treacy, \$900 — \$31.50.....	868 50	
Miss E. J. Reed.....	800 00	
Miss F. I. Honey, Assistant (part time — Sessional; paid also \$577.50 as Clerical Assistant) \$400 — \$14.00.....	386 00	
		10,198 38
		<u>\$26,718 21</u>

97. HOUSEHOLD SCIENCE DEPARTMENT

Laboratory supplies (\$1,473.27):	
Acme Farmers' Dairy, milk and butter.....	\$185 42
Borden Co., milk powder.....	12 74
Canadian Laboratory Supplies, chemicals, glassware, etc.....	370 65
Cassidy's Ltd., chinaware.....	34 86
H. G. Cook & Son, provisions.....	112 91
Herbert Druiffe, linen, towels, etc.....	36 60
T. Eaton Co., utensils, cotton, etc.....	49 19
La Motte Chemical Products Co., colour standards, chemicals, etc.	21 63
Lever Bros., soap.....	36 57
Nichols Chemical Co., chemicals.....	10 68
A. Provan, groceries.....	539 71
Geo. Sparrow & Co., metals.....	10 50
Wilson Scientific Co., glassware.....	26 50
Accounts under \$10 (7).....	17 47
Superintendent's Dept., freight, 45 cents; material, \$7.39.....	7 84
Laboratory attendance (\$1,498.00):	
Miss Conacher, 43 weeks.....	688 00
Mrs. Stroud, 42 weeks.....	630 00
Mrs. Robottom, 15 weeks.....	180 00

131. RECEPTIONS TO SOCIETIES AND UNIVERSITY VISITORS

Expenses re sundry public lectures:

By Albert J. Adams :	
Honorarium	\$75 00
Expenses	5 50
By Noel Baker:	
Expenses	2 50
By Prof. Manley Hudson:	
Honorarium	60 00
Expenses	2 60
By Prof. G. C. Sedgewick (Alexander Lectures):	
Expenses, Hart House Theatre.....	40 00
By Dr. J. A. Todd:	
Honorarium	35 00
Expenses	4 00
By Dr. de Magellanes Wilf:	
Honorarium	50 00
Meetings of Societies:	
Botanical Society.....	150 00
Canadian Chemical Association.....	164 00
Commonwealth Relations Conference.....	25 80
National Council of Education.....	119 50
Catering on sundry occasions:	
Hart House: Adult Education, \$82; Ontario Educational Association, \$125; President, luncheons and dinners, \$234; sundry guests, \$17.20.....	458 20
Robt. Simpson Co., President's reception at Royal Ontario Museum	42 00
U. C. Women's Union, Students' Administrative Council.....	31 00
Women's Bakery.....	45 00
Toronto General Hospital.....	140 00
Prof. J. C. McLennan, honorarium for special course.....	1,695 57

 \$3,145 67

132. CONVOCATION EXPENSES

Hoods, gowns, printing programmes, invitations, etc.:

E. Awde, engrossing.....	\$16 00
Harcourt & Sons, hoods and gowns.....	344 00
University Press, printing and stationery.....	239 70

 \$599 70

133. AID TO PUBLICATIONS AND SOCIETIES

Alumni Federation, University of Toronto Monthly.....	\$1,500 00	
Royal Astronomical Society.....	150 00	
Royal Society of Canada.....	400 00	
Universities Bureau of the British Empire.....	290 46	
British School of Archaeology, Jerusalem.....	102 66	
British School at Athens.....	100 00	
American School of Oriental Research, Jerusalem.....	100 00	
American School of Oriental Research, Bagdad.....	100 00	
Association of American Universities.....	50 00	
Conference of Canadian Universities.....	50 00	
Society for Promotion of Engineering Studies.....	15 58	
Students' Administrative Council (re student lodgings).....	100 00	
		\$2,958 70

134. SENATE ELECTIONS
(Nothing spent)

135. CONTINGENCIES

Cassels, Brock & Kelly, proportion of 1934 taxes, purchase of No. 75 St. George Street.....	\$416 92	
City of Toronto, taxes Nos. 719 and 721 Spadina Avenue, less rentals..	93 67	
Canadian Bank of Commerce, charges re registration of securities.....	374 50	
Chartered Trust & Executor Co., commission on collection of postponed fees of students.....	33 76	
London Guarantee & Accident Co., premium on fidelity bonds.....	914 60	
Workmen's Compensation Board, to cover allowances paid to employees	1,057 98	
Medical services for injured employees, etc.:		
Toronto General Hospital.....	57 25	
Dr. D. R. Mitchell.....	100 00	
Dr. R. H. Thomas.....	152 50	
Sundry doctors.....	90 50	
Dunlop's Ltd., flowers for funerals.....	100 50	
Remembrance Day Wreath Committee, wreath for Tower Memorial Service, Nov. 11th.....	12 00	
Sundry payments:		
Dean De Lury, expenses as Dean.....	12 26	
Rockefeller Foundation, discount on cheque for fees.....	21 80	
Engraving and freight charges, sundry medals.....	11 60	
Accounts under \$10 (4).....	14 58	
		\$3,464 42
		<u>\$84,532 95</u>

XX. 136. CAPITAL ACCOUNT CHARGES

Accountant, Supreme Court of Ontario, twenty-fifth annual payment on debenture issue of 1909.....	\$25,260 00	
Less portion charged to Ontario College of Education	10,000 00	
		\$15,260 00
Accountant, Supreme Court of Ontario, nineteenth annual payment on debenture issue of 1915 re Hart House.....	5,975 00	
Accountant, Supreme Court of Ontario, tenth annual payment on debenture issue of 1924 re Forestry Building.....	10,000 00	
Toronto General Hospital, twenty-third annual payment on debenture issue of 1911 re grant to Toronto General Hospital.....	15,157 00	
Toronto General Hospital, twenty-third annual payment on debenture issue of 1911 re old Pathological Building.....	6,568 00	
University of Toronto (Rockefeller Endowment—Medicine), fifth annual payment on debenture issue of 1929 re Banting Institute.....	64,193 00	
Royal College of Dental Surgeons, interest on liability of \$50,000.....	2,500 00	
		<u>\$119,653 00</u>

XXI. 137-138. SPECIAL RESEARCH

ASTRONOMY

Research Assistant, Miss E. M. Fuller, 10 mos.....	\$500 00	
		\$500 00

BIOLOGY

Research Assistants:		
L. F. McGee, 8 mos.....	\$450 00	
E. S. Pentland, 8 mos.....	450 00	

Mrs. E. Kuitunen, 7 mos.....	400 00
Miss M. A. Langstroth, 8 mos.....	400 00
L. Butler, 3 mos.....	270 00
A. W. A. Brown, 8 mos.....	250 00
C. H. D. Clarke, 8 mos.....	250 00
D. A. MacLulich, 8 mos.....	250 00
F. N. Jerome, 5 mos.....	200 00
W. H. Johnson, 6 mos.....	200 00
Special Technical Assistant, Miss M. Sewell, 9 mos.....	360 00
Expenses (\$416.42):	
Aikenhead Hardware, Ltd., hardware.....	83 74
American Instrument Co., heaters and regulators.....	83 66
Art Metropole, stain.....	11 76
Bausch & Lomb, micrometer discs.....	14 39
Canadian Laboratory Supplies, thermometers.....	10 58
Central Scientific Co. of Canada, thermometers, etc.....	21 99
Consumers' Gas Co., refrigerator and thermostat.....	93 91
Earle M. Grose, fertilizers.....	12 27
Lake Simcoe Ice & Fuel Ltd., ice.....	10 00
Maple Leaf Milling Co., feed.....	12 63
Accounts under \$10 (11).....	34 64
Superintendent's Dept., labour, \$7.07; material, \$19.78.....	26 85
	<hr/>
	3,896 42

Fisheries Research:

Research Assistants:

R. R. Langford, 8 mos.....	\$600 00
J. M. Corkill, 8 mos.....	450 00
F. E. J. Fry, 8 mos.....	450 00
J. P. Oughton, 8 mos.....	450 00
Technical Assistant, Miss E. Carlaw, 2 mos.....	130 00

Expenses (\$1,919.73):

W. J. K. Harkness, disbursements:

Provisions, \$497.90; payments to help, \$118.82; gas, lumber and supplies, \$180; travelling and hotel expenses, \$270.03; boat service, \$44.16; baggage transfer, freight and express, \$128.53; sundries, \$44.53.....	1,283 97
--	----------

Art Metropole, filters.....	49 49
Borden Co., milk powder.....	20 58
Central Scientific Co. of Canada, slide boxes, etc.....	37 67
T. Eaton Co., meter exposure, net and oil.....	33 48
Foerst Scientific & Mechanical Specialties Co., centrifuge and trap, \$118.88; repairs to motor, \$7.39.....	126 27
Lake Simcoe Ice & Fuel Ltd., ice.....	26 00
John Leckie Ltd., propeller, anchor, etc.....	137 12
Thos. Pocklington Co., machining valve, etc.....	12 00
University Press.....	26 90
Accounts under \$10 (13).....	56 33
Superintendent's Dept., freight, \$65.28; labour, \$34.71; material, \$9.93.....	109 92

\$7,896 15

BOTANY

Associate Professor, D. L. Bailey, share of salary for 8 months charged to Research (see also Faculty of Arts) \$566.67—\$28.33.....	\$538 34
Research Associate, John Dearnass (without salary).....
Research Assistants:	
A. J. V. Lehmann, 4 mos., \$250—\$2.50.....	247 50
J. E. Bier, 3 mos.....	170 00
D. H. Hamly, 3 mos.....	170 00
A. N. Langford, 3 mos.....	170 00
D. F. Putnam, 3 mos.....	150 00
W. K. W. Baldwin, 2 mos.....	100 00
M. W. Bannan, 2 mos.....	100 00
R. G. H. Cormack, 2 mos.....	100 00
Dr. Kathleen L. Hull, 2 mos., \$100—\$5.00.....	95 00
Miss M. K. Nobles, 2 mos.....	100 00
R. E. Fitzpatrick, 1 month.....	70 00
J. W. Groves, 1 month.....	70 00
D. C. McPherson, 1 month.....	70 00

J. H. L. Truscott, 3 mos.....	170 00	
Miss D. F. Forward, 2 mos.....	100 00	
A. A. Hildebrand, 2 mos.....	100 00	
R. M. Lewis, 2 mos.....	100 00	
S. M. Pady, 1 month.....	50 00	
Expenses (\$1,431.14):		
Aikenhead Hardware Ltd., zinc, spray, etc.....	12 42	
Canadian General Electric Co., lamps.....	10 36	
Canadian Liquid Air Co., rental of cylinders, and gas.....	23 51	
Canadian Society of Technical Agriculturists, reprints.....	25 50	
Central Scientific Co. of Canada, lime, etc.....	12 59	
Eastman Kodak Stores, films, plates, etc.....	86 04	
Julien P. Friez & Sons, charts and ink.....	14 94	
J. F. Hartz Co., cover slips.....	11 00	
Office Specialty Mfg. Co., files.....	127 35	
Photography Dept.....	34 16	
Alex. J. Simpson, Jr., 659 hours at 30c.....	197 10	
Screen & Sound Service, research microscope.....	441 00	
Telfer Paper Box Co., cases and boxes.....	122 40	
University of Chicago Press, reprints.....	10 41	
Will Corporation, scalpels, bone meal, etc.....	13 80	
University Press, reprints and stationery.....	17 75	
Accounts under \$10 (11).....	54 09	
Sundry disbursements by members of staff:		
Travelling and collecting expenses:		
Prof. R. B. Thomson, \$19.32; Prof. H. S. Jackson, \$44.42;		
Prof. D. L. Bailey, \$22; W. K. W. Baldwin, \$11.55; R.		
F. Cain, \$6.15; Dr. Kathleen L. Hull, \$12.53; S. M. Pady,		
\$11.75; A. J. Simpson, \$6.09.		
Photographic supplies, \$10.02; hardware, \$7.10; sundries, \$9.30	160 23	
Superintendent's Dept., freight, \$10.84; labour, \$37.42; material,		
\$8.42	56 68	
	<hr/>	
	1,431 33	
Less credit, Baird & Tatlock.....	19	
	<hr/>	
		\$4,101 98
APPLIED SCIENCE		
Electrical Engineering:		
Research Assistant, C. K. Duff, 12 mos., \$2,750—\$170.30.....	\$2,579 70	
	<hr/>	
		\$2,579 70
DENTISTRY		
Professor of Periodontology, H. K. Box, 12 mos. (paid also \$5 for Extra Mural Lecture), \$3,000—\$191.67.....	\$2,808 33	
Laboratory Technician, A. F. Fenton, 12 mos., \$1,000—\$37.50.....	962 50	
	<hr/>	
		\$3,770 83
BANTING AND BEST RESEARCH		
(a) Banting Research:		
Professor of Research in Medicine, Sir Frederick Banting, 12 mos:	\$5,000 00	
Assistant Professors, each 12 mos.:		
E. J. King, \$3,700—\$254.36; contribution towards retiring annuity, \$184.92.....	3,630 56	
D. A. Irwin (on leave of absence on salary from 12th April), \$3,500—\$236.45	3,263 55	
W. R. Franks, \$3,300—\$218.54.....	3,081 46	
Research Associates:		
G. H. Ettinger, 3 mos. to 30th Sept. at \$250; 9 mos. from 1st October at \$500, \$5,250—\$412.50.....	4,837 50	
Miss S. Gairns, 12 mos., \$2,160—\$119.92.....	2,040 08	
Dr. M. Juanita Thompson, 3 mos., \$600—\$50.00.....	550 00	
C. C. Lucas, 2 mos. (paid also \$325 from J. P. Rutherford Fund)	250 00	
Research Assistants:		
Miss J. M. Lang, 12 mos., \$1,400—\$65.00.....	1,335 00	
B. R. Brown, 12 mos., \$1,200—\$51.25.....	1,148 75	
Miss M. M. Shaw, 12 mos., \$1,200—\$51.25.....	1,148 75	
Miss M. E. Dolan, 11 mos., \$990—\$36.00.....	954 00	
Miss A. J. Watt, 10 mos.....	750 00	
W. R. Edmonds, 9 mos.....	540 00	
Miss L. C. Tresidder, 10 mos.....	500 00	
J. A. Romeyn, 1 month.....	50 00	

Research Fellows:

J. Fallon, 10 mos., \$1,800—\$85.00.....	1,715 00
G. E. Hall, 12 mos., \$1,500—\$71.85.....	1,428 15
H. J. Perkin, 12 mos., \$1,200—\$51.25.....	1,148 75
E. L. Outhouse, 2 mos. at \$75; 10 mos. at \$85. \$1,000—\$37.25	962 75
R. M. Mitchell, 10 mos., \$1,000—\$35.00.....	965 00
L. D. Proctor, 10 mos., \$1,000—\$35.00.....	965 00
A. R. Armstrong, 7 mos. (paid also \$246.65 in Pathological Chemistry), \$750—\$26.25.....	723 75
Miss E. L. Batho, 10 mos.....	750 00
Miss H. Tait, 10 mos.....	750 00
K. Watson, 10 mos.....	750 00
Miss M. F. MacLennan, 9 mos.....	720 00

Technicians:

L. C. Brock, 12 mos., \$1,260—\$55.35; bonus for overtime, \$50	1,254 65
H. Douglas, 12 mos., \$1,140—\$47.13.....	1,092 87
T. Walker, 12 mos., \$1,020—\$38.85.....	981 15
J. Conley, 12 mos., \$900—\$33.75.....	866 25
Miss N. Davy, 12 mos.....	600 00
Miss G. E. Mulholland, 20 weeks at \$10.....	200 00
Secretarial Assistant, Miss M. J. Millar, 12 mos., \$1,080—\$43.00... ..	1,037 00
Cleaner, Mrs. A. Moffitt, 6 mos. at \$35; 6 mos. at \$50; overtime, \$4.80	514 80

46,504 77

Experimental Medical Research:

Chief Technical Assistant, W. Cowan, 12 mos., \$1,600—\$78.75	1,521 25
Head of Animal Quarters:	
G. Bruce, 1st July to 17th Oct., at \$800 per annum.....	236 56
J. Minshull, 9 weeks at \$15; 6 mos. at \$45.....	405 00
Assistants, Animal Quarters:	
G. Parkes, 12 mos.....	540 00
Cyril Lee, 12 mos.....	540 00
A. Booth, 11 mos.....	550 00

50,297 58

Expenses (\$12,125.88):

Allen Mfg. Co., laundry.....	134 52
American Journal of Cancer, subscription.....	10 42
American Medical Association, reprints.....	14 13
Art Metropole, micrometer, etc.....	31 12
British Drug Houses, chemicals, etc.....	80 90
Allan Brock, holders and animals.....	12 00

M. J. Wilson, 4 mos. (paid also \$400 in Anatomy).....	400 00
O. M. Solandt, 3 mos.....	300 00
Dr. E. Rhoda Grant, 1 month.....	100 00
Mrs. M. S. Welch (without salary).....
Research Fellow, E. Fidler, 12 mos., \$1,320—\$59.50.....	1,260 50
Part-time Tutors (each paid also \$150 in Anatomy):	
C. S. Day.....	150 00
B. W. Stevens.....	150 00
Technical Assistants:	
F. L. Robinson (share of salary charged to Research—see also Department of Physiology), \$500—\$18.75.....	481 25
Miss G. I. Harpell at \$900, less 3 weeks, \$849.20—\$31.20..	818 00
L. S. Mann, 5 mos. at \$840 per annum (resigned), \$350—\$16.66	333 34
T. Beaton, 12 mos.....	780 00
G. Scattergood, 12 mos.....	780 00
Mrs. J. M. D. Williamson, 792 hours at 30c; 31 weeks at \$58 per month.....	653 00
Miss M. L. Palmer, 12 mos.....	600 00
Cedric D'E. Barker, 34 weeks at \$15.....	510 00
L. V. Hodgins, 7 mos.....	490 00
F. C. Staples, 1 month, \$87.10—\$4.55.....	82 55
W. Dobbie, 5 mos. at \$800 per annum, \$333.34; Assistant Animal Caretaker, 7 mos. at \$84, \$588—\$16.88.....	904 46
Secretarial Assistant, Miss D. Waugh, 4 mos.....	400 00
Physiological Hygiene:	
Lecturer, E. W. McHenry, 12 mos. (share of salary charged to Research—see also School of Hygiene), \$500—\$18.75; contribution towards retiring annuity, \$24.96..	506 21
Research Associate, Mrs. Ruth C. Partridge, 12 mos. (share of salary charged to Research—see also School of Hygiene), \$800—\$30.00.....	770 00
Research Assistant, Miss J. H. Ridout, 12 mos. (paid also in Connaught Laboratories), \$1,000—\$37.50.....	962 50
Technical Assistants:	
C. R. Cowan, 12 mos. (share of salary charged to Research—see also School of Hygiene), \$200—\$7.50.....	192 50
J. G. Truax, 12 mos.....	800 00
Miss M. Luxton, 12 mos.....	600 00
Miss L. C. Barber, 12 mos.....	540 00
Miss M. E. Hocking, 19 weeks, 3 days at \$22.50 per fortnight	218 60
Anatomy:	
Research Technician, H. E. LeMasurier, 12 mos., \$1,700—\$85.61	1,614 39
Bio-Chemistry:	
Research Assistants (See also Dept. of Bio-Chemistry):	
B. F. Crocker, 3 mos., \$300—\$12.50.....	287 50
L. B. Pett, 2 mos., \$150—\$5.25.....	144 75
L. Farber, 2 mos.....	150 00
V. Ignatieff, 1 month, \$75—\$3.75.....	71 25
H. W. Lemon, 1 month, \$75—\$3.75.....	71 25
Pathology:	
Research Fellow, Dr. Helen L. Vanderveer, 12 mos., \$1,200—\$51.25	1,143 75

 23,633 30

Expenses (\$12,141.67):

Aikenhead Hardware Ltd., hardware.....	85 26
Fred Bateman, animals.....	66 00
C. Becker, Inc., balances.....	100 27
British Drug Houses (Canada), chemicals, etc.....	336 81
J. F. Burns, turtles.....	62 38
H. J. Cable, dictaphone.....	275 00
Cambridge Instrument Co., string.....	16 68
Canada Packers Ltd., glands.....	52 00
Canadian General Electric Co., heaters, electrical supplies, etc.	112 95
Canadian Kodak Co., chemicals.....	46 98
Canadian Laboratory Supplies, flasks.....	35 28
Canadian Medical Association, reprints.....	21 20
Canadian Office & School Furniture Co., fume hood and table	258 00
Central Scientific Co., chemicals, glassware, etc.....	599 53
R. H. Chappell, tubes and burettes.....	40 00
G. C. Charlton, animals.....	435 75
Colliers in Canada, books.....	79 20
Connaught Laboratories, rats, chemicals, laboratory coats, etc.	180 92
Joseph Cooper, meats.....	376 50
E. Cullen, animals.....	115 00
Dept. of Medical Research—Banting, authorized transfer.....	2,500 00
J. A. Fontaine, frogs.....	160 00
Jas. D. Graham, monometers.....	169 76
C. D. Haedrick, rats.....	65 76
Harvard Apparatus Co., clamps, electrodes, etc.....	172 81
Hoffman, La Roche Ltd., chemicals.....	117 39
Imperial Optical Co., ophthalmoscope.....	45 00
Instruments Ltd., supplying fibre and inserting.....	25 00
J. Irwin, overtime services re meetings of Physiological Society	15 00
O. H. Johns Glass Co., flasks, condensers, etc.....	37 87
Kodascope Libraries Ltd., rentals.....	51 65
A. Leadbeater, animals.....	40 00
Lowe-Martin Co., cabinet.....	39 00
Lundy Fence Co., cages.....	85 50
McGregor-McIntyre Iron Works, boxes and covers.....	15 00
Mallinckrodt Chemical Works, chemicals.....	104 58
Marine Biological Laboratory, cataphoresis chamber and attachment, pipettes, etc.....	109 16
V. Mueller & Co., clamp.....	24 81
Nichols Chemical Co., chemicals.....	27 00
Office Specialty Mfg. Co., card cabinet and guides.....	24 52
Photography Dept., prints and slides.....	82 60
Scientific Glass Apparatus Co., automatic burette.....	50 52
Robt. Simpson Co., drapes.....	60 00
Taylor Instrument Co., pyrometer, etc.....	82 20
Arthur H. Thomas, burettes.....	30 21
Wholesale Radio Co., radio parts.....	52 93
University Press, printing and stationery.....	220 00
Accounts under \$10 (13).....	59 16

Sundry travelling and other expenses:

H. J. Channon.....	500 00
Laurence Irving.....	460 00
D. Y. Solandt.....	100 00
Henry Orb.....	69 00
Miss M. E. Huntsman.....	34 40
N. B. Taylor.....	52 85
C. H. Best.....	55 58
H. Davis.....	53 36
C. N. H. Long.....	52 65
J. Markowitz.....	46 12
E. N. Harvey.....	38 91
F. R. Miller.....	9 95

Sundry disbursements by department:

Postage, \$29.19; telegrams, \$24.46; supplies and sundries, \$109.05; amount paid to children used in the study of ventilation and illumination problems, \$37.30.....	200 00
---	--------

Superintendent's Dept., freight, \$11.82; labour, \$1,361.73; material, \$1,166.56.....	2,540 11	
Contribution to Employees' Pension Fund.....	165 00	
		35,774 97
Charged to Insulin Committee Grants.....	33,274 97	
		2,500 00
		<u>\$10,000 00</u>
		<u>\$28,848 66</u>

APPENDIX III.

UNIVERSITY PRESS

Transactions for year ending 30th June, 1934

Operating Account:		
Receipts, including \$8,498.55 outstanding and receivable on 30th June, 1934	\$143,564 36	
Rentals, Students' Book Department.....	1,200 00	\$144,764 36
Expenditures, ordinary.....	\$130,231 13	
Items written off.....	34 44	130,265 57
Value of supplies bought in advance and on hand 30th June, 1934.....	6,953 23	
And work in progress.....	2,426 66	
	9,379 89	
Less Liabilities.....	3,031 95	
		6,347 94
		<u>123,917 63</u>
		\$20,846 73
Purchases in advance (net).....		6,347 94
		<u>14,498 79</u>
Balance 30th June, 1933.....		5,000 00
		<u>19,498 79</u>
Carried to Surplus Account.....		14,498 79
		<u>\$5,000 00</u>
Surplus Account:		
Amount at credit 30th June, 1933.....	\$129,472 25	
Interest allowed on net balances.....	3,188 68	
		132,660 93
R. J. Hamilton, in full payment of his interest in the Students' Book Department upon taking over by the University.....	13,865 94	
		118,794 99
Transferred from Operating Account, as above.....	14,498 79	
		<u>133,293 78</u>
		<u>\$138,293 78</u>
Publications Account:		
Amount at debit 30th June, 1933.....	\$27,969 51	
Expenditures, 1933-34.....	17,297 63	
		45,267 14
Receipts from sales.....	6,215 79	
		<u>39,051 35</u>
		<u>\$90,242 43</u>
Net total of Ledger Balances, 30th June, 1934.....		

The above statement does not include certain receipts and expenditures dealt with directly by the Students' Book Department and not passing through the Bursar's hands.

DETAILS OF EXPENDITURE

Operating Account

R. J. Hamilton, Manager, 12 mos. to 30th June, \$5,000—\$385.41.....	\$4,614 59
A. Gordon Burns, Assistant Manager, 12 mos. to 30th June, \$3,000—\$191.67	2,308 33
Miss E. M. Walker, Secretary, 12 mos. to 30th June, \$1,800—\$92.50...	1,707 50
Pay lists, wages of employees.....	67,843 81
	\$76,974 23
Supplies and general maintenance (\$53,291.34):	
Alexander & Cable, lithographing diplomas.....	\$120 35
H. E. Allen Bros., gilding.....	150 85

ONTARIO COLLEGE OF EDUCATION

Balance on hand 30th June, 1933.....	\$18,450 53
Receipts, 1933-34:	
Legislative Grant.....	208,000 00
Fees of Students.....	60,809 71
Aura Lee Grounds.....	600 00
	\$287,860 24
Expenditure for salaries and maintenance for the year ending 30th June, 1934.....	247,711 39
Balance on hand 30th June, 1934.....	\$40,148 85

SALARIES

W. Pakenham, Dean, \$6,000—\$493.75 (retired 30th June).....	\$5,506 25
Professors:	
P. Sandiford, Educational Psychology, and Director of Educational Research (paid also \$40 from University Press Publications), \$5,400—\$428.75.....	4,971 25
F. E. Coombs, Methods in Elementary Subjects (paid also \$350 for Extension Work), \$4,700—\$354.16.....	4,345 84
G. A. Cornish, Methods in Science, \$4,700—\$354.16.....	4,345 84
W. C. Ferguson, Methods in Modern Languages (paid also \$102 for Extension Work), \$4,700—\$354.16.....	4,345 84
G. M. Jones, Methods in English and History, \$4,700—\$354.16.....	4,345 84
W. E. Macpherson, History of Education, and Librarian (paid also \$350 for Extension Work), \$4,700—\$354.16.....	4,345 84
J. O. Carlisle, Methods in Classics, \$4,700—\$354.16.....	4,345 84

Associate Professors:

Miss W. G. Barnstead, also Director of Library School, \$3,900—\$272.29	3,627 71
Miss L. L. Ockley, Household Science, \$4,100—\$291.66	3,808 34
W. J. Loughheed, Methods in Mathematics (paid also \$218 for Extension Work), \$4,300—\$312.50	3,987 50
W. G. Bennett, Methods in Commercial Subjects, \$4,100—\$291.66 ..	3,808 34

Assistant Professors:

Miss Bertha Bassam, Library Science in Library School, \$2,700—\$166 04	2,533 96
B. C. Diltz, Methods in English and History, \$3,850—\$267.80	3,582 20
J. A. Long, Educational Psychology (paid also \$350 for Extension work), \$3,500—\$236.45	3,263 55

Lecturers, also Instructors in University Schools:

Miss A. Marsh, Art, \$3,025—\$193.93	2,831 07
A. N. Scarrow, Manual Training, \$4,000—\$281.25	3,718 75
G. N. Bramfitt, Music, \$4,000—\$281.25	3,718 75
F. Halbus, Physical Training (paid also \$91.05 in Athletics and Physical Training—Men), \$3,525—\$238.67	3,286 33
Miss H. L. Bryans, Instructor, Physical Training, \$3,300—\$218.54	3,081 46

Lecturers:

Miss A. E. Robertson, Household Science, \$3,200—\$209.58	2,990 42
Miss D. Thompson, Library Science, at \$2,400, of which half paid as Supervising Assistant in Library, \$1,200—\$70.23	1,129 77

Instructors in University Schools:

J. G. Althouse, Headmaster (paid also \$179.17 for Graduate Courses and \$350 for Extension Work), \$4,700—\$354.16	4,345 84
R. F. Baird, Teacher-Librarian, \$3,300—\$218.55	3,081 45
G. A. Cline, \$4,000—\$281.25	3,718 75
A. G. Croal (paid also \$40 for Extension Work), \$3,500—\$236.45 ..	3,263 55
E. L. Daniher, \$4,000—\$281.25	3,718 75
J. L. Gill, \$3,700—\$254.38	3,445 62
H. A. Grainger (paid also \$110 for Extension Work), \$4,000—\$281.25 ..	3,718 75
J. A. Irwin, \$4,000—\$281.25	3,718 75
J. H. Mills (paid also \$66 for Extension Work), \$4,000—\$281.25 ..	3,718 75
N. L. Murch, \$4,000—\$281.25	3,718 75
P. A. Petrie, \$3,850—\$267.80	3,582 20
C. E. Phillips, \$3,650—\$249.90	3,400 10
W. L. C. Richardson, \$4,000—\$281.25	3,718 75
W. H. Williams (paid also \$114 for Extension Work), \$4,000—\$281.25	3,718 75
J. G. Workman, \$4,000—\$281.25	3,718 75
Norman McLeod, 10 mos. from 1st Sept. at \$3,800 per annum, \$3,166.67—\$200.83	2,965 84
W. R. Stewart, 10 mos. from 1st Sept. at \$2,750 per annum, \$2,291.67—\$129.67	2,162 00
G. W. Cochrane, Instructor in Swimming and Supervisor of U. T. S. Athletic Field and Sports, \$2,400—\$140.42	2,259 58

Special Instructors in Library Science:

G. H. Locke, Administration	700 00
W. S. Wallace (paid also as University Librarian), College and University Libraries, \$350—\$13.13	336 87
